1 Executive Summary

Dudek conducted a Desktop Hazards Assessment for the proposed Ventura Compressor Station Modernization Project (VCM Project) – Avocado Site Alternative on behalf of SoCalGas®. The Avocado Site is composed of three portions: a compressor station area, a Temporary Staging Area, and a roadway/utility corridor. The compressor station area of the Avocado Site is located in unincorporated Ventura County, approximately 0.56 miles west of the City of Ventura, and the Temporary Staging Area is located along the western boundary of the City of Ventura, in Ventura County, California (see Figure 1, Avocado Site). The compressor station area of the Avocado Site consists of approximately 66 acres of land located within portions of two parcels (Assessor's Parcel Numbers [APNs] 060-031-017 and 060-031-018). The Temporary Staging Area consists of approximately 5.6 acres of land located within a portion of one parcel (APN 060-0320-019). The roadway/utility corridor portion of the Avocado Site is an approximately 2-mile-long winding route that connects the compressor station area and Temporary Staging Area portions of the Avocado Site and is located within portions of APNs 060-031-018 and 060-032-025. The findings of this investigation are based on historical sources and information contained in regulatory agency databases.

Information gathered for this report indicated the following:

- The compressor station area of the Avocado Site was vacant and undeveloped land from as early as 1904 until grading/terracing was observed in 2010. By 2011, orchards were observed on the graded/terraced potions of the compressor station area.
- The Temporary Staging Area portion of the Avocado Site was vacant and undeveloped land from at least 1904 until between 1967 and 1978 when the area was first observed to be cultivated for agricultural purposes. The Temporary Staging Area has been used for such purposes from that time to the present day.
- The compressor station area of the Avocado Site is adjoined by a mix of vacant and undeveloped land to the north and west, and agricultural land (orchard) to the east and south.
- The Temporary Staging Area portion of the Avocado Site is adjoined by a mix of agricultural land to the north and east, vacant land and a road to the west, and a road and RV park to the south.
- Parts of the roadway/utility corridor portion of the Avocado Site have been used for agricultural purposes (fields and support structures) since as early as 1927.
- The southernmost portion of the roadway/utility corridor included a building (likely a building associated with agricultural operations) within the Avocado Site. These areas likely had organochlorine pesticide use or storage. Residual concentrations of organochlorine pesticides may persist in the shallow soils in these areas.

This assessment revealed the long-term agricultural use of the Temporary Staging Area of the Avocado Site may have resulted in elevated concentrations of pesticide-related compounds (organochlorine pesticides and metals) in shallow soils. Petroleum hydrocarbon impacts to soil may also be located near the structures on the southern portion of the Avocado Site.

The assessment revealed the potential presence of the following estimated impacted soils:

- Proposed Compressor Station Area no anticipated soil impacts
- Roadway/Utility Corridor approximately 3,085 cubic yards (cy) of potentially impacted soils

Avocado Site Alternative

FIGURE 1

2 Introduction and Scope of Investigation

This desktop hazards assessment was prepared for SoCalGas to evaluate potential hazards at the Avocado Site. This assessment included a contaminated soil estimate, a search of regulatory records, review of available historical records (aerial photographs and topographic maps), and the preparation of this report.

3 Site Location

The Avocado Site is located in southwestern Ventura County, California, west of State Route 33 and north of U.S. Highway 101. The compressor station area of the Avocado Site is located approximately 1.37 miles north of the Temporary Staging Area portion of the Avocado Site and 0.28 miles west of Milling Road. Taylor Ranch Road wraps around the compressor station area, abutting the area to the north and then curving down south to the east of the area before joining the roadway/utility corridor portion of the study area. The Temporary Staging Area of the Avocado Site is located approximately 0.02 miles east of Taylor Ranch Road and directly north of West Main Street.

The compressor station area of the Avocado Site consists of approximately 66 acres of land located within portions of two parcels (APNs 060-031-017 and 060-031-018). The Temporary Staging Area consists of approximately 5.6 acres of land located within a portion of one parcel (060-030-019). The compressor station area currently consists of vacant and undeveloped land, and the Temporary Staging Area currently consists of tilled land. The roadway/utility corridor is an approximately 2-mile-long winding segment that connects the compressor station area and the Temporary Staging Area portions of the Avocado Site and is located within portions of two parcels (APNs 060-030-018 and 060-032-025). The Avocado Site location and boundaries are shown in Figure 1.

4 Environmental Setting

4.1 Topography and Geology

The compressor station area of the Avocado Site is located in unincorporated Ventura County and approximately 0.5 miles west of the City of Ventura boundary. Taylor Ranch Road wraps around the compressor station area, abutting the area to the north and then curving down south to the east of the area before joining the roadway/utility corridor portion of the study area. The Temporary Staging Area portion of the Avocado Site is located adjoining to the north of West Main Street and to the east of Taylor Ranch Road along the western boundary of the City of Ventura.

General topographic information for the Avocado Site and the surrounding area was obtained from a review of topographic maps (Appendix A), the Environmental Data Resources (EDR) Radius Map Report (Appendix B). The topography of the compressor station area of the Avocado Site consists of a steep incline from the northeast corner up to the southwest corner. The Temporary Staging Area is relatively flat throughout. The elevation of the main property of the Avocado Site ranges from approximately 480 feet above mean sea level in the northeastern corner to approximately 740 feet above mean sea level in the southwest corner. The average elevation of the Temporary Staging Area portion of the Avocado Site is 27 feet above mean sea level.

No subsurface geologic investigations were performed as part of this Desktop Hazards Assessment. According to the EDR Radius Map Report (Appendix B), the compressor station area is primarily underlain by Malibu loam in the southern and western region, by Huerhuero very fine sandy loam in the southeast and north, and by San Benito clay loam in the northwestern region. Malibu loam is characterized as soils that are well drained with very slow infiltration rates. Huerhuero very fine sandy loam is characterized as soils that are moderately well drained with very slow infiltration rates. San Benito clay loam is characterized as soils that are well drained with moderate infiltration rates. The Temporary Staging Area is primarily underlain by Camarillo loam which is characterized as soils that are poorly drained with slow infiltration rates.

4.2 Groundwater

Based on a review of the State Water Resources Control Board (SWRCB) Groundwater Ambient Monitoring and Assessment Information System (SWRCB 2025a), there are no water wells located on the compressor station area. Dudek also reviewed the SWRCB GeoTracker database for nearby assessment and remediation sites; the nearest cleanup site with groundwater information (Halliburton/Lowe Trust), approximately 0.65 miles southeast of the compressor station area of the Avocado Site, was identified on the GeoTracker database as a leaking underground storage tank Cleanup Site (SWRCB 2025b). Based on available information from a closure letter, the depth to water ranged from 30 feet below ground surface (bgs) to 32 feet bgs, with a flow direction toward the south-southeast (LA RWQCB 1997).

Based on a review of the SWRCB Groundwater Ambient Monitoring Assessment Information System (SWRCB 2025a), there are no water wells located on the Avocado Site Temporary Staging Area. Dudek also reviewed the SWRCB GeoTracker database for nearby assessment and remediation sites; the nearest cleanup site with groundwater information (Aqua Chem Ltd.), approximately 0.44 miles east of the Temporary Staging Area was listed on the GeoTracker database as a leaking underground storage tank Cleanup Site (SWRCB 2025b). Based on

available information from a Closure Letter, the depth to water ranged from 14 feet bgs to greater than 30 feet bgs, with a flow direction toward the southeast (LA RWQCB 1996).

4.3 Agricultural Use

Portions of the compressor station area of the Avocado Site have been cultivated for agricultural use (orchards) as early as 2011. The Temporary Staging Area portion of the Avocado Site has been used for agricultural purposes since at least 1978. The southern portion of the roadway/utility corridor had agricultural use from at least 1959 through 1971, and between 1929 and 1947 a different style of agricultural use (possibly hay) occurred (see Section 7, Site History, of this document).

Pesticides and herbicides used prior to 1990 were likely to contain organochlorinated compounds, such as chlordane, DDT, and DDE, or metals, such as arsenic. The chemicals of concern associated with these compounds are accumulative and persistent in shallow soils. Therefore, the longer a property is used for agricultural purposes, the more likely there is an accumulation of these chemicals of concern. Considering the former and present uses of the property, there is a potential for elevated concentrations of pesticide and herbicide-related compounds in shallow soils. Because the proposed redevelopment is commercial/industrial, the accumulated concentrations are likely below risk-based concentrations associated with commercial/industrial development; however, the potential presence of these chemicals should be considered when evaluating future risk.

5 Public Agency Records Search

The regulatory database search gives a listing of sites within a 1-mile radius of the Avocado Site (compressor station area and Temporary Staging Area; "target property" is the term used by EDR) that are known to be chemical handlers or hazardous waste generators or have reported releases of hazardous substances or petroleum products. Information in these listings includes the location of the site relative to the Avocado Site's main property and Temporary Staging Area, the type of potential environmental concern present, and the status of the site. On April 18, 2025, EDR provided the database searches for this desktop hazards assessment.

Tables 1a and 1b summarize the databases that were searched that provide information on hazardous materials and petroleum products on the main and Temporary Staging Area portions of the Avocado Site. The table also indicates the search distances from the Avocado Site and the number of sites identified in each database. The comprehensive list of databases is included in the EDR Radius Map Report (Appendix B).

Table 1a. Regulatory Database Search Summary for Compressor Station Area

Acronym	Database	Search Distance	Avocado Site Listed?	Number of Surrounding Sites Listed

Note: The search distances in the EDR Radius Map Report (Appendix B) and listed in this table are equal to or greater than the search distances required by ASTM E2247-23 (ASTM 2023); however, this report does not meet the ASTM Standard for Phase I Environmental Site Assessments.

5.1 Avocado Site (Compressor Station Area and Temporary Staging Area)

The Avocado Site was not identified in any of the databases searched by EDR.

6 Agency Records

6.1 Ventura County

6.1.1 Environmental Health Division

Ventura County Environmental Health Division (EHD) is the Certified Unified Program Agency for Ventura County. Ventura County EHD maintains information on spills, tanks, and chemical use. Ventura County EHD provides regulatory oversight for six statewide environmental programs: (1) Hazardous Materials Business Plan, (2) Hazardous Waste, (3) Tiered Permitting, (4) Underground Storage Tanks, (5) Aboveground Petroleum Storage, and (6) California Accidental Release Prevention Program. Several online databases of public records are available, including USTs), leaking underground fuel tanks, Voluntary Cleanup Program, Individual Sewage Disposal Systems (septic systems), Hazardous Materials Program (tracks storage, usage, and violations/incidents), and solid waste.

Dudek submitted a request for records on April 21, 2025, for records pertaining to hazardous materials, USTs/aboveground storage tanks, septic systems, on-site wastewater treatment systems, individual sewage disposal systems, releases, or investigations associated with the Avocado Site. Dudek received a response on April 28, 2025, that did not identify any records pertaining to the Avocado Site.

In addition, Dudek reviewed each of the online databases outlined below (County of Ventura 2025a). The information provided in the databases is summarized as follows.

Leaking Underground Fuel Tanks and Voluntary Cleanup Program

Ventura County EHD maintains online records for leaking underground fuel tanks and Voluntary Cleanup Program sites from 1984 through May 2008. Records from June 2008 to present are linked to the SWRCB's GeoTracker website. The Avocado Site was not identified in this database.

Solid Waste

Ventura County EHD maintains online records for solid waste sites from 1980 through May 2002. The Avocado Site was not identified in this database.

Individual Sewage Disposal Systems

Ventura County EHD maintains online records for septic systems from 1978 through 2016. The Avocado Site was not identified in this database.

Hazardous Materials Program and Underground Tanks

The Certified Unified Program Agency division of the Ventura County EHD maintains online records of hazardous material and UST sites that were active from 1984 through July 2011 and those that were inactive from 1984 through May 2008. The Avocado Site was not identified in this database.

Inactive Underground Storage Tanks

Ventura County EHD maintains online records for inactive USTs from 1984 through May 2008. The Avocado Site was not identified in this database.

Hazardous Material Release Reports

Ventura County maintains documents from 1987 to 2017 for hazardous material release reports. The Avocado Site was not identified in this database.

6.1.2 Zoning

Dudek accessed the County of Ventura Planning online map for information about zoning of the Avocado Site (County of Ventura 2025b). The compressor station area of the Avocado Site is located on portions of two parcels (APNs 060-031-017 and 060-031-018) while the Temporary Staging Area of the Avocado Site is located on a portion of one parcel (APN 060-032-019). According to the online map, zoning for the compressor station area of the Avocado Site was identified as "AE-40 ac" (Agricultural Exclusive Zone with a minimum lot size of 40 acres). The Temporary Staging Area was identified as a zoning area in the City of Buenaventura. According to a Zoning District Map from the City of Buenaventura Department of Community Development Planning Division (Appendix C, Local Agency Records); the Temporary Staging Area of the Avocado Site is zoned as Agricultural/Save Open Space and Agricultural Resources.

6.1.3 Agricultural Commissioner

Dudek contacted the County of Ventura Agriculture Commissioner's Office on April 21, 2025, to obtain records on agricultural use pertaining to the Avocado Site. Responses were received on April 22, 2025, indicating that no records were available for the compressor station area of the Avocado Site; pesticide use reports dating from January 2020 to November 2024 were identified for the APN associated with the Temporary Staging Area (Appendix C). A combination of fungicides, insecticides, herbicides, and other pesticides were identified as having been used on that APN parcel for Ventura Ranch and Bottom Taylor Ranch.

6.1.4 Building and Safety Division

Dudek contacted the County of Ventura Building and Safety Division on March 20, 2025, to obtain building records and permits pertaining to the Avocado Site. A response was received on April 21, 2025 (Appendix C), that indicated a building permit from 2013 for the construction of three wells on APN 060-031-017. The wells were not identified as being located on the Avocado Site. Five additional records were identified for APN 060-031-018. These records spanned from 2007 to 2016 and included building permits for the new wells, agricultural electrical services, a new agricultural booster station, electrical upgrades, and a new water pump. Dudek also reviewed the County of Ventura online permit database (County of Ventura 2025c) and confirmed the previously identified building records. None of these records indicate a spill or release of hazardous materials to the environment; therefore, they are unlikely to have impacted the environmental conditions of the Avocado Site.

6.2 State Water Resources Control Board

Dudek searched GeoTracker, the SWRCB data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. Records include sites that require cleanup, various unregulated projects, and permitted facilities (SWRCB 2025b). No sites were identified on the Avocado Site.

6.2.1 GeoTracker Per- and Polyfluoroalkyl Substances Database

Per- and polyfluoroalkyl substances (PFAS) constitute a large family of fluorinated chemicals (exceeding several thousand compounds) that vary widely in their chemical and physical properties. They have been used for commercial and industrial purposes and as a result have been found in the environment (i.e., water, soil, and air). The persistence and mobility of some PFAS, combined with decades of widespread use in industrial processes, certain types of firefighting foams, and consumer products, have resulted in their presence in the environment at trace levels across the globe (ITRC 2023).

The San Francisco Bay RWQCB published a PFAS sampling fact sheet in May 2024, outlining the following types of sites likely to have used, stored, and/or released PFAS (SFB RWQCB 2024):

- Firefighting practice training areas and fire stations (aqueous film-forming foam sites)
- Refineries and bulk fuel terminals
- Semiconductor manufacturers
- Electronics manufacturers—including phones, TVs, and screens
- Chrome plating facilities
- Large commercial/industrial laundries
- Textile facilities—leather tanneries, upholsterers and furniture makers/processors, carpet manufacturing/ treating, large-scale clothes/textile makers
- Plastics manufacturers
- Cardboard/paper packaging manufacturers
- Recycling facilities—paper and/or plastics
- Surface coatings/paints/varnish manufacturers and high-volume users
- High-volume print shops, photos shops, and ink manufacturers
- Pesticide manufacturers
- Manufacturers of consumer products with PFAS
- Mining industry (copper, gold, aluminum, vanadium, and uranium)
- Landfills

As of April 2024, the U.S. Environmental Protection Agency (EPA) has finalized National Primary Drinking Water Regulations for six PFAS chemicals: perfluorooctanoic acid (PFOA), perfluorooctanesulfonic acid (PFOS), perfluorononanoic acid (PFNA), perfluorohexanesulfonic acid (PFHxS), hexafluoropropylene oxide-dimer acid (HFPODA), and mixtures of two or more of PFHxS, PFNA, HFPO-DA, and perfluorobutanesulfonic acid (PFBS). EPA set maximum contaminant levels for these six chemicals (or chemical mixtures), which are enforceable health-based limits, and a hazard index (ratio of water sample concentration to health-based water concentration) for mixtures

of two or more of PFHxS, PFNA, HFPO-DA, and PFBS (EPA 2024a). Additionally, under the Comprehensive Environmental Response, Compensation, and Liability Act, PFOA, PFOS, and their salts and structural isomers were designated hazardous substances by EPA (EPA 2024b). EPA also established regional screening levels for PFOA and PFOS in soil (EPA 2024c). As such, the presence of PFOA, PFOS, PFNA, PFHxS, and/or HFPO-DA in any combination above their maximum contaminant levels and/or reportable quantities could be identified as an environmental concern under ASTM E2247-23 (ASTM 2023).

