Re: Opposing Alternative 4 New Transmission Lines

I have lived on 107<sup>th</sup> Street for the last 14 years. In those 14 years there have been two wild fires. The first one went right thru my ranch. It was my worst nightmare. I was at work and when I got home, I found the fire still going and I was not allowed to go home. Nobody had time to evacuate. All my animals, (my horses (mares with new born foals), my dogs, cats, chickens, and goats)) and my house were saved by helicopter drops. The second one we had to evacuate. That was a problem because of the dirt road becoming grid locked. I only could get half of my animals out. I was saved because the fire that had come from Santa Clarita missed my ranch. With Alternative 5 and Alternative 4, Leona Valley is sandwiched in with these Transmission Lines. I do not see how I will ever have helicopter support, especially on 107<sup>th</sup>, which is a narrow canyon road with only a narrow two-lane dirt road.

C.230-1

I strongly oppose both the Alternative 5 and 4 Transmission route!!!!!!!!!!!!!!

## **Response to Comment Set C.230: Karen Crawford**

C.230-1 Thank you for submitting your opinion and concerns regarding Alternative 5. These will be shared with the decision-makers at the USDA Forest Service and the CPUC.

Alternative 4 in this context of this comment is referring to an alternative for the Antelope Transmission Project, Segments 2 and 3, which is a separate project.
