

Southern California Edison
Banducci PTC A.12-11-011

DATA REQUEST SET A1211011 Banducci CPUC-SCE-001

To: CPUC
Prepared by: Warnetta Logan
Title: Project Manager
Dated: 01/16/2013

Question 01.a:

1. The following elements of the project description continue to require supplementation, as noted previously (letter of August 2, 2012).

- a. An Excel spreadsheet with all parcels within 300 feet of the proposed project components, including APN number, mailing address, and parcel's physical address, should be provided.

Response to Question 01.a:

Attached is the 300 foot Ownership List for the proposed Banducci Substation

Southern California Edison
Banducci PTC A.12-11-011

DATA REQUEST SET A1211011 Banducci CPUC-SCE-001

To: CPUC
Prepared by: Rachael Poston
Title: SCE Biologist
Dated: 01/16/2013

Question 02.a:

2. The following items were previously requested (letter of August 2, 2012) and continue to require supplementation to appropriately characterize the environmental setting for various resource areas.

- a. GIS data for vegetation and soils mapping, and for any special-status species identified during surveys.

Response to Question 02.a:

Natural resources GIS information was provided that contains special status species detected, soils mapping, and vegetation as attached.

Southern California Edison
Banducci PTC A.12-11-011

DATA REQUEST SET A1211011 Banducci CPUC-SCE-001

To: CPUC

Prepared by: Rachael Poston

Title: SCE Biologist

Dated: 01/16/2013

Question 02.b:

2. The following items were previously requested (letter of August 2, 2012) and continue to require supplementation to appropriately characterize the environmental setting for various resource areas.

- b. A delineation of state and federal jurisdictional waters pursuant to Section 404 of the federal Clean Water Act and Sections 1600 et seq. of the California Fish and Game Code covering all proposed disturbance areas.

Response to Question 02.b:

As indicated on page 4.4-46 of the PEA, “Prior to any impacts to jurisdictional areas, permits/agreements from the USACE, the CDFG, and the RWQCB shall be obtained for direct and indirect impacts to areas within these agencies’ jurisdictions.” Additionally, as outlined on page 59 of the Biological Resources Technical Report:

“If the Proposed Project design changes and impacts to jurisdictional areas are determined to be necessary, a jurisdictional delineation shall be conducted to describe the type and extent of waters of the United States, including wetlands, and/or waters of the State within the proposed impact area. The presence or absence of wetlands shall be verified through an analysis of any hydrological conditions, hydrophytic vegetation, and hydric soils pursuant to the Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Arid West Region 1280 (USACE, 2008).”

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STATE AND LOCAL RECORDS

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES].

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
BEAR VALLEY SPRINGS CHEVR	26900 BANDUCCI	4	4

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 06/20/2011 has revealed that there is 1 UST site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
EXCETER CORP	20248 PELLISIER	1	3

AST: The Aboveground Storage Tank database contains registered ASTs. The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the AST list, as provided by EDR, and dated 08/01/2009 has revealed that there is 1 AST site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
GRIMMWAY - TURNER RANCH	26760 DALE	3	4

EXECUTIVE SUMMARY

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2009 has revealed that there are 2 HAZNET sites within the searched area.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2011	Source: EPA

Number of Days to Update: 62	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 05/16/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 08/29/2011
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810
Date Made Active in Reports: 05/02/2011	Last EDR Contact: 06/14/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/12/2011
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/11/2011

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2011

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2011	Telephone: 703-603-0695
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 06/13/2011
Number of Days to Update: 81	Next Scheduled EDR Contact: 09/26/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/16/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2011	Telephone: 703-603-0695

Number of Days to Update: 80	Next Scheduled EDR Contact: 08/22/2011
	Data Release Frequency: Varies

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Data Release Frequency: Quarterly

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 03/29/2011

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007
Date Data Arrived at EDR: 08/26/2009
Date Made Active in Reports: 09/11/2009
Number of Days to Update: 16