The SWRCB Division of Drinking Water issued multiple General Orders for investigation and monitoring of PFAS in public water systems (SWRCB 2024), along with a series of Investigative Orders issued for airports, chrome plating facilities, landfills, bulk fuel terminals, and public water treatment facilities. The various orders, issuance of which first began in 2019, targeted public water systems and facilities likely to have PFAS, such as airports, landfills, and chrome-plating facilities. SWRCB has created the GeoTracker PFAS Map, which is a data management system for sites with PFAS investigative orders, other sites with PFAS data, and water well systems with PFAS data (SWRCB 2025c). No PFAS data were identified within 1 mile of the Avocado Site.

Based on review of the GeoTracker PFAS database, there are no records to indicate that PFAS is an environmental concern to the Avocado Site. However, research and studies indicate that PFAS is present in most environments; thus, it is possible that it is present on or near the Avocado Site.

6.3 Department of Toxic Substances Control

Dudek searched EnviroStor, the Department of Toxic Substances Control database management system used for tracking cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known contamination. No sites were identified on the Avocado Site (DTSC 2025).

6.4 National Pipeline Mapping System

Dudek searched the National Pipeline Mapping System online database, which provides a public map viewer application that displays data related to gas transmission and hazardous liquid pipelines, liquefied natural gas plants, and breakout tanks under the jurisdiction of the Department of Transportation's Pipeline and Hazardous Material Safety Administration (PHMSA 2025). No pipelines were identified on the Avocado Site (Appendix C).

6.5 California Department of Resources Recycling and Recovery Solid Waste Information System

The California Department of Resources Recycling and Recovery Solid Waste Information System (SWIS) portal provides information on solid waste facilities, operations, and disposal sites throughout California. Dudek queried the SWIS System database for landfills, transfer stations, composting sites, in-vessel digestion sites, engineered municipal solid waste conversion facilities, transformation facilities, and closed disposal sites or documentation for the Avocado Site (CalRecycle 2025). The Avocado Site was not identified in this database.

6.6 California Environmental Protection Agency Regulated Site Portal

Dudek reviewed the California Environmental Protection Agency Regulated Site Portal, which contains data about environmentally regulated sites and facilities in California (CalEPA 2025). Data sources for the portal include the California Environmental Reporting System, the Department of Toxic Substances Control EnviroStor, the SWRCB GeoTracker and California Integrated Water Quality System, and the Federal Toxics Release Inventory.

California Environmental Protection Agency sites are generally administrative in nature; the Regulated Site Portal identifies sites that have environmental permits or that handle hazardous materials or generate hazardous waste but that do not necessarily have an uncontrolled release of hazardous substances to the environment. No sites were identified on the Avocado Site.

6.7 California Geologic Energy Management Division

Dudek reviewed the California Geologic Energy Management Division online database, which has information for known oil and gas wells in the state, for wells on the Avocado Site. No wells were identified on the Avocado Site (CalGEM 2025). The EDR Radius Map Report (Appendix B) identified a total of 384 wells within 1 mile of the Avocado Site.

7 Site History

Compressor Station Area

Based on a review of historical aerial photographs, historical topographic maps, and agency records, the compressor station area of the Avocado Site was vacant land since at least 1904 to 2010 when terracing was observed on the eastern and southern portions. Orchards were observed on the terraced portions as early as 2011; the remainder of the compressor station area has remained undeveloped land.

Temporary Staging Area

The Temporary Staging Area was vacant land from at least 1904 until between 1967 and 1978 when the area was first observed to be cultivated for agricultural purposes (tilled land) and has been used as such to the present day.

Roadway/Utility Corridor

The southern portion of the roadway/utility corridor has been cultivated for agricultural purposes (field crops) as early as 1927. Structures, likely associated with agricultural operations, were observed in the southern portion as early as 1947 through the present day. The northern portion of the roadway/utility corridor was vacant and undeveloped land from 1927 until 2010, when orchards were first observed.

7.1 Historical Aerial Photographs

7.1.1 Compressor Station Area

Dudek reviewed historical aerial photographs obtained from EDR for 1927, 1947, 1953, 1959, 1967, 1978, 1984, 1994, 2005, 2010, 2014, 2018, and 2022 (Appendix D). Dudek also reviewed aerial photographs from Google Earth for 2025 (Google Earth 2025). The photographs provided background information to assess the possibility of past activities that could present environmental concerns. The aerial photographs are described in Table 2a.

Table 2a. Aerial Photographs of Compressor Station Area

Date	Avocado Site
1927	The Avocado Site appears to be vacant and undeveloped land.
1947	The Avocado Site appears similar to the 1927 aerial photograph.
1953	The Avocado Site appears similar to the 1947 aerial photograph.
1959	The Avocado Site appears similar to the 1953 aerial photograph.
1967	The Avocado Site appears similar to the 1959 aerial photograph.
1978	A dirt road is observed on the southern portion of the Avocado Site. The remainder of the Avocado Site appears similar to the 1967 aerial photograph.
1984	The Avocado Site appears similar to the 1978 aerial photograph.
1994	The Avocado Site appears similar to the 1984 aerial photograph.
2005	The Avocado Site appears similar to the 1994 aerial photograph.

Table 2a. Aerial Photographs of Compressor Station Area

Date	Avocado Site
2009	The eastern and southern portions of the Avocado Site appear to be graded into terraces. The remainder of the Avocado Site appears similar to the 2005 aerial photograph.
2012	Orchards are present on the graded/terraced portions of the Avocado Site. The remainder of the Avocado Site appears similar to the 2009 aerial photograph.
2016	Additional orchards are observed on the southern portion of the Avocado Site. The remainder of the Avocado Site appears similar to the 2012 aerial photograph.
2020	The Avocado Site appears similar to the 2016 aerial photograph.
2025	The Avocado Site appears similar to the 2020 aerial photograph.

Note: See Appendix D for corresponding photographs for 1927 through 2020. The 2025 Google Earth photograph is available online and therefore is not included in Appendix D.

7.1.2 Temporary Staging Area

Dudek reviewed historical aerial photographs obtained from EDR for 1927, 1947, 1953, 1959, 1967, 1978, 1984, 1994, 2005, 2009, 2012, 2016, and 2020 (Appendix D). Dudek also reviewed aerial photographs from Google Earth for 2025 (Google Earth 2025). The photographs provided background information to assess the possibility of past activities that could present environmental concerns. The aerial photographs are described in Table 2b.

Table 2b. Aerial Photographs of Temporary Staging Area

Date	Avocado Site
1927	A trail is observed on the eastern portion of the Avocado Site. The rest of the Avocado Site is observed to be land cleared of vegetation.
1947	The trail on the Avocado Site is no longer observed. The rest of the Avocado Site appears similar to the 1927 aerial photograph.
1953	The Avocado Site appears similar to the 1947 aerial photograph.
1959	Portions of fence lines are observed in the western and northern regions of the Avocado Site.
1967	The Avocado Site appears similar to the 1959 aerial photograph.
1978	The fence lines previously observed on the Avocado Site have been removed. Surface soil has been disturbed on the southern region of the Avocado Site. The rest of the Avocado Site appears similar to 1967 aerial photograph.
1984	The Avocado Site appears to be cultivated for agricultural use.
1994	The Avocado Site appears similar to the 1984 aerial photograph.
2005	The vegetation/crops have been removed.
2009	Crops are again observed on the Avocado Site.
2012	Surface soils across the Avocado Site appear to have been tilled.
2016	The Avocado Site appears to be cultivated for agricultural purposes.
2020	The Avocado Site appears similar to the 2016 aerial photograph.
2025	The Avocado Site appears similar to the 2020 aerial photograph.

Note: See Appendix D for corresponding photographs for 1927 through 2020. The 2025 Google Earth photograph is available online and therefore is not included in Appendix D.

7.1.3 Roadway/Utility Corridor

Dudek reviewed aerial photographs from the University of California, Santa Barbara, Library FrameFinder online database for the years 1929, 1941, 1945, 1947, 1959, 1966, 1971, 1984, 1994, and 2002 (UCSB 2025). Dudek also reviewed 2025 aerial imagery from Google Earth (Google Earth 2025) and aerial photographs for portions of the site from EDR for 1927, 1947, 1953, 1959, 1967, 1978, 1984, 1994, 2005, 2009, 2012, 2016, and 2020.

The roadway in the southern half of the roadway/utility corridor was developed for agricultural use from at least 1959 through 1971. The southernmost area included a building (likely a building associated with agricultural operations) within the Avocado Site. These are areas of likely organochlorine pesticide use or storage. Between 1929 and 1947, a different style of agricultural use (possibly hay) is visible in the aerial photographs. During this time, it is possible that arsenical pesticides were used in the fields. These areas generally overlap with the areas noted for the previous period (1959–1971); however, the 1959–1971 agricultural use appeared to be on the sides of the roadways and the 1929 period hay fields covered more of the Avocado Site in the southern portion of the site.

7.2 Historical Topographic Maps

7.2.1 Compressor Station Area

Dudek reviewed historical topographic maps from 1904, 1941, 1948, 1951, 1967, 2012, 2015, 2018, and 2022 (Appendix A). The topographic maps are a historical source that can be used to document the prior use of the Avocado Site and surrounding area. The topographic maps are described in Table 3a.

Table 3a. Topographic Maps of Compressor Station Area

Date	Avocado Site
1904	The Avocado Site is depicted as vacant and undeveloped land.
1941	The Avocado Site is depicted similarly to the 1904 topographic map.
1948	The Avocado Site is depicted similarly to the 1941 topographic map.
1951	The Avocado Site is depicted similarly to the 1948 topographic map.
1967	The Avocado Site is depicted similarly to the 1951 topographic map.
2012	The Avocado Site is depicted similarly to the 1967 topographic map.
2015	The Avocado Site is depicted similarly to the 2012 topographic map.
2018	The Avocado Site is depicted similarly to the 2015 topographic map.
2022	The Avocado Site is depicted similarly to the 2018 topographic map.

Note: See Appendix A for corresponding maps.

7.2.2 Temporary Staging Area

Dudek reviewed historical topographic maps from 1904, 1941, 1948, 1951, 1967, 2012, 2015, 2018, and 2022 (Appendix A). The topographic maps are a historical source that can be used to document the prior use of the Avocado Site and surrounding area. The topographic maps are described in Table 3b.

Table 3b. Topographic Maps of Temporary Staging Area

Date	Avocado Site
1904	The Avocado Site is depicted as vacant and undeveloped land.
1941	The Avocado Site is depicted similarly to the 1904 topographic map.
1948	The Avocado Site is depicted similarly to the 1941 topographic map.
1951	The Avocado Site is depicted similarly to the 1948 topographic map.
1967	The Avocado Site is depicted similarly to the 1951 topographic map.
2012	The Avocado Site is depicted similarly to the 1967 topographic map.
2015	The Avocado Site is depicted similarly to the 2012 topographic map.
2018	The Avocado Site is depicted similarly to the 2015 topographic map.
2022	The Avocado Site is depicted similarly to the 2018 topographic map.

Note: See Appendix A for corresponding maps.

7.2.3 Roadway/Utility Corridor

Dudek reviewed historical topographic maps from 1904, 1910, 1918, 1921, 1938, 1946, 1952, 1955, 1961, 1964, 1966, 1968, 1972, 2012, 2015, 2018, and 2022 (Historic Aerials 2025). From 1904 to 1946, the roadway/utility corridor was depicted as primarily vacant land. Beginning in 1952, a road (present-day Taylor Ranch Road) was depicted in the general location of the roadway/utility corridor; several buildings were also depicted at the southern terminus of roadway/utility corridor. The roadway/utility corridor was depicted similarly through 1972. Beginning in 2012, minor roads, wells, and other features were no longer depicted on the topographic maps.

8 Vapor Encroachment

Dudek evaluated vapor encroachment to determine whether there is potential for vapors originating from contaminated soil and/or groundwater to occur in the subsurface below the existing and potential future on-site structures. Information obtained from other sources (geologic and hydrogeological information, and local regulatory agency responses), as discussed in this report, was also considered. The vapor encroachment condition assessment was conducted in accordance with ASTM E2600-22 (ASTM 2022). The EDR Radius Map Report (Appendix B) was used to evaluate listed contaminated sites as identified in federal, state, and local databases.

No sites were identified as having groundwater contamination or soil vapor contamination that could impact the Avocado Site; as such, no vapor encroachment condition was identified.

9 Contaminated Soil Estimate

Dudek further reviewed aerial photographs and online databases (GeoTracker and EnviroStor) to identify the areas of likely soil contamination on the Avocado Site (in the proposed compressor station area and the roadway/utility corridor area, excluding the Temporary Staging Area). The following sections present a rough estimate (educated guess) of the area and depth of contamination based on Dudek's experience at other sites; note that this rough estimate cannot be more than an educated guess because there is no available subsurface sampling data for the sites.

9.1 Proposed Compressor Station Area

Dudek reviewed aerial photographs from the University of California, Santa Barbara, Library FrameFinder online database for the years 1929, 1941, 1945, 1947, 1959, 1966, 1971, 1984, 1994, and 2002. Dudek also reviewed 2025 aerial imagery from Google Earth and aerial photographs for portions of the site from EDR for 1927, 1947, 1953, 1959, 1967, 1978, 1984, 1994, 2005, 2009, 2012, 2016, and 2020. Dudek also reviewed the GeoTracker and EnviroStor online databases in the site vicinity.

The aerial photographs indicate that several portions of the proposed compressor station area were developed for agriculture between approximately 2009 (EDR) and the present (Figure 1). While these areas have recently been developed for agriculture, it is unlikely that persistent pesticides, such as organochlorine pesticides, have been used in these areas. Dudek does not anticipate a need for contaminated soil disposal from these areas of recent agricultural use.

9.2 Roadway/Utility Corridor

Based on a review of the same aerial photographs and online databases, Dudek identified areas of potential impacts within the roadway/utility corridor portion of the Avocado Site (Avocado Site areas excluding the compressor station area and Temporary Staging Area; Figures 2-4). These areas and potential impacts are described as follows:

- The aerial photographs indicate that the northern portions of the roadway/utility corridor were developed for agriculture between approximately 2009 and the present. While these areas have recently been developed for agriculture, it is unlikely that persistent pesticides, such as organochlorine pesticides, have been used in these areas. Dudek does not anticipate a need for contaminated soil disposal from these areas of recent agricultural use.
- Other areas along the roadway in the southern half of the site were developed for agricultural use from at least 1959 through 1971. The southernmost area included a building (likely an agricultural building) within the Avocado Site. These areas are shown on Figures 2 and 3. These areas likely had organochlorine pesticide use or storage. Residual concentrations of organochlorine pesticides may persist in the shallow soils in these areas. These areas should be sampled to determine the concentrations of pesticides in comparison to agency screening levels; however, in the absence of data, it can be assumed that the upper 1 foot of soil in these areas may require removal due to pesticide concentrations. Total petroleum hydrocarbon impacted soil may also be present around the building. It could be assumed that

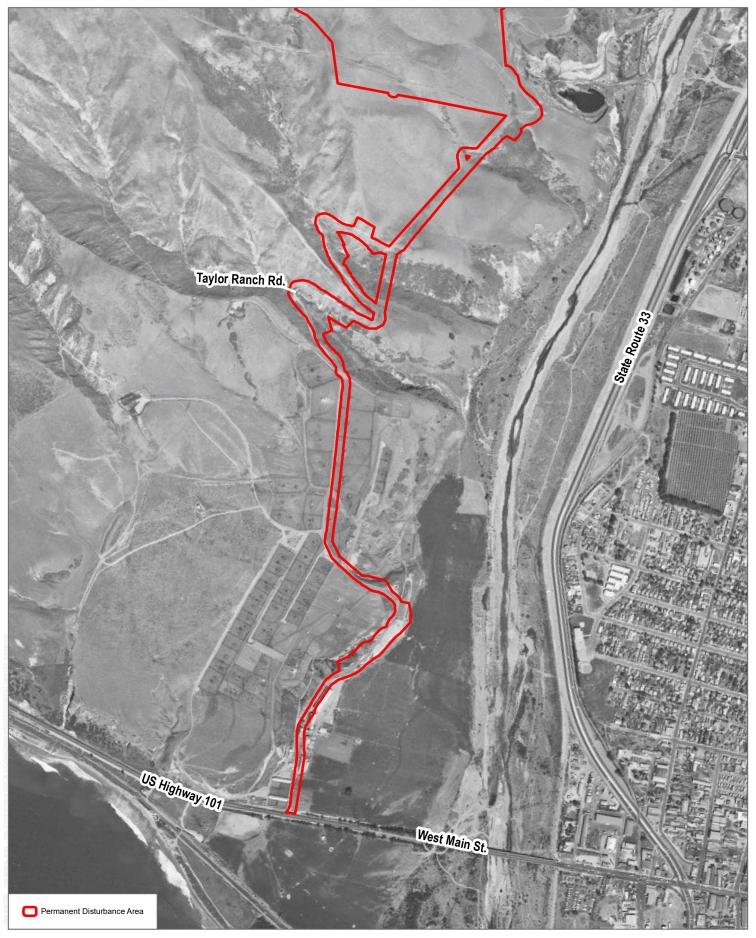

- approximately 1/5 of the building area may require removal to approximately 3 feet depth. The area of potential impacts from the building area is 1,100 square feet, resulting in a volume of potential impacts of 3,300 cubic feet (cf), or 122 cy.
- Between 1929 and 1947, a different style of agricultural use (possibly hay) is visible in the aerial photographs (Figure 4). During this time period, it is possible that arsenical pesticides were used in the fields. These areas generally overlap with the areas noted for the prior time period (1959 to 1971); however, the 1959 to 1971 agricultural use appeared to be on the sides of the roadways and the 1929 period hay fields covered more of the Avocado Site areas in the southern portion of the site. The total area of agricultural use during this time period or the 1959 to 1971 time period is approximately 240,000 square feet. Dudek assumes that approximately 1/3 of the area is impacted to an estimated depth of 1 foot. Therefore, the total area of potential impacts from assumed pesticide use in agricultural fields during the 1929 time period or the 1959 to 1971 time period is approximately 80,000 square feet, resulting in a volume of potential impacts of approximately 80,000 cf, or 2,963 cy (Figure 5).

