1 Executive Summary

Dudek conducted a desktop hazards assessment for the proposed Ventura Compressor Station Modernization Project (VCM Project) – Devil's Canyon Road Site Alternative on behalf of SoCalGas®. The Devil's Canyon Road Site is located in unincorporated Ventura County, California (see Figure 1, Devil's Canyon Road Site). The Devil's Canyon Road Site is composed of three portions: a compressor station area, a Temporary Staging Area, and a roadway/utility corridor. The compressor station area of the Devil's Canyon Road Site consists of approximately 17.7 acres of land located within a portion of one parcel (Assessor's Parcel Number [APN] 060-031-016); this area also maintains an address of 600 Shell Road. The Temporary Staging Area consists of approximately 6.3 acres of land located within a portion of one parcel (APN 060-032-019). The roadway/utility corridor portion of the Devil's Canyon Road Site is an approximately 4-mile-long winding route to the east and west of the compressor station; a small segment extends to the east. The roadway/utility corridor is located within portions of APNs 060-030-005, 060-031-015, 060-031-017, and 060-031-018. The findings of this investigation presented in this report are based on historical sources and information contained in regulatory agency databases.

Information gathered for this report indicated the following:

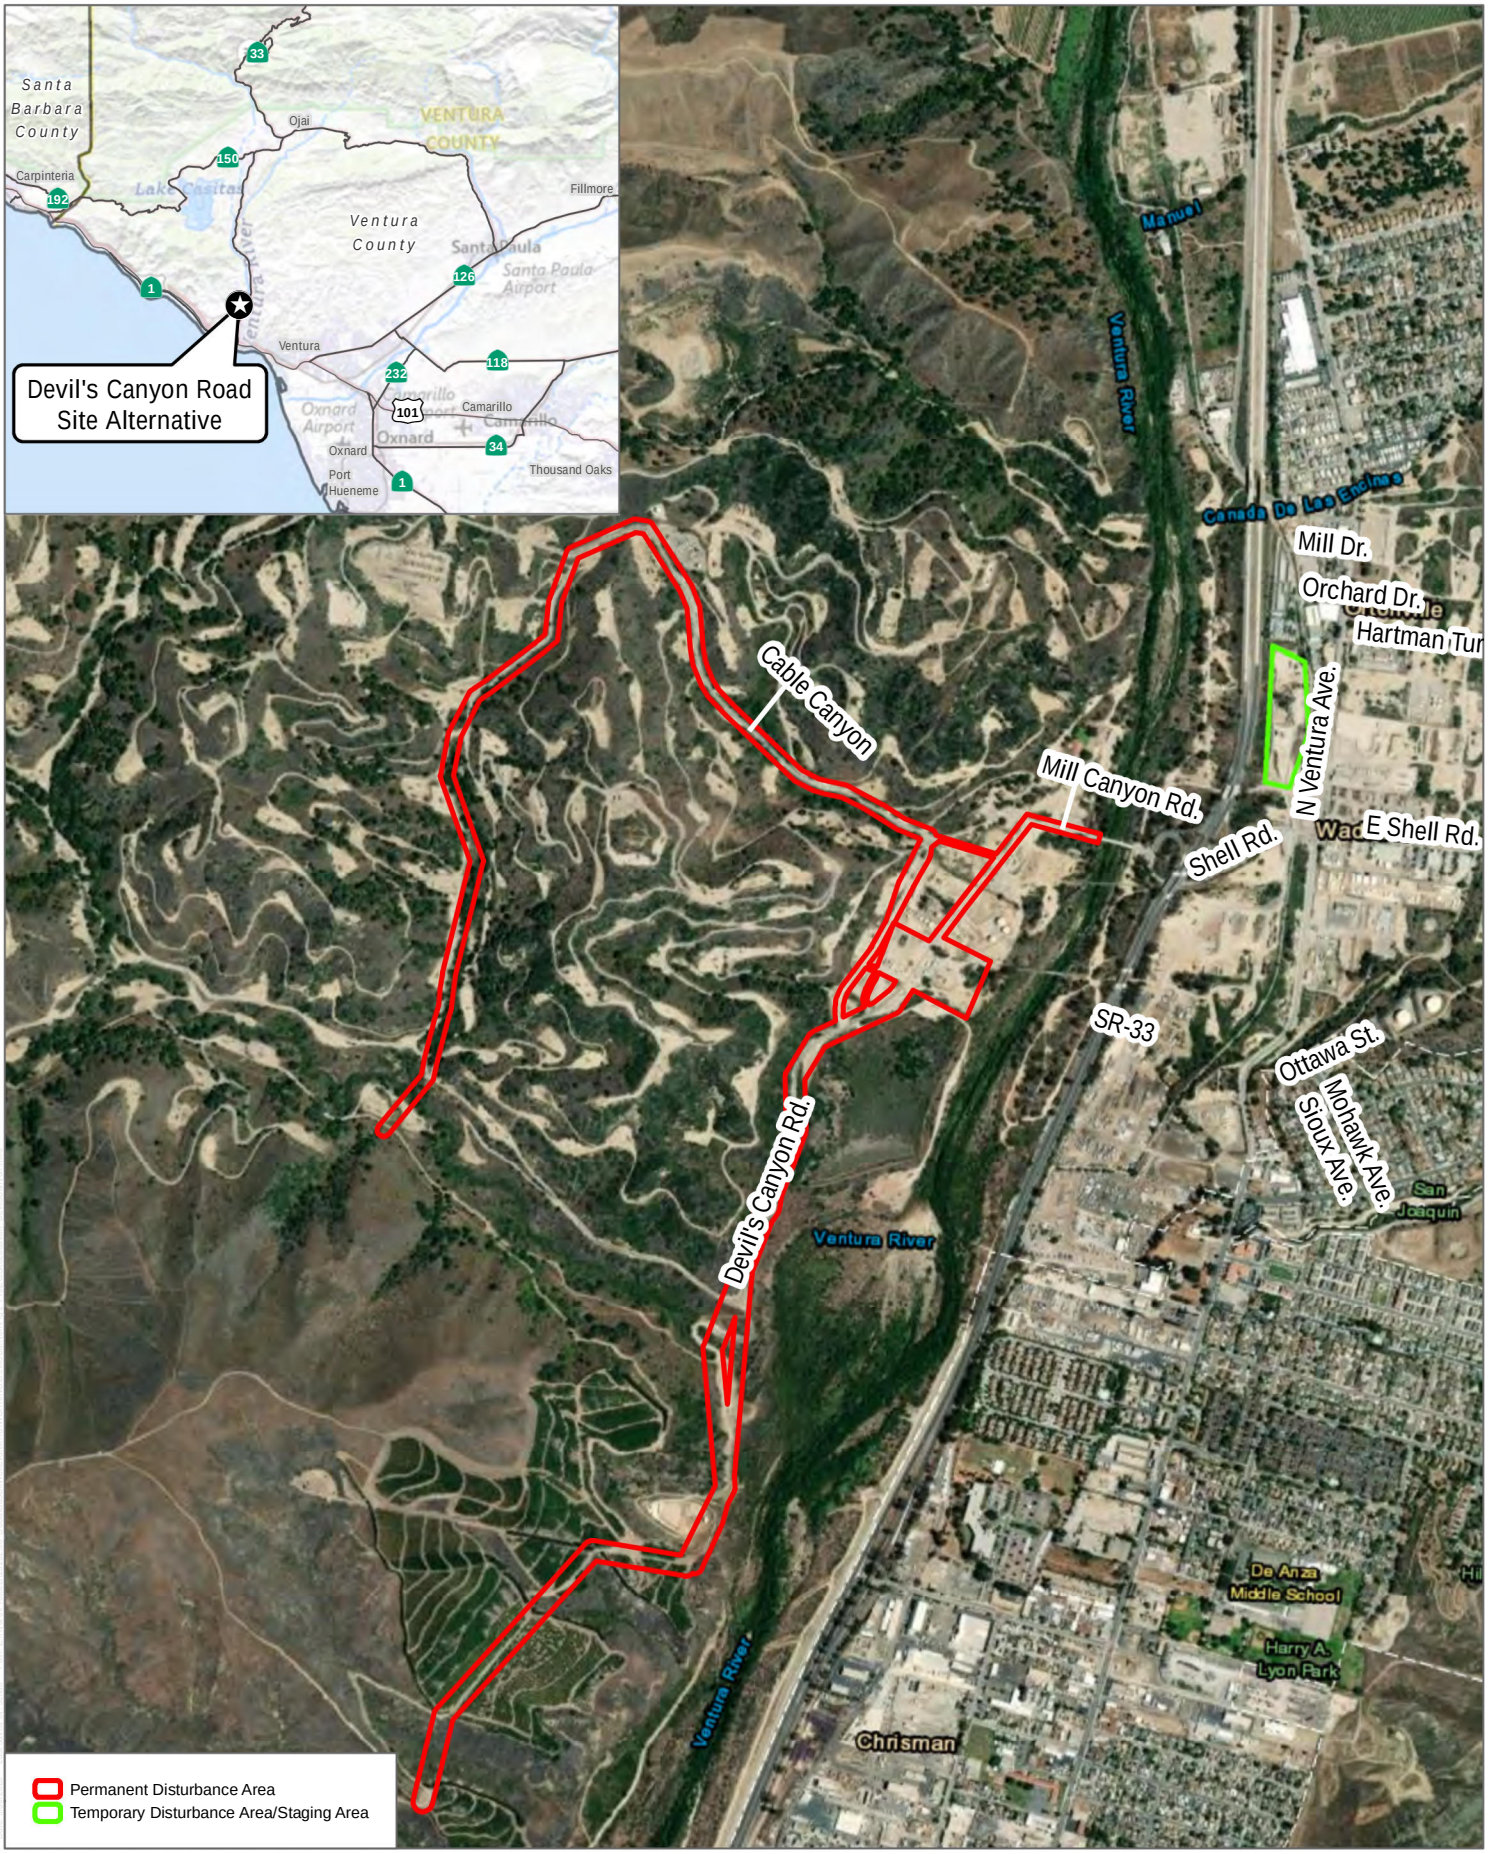

- The compressor station area has been used for oil production and storage from at least 1927 until the present. The Temporary Staging Area hosted oil storage and production as early as 1941. Oil storage was terminated as early as 1994; oil production is ongoing.
- State Route (SR) 33 trends north–south between the compressor station area and the Temporary Staging Area. The Ventura River also flows north–south between the compressor station area and the Temporary Staging Area.
- The roadway/utility corridor portion of the Devil's Canyon Road Site is located within the Ventura Oil Field and includes active oil and gas operations. The southernmost portion of the Devil's Canyon Road Site is located within an orchard.

The assessment revealed the following environmental concern:

- The historical and ongoing use of the Devil's Canyon Road Site as an oil production and storage facility since at least 1927 is considered an environmental concern for both the compressor station area and the Temporary Staging Area of the Devil's Canyon Road Site. Multiple sumps, oil wells, tank farms, equipment and piping have been located on the Devil's Canyon Road Site since as early as 1927. This long-term use also represents the risk of a vapor encroachment condition (VEC).

The assessment revealed the potential presence of the following estimated impacted soils:

- Compressor Station Area – approximately 15,146 cubic yards (cy) of potentially impacted soils
- Roadway/Utility Corridor – approximately 10,228 cy of potentially impacted soils

FIGURE 1

Devil's Canyon Road Site Alternative

Ventura Compressor Station Modernization Project (VCM Project) - Devil's Canyon Road Site Desktop Hazards Assessment

DUDEK

0 500 1,000 Feet

2 Introduction and Scope

This desktop hazards assessment was prepared for SoCalGas to evaluate potential hazards at the Devil's Canyon Road Site. This assessment included a contaminated soil estimate, a search of regulatory records, review of available historical records (aerial photographs and topographic maps), and the preparation of this report.