Source: Department of Environmental Protection
Telephone: 860-424-3375
Last EDR Contact: 05/26/2011
Next Scheduled EDR Contact: 09/05/2011
Data Release Frequency: Annually

NJ MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2009

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

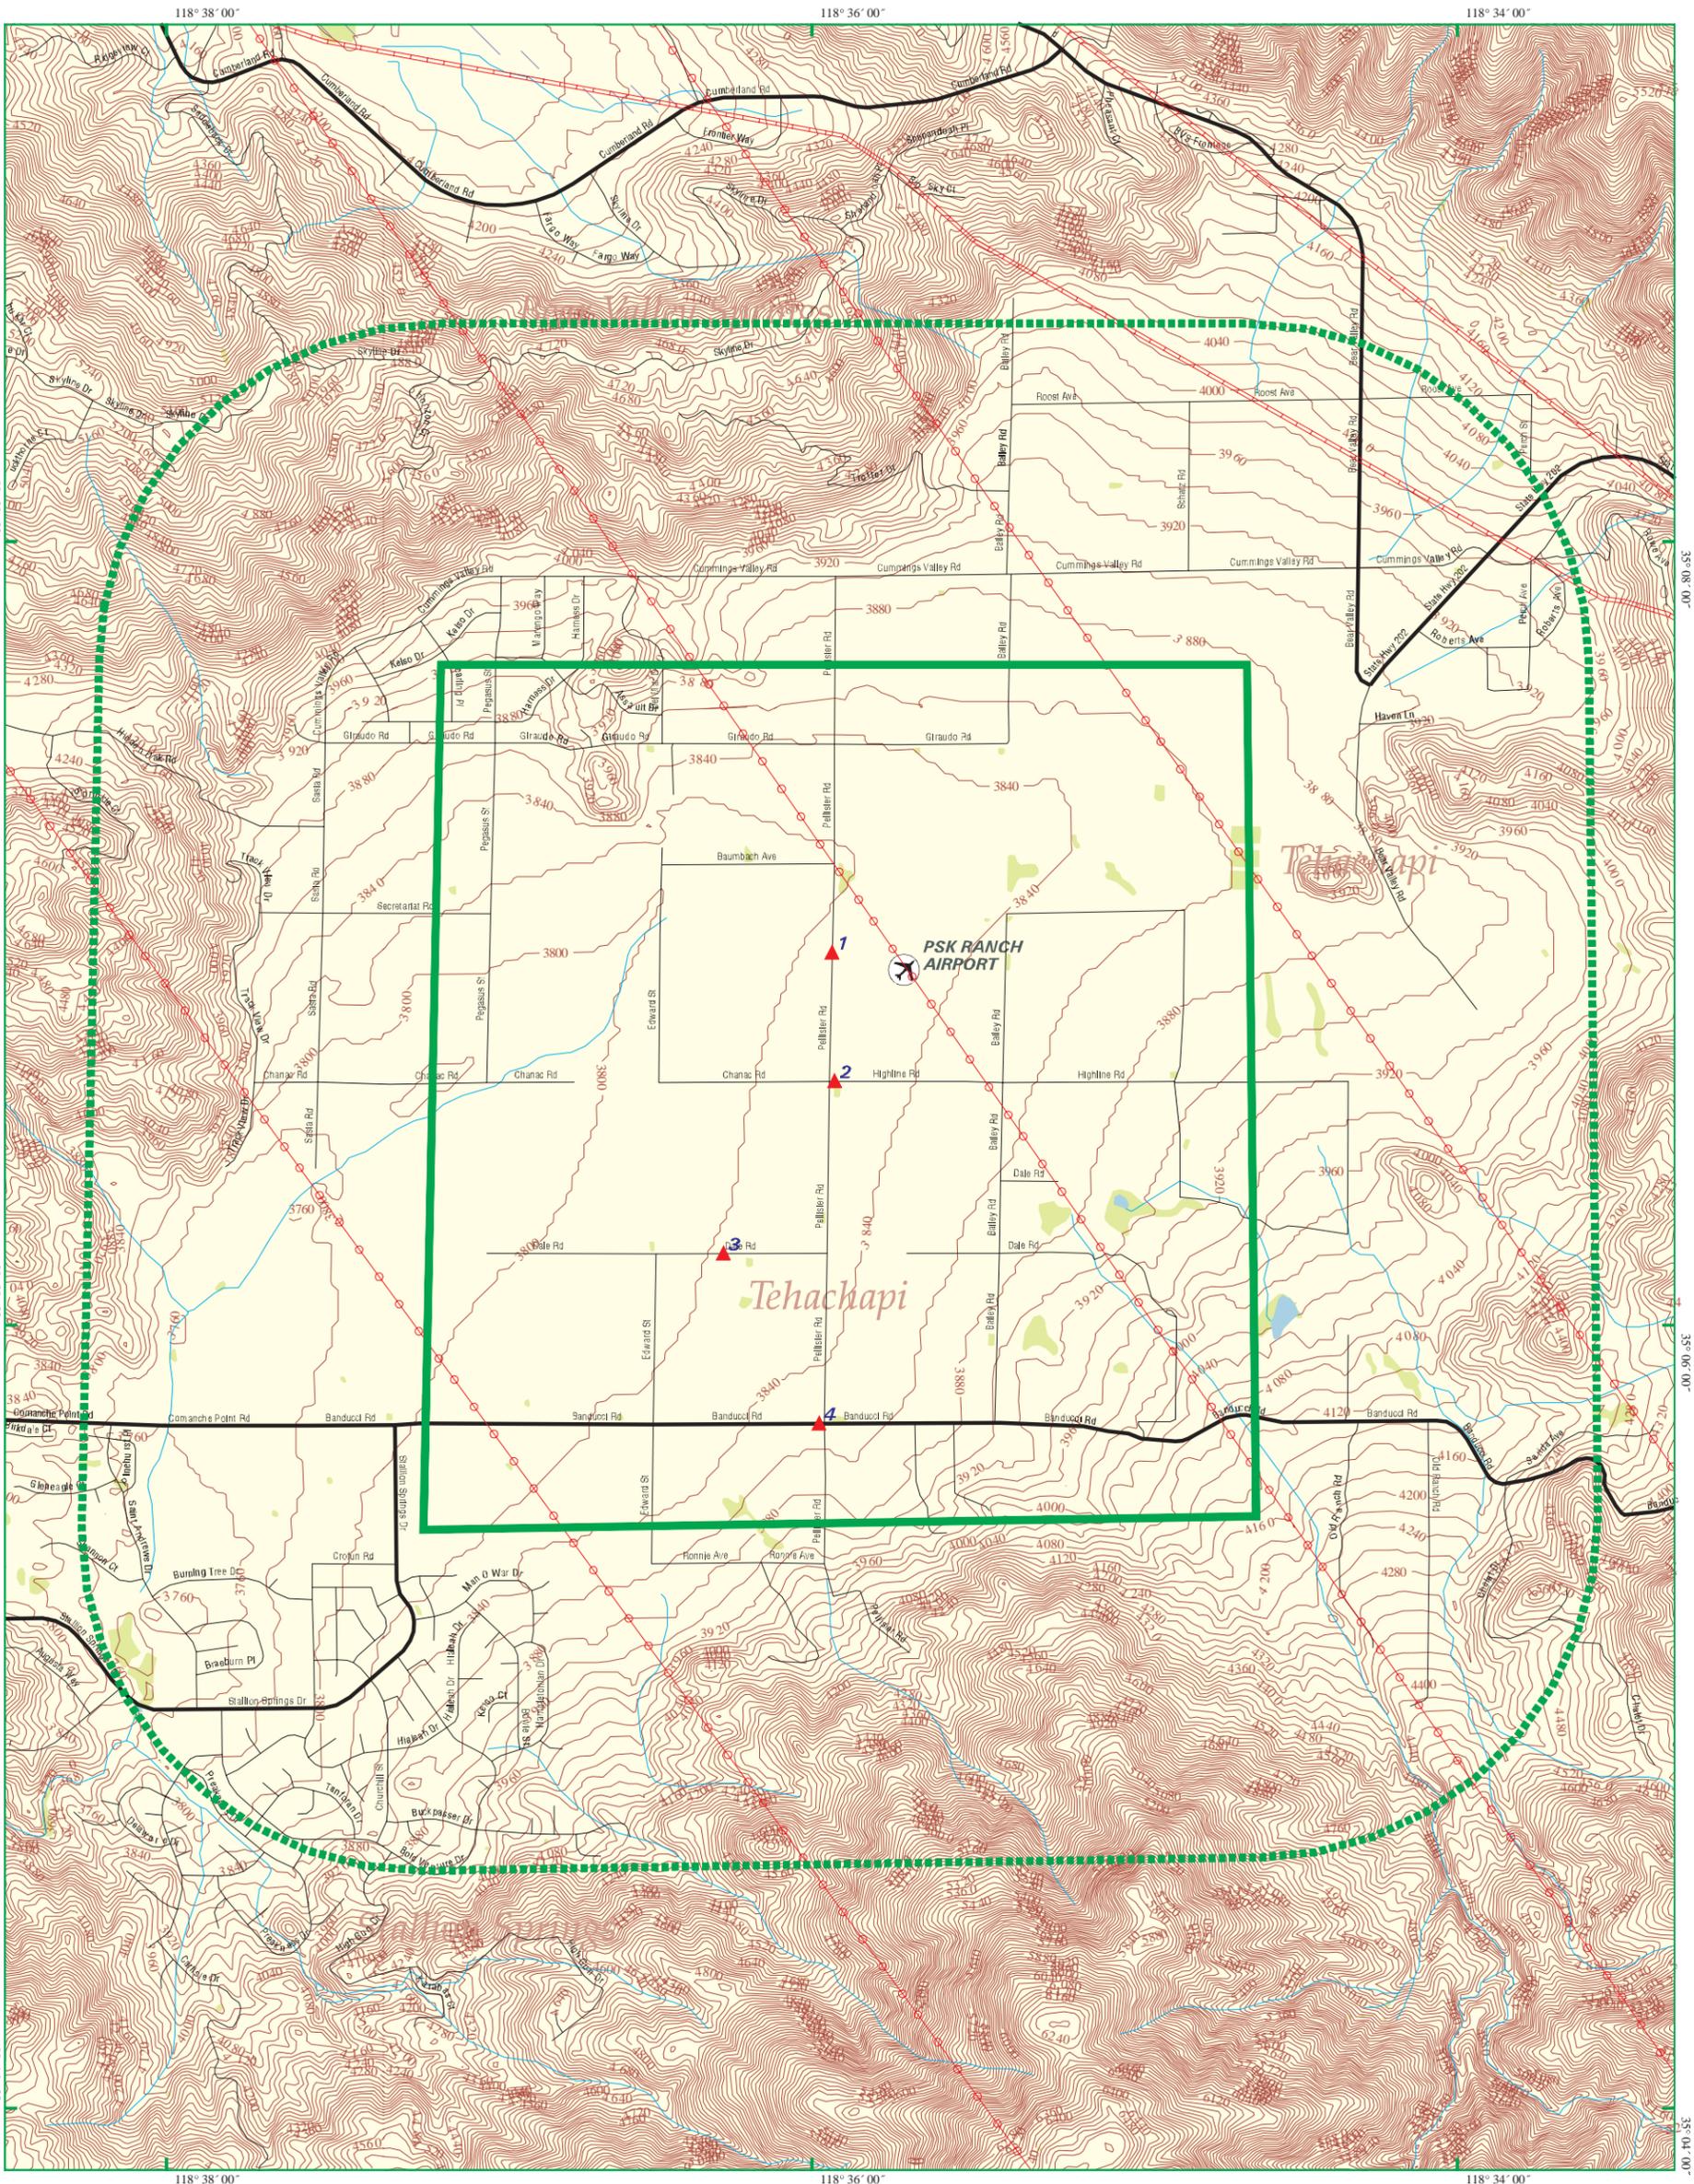

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

CALIFORNIA GOVERNMENT WELL RECORDS SEARCHED

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

DATA REQUEST SET A1211011 Banducci CPUC-SCE-001

To: CPUC

Prepared by: Tony Barranda

Title: Environmental Coordinator

Dated: 01/16/2013

Question 02.c:

2. The following items were previously requested (letter of August 2, 2012) and continue to require supplementation to appropriately characterize the environmental setting for various resource areas.

- c. A copy of the EDR Report.

Response to Question 02.c:

As requested, the EDR report and its associated figures for the Proposed Project have been provided as attached.

