Re: Request for Information Regarding Stirling Energy Systems Solar Two Project and the Proposed Sunrise Powerlink Transmission Project

Dear Mr. Webb,

The California Public Utilities Commission (CPUC) and the U.S. Bureau of Land Management (BLM) are preparing an Environmental Impact Report/Environmental Impact Statement (EIR/EIS) for SDG&E's proposed Sunrise Powerlink Transmission Project. The agencies have determined that the Stirling Energy Systems (SES) Solar Two Project is considered under CEQA to be a "Connected Action," and its impacts must therefore be analyzed in the EIR/EIS. We understand that SES has been carrying out biological, geotechnical, and other surveys in preparation to submit an Application for Certification to the California Energy Commission (CEC) and a Plan of Development to BLM. In order to fully evaluate the impacts of the SES Solar Two Project, we are requesting that data obtained from these surveys be shared with the agencies.

Request SES-5: Please provide data obtained to date from biological, geotechnical, and other surveys including the following:

- Visual simulations of the facility,
- Biological data, and
- Geologic and hydrologic data.

We would appreciate your prompt responses to these requests, which will allow us to maintain our current EIR/EIS schedule. If possible, please respond to these items within one week (by March 19, 2007). Any questions on this information request should be directed to me at (415) 703-2068.

Sincerely,

Billie C. Blanchard, AICP, PURA V
Project Manager for Sunrise Powerlink Project
Energy Division, CEQA Unit