Combining the potential impact volumes in the former building area and the agricultural fields results in an estimated total volume of potential impacts of 83,300 cf, or 3,085 cy.

10 Findings and Conclusions

Information gathered for this report indicated the following:

- The compressor station area of the Avocado Site was vacant and undeveloped land from as early as 1904 until grading/terracing was observed in 2010. By 2011, orchards were observed on the graded/terraced potions of the compressor station area.
- The Temporary Staging Area portion of the Avocado Site was vacant and undeveloped land from at least 1904 until between 1967 and 1978 when the area was first observed to be cultivated for agricultural purposes. The Temporary Staging Area has been used for such purposes from that time to the present day.
- The compressor station area of the Avocado Site is adjoined by a mix of vacant and undeveloped land to the north and west, and agricultural land (orchard) to the east and south.
- The Temporary Staging Area portion of the Avocado Site is adjoined by a mix of agricultural land to the north and east, vacant land and a road to the west, and a road and RV park to the south.
- Parts of the roadway/utility corridor portion of the Avocado Site have been used for agricultural purposes (fields and support structures) since as early as 1927.
- The southernmost portion of the roadway/utility corridor included a building (likely a building associated with agricultural operations) within the Avocado Site. These areas likely had organochlorine pesticide use or storage. Residual concentrations of organochlorine pesticides may persist in the shallow soils in these areas.

This assessment revealed the long-term agricultural use of the Temporary Staging Area of the Avocado Site may have resulted in elevated concentrations of pesticide-related compounds (organochlorine pesticides and metals) in shallow soils. Petroleum hydrocarbon impacts to soil may also be located near the structures on the southern portion of the Avocado Site.

The assessment revealed the potential presence of the following estimated impacted soils:

- Proposed Compressor Station Area no anticipated soil impacts
- Roadway/Utility Corridor approximately 3,085 cy of potentially impacted soils

11 Report Limitations

The findings and conclusions presented in this report are professional opinions based solely on the indicated data described in this report and our interpretation of the available historical information and documents reviewed. This desktop hazards assessment does not meet the burden of the ASTM Standard for Phase I environmental site assessments. Dudek makes no warranty as to the accuracy of statements made by others or the accuracy of information included in documentation reviewed in connection with this study. This study was not intended to be a definitive investigation of potential contamination at the Avocado Site, and the recommendations do not necessarily include all conditions that may be present. It is possible that conditions or contamination exist at the Avocado Site that have not been previously identified or that are not identified in this report.

No warranties or guarantees or representations, expressed or implied, are made by Dudek, except for the representation that this report has been prepared in accordance with current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professionals performing the same or similar services in the same or similar locality. The conclusions are intended exclusively for the purpose outlined herein and may not be suitable for, or relied upon, by others, and any use of this document is at the sole risk of the user, SoCalGas.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in bold italics are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal

Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/21/2025 has revealed that there are 11 ENVIROSTOR sites within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

Notify 65: Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

A review of the Notify 65 list, as provided by EDR, and dated 09/05/2024 has revealed that there is 1 Notify 65 site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page	
SEMPRA ENERGY	1555 OLIVE ST N	SE 1/2 - 1 (0.765 mi.)	A4	82	

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

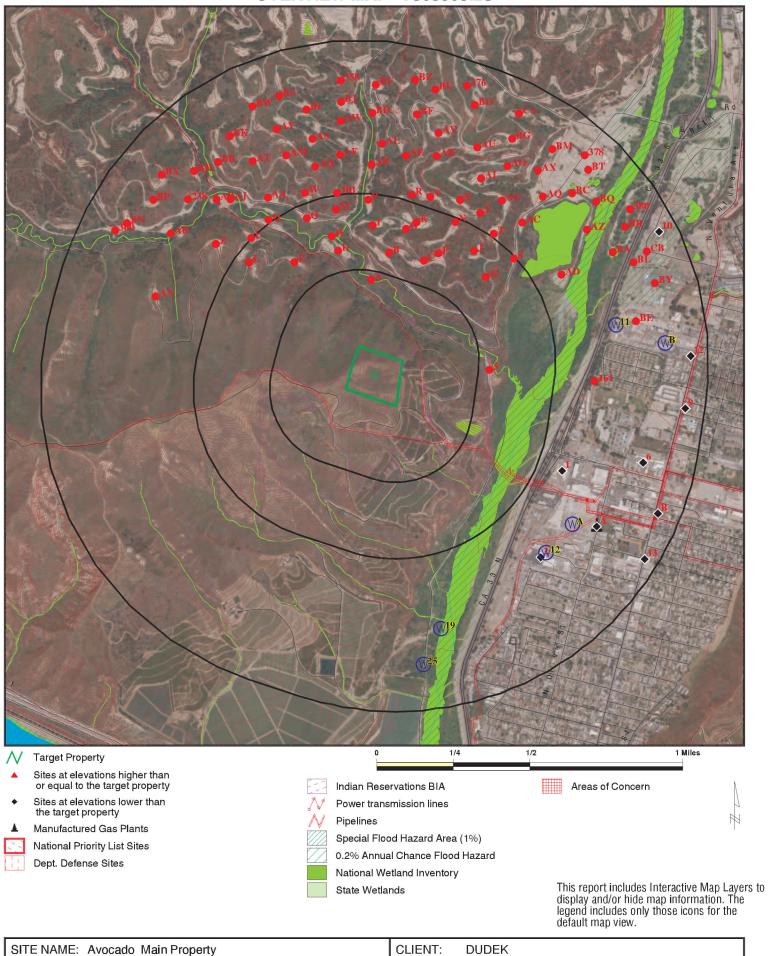

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Α5 SE 1555 NORTH OLIVE STREET 1/2-1 VENTURA, CA 93001

0.765 mi.

Site 3 of 3 in cluster A 4039 ft.

Relative: EDR MGP:

Lower Prior to MGP operations in 1905, an ice factory and an electrical light works had been operating on the site. In 1905, the ice factory and electrical light Actual:

works were removed and Manufactured Gas Plant (MGP) was constructed. The plant 65 ft.

was then soldto Ventura County Power Company in 1907 who continued to operate the facility until 1917. The property was then sold to Southern California

Edison (Edison) which owned and operated the gas plant until its sale to the

Southern Counties Gas Company in 1919. When Southern Counties obtained the site

in 1919 from Edison, no further additions or construction for MGP operations were completed. The MGP was subsequently removed from service in 1920. N/A

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter

6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or

disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month

if all of the following conditions are met: (1) The quantity of

hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount

greater than one kilogram for more than 90 days.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

storers, and disposers of hazardous waste.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

GEOCHECK®-PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

AVOCADO MAIN PROPERTY NOT REPORTED VENTURA, CA 93001

TARGET PROPERTY COORDINATES

Latitude (North): 34.304523 - 34° 18' 16.28" Longitude (West): 119.311797 - 119° 18' 42.47"

Universal Tranverse Mercator: Zone 11 UTM X (Meters): 287249.3 UTM Y (Meters): 3798146.0

Elevation: 594 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 50006233 VENTURA, CA

Version Date: 2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

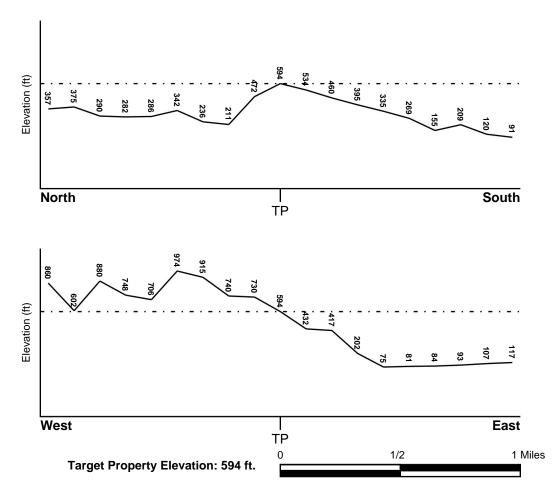

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property FEMA Source Type

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

VENTURA YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: MALIBU

Soil Surface Texture: loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 77 inches

Depth to Watertable Min: > 0 inches

2	22 inches	59 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.8 Min: 6.1		

Soil Map ID: 9

Soil Component Name: Azule

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward

movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information								
	Воц	ındary		Classi	Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	hydraulic conductivity micro m/sec	Soil Reaction (pH)	
1	0 inches	9 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.1

3	40 inches	59 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.1		

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing

Department of Conservation Telephone: 916-445-9686

Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558 Radon Database for California

Area Radon Information Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

Status: Backlog Facility Id: 56750014

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/21/2025 has revealed that there are 7 ENVIROSTOR sites within approximately 1 mile of the target property.

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 9 LUST sites within approximately 0.5 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 8 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

APNS: 071-0-171-90, 071017109

Description: Former auto junk yard that had an hydraulic crusher on site. The

property was sold in 2007 to a new owner and operations were shut down by Ventura City Fire Department (VCFD). Site was formally

transferred to DTSC on December 14, 2007. Site was sampled by RP and DTSC in separate sampling events. Lead was found to be a contaminant as well as motor oil, diesel oil, PAH's and metals. New owner is in contact with DTSC, wants to clean up site for future reuse. Site has illegally excavated and moved contaminated soil, DTSC issued a stop work order and notice of non-compliance on March 30, 2010. The case was referred to Enforcement and is currently under investigation. In May 2015, DTSC was notified about grading on Site. DTSC was in contact with the RP and the operator who had since leased the site.

In October 2015, a scoping meeting was held with the RP s

representative and DTSC. A workplan was submitted subsequently in May

2016 which was approved in April 2017. The consultants have until

June 30, 2017 to start implementation of the workplan.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

COAST ARTILLERY CAMP (Continued)

1018283003

Description:

he Army acquired use of the property from the County of Ventura by a permit agreement (LA 418) on 4 August 1942. The agreement specified the size of the property as 10 acres. The site is accessible only by foot, from the Emma Wood State Park day use or camping area. A foot trail leading from the State Park campground area to the subject site passes beneath the Southern Pacific Railroad tracks that parallel the coast between the beach and U.S. Highway 101. This trail leads to a network of nature trails that meander through a varied coastal dune ecosystem and wilderness preserve, developed as part of the State Park recreational area and the City of Ventura Seaside Wilderness Park. The entire area is part of a conservation effort by the California State Parks Department, the City of Ventura, and the Coastal Conservancy to preserve this unique ecosystem where it still exists, as well as

restore coastal dune scrub communities where they have been degraded or eliminated. The nature trail system extends approximately 1/4 mile to the site of the former Coast Artillery Camp. Improvements on site included an undetermined number of buildings of wood-frame and tarpaper construction (at least two), a rifle range, asphalt roads, an

ammunition magazine, and two Panama gun mounts for two 155-mm Long Tom

guns.

The Army acquired use of approximately 10 acres from the County of History:

Ventura by permit agreement on 4 August 1942. On-site training included rifle range practice, parade ground drills, and monthly live firing of Long Tom guns at towed targets offshore. The U.S. terminated the permit agreement on 15 May 1945. The site is now owned by the City of Ventura and is the location of the Seaside Wilderness Park, which comprises a network of nature trails within a varied coastal dune ecosystem and wilderness preserve area. This area is part of a joint California State Parks Department, City of Ventura, and Coastal Conservancy conservation project to preserve and enhance the coastal

dune ecosystem in this area.

Comments: The Department received a referral dated June 28, 1993 from the

County of Ventura - Environmental Health Division. During the County inspection, it appeared that transformers that may be contaminated with polychlorinated biphenyls (PCBs) transformer oil had leakedon to the ground surface. Due to the evidence of contamination onsite, the

Department recommends PEA.

Feature Description: The Site Has Be

The Site Has Been The Location Of A Public Park And Fairgrounds Since It Was Originally Deeded To The County Of Ventura In 1909. The California National Guard (Cng), A Non-Dod Entity, First Acquired Use Of The Site In 1930 As The Annual Training Grounds For A Coastal Artillery Unit Of The Cng. Training Activities On Site Were Limited To Mobility And Bivouac Training. Artillery Practice Was Conducted Off Site, In The Mid-Thirties, A Local Cng Field Artillery Unit Acquired Full-Time Use Of Portions Of The Site, Namely The Pavilion And Warehouse, For Use As An Armory And Vehicle Storage, Respectively. Cng Use Of The Site Continued Until The Onset Of Wwii When The Site Became The Command Post For The Four Artillery Batteries And Multiple Searchlight Units Stationed Between Point Mugu And Santa Barbara. Which Lasted For The Duration Of The War. Improvements On Site During This Period Included The Construction Of A Number Of Buildings (Barracks, Small Mess Houses W/ Grease Traps, Tent Houses), Three Grease Racks, An Incinerator, And Numerous Gravel Roads. None Of The Dod Improvements Remain At The Site. The Site. Which Now Encompasses 62 Acres, Is Owned And Maintained By The State Of California With The Exception Of A Public Road, Constructed By The City Of Ventura In 1989 For Public Access To The Local Beach And Surfing Location. As Part Of Road Construction Activities, An Underground Storage Tank Containing Gasoline Was Removed From The Site Which Remains On The Active Sites List With The County Of Ventura. Installation Of The Ust Was Subsequent To Dod Use Of The Site. Currently, The Main Use Of The Site Is For The Annual State Agricultural Fair That Occurs Each Year In August. The Site Is Secondarily Used For Other Weekend Exhibits And Expositions.

NO SITES FOUND

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation
and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database
includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste
as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate
less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Elevation: 27 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 50006233 VENTURA, CA

Version Date: 2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

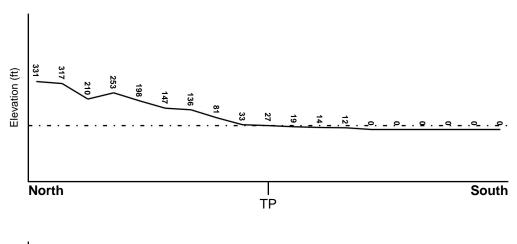

TOPOGRAPHIC INFORMATION

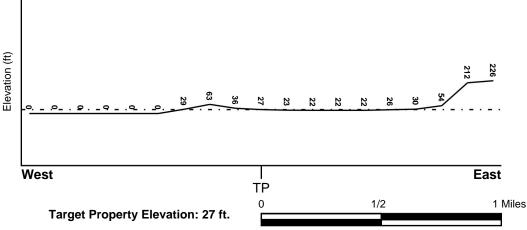

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Additional Panels in search area: FEMA Source Type

06111C0745E FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

VENTURA YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CAMARILLO

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward

movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

	Soil Layer Information								
	Bou	ındary		Classi	fication	Saturated hydraulic	Con Noachon		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec			
1	0 inches	24 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9		
2	24 inches	40 inches	stratified sandy loam to silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9		
3	40 inches	79 inches	fine sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 7.9		

Soil Map ID: 2

Soil Component Name: **CALLEGUAS**

Soil Surface Texture: channery loam

Class D - Very slow infiltration rates. Soils are clayey, have a high Hydrologic Group:

water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches Depth to Watertable Min: > 0 inches

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Project Description

This project consists of drilling 2 new replacement wells and 1 redrill well, including all electrical equipment, to replace 3 wells that have been plugged and abandoned. 2 of the wells are producers and 1 well is an injector. The locations are located on the Taylor lease approximately a half mile west and east of Highway 33 and Shell Road exit. The wells are located in the Ventura Oil Field and the wells and their locations are as follows:

NOTES:

- 1. This Zoning Clearance becomes valid once the fees are paid.
- 2. This Zoning Clearance will be nullified pursuant to the Zoning Ordinance if the information provided by the applicant was not full, true and correct; it was issued erroneously; or it does not comply with the terms and conditions of the permit

ZONING CLEARANCE NO. ZC07-1046

originally granting the use.