DATA REQUEST SET A1211011 Banducci CPUC-SCE-001

To: CPUC

Prepared by: Rachael Poston

Title: SCE Biologist

Dated: 01/16/2013

Question 03.a:

3. The biological resources technical report was provided for the first time with SCE's official filing of the PEA. Upon review of the biological resources technical report, the following additional biological resources information is necessary to prepare an adequate analysis of project impacts under CEQA.
- a. PEA page 3-37 of PEA describes surveys that would occur prior to construction but after project approval, including those for special-status plants and identification of special-status plant habitat. These surveys need to be completed at the appropriate time of year prior to environmental analysis to ensure that the CPUC can accurately evaluate the biological resources that could be impacted by the project and disclose this information to the public. It is not appropriate to defer these surveys to after project approval, especially because if they are conducted as part of the pre-construction surveys, plants that are present may be missed depending on the timing of the surveys (identification of many special-status plants is only possible during the species' blooming season.) Please provide a botanical survey report for all temporary and permanent areas of impact for the proposed Banducci Substation and associated facilities, including but not limited to laydown areas, pull and tension areas, trenching areas, and pole replacement areas.

Response to Question 03.a:

As described in the PEA and Appendix D – the Biological Resources Technical Report, queries of the California Natural Diversity Database (CNDDDB) and plant surveys, including surveys for special-status plant species, were conducted for the Project Survey Area (PSA) and the Focused Survey Area/Area of Potential Effect (FSA/APE). The analysis of the CNDDDB yielded the potential for 12 special-status plants to occur in the PSE and FSA/APE (see page 29). Following the CNDDDB query, plant surveys were conducted within suitable habitat, were consistent with the CNPS (2001) survey guidelines, and occurred over the course of several months to account for the blooming period of the species that have the potential to occur. Plant surveys were conducted on the following dates: December 15, 2010; March 16, 2011; April 20, 2011; May 25, 2011; June 2 and 30, 2011; and July 25, 2011. The plant surveys in 2010 and 2011 resulted in no occurrences of special-status species.

Section 3.9 of the PEA states that preconstruction surveys for special-status species, including plants, will be conducted within and in the vicinity of the project work areas such as the pole

work areas, wire stringing locations, access roads, and staging yards. The preconstruction survey methodology will be consistent with the intent of the CNPS (2001) guidelines.

339 Additionally, biologists reviewed species occurrences from the CDFG California Natural
340 Diversity Database (CNDDDB) RareFind3 (CDFG 2003, as updated 2011) and the California
341 Native Plant Society (CNPS).

