

Michael Clayton & Associates

The **existing view** to the south, toward Tamarisk Grove Campground (grouping of trees) and proposed structure location SP92, from Station 6 on the Cactus Loop Trail. SR 78 is visible as the horizontal line beyond the trees in the center of the image. Yaqui Pass Road (S2) parallels the tree line on the north (near) side. The cactus loop trail ascends a ridge immediately north of the campground on the north side of Yaqui Pass Road. The dominant, angular to rounded landform of a north spur ridge of the North Pinyon Mountains provides a backdrop for this south view.