3. This Zoning Clearance expires within 180 days of its issuance date unless a Building Permit is issued. Once a building permit is issued, construction must commence within 180 days. This Zoning Clearance expires if construction does not commence within 180 days of issuance of a building permit.

APN: 060-0-310-185

- 4. The property owner is responsible for identifying all property lines and ensuring that all the requirements of this permit are complied with.
- 5. That authorizations by other County Departments that exceed the allowable limits noted herein do not excuse the property owner from complying with the provisions of this permit. (The stricter provisions apply).
- 6. The proposed project will not result in the removal of more than 50% of the roof or floor area of a non-conforming structure.
- 7. By May 15th of each year the property owner shall submit a "verification report" and applicable fees demonstrating to the Planning Director's satisfaction that the farmworker/animal caretaker meets the Zoning Ordinances' applicable employment criteria.
- 8. If the parcel numbers cited in this permit are within the boundary of a Homeowner's Association, additional review and approval of the project may by required by the HOA's Conditions, Covenants & Restrictions (CC&R's). HOA review and approval is the responsibility of the property owner.

CONDITIONS:

DECLARATIONS:

BY SIGNING BELOW I CERTIFY THE FOLLOWING:

- I am the owner of the subject property or I am the authorized agent of the property owner and have his/her permission to obtain this permit.
- I have noted on the attached plot plan all of the following attributes: existing and proposed structures, Protected Trees
 (Oaks, Sycamores, and any 30+" diameter trees), marshes, wetlands, streams, rivers, landslides, edges and toes of
 slopes, abandoned or active oil wells, septic systems and leach fields.
- The information provided in this Zoning Clearance and attached plot/site plans, floor plans and elevations are full, true and correct.
- I have reviewed, read and understand the terms, notes and conditions of this permit and as depicted in related
 attachments, and agree to abide by them and all other provisions of the Ventura County Zoning Ordinance. I further
 understand that the permit can be nullified for cause as noted above.

Date Contractors Signature OWNER-BUILDER DECLARATION I hereby affirm under penalty of perjury that I am exempt from the Contractors' State License Law for the reason(s) indicated below by the checkmark(s) I have placed next to the applicable item(s) (Section 7031.5, Business and Professions Code: Any city or county that requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for the permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors' State License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt from licensure and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500)): I, as owner of the property, or my employees with wages as their sole compensation, will do \Box all of or \Box portions of the work, and the structure is not intended or offered for sale (Section 7044, Business and Professions Code: The Contractors' State License Law does not apply to an owner of property who, through employees' or personal effort, bullds or improves the property, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the Owner-Builder will have the burden of proving that it was not built or improved for the purpose of sale). ß I, as owner of the property, am exclusively contracting with licensed Contractors to construct the project (Section 7044, Business and Professions Code: The Contractors' State License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a licensed Contractor pursuant to the Contractors' State License Law). I am exempt from licensure under the Contractors' State License Law for the following reason: By my signature below I acknowledge that, except for my personal residence in which I must have resided for at least one year prior to completion of the improvements covered by this permit, I cannot legally sell a structure that I have built as an owner-builder if it has not been constructed in its entirety by licensed contractors. I understand that a copy of the applicable law, Section 7044 of the Business and Professions Code, is available upon request when this application is submitted or at the following Web site: http://www.leginfo.ca.gov/calaw.html. Signature of Property Owner or Owners Authorized Agent Date GENERAL ACKNOWLEDGEMENT (FOR ALL APPLICANTS) I certify that I have read this application and state that the above information is correct. I agree to comply with all county ordinances and state laws relating to building construction, and hereby authorize representatives of this city and county to enter upon the above mentioned property for inspection purposes. Additionally, I understand that Section 105.5 of the Ventura County Building Code (VCBC) 2007 Edition states that: "Every permit issued by the Building Official under the provisions of this Code shall expire by limitation and become null and void, if the building or work authorized by such permit is not commenced within 180 days after the date of Issuance of such permit or if the building or work authorized by such permit is suspended or abandoned at any time after the work is commenced for a period of 180 days, or if the work authorized by such permit does not receive final inspection approval within 3 years from the issuence date of the permit". For permit expiration purposes, "SUSPENDED OR ABANDONED" shall be measured as elapsed time between "APPROVED REQUIRED INSPECTIONS" as delineated in 2007 CBC Appendix Chapter 1, Sections 109.3.1 through 109.3.6, 109.3.8, 109.3.9, and 109.3.10. I further understand that I will not be notified by the County of Ventura prior to expiration of permit number E12-000065 Signature of Owner, Owner's Authorized Agent, Contractor, or Applicant FOR OFFICE USE ONLY Date: 2-1-12 Final inspection Approval: -12-000065

NOTES:

- 1. This Zoning Clearance becomes valid once the fees are paid.
- This Zoning Clearance will be nullified pursuant to the Zoning Ordinance if the information provided by the applicant was not full, true and correct; it was issued erroneously, or it does not comply with the terms and conditions of the permit originally granting the use.
- This Zoning Clearance expires within 180 days of its issuance date unless a Building Permit is issued. Once a building
 permit is issued, construction must commence within 180 days. This Zoning Clearance expires if construction does not
 commence within 180 days of issuance of a building permit.
- The property owner is responsible for identifying all property lines and ensuring that all the requirements of this permit are complied with.
- That authorizations by other County Departments that exceed the allowable limits noted herein do not excuse the property owner from complying with the provisions of this permit. (The stricter provisions apply).
- The proposed project will not result in the removal of more than 50% of the roof or floor area of a non-conforming structure.
- By May 15th of each year the property owner shall submit a "verification report" and applicable fees demonstrating to the
 Planning Director's satisfaction that the farmworker/animal caretaker meets the Zoning Ordinances' applicable employment
 criteria.
- 8. If the parcel numbers cited in this permit are within the boundary of a Homeowner's Association, additional review and approval of the project may by required by the HOA's Conditions, Covenants & Restrictions (CC&R's). HOA review and approval is the responsibility of the property owner.

BY SIGNING BELOW I CERTIFY THE FOLLOWING:

- I am the owner of the subject property or I am the authorized agent of the property owner and have his/her permission to obtain this permit.
- I have noted on the attached plot plan all of the following applicable attributes: existing and proposed structures, Protected Trees (Oaks, Sycamores, and any 30+" diameter trees), marshes, wetlands, streams, rivers, landslides, edges and toes of slopes, abandoned or active oil wells, septic systems and leach fields. I have illustrated all roads, public and private easements, and utilities on the attached plot plan/site plan accurately and accept responsibility for any encumbrances, restrictions, or agreements on the subject property.
- I have illustrated all roads, public and private easements, and utilities on the attached plot plan/site plan accurately and

accept responsibility for any encumbrances, restrictions, or agreements on the subject property

- The information provided in this Zoning Clearance and attached plot/site plans, floor plans and elevations are full, true and correct
- I have been informed that I am responsible for contacting the applicable Homeowners Association or Property Owners
 Association to ensure compliance with the CC&R's.
- I have reviewed, read and understand the terms, notes and conditions of this permit and as depicted in related attachments, and agree to abide by them and all other provisions of the Ventura County Zoning Ordinance. I further understand that the permit can be nullified for cause as noted above.

Requirements for Foundation and Soil Investigation Reports

Ventura County Building Code section 1802.1 states that, when required by the Building Official, the classification and engineering properties of the soil at a building site shall be determined in accordance with Section 1802.2 through 1802.8. When a Foundation and Soil Investigation report is required, it must be prepared by a California licensed Engineer with experience in soils engineering. For projects requiring geologic evaluations, such evaluation shall be prepared by a California licensed engineering Geologist and be based on the guidelines presented in the California department of Conservation Special Publication 117.

Except as provided for in the table below, and supported by an approved Waiver form B-50, all projects where foundations are required to support the building or structure shall obtain a Foundation and Soil Investigation

Report prior to submitting plans to the Buildir USE / OCCUPANCY	HEIGHT OR STORIES	FLOOR AREA	FOUNDATION DESIGN REQUIREMENTS 6

rootnotes

- 1- Total proposed floor areas of attached or detached buildings combined per items 1 and 2 shall not exceed 1000 square
- 2- Exemption is limited to foundations where construction will take place on an existing natural level lot containing no fill.

3- When not exempted from plan check and inspection in accordance with VCBC Section 105.1.3 and 105.1.4.

4- When supported by a letter from a qualified geotechnical engineer or geologist that liquefaction is not probable, one additional story may be allowed. VCBC 1802.4 Ex #1.

5- Gutter and downspouts are required per Table 1805.4.2 Footnote #13

- 6- When an Expansion Index Report is provided by a Soil Engineer, the foundation depth may be reduced to equal the corresponding Index in Table 1805.4.2.
- 7- For retaining wall design, use active fluid pressure as noted below. Grading permit is required when the quantity of cut or fill exceeds 50 cubic yards.

Surface Slope	Fluid Pressure			
LEVEL	30#/cft			
5 to 1	32#/cft			
4 10 1	35#/cft			
2 to 1	38#/cft			
1.5 to 1	-55#/cft			
1 to 1	80#/cft			

8- Property located in earthquake fault hazard zone area does not qualify for waiver regardless of that area.

*Refer to next page for foomotes (1) through (14).

- 1. Premoistening is required where specified in Table 1805.4.2 in order to achieve maximum and uniform expansion of the soil prior to construction and thus limit structural distress caused by uneven expansion and shrinkage. Other systems which do not include premoistening may be approved by the Building Official when such alternatives are shown to provide equivalent safeguards against the adverse effects of expansive soil.
- 2. Reinforcement for continuous foundations shall be placed not less that 3" above the bottom of the footing and not less than 3" below the top of the stem.
- 3. Reinforcement shall be placed at mid depth of slab.
- 4. After premoistening, the specified moisture content of soils shall be maintained until concrete is placed. Required moisture content shall be verified by an approved testing laboratory not more than 24 hours prior to placement of concrete.
- 5. Crawl spaces under raised floors need not be pre-moistened except under interior footings. Interior footings which are not enclosed by a continuous perimeter foundation system or equivalent concrete or masonry moisture barrier complying with Footnote # 12 of Table 1805.4.2 shall be designed and constructed as specified for perimeter footings in Table 1805.4.2.
- 6. Foundation stem walls which exceed a height of three times the stem thickness above lowest adjacent grade shall be reinforced in accordance with Chapter 21 and Section 1914 in the IBC, or as required by engineering design, whichever is more restrictive.
- 7: Bent reinforcing bars between exterior footing and slab shall be omitted when floor is designed as an independent, "floating' slab.

- 8. Where frost conditions or unusual conditions beyond the scope of this table are found, design shall be in accordance with recommendations of a foundation investigation. Concrete slabs shall have a minimum thickness of 4 inches when the expansion index exceeds 50.
- The ground under a raised floor system may be excavated to the elevation of the top of the perimeter footing, except where otherwise required by engineering design or to mitigate groundwater conditions.
- 10. GRADE BEAM, GARAGE OPENING. A grade beam not less than 12" x 12" in cross section, or 12" x depth required by Table 1805.4.2, whichever is deeper, reinforced as specified for continuous foundations in Table 1805.4.2, shall be provided at garage door openings.
- 11. Where a post-tensioning slab system is used, the width and depth of the perimeter footings shall meet the requirements of this table.
- 12. An approved vapor barrier shall be installed below concrete slab-on-grade floors of all residential occupancies in such a manner as to form an effective barrier against the migration of moisture into the slab. When sheet plastic material is employed for this purpose it shall be not less than 6 mils (.006 inch) in thickness. The installation of a vapor barrier shall not impair the effectiveness of required anchor bolts or other structural parts of a building. Foundations at the perimeter of concrete floor slabs shall form a continuous moisture barrier of Portland cement concrete or solid grouted masonry to the depths required by Table 1805.4.2.
- 13. When buildings are located on expansive soil having an expansion index greater than 50, gutters, downspouts, piping, and/or other non-erosive devices shall be provided to collect and conduct rainwater to a street, storm drain, or other approved watercourse or disposal area.
- 14. Fireplace footings shall be reinforced with a horizontal grid located 3" above the bottom of the footing and consisting of not less than No. 4 Bars at 12" on center each way. Vertical chimney reinforcing bars shall be hooked under the grid. Depth of fireplace chimney footings shall be no less than that required by Table 1805.4.2.

COUNTY OF VENTURA STORMWATER QUALITY MANAGEMENT PROGRAM

BEST MANAGEMENT PRACTICES FOR CONSTRUCTION LESS THAN 1 ACRE

Prior to the issuance of any construction/grading/building permit and/or the commencement of any clearing, grading or excavation, contractors of projects with <u>construction activities that disturb less than one acre of soil</u>, shall prepare and submit this Best Management Practices (BMPs) worksheet on the form provided herein.

The purpose of the implementing BMPs is to effectively prohibit the entry of pollutants from the construction site into the storm drain system during construction. Erosion and sediment source control BMPs should be considered for both active and inactive construction areas. BMPs for wind erosion and dust control are also included. The BMPs may require modification as the project progresses and as conditions warrant.

The BMPs shall be implemented in accordance with the National Pollutant Discharge Elimination System (NPDES) Ventura Countywide Stormwater Municipal Permit No. CAS004002 (Order 10-0108) dated July 8, 2010.

The applicant/owner is responsible for ensuring that all project contractors and subcontractors implement all applicable BMPs.

Project Architect/ Engineer of Record, or Authorized Qualified Designee:

As the architect, or engineer of record, or authorized qualified designee, I have selected appropriate BMPs to effectively minimize the negative impacts of this project's construction activities on storm water quality. The project owner and contractor are aware that the selected BMPs must be installed, monitored, and maintained to ensure their effectiveness. The BMPs not selected for implementation are redundant or deemed not applicable to the proposed construction activity.

COUNTY OF VENTURA

STORMWATER PERMIT REQUIREMENTS FOR CONSTRUCTION ACTIVITIES QUESTIONNAIRE

The Ventura County Municipal Stomwater Permit requires implementation of an effective combination of Best Management Practices (BMPs) at construction sites in order to prevent erosion and sediment loss, or the discharge of construction wastes to the storm drain system (available at http://onestoppermit.ventura.org/, subpart 4.F of the Los Angeles Regional Water Quality Control Board Permit Order No. 10-0108). Additionally, construction activities causing one acre or more of soil disturbance (or less than one acre but as a part of a larger common area of development or sale) require coverage under the California Statewide General Construction Permit CAS000002, available online at

http://www.waterboards.ca.gov/water_issues/programs/stormwater/construction.shtml.

Please place a check mark in all the boxes that apply to project.

Construction activities causing less than 1 acre of soil disturbance:

 Complete and submit SW-1 (Best Management Practices for Construction Less than 1 Acre) with the Building Permit application.

☐ Construction activities with soil disturbance of 1 acre or greater:

- As required by the State Water Resources Control Board (SWRCB) State General Construction Permit No.CAS000002, the following items must be completed and submitted to the SWRCB:
 - Stormwater Pollution Prevention Plan (SWPPP)
 - Notice of Intent (NOI)
 - SWRCB fee

(Additional information available online at:

http://www.waterboards.ca.gov/water_issues/programs/stormwater/construction.shtml)

- Complete SW-2 (Best Management Practices for Construction 1 Acre or Greater).
- Include completed form SW-2 in the prepared site-specific SWPPP and submit with the Building Permit
 application and to the Watershed Protection District County Unincorporated Stormwater Program for
 certification as a Local SWPPP/SW-2. If your project requires a Grading Permit, then submit
 documentation with Grading Permit application instead.

☐ Construction Activities at High Risk Sites (see map and definition on back):

- Complete and submit SW-HR (Best Management Practices for Construction at High Risk Sites worksheet) and SW-1 or Local SWPPP/SW-2 (whichever is applicable as listed above) with the Building Permit application.
- Qualified SWPPP Developer (QSD), Qualified SWPPP Practitioner (QSP), or personnel or consultants who are Certified Professionals in Erosion and Sediment Control (CPESC) shall inspect the site:
 - at the time of BMP installation,
 - at least weekly between October 1 and April 15, and
 - at least once each 24 hour period during a storm event that generates runoff from the site.
- Retain records of inspection reports for review by the Building Permit inspectors upon request.