342 **3.4 GIS Analysis**

343 Biological resources geospatial data were collected from a variety of sources to develop a
344 project-specific GIS database. This was the first analysis level and it provided reviewers with
345 essential sensitive species location data, preliminary habitat information, potential drainages and
346 other jurisdictional waters, and designated critical habitat for federally-listed species. Data from
347 the following sources comprise the database:

- 348 • California Gap Analysis (http://www.biogeog.ucsb.edu/projects/gap/gap_home.html)
- 349 • California Spatial Information Library (<http://atlas.ca.gov/>)
- 350 • CDFG Biogeographic Information and Observation System (BIOS)
351 (http://bios.dfg.ca.gov/dataset_index.asp)
- 352 • CNDDDB
- 353 • National Wetland Inventory (GIS layers available at <http://atlas.ca.gov/>)
- 354 • USFWS Critical Habitat Portal (<http://criticalhabitat.fws.gov/>)

355 The data were compiled in ArcGIS Desktop 10 and were subsequently uploaded to a Trimble
356 Juno handheld GPS with ArcPad 8.0 for field verification efforts.

357 **3.4.1 Vegetation and Jurisdictional Waters**

358 Mapping and location data were collected using ESRI ArcPad 8.0 software installed on a
359 Trimble Juno global positioning system unit. The software allowed biologists to superimpose the
360 Proposed Project alignment on aerial imagery and create vegetation polygons in the field.
361 Biologists also mapped and verified vegetation on aerial photographs scaled to 1 inch equals 238
362 feet. Vegetation types were mapped to 1,000 feet on either side of the project alignment.
363 Therefore, the mapped area is greater than the PSA. The larger area was used to determine the
364 uniqueness of biological communities within the proposed project alignment. Vegetation
365 mapping was later clipped to conform to 100-foot wide PSA (50 feet on either side of center-
366 line). Vegetation mapping generally follows the descriptions in Preliminary Description of the
367 Terrestrial Natural Communities of California (Holland 1986).

368 Potential jurisdictional waters were mapped using available data from the above-named sources.
369 Field verification was conducted in the spring of 2011 to determine if the drainages mapped met
370 the criteria for waters of the United States and waters of the state. The drainage maps were
371 adjusted to match conditions encountered in the field.

To: CPUC

Prepared by: Rachael Poston

Title: SCE Biologist

Dated: 01/16/2013

Question 03.b:

3. The biological resources technical report was provided for the first time with SCE's official filing of the PEA. Upon review of the biological resources technical report, the following additional biological resources information is necessary to prepare an adequate analysis of project impacts under CEQA.
- b. PEA page 4.4-6 states that vegetation was mapped "to 1,000 feet on either side of the Proposed Telecommunications and Subtransmission Routes" but the biological resources technical report (Appendix D, page 16) states that "Vegetation types were mapped to 100 feet on either side of the project alignment" and that "Vegetation mapping was later clipped to conform to 100-foot wide PSA [50 feet on either side of centerline.]) Clarification is requested on which mapping strategy was employed.

Response to Question 03.b:

This is a typographical error. Vegetation types were mapped to 1000 feet and clipped to the 100 feet on either side of the project alignment. The appropriate modification to page 16 in Appendix D - Biological Resources Technical Report should be made and has been provided as attached.

Title: SCE Biologist

Dated: 01/16/2013

Question 03.d:

3. The biological resources technical report was provided for the first time with SCE's official filing of the PEA. Upon review of the biological resources technical report, the following additional biological resources information is necessary to prepare an adequate analysis of project impacts under CEQA.
- d. Burrowing owl surveys appear to be the only focused surveys conducted. The surveys are said to have been conducted according to "accepted protocols", but methodology is not provided to allow evaluation as to whether surveys were adequate to characterize wintering and/or breeding season use by owls. Please provide supplemental information that clearly describes the survey methodology for burrowing owls.

Response to Question 03.d:

The surveys for burrowing owls used the three-tiered survey approach as described in the *Burrowing Owl Survey Protocol and Mitigation Guidelines* (CBOC 1993). As recommended in the guidelines, a 500-foot buffer around the FSA/APE was surveyed during the nesting season (15 April to 15 July) and consisted of numerous visits within suitable habitat on four separate days.

