**Subject: California Public Utilities Commission, Proposed Antelope-Pardee 500 KV
Transmission Project**
Reference: Alternate Plan 5

Dear Sir,

I am writing this letter in opposition of the proposed subject project.

C.67-1

Of all places to put these electrical towers why pick our serene country town? Stop picking on the little guy! We have limited lot sizes for building (normally 2.5 acres). We stave off the track homes and clustering. We do not require the infrastructure for progressive overbuilding in the Antelope Valley. We are hard working enterprising people who raise livestock and orchards and take great pride of our hometown.

We do not want our property values to diminish, fall victim to eminent domain, or inherit any of the EMF cancer causing effects these towers will create.

There are existing easement areas in the Angeles National Forest and other alternatives available.

C.67-2

I implore you to find another environment to mutilate and leave us alone.

Quinn Smith