REQUIREMENTS FOR ALL CONSTRUCTION SITES

- A copy of the required forms (SW-1, Local SWPPP/SW-2, or SW-HR as applicable) must be kept at the site during construction activities.
- Implement all required BMPs during construction.

County of Ventura Stormwater Permit Requirements for Construction Activities Questionnaire

ADDITIONAL INFORMATION:

Documents referenced in this questionnaire area available at http://onestoppermit.ventura.org/.

DEFINITIONS:

Construction activity includes any construction or demolition activity, clearing, grading, grubbing, or excavation or any other activity that results in a land disturbance. Construction does not include emergency construction activities required to immediately protect public health and safety or routine maintenance activities required to maintain the integrity of structures by performing minor repair and restoration work, maintain original line and grade, hydraulic capacity, or original purpose of the facility. See "ROUTINE MAINTENANCE" definition for further explanation. Where clearing, grading or excavating of underlying soil takes place during a repaving operation, State General Construction Permit Order No. 2009-0009-DWQ (CAS000002) coverage is required if more than one acre is disturbed or the activities are a part of a larger plan.

ROUTINE MAINTENANCE - Routine maintenance projects include, but are not limited to projects conducted to:

- Maintain the original line and grade, hydraulic capacity, or original purpose of the facility.
- Perform as needed restoration work to preserve the original design grade, integrity and hydraulic capacity of flood control facilities.
- Includes road shoulder work, re-grading dirt or gravel roadways and shoulders and performing ditch cleanouts.
- 4. Update existing lines^A and facilities to comply with applicable codes, standards, and regulations regardless if such projects result in increased capacity.
- 5. Repair leaks

Routine maintenance does not include construction of new lines⁸ or facilities resulting from compliance with applicable codes, standards and regulations.

<u>Notes:</u> A Update existing lines includes replacing existing lines with new materials or pipes. B New lines are those that are not associated with existing facilities and are not part of a project to update or replace existing lines.

HIGH RISK SITES:

- (i) Construction sites on hillsides (on average 20% or greater slope); and
- (ii) Construction sites that **directly discharge**¹ to a waterbody listed on the CWA § 303 (d) list for siltation or sediment; or
- (iii) Construction activities that occur within or directly adjacent² to an Environmentally Sensitive Area³. Refer to Figure 1 (Ventura County Environmentally Sensitive Areas) illustrating ESA locations in Ventura County.
- Directly Discharge means outflow from a drainage conveyance system that is composed entirely or predominantly of flows from the subject, property, development, subdivision, or industrial facility, and not commingled with the flows from adjacent lands.
- Directly Adjacent means situated within 200 feet of the contiguous zone required for the continued maintenance, function, and structural stability of the environmentally sensitive area.
- Environmentally Sensitive Area (ESA) means an area "in which plant or animal life or their habitats are either rare or especially valuable because of their special nature or role in an ecosystem and which would be easily disturbed or degraded by human activities and developments" (Reference: California Public Resources Code § 30107.5). ESAs will include Clean Water Act 303d Listed Water Bodies in all reaches that are unimproved, all California Coastal Commission's Environmentally Sensitive Habitat Areas as delineated on maps in Local Coastal Plans and the Regional Water Quality Control Board's Basin Plan's Rare, Threatened or Endangered Species (RARE) and Preservation of Biological Habitats (BIOL) designated waterbodies. The California Department of Fish and Game's Significant Natural Areas map will be considered for inclusion as the department field verifies the designated locations. Watershed restoration projects will be considered for inclusion as the department field verifies the designated locations.

For information on requirements for Qualified SWPPP Developer (QSD) and Qualified SWPPP Practitioner (QSP), refer to http://www.waterboards.ca.gov/water-issues/programs/stormwater/construction.shtml.

For information on requirements for Certified Professionals in Erosion and Sediment Control (CPESC), refer to http://www.cpesc.net/

NOTES:

- This Zoning Clearance becomes valid once the fees are paid.
- 2. This Zoning Clearance will be nullified pursuant to the Zoning Ordinance if the information provided by the applicant was not full, true and correct; it was issued erroneously; or it does not comply with the terms and conditions of the permit originally granting the use.
- 3. This Zoning Clearance expires within 180 days of its issuance date unless a Building Permit is issued. Once a building permit is issued, construction must commence within 180 days. This Zoning Clearance expires if construction does not commence within 180 days of issuance of a building permit.
- 4. The property owner is responsible for identifying all property lines and ensuring that all the requirements of this permit are complied with.
- That authorizations by other County Departments that exceed the allowable limits noted herein do not excuse the property owner from complying with the provisions of this permit. (The stricter provisions apply).
- 6. The proposed project will not result in the removal of more than 50% of the roof or floor area of a non-conforming structure.
- 7. By May 15th of each year the property owner shall submit a "verification report" and applicable fees demonstrating to the Planning Director's satisfaction that the farmworker/animal caretaker meets the Zoning Ordinances' applicable employment

criteria.

8. If the parcel numbers cited in this permit are within the boundary of a Homeowner's Association, additional review and approval of the project may by required by the HOA's Conditions, Covenants & Restrictions (CC&R's). HOA review and approval is the responsibility of the property owner.

BY SIGNING BELOW I CERTIFY THE FOLLOWING:

- I am the owner of the subject property or I am the authorized agent of the property owner and have his/her permission to obtain this permit.
- I have noted on the attached plot plan all of the following applicable attributes: existing and proposed structures, Protected Trees (Oaks, Sycamores, and any 30+" diameter trees), marshes, wetlands, streams, rivers, landslides, edges and toes of slopes, abandoned or active oil wells, septic systems and leach fields. I have illustrated all roads, public and private easements, and utilities on the attached plot plan/site plan accurately and accept responsibility for any encumbrances, restrictions, or agreements on the subject property.
- I have illustrated all roads, public and private easements, and utilities on the attached plot plan/site plan accurately and accept responsibility for any encumbrances, restrictions, or agreements on the subject property
- The information provided in this Zoning Clearance and attached plot/site plans, floor plans and elevations are full, true and correct.
- I have been informed that I am responsible for contacting the applicable Homeowners Association or Property Owners
 Association to ensure compliance with the CC&R's.
- I have reviewed, read and understand the terms, notes and conditions of this permit and as depicted in related attachments, and agree to abide by them and all other provisions of the Ventura County Zoning Ordinance. I further understand that the permit can be nullified for cause as noted above.

SPECIAL CONDITIONS:

I am applying for zoning approval for a new electrical service for my water pump. I understand that this electrical service is to be used solely for this purpose and does not authorize the construction of any structures or legalize an illegally created parcel.

I authorize the County of Ventura to order my electrical service terminated if any of the following conditions occur.

- 1. Agricultural production or animal husbandry is not commenced within ninety days after issuance of my electrical permit.
- 2. The electrical service is used for any other purpose other than that listed above.

DIVISION OF BUILDING AND SAFETY

Jim MacDonald
Building Official

NOTICE TO PROPERTY OWNER

Item **B13** on Permit Processing Checklist (SECTION 19825 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA)

Dear Property Owner:

An application for a building permit has been submitted in your name listing yourself as the builder of the property improvements specified at:

1159 W. Main St. Ventura CA.

We are providing you with an Owner-Builder Acknowledgment and Information Verification Form to make you aware of your responsibilities and possible risk you may incur by having this permit issued in your name as the Owner-Builder.

We will not issue a building permit until you have read, initialed your understanding of each provision, signed, and returned this form to us at our official address indicated. An agent of the owner cannot execute this notice unless you, the property owner, obtain the prior approval of the permitting authority.

OWNER'S ACKNOWLEDGMENT AND VERIFICATION OF INFORMATION

DIRECTIONS: Read and initial each statement below to signify you understand or verify this information.

LCTS 1. I understand a frequent practice of unlicensed persons is to have the property owner obtain an "Owner-Builder" building permit that erroneously implies that the property owner is providing his or her own labor and material personally. I, as an Owner-Builder, may be held liable and subject to serious financial risk for any injuries sustained by an unlicensed person and his or her employees while working on my property. My homeowner's insurance may not provide coverage for those injuries. I am willfully acting as an Owner-Builder and am aware of the limits of my insurance coverage for injuries to workers on my property.

KS2. I understand building permits are not required to be signed by property owners unless they are responsible for the construction and are not hiring a licensed Contractor to assume this responsibility.

13. I understand as an "Owner-Builder" I am the responsible party of record on the permit. I understand that I may protect myself from potential financial risk by hiring a licensed Contractor and having the permit filed in his or her name instead of my own.

KJS4. I understand Contractors are required by law to be licensed and bonded in California and to list their license numbers on permits and contracts.

5. I understand if I employ or otherwise engage any persons, other than California licensed Contractors, and the total value of my construction is at least five hundred dollars (\$500), including labor and materials, I may be considered an "employer" under state and federal law.

6. I understand if I am considered an "employer" under state and federal law, I must register with the state and federal government, withhold payroll taxes, provide workers' compensation disability insurance, and contribute to unemployment compensation for each "employee." I also understand my failure to abide by these laws may subject me to serious financial risk.

MAIN OFFICE, L #1720

800 South Victoria Avenue, Ventura, CA 93009 (805) 654-2771 FAX (805) 648-9212

BRANCH OFFICE

East County: 3855-F Alamo Street, L #5915, Room 2019-A, Simi Valley, CA 93065 (805) 582-8064 FAX (805) 582-8085

BS25 Page 1 of 2 7. I understand under California Contractors' State License Law, an Owner-Builder who builds single-family residential structures cannot legally build them with the intent to offer them for sale, unless all work is performed by licensed subcontractors and the number of structures does not exceed four within any calendar year, or all of the work is performed under contract with a licensed general building Contractor. 138. I understand as an Owner-Builder if I sell the property for which this permit is issued, I may be held liable for any financial or personal injuries sustained by any subsequent owner(s) that result from any latent construction defects in the workmanship or materials. KIS 9. I understand I may obtain more information regarding my obligations as an "employer" from the Internal Revenue Service, the United States Small Business Administration, the California Department of Benefit Payments, and the California Division of Industrial Accidents. I also understand I may contact the California Contractors' State License Board (CSLB) at 1-800-321-CSLB (2752) or www.cslb.ca.gov for more information about licensed contractors. KIS 10. I am aware of and consent to an Owner-Builder building permit applied for in my name, and understand that I am the party legally and financially responsible for proposed construction activity at the following address: 灯〜11. I agree that, as the party legally and financially responsible for this proposed construction activity. I will abide by all applicable laws and requirements that govern Owner-Builders as well as employers. 12. I agree to notify the issuer of this form immediately of any additions, deletions, or changes to any of the information I have provided on this form. Licensed contractors are regulated by laws designed to protect the public. If you contract with someone who does not have a license, the Contractors' State License Board may be unable to assist you with any financial loss you may sustain

as a result of a complaint. Your only remedy against unlicensed Contractors may be in civil court. It is also important for you to understand that if an unlicensed Contractor or employee of that individual or firm is injured while working on your property, you may be held liable for damages. If you obtain a permit as Owner-Builder and wish to hire Contractors, you will be responsible for verifying whether or not those Contractors are properly licensed and the status of their workers' compensation insurance coverage.

Before a building permit can be issued, this form must be completed and signed by the property owner and returned to the agency responsible for issuing the permit.

Note: A copy of the property owner's driver's license, form notarization, or other verification acceptable to the agency is required to be presented when the permit is issued to verify the property owner's signature.

This attachment has been provided to identify remaining asbestos (post abatement) and the procedure for its safe removal during demolition.

It is our understanding that Abateco has filed notification with your district for the abatement on this project, and that the start date for abatement is 8/3/2004.

Golden Hills Redevelopment Inc. involvement will be limited to strictly demolition and minor excavation. There will however be some asbestos remaining in the joints of the bolted tanks (where the horizontal and vertical seams meet) and in some of the flanges.

We have attached the asbestos surveys to provide further information regarding types and locations of asbestos. We at Golden Hills Redevelopment Inc. have worked with other air districts to develop a process for the safe removal of this material without the risk of it becoming friable.

Process for removal:

- We will utilize an excavator with shear to cut sections of the tank down and lay them out flat on the ground.
- We then use a torch to cut around the asbestos in such a way as to leave it encased between the tank plates.
- Flanges with asbestos gasket material will not be unbolted but will be cut with the shear or torch on the pipe on both sides of the flange leaving the gasket undisturbed.
- The material, which we refer to as coupons, will then be bagged, tagged and placed in the MP Environmental bin by a certified abatement contractor for later disposal.
- If for any reason asbestos containing material should become disturbed during the demolition process all work will be stopped at that location, site control will be established and the abatement contractor will be called to remove the material.

I am conducting a Phase I Environmental Site Assessment for an approximately 15-acre property located approximately 0.10 miles south of Taylor Ranch Road and 0.28 miles west of Milling Road in Ventura County (property boundary photo to be provided). The property is located on portions of the following two parcels, identified as APNs 060-031-017 and 060-031-018. I am looking for records pertaining to agricultural use (including pesticide, herbicide, and/or insecticide usage or storage) associated with the previously mentioned property. Please let me know if there is any additional information I can help to provide to facilitate this request.

- Inspection Summary

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (SPOT CHECK INSPECTION)

General Comments: This facility maintains a Spill Prevention Control and Countermeasure (SPCC) Plan and the Plan is maintained available for review at the AERA facility located at 1800 School Canyon Rd. in Ventura.

> The updated SPCC Plan is dated 8/1/2019 and was updated to account for an administrative and technical amendment as recorded in the plan, dated 8/1/2019.

The Plan is a PE Certified Plan and is correct for this facility.

Tanks and containers have sized secondary containment.

**Some containers observed stored within individual secondary containment features and were observed to hold rain water from the last storm event. No oil observed. Ensure timely inspection and removal of collected rain water from secondary containment features. Monthly inspections are performed and documented. Inspection documentation maintained on site and reviewed.

Annual briefings for employees are performed and documented. Documentation for employee briefings for 2019 reviewed.

***The Hazardous Waste Program inspection for this facility was performed on 12/23/2019. Due to inclement weather at that time, inspection for the Hazardous Materials Business Plan Program and Aboveground Petroleum Storage Act Program inspections was rescheduled for this date.

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: Verified owner/operator information as reported to the California Environmental Reporting System (CERS).

Complete CERS Hazardous Materials Business Plan submittal available electronically on

Hazardous materials inventory reviewed.

***Operator reports that maximum daily amounts of chemicals stored at "various well sites" will be reviewed to ensure information reported to CERS is accurate. Update CERS accordingly.

For chemicals reported to CERS that were not observed on site at the time of inspection, the facility will determine if these chemicals will no longer be used/stored on site, and if no longer used, the chemicals will be removed from the hazardous materials inventory reported to CERS.

Annotated site maps reviewed.

Verified employee annual training for 2017-2019 on hazardous materials management (MEST - Mandatory Environmental Safety Training, completed annually by all employees). Emergency response plan available and reviewed.

*** Review of the Emergency Response Plan indicates that the CUPA/UPA phone number should be updated

- Inspection Summary

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: Facility owner/operator contact information verified as reported in California Environmental

Reporting System (CERS).

Hazardous material inventory verified on site. Add as noted below.

Site map available and reviewed for accuracy.

Emergency response plan available and reviewed.

Employee training records reviewed for 2013-15. Maintain annual training records for at least

three years.

Your annual HMBP submittal is due on or before 3-16-2016.

Note: An update to your HMBP is required, if at any time during the year there is: a 100% change in inventory, addition of previously unreported hazardous chemical and/or waste. change of address, change of name, change of ownership, or any other substantial change in operation that could inhibit immediate response during an emergency and is separate from the annual update.

Make the following corrections to CERS and submit within 30 days:

- 1. Update Business Activities page to indicate YES, aboveground storage tanks containing 1320 gallons or more of petroleum are stored on site.
- 2. Submit APSA element indicating "stored elsewhere in CERS" and "hazardous material
- 3. Add oil-filled electrical equipment to inventory (Currently inventoried only in SPCC plan).
- 4. Add total oil-filled equipment volume (including but not limited to: pumping units with 55 gallons or greater each).

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: Facility currently operates as a hazardous waste large quantity generator (LQG) of more than 1000 kg per month.

Hazardous waste containers were closed, labeled, accessible, and in good condition.

Acceptable accumulation times noted.

Properly located and maintained spill response kits available on site. Properly maintained fire extinguishers available throughout facility.

EPA ID number verified as active.

Emergency Contingency plan available and reviewed.

Manifests/consolidated disposal receipts from previous three years were available and

reviewed.

Inspection Date: 2/3/2024

(TAY526) oil field in Ventura which is a permitted facility.

