

December 29, 2010

I. REPRESENTATIVES, LOCATIONS AND DATES

Clarence Brown of the Viejas Tribe served as the Tribal representative to monitor construction efforts at the Alpine Underground on Link 4 from December 20-24, 2010. Only one day required his monitoring efforts, December 23 for a fraction of the day.

II. CONSTRUCTION ACTIVITIES

Pot-holing on Vault 9 and the track drilling of nine holes approximately 18 feet deep was conducted in fill soils. Subsurface fiber optics were reached.

III. OBSERVATIONS

No cultural resources identified during this effort.

IV. CONCERNS EXPRESSED

No concerns expressed at this time.

V. SUMMARY

Nothing of significance nor any concerns have been made at this time.

VI. SUMMARY PREPARER

Hillary Murphy, Project Archaeologist, Tierra Environmental Services, Inc.
Joseph M. Nixon, Senior Anthropologist, Tierra Environmental Services, Inc.

No report was submitted for last week, however in following up with Mr. Brown to verify hours, he informed me, via telephone, that work had in fact been done on the one day listed above. Mr. Brown agreed to submit the report as soon as possible and ensured me that he will submit future reports on Fridays the week of here on out. He authorized me to write this report of our conversation without his actual report in hand. I will submit that to you as I receive it. (HM 12/19)