Title: SCE Biologist
Dated: 01/16/2013

Question 03.f:

3. The biological resources technical report was provided for the first time with SCE's official filing of the PEA. Upon review of the biological resources technical report, the following additional biological resources information is necessary to prepare an adequate analysis of project impacts under CEQA.
- f. PEA page 4.4-30 states that "Riparian areas include the emergent vegetation found on perennial and ephemeral riverine water courses. Riparian vegetation is absent from the Focused Survey Area/Area of Potential Effect but occurs along water courses, such as Brite Creek, which cross the Proposed Telecommunication Routes near west of Tehachapi. Vegetation associated with mapped Riparian areas includes trees such as willows (*Salix* spp.), Fremont cottonwood (*Populus fremontii*), and western sycamore (*Platanus racemosa*). Other emergent species such as Baltic rush (*Juncus balticus*), sedges (*Carex* spp.), and nutgrass (*Cyperus* spp.), common cattail (*Typha latifolia*) and bulrush (*Scirpus* spp.) may also occur." On page 4.4-45 it states "The Proposed Telecommunications Routes would be located on road shoulders in nonnative grassland, disturbed, and agricultural areas with limited native vegetation. Construction of this part of the Proposed Project would not have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations, or by the CDFG or USFWS." Clarification is requested as to whether construction of the telecomm facilities could potentially result in impacts to riparian habitats identified along the telecomm routes.

Response to Question 03.f:

Riparian vegetation does exist within the PSA and FSA/APE including Brite Creek and its tributaries as stated in PEA page 4.4-30 and detailed on Figures 4-3.b, .c, and .j in Attachment D – Biological Resources Technical Report. However, the Proposed Telecommunication Route 2 FSA/APE will span (i.e., consist of overhead line with non-ground disturbing or vegetation disturbing activities) these riparian areas and no impacts to riparian vegetation at this location are anticipated.

Additionally, as stated in Response to 2b and indicated on page 4.4-46 of the PEA, "Prior to any impacts to jurisdictional areas, permits/agreements from the USACE, the CDFG, and the RWQCB shall be obtained for direct and indirect impacts to areas within these agencies'

jurisdictions."

DATA REQUEST SET A1211011 Banducci CPUC-SCE-001

To: CPUC

Prepared by: Sara Bholat

Title: Senior Project Archaeologist

Dated: 01/16/2013

Question 04:

4. SCE submitted for the first time with its official PEA filing the confidential cultural resources technical report. Upon review of that report, it is unclear whether SCE's proposed staging areas have been surveyed and evaluated for cultural resources impacts. Particularly given recent CEQA case law regarding cultural resources impact disclosures (see *Madera Oversight Coalition v. County of Madera* 199 Cal. App. 4th 48 (2011)), it is critical that all areas of potential disturbance are described in terms of cultural resources impacts as a part of the CEQA process, not after project approval. Please supplement the cultural resources technical report to include coverage of the staging areas and all other areas of potential disturbance.

Response to Question 04:

Cultural resources field surveys incorporating the staging area on the northwest corner of Highline Road and Pelliser Road have been completed, and the results are currently being compiled. Supplemental information regarding the staging area will be provided to ensure all areas are adequately surveyed based on the current stage of engineering. The performed surveys included the area immediately adjacent to that proposed staging area. Results found no cultural or historical resources in the vicinity of the staging area. Due to the existing conditions of the proposed staging area, and the cultural resources results provided to the CPUC, no cultural, or historical resources are expected to occur in that staging area. Paleontological surveys are not needed as the area was previously covered in the *Paleontological Resources Assessment for the Southern California Edison Banducci Substation and Telecommunications Routes Project, Tehachapi, Kern County, California (LSA Project No. SCE1105A)*, and has the potential to encounter fossils below the depth of 8 feet.

SCE will submit the supplemental results of these surveys on the staging area outlined at Highline Road and Pelliser Road directly to the CPUC's designated archeologist pursuant to 16 U.S.C. 470w-3 (National Historic Preservation Act), 16 U.S.C. § 470hh (Archaeological Resources Protection Act), and Section 6254.10 of the California State Government Code.

The anticipated date of submittal is tentatively slated for 2/15/2013.