On 2/1/2024 at approximately 12:29 p.m., called Chris Logan, Environmental Advisor for details of the incident. Chris Logan stated at 10:25 a.m., a flow line that was in service had a leak at TAYLOR 526 Oil Field at Aera Energy in Ventura. The flow line is attached to a well line and connects to a larger line and header in the system. There was a release of 0.5 barrel of crude oil and 10.0 barrels of produce water on the premises which did not leave the property and no water ways were impacted. Per Chris Logan stated that the crude oil flowed onto some very hard to reach areas in the hills. Due to the rain event today, a team on behalf of Aera Energy has been able to remove contaminated soil by hand due to the saturated ground surface. CD Lyon which was the first contractor on site and Patriot Environmental Services are assisting the facility with the cleanup especially in the hard-to-reach areas that are affected in the remote hills on site. He stated that the flow line that leaked will need to be repaired once the line is excavated to find the failure.

Chris Logan stated that the crude oil and produce water flowed on a vegetative hillside which is part of the oil lease and no waterways have been affected. Per Chris Logan said that the section of the equipment with the non-functional flow line has been shut off and not conveying oil since the discovery of the release this morning.

According to Chris Logan stated that the cleanup is still in process. He stated that he will send a couple photos, segregate the waste streams such as contaminated vegetation, used personal protective equipment, PPE and removed contaminated soil from the release in bins and provide a non-hazardous emergency temporary manifest.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at , https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

- Inspection Summary

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (INSPECTION, ROUTINE)

General Comments: Multi day inspection:

A facility walk through was conducted on 2/3/16 to evaluate tanks, containers and equipment that are used to store liquid petroleum products in aboveground containers.

Health and Safety Code 6.67 (APSA) gives the responsibility and authority of enforcing and implementing this program to CUPA.

APSA specifically excludes "Oil Production tanks" that are subject to Public Resources Code (PRC) 3106 (regulated under DOGGR) from the definition of an aboveground tank. PRC restricts DOGGR's regulatory authority to drilling, operations, maintenance and abandonment of wells and the removal or abandonment of tanks. Additionally, facilities attendant to oil and gas production, including pipelines that are within an oil and gas field are included. If the oil and gas field are outside the oil and gas map boundaries, DOGGER does not regulate them. US EPA has further stated that if a facility is not within the boundaries of the oil and gas field, it must comply with 40 CFR 112.8 and not 40 CFR 112.9. CUPA regulates facilities subject to 40 CFR 112.8 and DOGGR regulates facilities subject to 40 CFR 112.9.

"Oil Production tanks" do not include: totes, drums or tanks of petroleum based materials (diesel or gasoline, motor or hydraulic oils, liquid petroleum waste, petroleum based liquid condensate, gas plant tanks with liquid petroleum products), oil filled equipment (compressors, Lufkin pumps, flowthrough process equipment requiring lube oil and mineral oil in transformers), mobile equipment (mobil pumper trucks) or loading and unloading activities (Lloyd shaker facility, occasional loading to tankers at LACT units). Only tanks, containers and equipment with 55 gallon or larger capacity and that contain petroleum products (or mixtures) that are liquid at room temperature are subject to APSA.

The areas and equipment inspected on 2/3/16 included: Trap Plant 8, RBU Trap Farm 1, Central Water Plant, Compressor Plant 3, Central Chemical Storage, Taylor Tank Farm, Taylor LACT unit, Bin City, Fire School and several Oil well pumping stations (Lufkins). The tank integrity tests were verified on 2/2/16 in the gas plant office. The next internal tank testing is due by 12/2017.

Paperwork and documentation was reviewed on 2/3/16.

The SPCC plan contains all content required by 40 CFR 112.

SPCC Plan available for review on site and PE certified on 2/6/13.

Management authorization of resources and implementation complete.

Plan review conducted and PE certified on 6/28/15.

Amendments to the plan are documented in the plan.

The facility has had reportable spills. All reportable spill and incidents are recorded and

Inspection Date: 2/4/2016

records provided in the Integrated Contingency Plan. The last reportable spill was in 1997. Verified SPCC plan petroleum storage matches the HMBP inventory storage.

Site diagram is accurate and up to date.

Oil storage containers, loading areas and AST's are in good condition, have sized secondary containment (with freeboard for precipitation), do not have oil in secondary containment and are compatible for contents.

Overfill protection matches the SPCC plan, is tested 2 times per year and documentation provided.

Oil filled equipment, oil loading/unloading/transfer areas, piping and mobile pumper trucks have spill kits readily available and sufficient general containment.

Open exterior containment structures and sumps have closed valves (or no valves), are sized to contain 100% of the volume of the largest container plus precipitation, are in good condition, are sufficiently impermeable to contain a spill and records of rain water discharge are maintained.

Facility has adequate security.

Records of inspections, integrity testing and procedures, training/annual discharge briefing are available on site for 3 years.

Annual hazardous materials business plan submitted electronically in CERS to satisfy Tank Facility Statement requirement completed on 3/16/15. The lead user is in the process of the annual review and will submit the APSA element in CERS with the Business Plan submittal no later than 3/16/15.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at http://www.ventura.org/rma/envhealth/hawd.html. You may also scan this code with your mobile device.

- Inspection Summary

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: BUSINESS PLAN SUBMITTED A COMPLETE BUSINESS PLAN INTO CERS

Updates submitted into CERS on March 25, 2015

Facility maintains a copy of the Business Plan onsite and includes:

Emergency contacts, Chemical inventory

Site map,

Emergency contingency plan

Hazardous materials throughout lease and well heads stored in secondary containment Annual employee training on hazardous materials implemented and documented.

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: Hazardous waste inventory submitted into CERS and updated March 25, 2015.

Hazardous waste containers are stored at "Taylor Bin City"

Hazardous waste "Universal Waste" labeled, closed and stored in a secure storage unit. Recommend securing the 55 gallon drums of Universal waste stacked in the storage unit. Hazardous waste solids, labeled and stored in a roll off bin at the Taylor Bin City.

Hazardous waste manifests reviewed and available onsite.

Emergency contingency plan submitted into CERS and available at the facility.

Site maps throughout facility submitted into CERS and available onsite.

Annual employee training on hazardous waste management implemented and documented.

NOTE: Central water treatment plant has a 5000 gallon tank that stores "filtered water".

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at http://www.ventura.org/rma/envhealth/hawd.html. You may also scan this code with your mobile device.

Inspection Summary

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (INSPECTION, ROUTINE)

General Comments: This facility is regulated both by the Division of Oil Gas and Geothermal Resources (DOGGR) and the Environmental Protection Agency (EPA)/CUPA.

> A representative sample of aboveground storage tanks (ASTs), containers and equipment that are used to store petroleum products in aboveground containers were inspected at the

> The areas inspected included: Taylor Trap Farm 8, RBU Trap Farm 1, Central Water Plant, Compressor Plant 3, Central Chemical Storage, Taylor Tank Farm, Taylor LACT unit and D & N facility.

Documentation and records for this facility were reviewed at Aera's office following and as part of the Aera School Canyon facility inspection conducted on April 1, 2019.

The Spill Prevention Control and Countermeasure (SPCC) Plan contains a cross reference and all required content of 40 CFR 112.

SPCC Plan was last certified by a professional engineer on 10/6/2017.

Management authorization of resources and implementation complete. Recently updated by the new management on 8/20/18.

Facility has accurately completed the Substantial Harm Criteria Certification.

All facility technical and administrative amendments are documented in the SPCC Plan. The facility has had reportable spills. All reportable spill and incidents are documented. A recent release that occurred at the School Canyon facility on February 12, 2019 was properly responded to, reported, and documented.

Facility has adequate security.

Oil storage containers, loading areas and AST's are in good condition, have sized secondary containment (with freeboard for precipitation), do not have oil in secondary containment and are compatible for contents.

Overfill prevention matches the SPCC plan, is tested 2 times per year and documentation maintained.

Oil filled equipment, oil loading/unloading/transfer areas, piping and mobile pumper trucks have spill kits readily available and sufficient general containment (including bermed areas). Open exterior containment structures and sumps have closed valves (or no valves), are sized to contain 100% of the volume of the largest container plus precipitation, are in good condition, are sufficiently impermeable to contain a spill and records of rain water discharge are maintained.

Several catchment (spill containment) basins are located throughout the facility to prevent a release from leaving the facility. These spill containment basins are regularly inspected and maintained.

Loading and unloading procedures are in place for the occasional loading/unloading that

- Inspection Summary

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (INSPECTION, ROUTINE)

General Comments: Aera Energy is regulated by the California Geologic Energy Management (CalGEM), Department of Transportation, the Environmental Protection Agency (EPA) and Ventura County CUPA.

> A representative sample of aboveground storage tanks (ASTs), containers and equipment used to store petroleum products in aboveground containers were inspected at the facility. The facility was not able to locate all required documentation for the SPCC Plan/APSA facility at the time of inspection.

At this time the facility is requesting to be taken out of the APSA program as the facility is an oil lease, regulated by CalGEM and DOT. The facility provided the MOA between CalGEM and the Department of Forestry and Fire Protection Office of the State Fire Marshal (CAL FIRE-OSFM) from 2014 which states: OSFM is responsible for administering the Above ground Petroleum Storage Act (APSA) and giving CAL FIRE-OSFM jurisdiction over certain tank facilities with 1,320 gallons or more of petroleum, excluding tanks under the jurisdiction of CalGEM. CalGEM has jurisdiction over tank facilities that are "attendant to" oil and gas production, including pipelines located within oil and gas fields and not subject to regulation by CAL FIRE- OSFM pursuant to Chapter 5.5 (commencing with Section 51010) of Part 1 of Division 1 of Title 5 of the California Government Code. "Attendant to" oil and gas production, for purposes of the MOA means: tanks and pipelines that are located within the lease areas of oil and gas fields, and are integrally associated with oil and gas production, are generally "attendant to" oil and gas production and therefore under CalGEM jurisdiction.

This division will contact CalGEM to verify areas of inspection, review all chemicals stored on site to determine if they are petroleum products or fraction thereof and determine if the facility falls into APSA regulation. Once the status of the APSA program is determined this division will move forward with reviewing all paperwork and required documents if needed.

A follow-up inspection will be conducted to inform the facility of the APSA status and note any violations and observations from the inspection conducted.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

Inspection Summary

HAZARDOUS WASTE GENERATOR (COMPLAINT INVESTIGATION)

General Comments: TODAY'S INSPECTION IS IN RESPONSE TO A REPORTED OIL SPILL THAT OCCURRED ON 5/16/2023 AT THE AERA FACILITY, 600 SHELL RAOD VENTURA (OES REPORT 23-3238, DIVISION COMPLAINT NUMBER CO0032650).

> 12:30 PM, WAIT AT SITE (GATED ENTRANCE) FOR ED DE LA LLAVE, AERA ENERGY. FOR ESCORT INTO PROPERTY. ATTEMPTED TO LOG INTO TEAMS MEETING PER EMAIL INVITATION, ONLY CATCH THE TAIL END OF THE MEETING. ED DE LA LLAVE TO PROVIDE THE UPDATED INFORMATION DURING THIS INSPECTION.

NOTE: CONTENT OF MEETING PROVIDED TO ATTENDEES (INCLUDING DIVISION INSPECTOR) ON THE MORNING OF MAY 17 VIA EMAIL FROM TRISHA BOTTEN OF AERA ENERGY. ATTACHMENT INCLUDED A WRITTEN INCIDENT ACTION PLAN, WITH SITE MAP AND 10 DAY WEATHER FORECAST INFORMATION. ATTENDEES INCLUDED FISH & WILDLIFE OSPR PERSONNEL, AERA REPRESENTATIVES AND SEVERAL OTHER PARTIES.

DUE TO A SUPPORT SERVICE RIG BROKEN DOWN ON THE NARROW ACCESS ROAD. HAD TO TAKE THE BACK WAY TO GET TO THE RELEASE SITE.

AS STATED BY ED DE LA LLAVE. A SECURITY PERSONNEL OBSERVED EVIDENCE OF THE RELEASE LATER THE EVENING OF 5/16/2023. UPON IDENTIFICATION OF THE SOURCE, THE ELECTRICAL SERVICE TO TAYLOR WELL 612 WAS CUT AND THE VALVE AT THE HEADER INLET FOR THE LINE WAS CLOSED AND TAGGED (NOTE THAT THE DATE WAS INCORRECTLY MARKED AS 5/14/2023). CONTAINMENT ACTIVITIES WERE THEN INITIATED.

BASED ON DISCUSSIONS WITH ED DE LA LLAVE, OIL HAD BEEN RELEASED FROM A FLOW LINE ASSOCIATED WITH WELL TAYLOR 612. THE POINT OF RELEASE WAS ACTUALLY FURTHER DOWN LINE FROM THE WELL LOCATION, ADJACENT TO THE LOCATION OF TAYLOR HEADER 11 WHERE THE ABOVE GROUND FLOW LINES (3 INDIVIDUAL LINES) TRANSITIONED BELOW GRADE, PASSING UNDERGROUND TO TAYLOR HEADER 11. THE RELEASE IS SUSPECTED TO BE DUE TO CORROSION BELOW GRADE OF THE LINE FROM TAYLOR 612. OIL THAT SURFACED, DRAINED DOWN THE ASPHALT/DIRTS ACCESS ROAD, DOWN HILL, EVENTUALLY MAKING IT TO A DRAINAGE BOX, NEAR WELL SITE TAYLOR 628. ONCE FLOW ENTERED THE DRAINAGE BOX, IT WAS CONVEYED SUBSURFACE BY PIPE, UNDER THE ACCESS ROAD, DISCHARGING INTO AN ADJACENT, UNNAMED, DRY RAVINE. AT THE TIME OF THIS INSPECTION, THE FULL EXTENT OF THE RELEASE (BOTH ON SURFACE AND BELOW SURFACE) IS STILL UNKNOWN AND RESPONSE PLANS WILL BE MODIFIED ACCORDINGLY AS NEW INFORMATION IS GATHERED.

Rpt: CUPA - 5031 Page 1 of 2

CUPA PROGRAM INSPECTION REPORT

Facilty Name: AERA ENERGY LLC

Site Address: 600 SHELL RD

VENTURA, CA 93001 CERS #:10336582

Inspection Date: 5/17/2023

Owner Mailing

Address: AERA ENERGY LLC

3051 N VENTURA AVE VENTURA, CA 93001

AT THE TIME OF THIS INSPECTION, AERA HAD CONTRACTED CREWS WHO WERE ACTIVELY REMOVING THE VERY HEAVY VEGETATION AT THE BOTTOM OF THE VERY STEEP SIDED AND DEEP RAVINE SO THAT CONDITIONS MAY BE BETTER EVALUATED. ALSO, CD LYON HAD A BACKHOE AND CREW ADDRESSING SURFACE ASPHALT AND SOIL (SOIL SCRAPING) ALONG THE UPPER REACH OF THE AFFECTED ACCESS ROAD. SOME PATRIOT STAFF WERE ON SITE READY TO ASSIST WITH CLEANUP UPON DEPLOYMENT. OBSERVED A SOIL BERM HAD BEEN CONSTRUCTED ABOUT 2/3 UP THE ROAD FROM THE DRAIN BOX TO INTERCEPT AND PREVENT ANY ADDITIONAL FLOW DOWN HILL.

THE CLEANUP PLAN IS TO ADDRESS CRUDE IMPACT SURFACES, SURFACE SOIL, VEGETATION, AND LATER ADDRESS SUBSURFACE CONDITIONS AND THE SUBSURFACE PIPE BETWEEN THE DRAINAGE BOX AND RAVINE, SLATED TO BE REPLACED LATER IN THE WORK SCOPE.

OIL CONTAMINATED SOILS WILL BE SEPARATED FROM OIL CONTAMINATED VEGETATION. A LINED ROLL OFF BIN CONTAINING SOIL WAS OBSERVED STAGED ON SITE NEAR TAYLOR HEADER 11 ALONG WITH ABSORBENT SUPPLIES, PLASTIC BAGS, AND PPE. BAGGED VEGETATION WAS OBSERVED SITUATED ON THE GROUND PENDING GATHERING FOR DISPOSITION. OIL IMPACTED ABSORBENTS AND PPE WILL BE BAGGED SEPARATELY.

WORK WILL CONTINUE ONLY UNTIL DUSK DUE TO SAFETY CONCERNS AND RESUME TOMORROW AT DAYLIGHT.

ED DE LA LLAVE AND DIVISION INSPECTOR DETERMINE TO KEEP CONTACT AT LEAST DAILY THROUGH CLEANUP, EXPECTED COMPLETED BY FRIDAY 5/19/2023. INFORMATION ON UPDATES TO PROGRESS OR ANY CHANGES IN SCOPE WILL BE PROVIDED THIS DIVISION.

DIVISION REQUESTS THAT ALL DOCUMENTATION FOR THE PROPER DISPOSAL OF ALL DERIVED WASTES ASSOCIATED WITH THIS CLEANUP BE PROVIDED AT THE END OF THE PROJECT AS THEY BECOME AVAILABLE.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

Inspection Summary

HAZARDOUS WASTE GENERATOR (COMPLAINT INVESTIGATION)

General Comments: TODAY'S INSPECTION IS IN RESPONSE TO A REPORTED OIL SPILL THAT OCCURRED ON 5/16/2023 AT THE AERA FACILITY, 600 SHELL ROAD, VENTURA (OES REPORT 23-3238, DIVISION COMPLAINT NUMBER CO0032650).

UPDATE TO DIVISION 5/17/2023 INSPECTION REPORT AS FOLLOWS.

- NRC NOTIFICATION #1367458
- ATTENDEES TO MAY 17, 2023 TEAMS MEETING INCLUDE
- JOANNA CISNEROS, CALGEM
- JOSH CROKER, WARDEN, CAL DEPT FISH & WILDLIFE OSPR
- THOMAS DELANO, CAL DEPT FISH & WILDLIFE OSPR
- DIANE WAHL, VENTURA COUNTY ENVIRONMENTAL HEALTH
- TRISHA BOTTEN, AERA ENERGY LLC
- MATT WYATT, AERA ENERGY LLC
- ERIN LARNER, AERA ENERGY LLC
- NICK CASTANON, AERA ENERGY LLC
- ED DE LA LLAVE, AERA ENERGY LLC
- MATT PURNELL, AERA ENERGY LLC

MET THIS DATE WITH ED DE LA LLAVE, AERA ENERGY LLC, TO OBSERVE POST CLEAN UP CONDITIONS AT THE TAYLOR 612 FLOW LINE INCIDENT SITE. AS STATED BY ED DE LA LLAVE, CLEANUP WAS COMPLETED ON THE 18TH.

THE TWO SUBSURFACE STORMWATER CONVEYANCE PIPES THAT TREND FROM THE DRAINAGE BOX TO THE OUTFALL POINT AT THE UNNAMED RAVINE WERE REPORTED TO HAVE BEEN BENT BACK USING AN EXCAVATOR TO THE POINT OF PINCHING THEM CLOSED, THEN SHEARED OFF. PIPE ENDS WERE OBSERVED STORED IN THE OPEN SPACE NEAR WELL TAYLOR 628. THE DRAINAGE BOX AND REMAINING SUBSURFACE PIPING WAS REPORTED BACKFILLED THIS DATE WITH CONCRETE TO CLOSE OFF THE DRAINAGE SYSTEM. OBSERVATION INTO THE DRAINAGE BOX CONFIRMED WET CONCRETE FILLED THE BOX. THIS ACTION WAS TAKEN IN LIEU OF REMOVAL. THE VISIBLE PORTION OF CONCRETE CULVERT LEADING TO THE DRAINAGE BOX (NOT BLOCKED FROM VIEW BY HEAVY VEGETATION) WAS OBSERVED TO BE FREE OF ANY RESIDUAL OIL AS NOTED ON 5/17/2023.

VEGETATION WAS OBSERVED REMOVED AT THE BASE OF THE RAVINE BELOW THE PIPE DISCHARGE LOCATION, AT THE TOP OF THE RAVINE IN THE AREA OF THE PIPE DISCHARGE LOCATION, AROUND THE AREA OF THE DRAINAGE BOX AND ADJOINING CONCRETE CULVERT, AND ALONG THE SIDE OF THE ACCESS ROAD

Rpt: CUPA - 5031 City Code: 01 Page 1 of 3

800 South Victoria Avenue, Ventura, CA 93009-1730 (805) 654-2813 FAX (805)477-1595 Internet Web Site Address: www.vcrma.org/envhealth

CUPA PROGRAM INSPECTION REPORT

Facilty Name: AERA ENERGY LLC

Site Address: 600 SHELL RD

VENTURA, CA 93001 CERS #:10336582 Owner Mailing

Address: AERA ENERGY LLC

3051 N VENTURA AVE VENTURA, CA 93001

Inspection Date: 5/19/2023

(ALONG THE PATH OF CRUDE OIL SURFACE FLOW AS OBSERVED ON 5/17/2023).

AT THE REPORTED RELEASE LOCATION, THE 3 FLOW LINES IN THE AREA OF TAYLOR HEADER 11, WERE BEING HYDROEXCAVATED BY CD LYON TO SAFELY EXPOSE THE SUBSURFACE PIPING. APPROXIMATELY 15-LINEAR FEET OF TRENCH WAS OBSERVED FROM THE POINT WHERE THE 3 FLOW LINES TREND SUBSURFACE, TOWARDS TAYLOR HEADER 11. EXCAVATED MUD/SOIL WAS VACUUMED AS TRENCHING PROGRESSED USING A VACUUM TRUCK. OBSERVATION OF THE TRENCH SIDEWALLS AND BASE INDICATED NO VISUAL EVIDENCE OF SUBSURFACE CRUDE OIL IMPACTS.

AS PER ED DE LA LLAVE, SOILS REMOVED BY VACUUM TRUCK WILL BE TRANSPORTED TO AERA'S ON SITE, APCD PERMITTED, MIXING PIT LOCATED IN 20 CANYON. AT THAT POINT, DRY SOILS WILL BE MIXED INTO THE MUD TO DRY THE MUD FOR TRANSPORT TO AERA'S BELL RIDGE FACILITY FOR PROCESSING. THIS SOIL WILL BE TRANSPORTED AS NON-HAZARDOUS WASTE.

ONE 20-YARD ROLL OFF BIN CONTAINING WASTE SOILS WAS OBSERVED STAGED NEXT TO HEADER 11 AND A SECOND BIN WAS OBSERVED STAGED AT WELL SITE TAYLOR 693, NEAR THE LOWER TERMINUS OF THE RAVINE. THE BINS WERE COVERED WITH PLASTIC SHEETING AND LABELED AS OILY DIRT. AS PER ED DE LA LAVEE, THE WASTE SOILS/DEBRIS/VEGETATION WILL BE MOVED FOR TEMPORARY STORAGE TO THE TAYLOR "BIN CITY" LOCATION, A SECURED STORAGE LOCATION ON THE LEASE SITE. OFFSITE TRANSPORT AND DISPOSAL IS PENDING. AS STATED BY ED DE LA LLAVE, THIS MATERIAL WILL BE TRANSPORTED FOR OFF SITE DISPOSAL AS NON-HAZARDOUS WASTE.

OBSERVATION OF THE CRUDE FLOW PATH ALONG THE SIDE OF THE ACCESS ROAD WAS MADE THIS DATE. ALTHOUGH REPORTED TO HAVE BEEN CLEANED AND SCRAPED AS NECESSARY TO REMOVE SURFACES (DEGRADED ASPHALT AND SOIL) IMPACTED BY CRUDE, CLEAN SOIL HAD SINCE BEEN PLACED AND SPREAD OUT AND THE EXTENT OF CLEAN UP COULD NOT BE READILY OBSERVED. AT SEVERAL LOCATIONS ALONG THE FLOW PATH, THE HEEL OF A SHOE WAS USED TO SCRAPE INTO THE CLEAN SOIL TO OBSERVE POTENTIAL RESIDUAL OIL BELOW. NO RESIDUAL OIL WAS OBSERVED.

ACCORDING TO ED DE LA LLAVE, PURSUANT TO AERA'S DISCUSSIONS WITH WARDEN JOSH CROKER, CAL DEPT FISH & WILDLIFE OSPR, OSPR DEEMS THIS INCIDENT AS A RELEASE TO LAND AND NO FURTHER ACTION IS REQUIRED. FURTHERMORE, THERE WILL BE NO UPDATE TO THE ORIGINAL OES REPORT. OSPR APPROVES PROCEEDING WITH AERA'S PLANNED WASTE DISPOSAL ACTIVITIES.

BASED ON INFORMATION PROVIDED AND SITE OBSERVATION, THIS DIVISION DOES NOT REQUIRE FURTHER CLEANUP AT THIS TIME.

SUBMIT DOCUMENTATION OF PROPER DISPOSAL OF ALL CLEANUP DERIVED WASTES TO THIS DIVISION AS SOON AS AVAILABLE.

Inspection Summary

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: Available for today's inspection (in full or part), were Kim Drews, Dan Starkey, Craig Martinez, Derek Wallace, and Ed De LaLava with Aera Energy and Diane Wahl and Melisa Custer with this Division.

> Verified owner/operator information as reported to the California Environmental Reporting System (CERS).

Complete CERS Hazardous Materials Business Plan submittal available electronically on site (electronically via CERS) for calendar year 2020.

Representative locations were inspected this date to verify chemical inventory. The following areas were included for inspection: Central Bulk Chemical Storage, Central Water Treating, Central Water Treating/Solids Area, Compressor Plants 2 and 3, Taylor Bin City, Taylor Tank Farm, Waterflood Plant 4 and several well sites. Verified inventory.

Kim Drews reports that chemical quantities and largest container sizes (example: 55 gallon drums versus larger capacity totes) frequently change. Examples noted today, in particular at the Central Chemical Storage area, for which many inventory items reported into CERS were not present on site this date, and some discrepancies in largest container size.

Observed 2-55 gallon drums of CLO3022 Cleaner and 1-55 gallon drum of Red Dye in the Central Bulk Chemical Storage area that are not in the current inventory as reported to CERS. Update CERS accordingly if these materials will continue to be stored on site.

For chemicals reported to CERS that were not observed on site at the time of inspection, the facility will determine if these chemicals will no longer be used/stored on site, and if no longer used, the chemicals may be removed from the hazardous materials inventory reported to CERS.

Annotated site maps reviewed.

Verified employee annual training for 2020 and prior 2 years on hazardous materials management (MEST - Mandatory Environmental Safety Training, completed annually by all employees).

Emergency response plan available and reviewed. Update the plan to record the new Manager of Operations contact information and upload the corrected Plan into CERS. Please discard outdated plans.

As reported by Kim Drews, minor updates to inventory information (largest container sizes, maximum daily amounts, hazardous waste stream descriptions, and annual waste amounts) as discussed this date, will be made in CERS.

CUPA PROGRAM INSPECTION REPORT

Facilty Name: AERA ENERGY LLC

Site Address: 600 SHELL RD

VENTURA, CA 93001 CERS #:10336582

Owner Mailing

Address: AERA ENERGY LLC

3382 N VENTURA AVE VENTURA, CA 93001

Inspection Date: 6/23/2021

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (SPOT CHECK INSPECTION)

General Comments: Annual tank facility statement, as submitted to the California Environmental Reporting System (CERS), was most recently made on 5/4/2021.

> This facility maintains a Spill Prevention Control and Countermeasure (SPCC) Plan and the Plan is maintained available for review at the AERA facility located at 1800 School Canyon Rd. in Ventura. California.

The Plan is a PE Certified and is correct for this facility.

Plan date is August 2009, which was PE certified on 8/1/2019 and management certification of availability of resources signed 8/6/2019.

Tanks and containers have sized secondary containment.

Containments observed free of oil.

Monthly inspections are performed and documented.

Inspection documentation maintained electronically at the 1800 School Canyon Road office and an example inspection record was provided for review.

Annual briefings for employees are performed and documented. Documentation for employee briefing for 2020 were reviewed.

Spill kits are maintained available within the facility.

Ensure that any technical amendments to the Plan are PE certified within 6 months of: commissioning or decommissioning containers; replacement, reconstruction, or movement of containers; reconstruction, replacement, or installation of piping systems; construction or demolition that might alter secondary containment structures; changes of product or service; or revision of standard operation or maintenance procedures at a facility if the change in facility design, construction, operation or maintenance materially affects its potential for a discharge.

***Note: Aera Energy is requesting this Division to contact Cal Fire OSFM office to discuss the definition of 'attendant to' oil and gas production. Aera Energy's understanding is that all refined petroleum products used to maintain equipment on-site is subject to CalGEM jurisdiction, therefore making them no longer subject to the Aboveground Petroleum Storage Tank Act (APSA) requirements.

The MOU between the Department of Conservation Division of Oil, Gas, and Geothermal Resources and the Department of Forestry and Fire Protection Office of the State Fire Marshal in 2014 states that: under California Public Resource Code (PRC), Section 3106, subdivision (a), CalGEM has jurisdiction over tanks and facilities that are "attendant to" oil and gas production, including pipelines located within oil and gas fields and not subject to regulation by Cal Fire - OSFM pursuant to Chapter 5.5 (commencing with Section 51010) of Part 1 of Division 1 of Title 5 of the California Government Code (PRC 3106, subdivision (a)). "Attendant to" is defined as tanks and pipelines that are located within the lease areas of oil and gas fields, and are integrally associated with oil and gas production.

This Division will be reaching out to Jennifer Lorenzo with Cal Fire OSFM to discuss the interpretation of 'attendant to' and determine if Aera Energy is no longer subject to APSA. Please understand that this determination is only in regard to the APSA program and the facility may still be subject to 40 CFR 112. ***

***Note: At the time of this inspection, the CERS hazardous material inventory does not match the SPCC Plan, due to several items such as production well locations being excluded from the Plan. These items were excluded due to Area Energy's understanding that the

pumps are regulated by CalGEM and not under CUPA regulation.***

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: Verified owner/operator information as reported to the California Environmental Reporting System (CERS).

> This facility is a hazardous waste generator of various construction, demolition, and maintenance activities associated with oil and gas production. Based on review of manifests, some months this facility is a generator of greater than 1000 kg/2200 lbs of hazardous waste, and other months at less than 1000kg/2200 lbs per month.

> As reported by Dan Starkey, hazardous waste at this facility is managed assuming a generator status of Large Quantity Generator (>1,000kg/2200 lbs per month), even if a given month's hazardous waste generation is below that threshold.

Hazardous waste containers and bins observed accessible, closed, properly labeled and in good condition.

hazardous waste containers (drums) observed secondarily contained. Hazardous waste containers (drums) and Universal Wastes, are secured inside storage buildings.

At least weekly inspections of hazardous waste storage areas are reported to be performed. Acceptable accumulation times noted.

Note: Universal wastes are reported to be usually picked-up every 90 days, along with other hazardous wastes generated and stored on site, and are reported never stored for over 1 year.

Note: According to Dan Starkey, this facility reports that it recently tested out its used oil and determined it can be handled as "Highly Controlled Used Oil" (HCUO) in accordance with HSC 25250.19(b)(3), such that by meeting certain conditions, the generator then can manage HCUO as a recycled oil and not as a hazardous waste. Prior to this determination, used oil was reinjected into the crude oil pipeline (recycled on site). This facility reports that it also recently tested out its oily waste/oily debris and verified that it is non-hazardous and no longer manages this material as hazardous waste. Ensure to keep all relevant testing documentation available for review upon request.

Hazardous waste storage area and secondary containment observed free of incidental spillage. Spill cleanup materials available on site.

Functioning portable fire extinguishers observed in the hazardous waste storage area and are reported stored in company vehicles as well.

Designated facility signed copies of unified hazardous waste manifests for the prior 3 years were made available via email for review.

According to Kim Drews, generator copy of each uniform hazardous waste manifest is properly submitted to the Sate Department of Toxic Substances Control within 30 days of shipment.

Records of employee training maintained available electronically at the Aera Energy office off School Canyon Rd, Ventura.

Verified employee annual training for 2020 and prior years on hazardous waste management (MEST - Mandatory Environmental Safety Training, completed annually by all employees). Copy of Contingency Plan available at the Aera Energy office at 1800 School Canyon Rd, in Ventura, California,

Contingency Plan as submitted to CERS reviewed. Update the Plan to record the new

1. WASTE DETERMINATION - 44 00014420

Comply by 7/27/2006

GENERATOR HAS NOT DETERMINED IF THE WASTE GENERATED IS A HAZARDOUS WASTE. (CCR 66262.11)

DETERMINE IF WASTE IS HAZARDOUS BY DETERMINING IF THE WASTE IS A LISTED HAZARDOUS WASTE OR IF THE WASTE EXHIBITS A HAZARDOUS CHARACTERISTIC THROUGH LABORATORY TESTING OR APPLYING GENERATOR KNOWLEDGE.

Violation Comments:

Observed the following drums located at McJunkin Warehouse. Determine if the contents are waste or usable product: label appropriately. If waste, determine if hazardous. If hazardous waste contact a registered hazardous waste hauler to properly dispose and document. Maintain waste determination and disposal documentation for 3 years.

- +Blue 55-gallon poly drum in the "Hazardous Waste Cage" labeled "Unclassified Waste".
- +Red 15-gallon steel drum near the parts washer has an illegible hazardous waste label.

2. RECORD KEEPING- RECEIPTS - 44 00274420

Comply by 7/27/2006

HAZARDOUS WASTE DISPOSAL RECEIPT(S) NOT MAINTAINED ONSITE FOR AT LEAST 3 YEARS. (HSC 25160.2)

MAINTAIN A COPY OF EACH HAZARDOUS WASTE DISPOSAL RECEIPT ONSITE FOR AT LEAST 3 YFARS.

Violation Comments:

Hazardous waste disposal receipts were not available for review at the time of inspection. Schedule a follow-up inspection to review the disposal receipts from the last 3 years.

3. EMPLOYEE TRAINING-SQG, CESQG - 44 00244420

Comply by 7/27/2006

EMPLOYEE TRAINING NOT CONDUCTED OR IS INADEQUATE. (CCR 66262.34(d)(2)

ALL EMPLOYEES MUST BE THOROUGHLY FAMILIAR WITH THE PROPER WASTE HANDLING AND EMERGENCY PROCEDURES RELEVANT TO THEIR RESPONSIBILITIES DURING NORMAL FACILITY OPERATIONS AND EMERGENCIES.

Violation Comments:

Employee Hazardous Waste Handling and Emergency Response training not available at the time of inspection. Provide evidence that annual employee training was conducted.

General Comments: The hazardous waste permit for this facility is inactive. This facility currently generates hazardous waste (i.e. waste parts cleaner solution, waste aerosol paint cans) and requires the hazardous waste generator permit to be reactivated.

NOTES:

-Observed oil contaminated gravel along the road on the east side of the Butane Bullets. Clean up the contaminated material and properly dispose.

Inspection Summary

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (INSPECTION, FOLLOW-UP)

General Comments: After further review and consultations with the California Geologic Energy Management Division and the Office of State Fire Marshal it has been determined the facility does not meet the minimum threshold for APSA regulation and not subject to APSA. The facility will be inactivated from the APSA program.

> For purposes of APSA (per HSC Section 25270.2(a)(3)), any tanks (including containers or equipment) and pipelines that are attendant to oil and gas production within the lease areas of an oil and gas field are subject to CalGEM and not subject to APSA. The 'attendant to oil and gas production' includes those that are directly or indirectly related to oil and gas production.

All tanks and containers storing petroleum products located on-site, at this time, have been determined as attendant to oil and gas production and are stored within the lease. Thus, subject to CalGEM.

The vehicles on site are maintained and fueled off site at local facilities. In the future if the facility has fuel tanks used for vehicles, fresh and used oils for maintenance of work vehicles, etc and storing greater than 1,320 gallons of petroleum product for the vehicles, the facility will be subject to SPCC and APSA.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at , https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

Inspection Summary

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: A joint inspection was conducted on today's date by Melanie Sebastian & Diane Wahl with the Ventura County Environmental Health Division.

Facility representatives present at the time of inspection included:

- Chris Logan, HSE Environmental Advisor
- Doug Koenig, Belridge Environmental Complex Lead
- Jo Cochran, HSE Advisor
- Kevin Brown, Process Specialist

Routine inspection was based upon the California Environmental Reporting System (CERS) submittal made on 8/28/2024.

Hazardous materials business plan (HMBP) was available electronically via CERS.

Verified owner/operator contact information as reported in the CERS.

Site map available electronically and reviewed on-site.

The following areas were inspected to verify chemical inventory:

- 1) Central Bulk Chemical Storage
- 2) Compressor Plant 3
- 3) Waterflood Plant 4
- 4) Taylor Bin City
- 5) Taylor Tank Farm
- 6) Central Water Treating

***Note: Perlite located in Waterflood Plant 4 was erroneously recorded in pounds. Facility evaluated quantity and submitted updates into the Hazardous Materials Inventory in CERS after the inspection.

Note: Businesses are required to electronically submit and certify their Hazardous Materials Business Plan (HMBP) annually using the California Environmental Reporting System (CERS) website (http://cers.calepa.ca.gov). The HMBP consists of the Owner/Operator Page, Business Activities Page, Hazardous Materials/Waste Inventory, and Emergency Response Plan.

An update to your HMBP is required within 30 days if at any time during the year there is: 1) a 100% change in inventory, and/or 2) addition of previously unreported hazardous chemical and/or waste, and/or 3) change of address, and/or 4) change of name of business, and/or 5) change of ownership, and/or 6) change in emergency contacts or their telephone numbers, and/or 7) any other substantial change in operation that could inhibit immediate response during an emergency and is separate from the annual update.

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: EPA ID#: CAR000327197 is active on the Hazardous Waste Tracking System (HWTS).

After review of manifests facility currently generates hazardous waste at greater than 100kg (220lbs/27 gallons) and less than 1000kg (2,200lbs/270g) per calendar month. Per Doug Koenig, hazardous waste at this facility is managed assuming a generator status of Large Quantity Generator (>1000kg/ 270 gallons/2,200 pounds per month), even if a given month's hazardous waste generation is below that threshold, and accumulation therefore does not exceed 90 days.

***NOTE: In the Business Activities page in CERS, facility self-reports as a generating 2,200 pounds of federal RCRA hazardous waste (in any single calendar month), or 2.2 pounds of RCRA acute hazardous waste; or more than 220 pounds of spill cleanup materials contaminated with RCRA acute hazardous waste. Per Aera representatives, this option was selected because they are an episodic generator of RCRA hazardous waste during special projects, demolitions and maintenance activities associated with oil and gas production. Based on this information, the RCRA-Large Quantity Hazardous Waste Generator program will be activated for this facility and the hazardous waste generator program will inactivated.

Hazardous waste and universal waste containers were observed accessible, labeled, closed, in good

condition and secondarily contained. Acceptable accumulation times noted for hazardous waste and universal waste.

***NOTE: There were several empty containers (approximately 55 gallons each) located at Taylor Bin City that previously held hazardous materials not marked "Empty" along with the date it was emptied. Per Chris Logan, empty containers are managed quarterly. After inspection of the facility, Chris Logan emailed this Division a photo of the empty containers marked "empty" with today's date.

Inspections of the hazardous waste storage areas are conducted weekly and logged electronically.

3 years of uniform hazardous waste manifests and bill of ladings are maintained available on site electronically.

The hazardous waste disposal company is MP Environmental Services and Safety Kleen. Based on review of manifest, last pick up occurred on 6/13/2024.

As reported on the previous report, this facility is managing used oil as "Highly Controlled Used Oil" (HCUO) in accordance with HSC 25250.19(b)(3). such that by meeting certain operating conditions, the generator then can manage HCUO as a recycled oil and not as a hazardous waste. Review of facility information indicates that this facility qualifies as a generator of HCUO.

On May 27, 2020, AERA Energy LLC notified DTSC a Certification of Compliance with HSC 25250.19(b)(3).

Annual testing for purity was last performed in 2024 and analytical report for HCOU by Oilfield Environmental & Compliance, Inc., dated May 28, 2024, was provided to the Division during a routine inspection at the 1800 N School Canyon Rd. site on July 25, 2024. Review of the HCUO analytical report for 2022 was provided and reviewed this date. HCUO analytical report for 2023 was unable to be located. Per Chris Logan, person managing this process left the company in 2023 and are unable to locate his records.

During inspection it was verified that target constituents tested within the required parameters to demonstrate purity to qualify for management as HCUO.

As reported on the previous report, this facility has also recently tested out its oily waste/oily debris and verified that it is non-hazardous and no longer manages this material as hazardous waste. AERA made

available for review a 5/26/2020 Oilfield Environmental & Compliance, Inc. analytical report during routine inspection at the 1800 N School Canyon Rd. site on July 25, 2024.

Spill response materials, fire extinguishers, first aid kits, and eye wash stations were available throughout the facility.

Emergency response/contingency plan reviewed and available electronically.

***NOTE: *The FACILITY ID# is incorrect in the Consolidated Emergency
Response/Contingency Plan. Update Facility ID# to FA0007102 and upload into CERS.

Employees demonstrated knowledge on hazardous waste procedure and spill response.

Employee training records from 2022-2024 reviewed. Mandatory Environmental Safety
Training (MEST) completed annually by all employees. MEST topics includes health and
safety, hazardous materials management, hazardous waste management, emergency
response/procedures, and spill response/procedures.

Maintain annual training records for at least three years.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at , https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (SPOT CHECK INSPECTION)

General Comments: SPOT CHECK INSPECTION:

(Full routine inspection conducted on 2/3/2016)

Facility stores more than 10,000 gallons of petroleum products in aboveground storage tanks

and is in the >10,000 gallon Aboveground Petroleum Storage Act (APSA) Program. Facility has a complete PE-certified Spill Prevention Control and Countermeasure (SPCC)

Plan. SPCC Plan last amended, signed, and dated on October 6, 2017. Technical amendments were updated in the recently amended SPCC Plan.

No leaky components observed. Spill kits available. Secondary containments are free of oil.

Leaks and spills are cleaned up upon discovery.

Logs and records maintained as part of SPCC Plan. Annual training conducted and

documentation available.

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: Facility has submitted the required Hazardous Materials Business Plan (HMBP) information to

the California Environmental Reporting System (CERS).

An annual HMBP/CERS submittal for 2017 was completed in March 2017.

Aerial site maps and detail site maps and Emergency Response/Contingency Plan available

on site, uploaded to CERS, and reviewed.

Reviewed hazardous materials inventory and facility contact information. Three years of documented employee training records available and reviewed.

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: Facility operates as a hazardous waste large quantity generator (LQG) of more than 1,000

kg/month. "Taylor Bin City" located at the Shell Road site is the central hazardous waste

storage area for the Aera Energy Ventura Fields

Hazardous waste drums and bins were accessible, in good condition, maintained closed, and

properly labeled. Spill response kits were accessible.

Update the EPA ID number for this location to reflect the correct address. TSDF-signed

copies of hazardous waste manifests available and reviewed.

Emergency Response/Contingency Plan available. Documented employee training available

and reviewed.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at http://www.vcrma.org/envhealth/hawd.html. You may also scan this code with your mobile device.

Inspection Summary

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: Paperwork review was conducted at the AERA Energy office at 1800 School Canyon Rd.,

Ventura on 12/13/2022.

Verified owner/operator information as reported to CERS.

Update the EPA ID Number reported in CERS to report CAR000327197.

This facility is a hazardous waste generator of various construction, demolition, and maintenance activities associated with oil and gas production.

3 Years of hazardous waste manifests are maintained available on site (electronically). Based on review of manifests, this facility is currently generating hazardous waste at greater than 100 kg and less than 1000 kg per month.

As reported by Dan Starkey, hazardous waste at this facility is managed assuming a generator status of Large Quantity Generator (>1,000kg/2200 lbs per month), even if a given month's hazardous waste generation is below that threshold, and accumulation therefore does not exceed 90 days.

At least weekly inspections of the hazardous waste storage areas are reported to be performed. Ensure inspections performed for hazardous waste containers (lab wastes) and waste oil stored outside of the central storage area at Taylor Bin City.

At the Taylor Bin City Location, the hazardous waste and solid waste consolidation area is manned daily during typical work week hours and is also monitored remotely by camera.

Spill cleanup materials and portable fire extinguishers are available on site throughout the lease.

Hazardous waste containers and universal waste containers (aerosols) were observed closed, labeled, in good condition and accessible. At Taylor Bin City, containers are secured within two storage buildings. Some containers observed stored on secondary containment. No spillage observed in secondary containment or on the ground in hazardous waste storage areas on site.

Acceptable accumulation times noted for hazardous waste and universal waste.

This facility is managing used oil as "Highly Controlled Used Oil" (HCUO) in accordance with HSC 25250.19(b)(3), such that by meeting certain operating conditions, the generator then can manage HCUO as a recycled oil and not as a hazardous waste. Review of facility information indicates that this facility qualifies as a generator of HCUO.

Annual testing for purity was last performed in 2022 and a 11/1/2022 Oilfield Environmental &

Inspection Date: 12/14/2022

Compliance, Inc. analytical report was made available for review. Verified that target constituents tested within the required parameters to demonstrate purity to qualify for management as HCUO. HCUO containers were observed properly labeled as non-Hazardous waste with generator information and accumulation start date.

This facility has also recently tested out its oily waste/oily debris and verified that it is non-hazardous and no longer manages this material as hazardous waste. AERA made available for review a 5/26/2020 Oilfield Environmental & Compliance, Inc. analytical report. Review of the analytical results indicate that oily debris was confirmed not to exceed Total Threshold Limit Concentrations for metals, recorded a flashpoint greater than 200 degrees, and passed an acute aquatic 96-hour test for LC50.

Records of employee training maintained available electronically on site at the AERA office. Verified employee annual training for 2022 which includes hazardous waste management. (MEST - Mandatory Environmental Safety Training, completed annually by all employees). Employees also receive DOT training.

Copy of Contingency Plan available on site and reviewed. The plan was updated to include the emergency coordinator names and phone numbers. Ensure the updated plan is uploaded to CERS. Discard older versions of the plan.

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: Paperwork review was conducted at the AERA Energy office at 1800 School Canyon Rd., Ventura on 12/13/2022.

> Verified owner/operator information as reported to the California Environmental Reporting System (CERS).

Complete CERS Hazardous Materials Business Plan submittal available on site (electronically via CERS) for calendar year 2022.

Representative lease locations were inspected this date to verify chemical inventory. The following areas were included for inspection: Central Bulk Chemical Storage, Central Water Treating, Central Water Treating Solids Area, Compressor Plant 2, Compressor Plant 3, Drilling Fluids Site, Taylor Bin City, Taylor Tank Farm, Taylor Trap Farm 8, Waterflood Plant 1, Waterflood Plant 4, and several well sites.

Verified inventory and noted several updates warranted to 'Largest Container' sizes and 'Maximum Daily Amounts'. Update the inventory in CERS as discussed during the field inspection. Note that some chemicals listed as stored at the Central Bulk Chemical Area were not on site at the time of this inspection but Aera is continuing to report them as they may be brought to the site at other times in the future. Ensure all inventory items include a 'Maximum Daily Amount'.

Baker-Petrolite HSW-700 at the Taylor Sulfa Check can be deleted from the inventory as this is no longer stored on site. Add HCUO at CP2 to the hazardous materials inventory.

Annotated site maps reviewed (based on the earlier 6/30/2021 CERS submittals). It appears that more recent CERS submittals errantly included site maps for the adjoining portion of the

least (1800 School Canyon Rd). Update CERS to ensure the corrected maps for the 600 Shell Road facility are uploaded to CERS and the errant maps are discarded.

Update all site maps to call out primary hazardous materials storage areas (HMS) and hazardous waste storage areas (HWS) and evacuation staging areas.

***Note: Pursuant to an inspection performed 7/13/2022, the Aboveground Petroleum Storage Tank Act (APSA) Program was inactivated for this facility. Update the Business Activities Page and select "No" to the question "does your facility store greater than 1320 gallons of petroleum products?".

3 years of employee training records maintained electronically. Reviewed example training records for an employee for 2022. (MEST - Mandatory Environmental Safety Training, completed annually by all employees). Employees also receive DOT training.

Emergency response plan available and reviewed. As noted by Dan Starkey, the Emergency Coordinator names and phone numbers were written into the hard copy of the plan at the time of this inspection. Ensure the updated plan is uploaded to CERS.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

- Inspection Summary

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: Verified owner/operator information as reported to the California Environmental Reporting System (CERS).

> This facility is a hazardous waste generator of greater than 1000kg/month (2,200lbs/month). Hazardous waste containers and bins observe accessible, closed, properly labeled and in good condition.

hazardous waste containers (drums) observed secondarily contained. Hazardous waste containers (drums) and Universal Wastes, are secured inside storage buildings. Acceptable accumulation times noted.

**Note: Universal wastes are reported to be picked-up every 90 days, along with other hazardous wastes generated and stored on site.

Hazardous waste storage area and secondary containment observed free of incidental spillage. Spill cleanup materials available on site.

Functioning portable fire extinguishers observed in the hazardous waste storage area and are reported stored in company vehicles as well.

Last pick-up of non-RCRA hazardous waste solids and hazardous waste solids (not otherwise specified) was performed on 12/16/2019 and 12/11/2019, respectively. Designated facility signed copies of unified hazardous waste manifests available at Aera office off School Canyon Rd, Ventura (paper and electronic copies).

Generator copies of uniform hazardous waste manifests properly submitted to the Sate Department of Toxic Substances Control within 30 days of shipment.

Records of employee training maintained available electronically at the Aera office off School Canyon Rd, Ventura.

Verified employee annual training for 2017-2019 on hazardous waste management (MEST -Mandatory Environmental Safety Training, completed annually by all employees). Copy of Contingency Plan available at the Aera office off School Canyon Rd, Ventura. Review of Contingency Plan indicates that the CUPA/UPA phone number should be updated to read 805/654-2813 and the updated copy uploaded to CERS.

***Note: Due to inclement weather, the Hazardous Materials Business Plan Program inspection was not conducted this date and will be rescheduled.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at, https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA), ARISING OUT OF OR IN ANY WAY CONNECTED WITH THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk or conditions in, on or at any property.