3 Site Location

The Devil's Canyon Road Site is in southwestern Ventura County, California, on both sides of the north–south-trending SR-33. The compressor station area is located west of SR-33, approximately 0.4 miles southwest of the Temporary Staging Area. The compressor station area is approximately 2.4 miles north of U.S. Highway 101 and 900 feet west of SR-33. The Temporary Staging Area is approximately 100 feet east of SR-33 and approximately 2.8 miles north of U.S. Highway 101. The Ventura River also flows north–south between the compressor station area and the Temporary Staging Area.

The compressor station area consists of approximately 17.7 acres of land on a portion of APN 060-031-016. The Temporary Staging Area consists of approximately 6.3 acres of land on a portion of APN 063-020-019. The compressor station area is currently part of an oil and gas lease and includes a tank farm, oil and gas wells, and associated structures and piping. The Temporary Staging Area currently consists of oil wells and associated piping. The roadway/utility corridor consists of an approximately 4-mile-long winding route, with one segment heading west-northwest from the compressor station area and then turning south-southwest; a second short segment heading north-northeast and then briefly turning east before terminating near the Ventura River; and a third segment heading south-southwest of the compressor station area. The roadway/utility corridor transects portions of APNs 060-030-005, 060-031-015, 060-031-017, and 060-031-018. The Devil's Canyon Alternative Site location and boundaries are shown on Figure 1.

4 Environmental Setting

4.1 Topography and Geology

The Devil's Canyon Road Site is located in unincorporated Ventura County, with portions both east and west of SR-33 and the Ventura River, more than 2 miles north of U.S. Highway 101, within the Ventura River Watershed Basin.

General topographic information for the Devil's Canyon Road Site and the surrounding area was obtained from a review of topographic maps (Appendix A) and the Environmental Data Resources (EDR) Radius Map Report (Appendix B). The Devil's Canyon Road Site is generally flat and slopes gently down toward the southeast. The Devil's Canyon Road Site sits at an average elevation of 124 feet above mean sea level.

No subsurface geologic investigations were performed as part of the desktop hazards assessment. According to the EDR Radius Map Report (Appendix B), the compressor station area of the Devil's Canyon Road Site is primarily underlain by Sorrento loam. The Sorrento loam is characterized as soils that are well drained with moderate infiltration rates.

4.2 Groundwater

Dudek reviewed the State Water Resources Control Board (SWRCB) Groundwater Ambient Monitoring and Assessment Program Groundwater Information System (SWRCB 2025a) for further information on groundwater wells located on the subject property; no water wells were identified on the Devil's Canyon Road Site. According to the CalGEM Well Finder Application, three water source wells were identified on the roadway/utility corridor portion of the Devil's Canyon Road Site; these wells are all listed as plugged and were associated with oil and gas operations (CalGEM 2025). Dudek also reviewed the SWRCB GeoTracker database for nearby assessment and remediation sites (SWRCB 2025b). The nearest cleanup site with groundwater information (B.J. Services), approximately 0.5 miles south of the compressor station area, was listed on the GeoTracker database as a leaking underground storage tank (LUST) cleanup site. Groundwater depth ranged between 39 feet below ground surface (bgs) (when measured in 2000) and 51 feet bgs (when measured in 2008). Groundwater flow direction was determined to be to the south (EnviroSolve 2011). No groundwater gradient information was obtained during the desktop hazards assessment.

4.3 Agricultural Use

The compressor station area and Temporary Staging Area are not currently, nor have they historically been, used for agricultural purposes (Section 7, Site History). The aerial photographs reviewed for the roadway/utility corridor (UCSB 2025) indicate that several portions of the southern roadway/utility corridor area were developed for agriculture in recent years. While these areas have recently been developed for agriculture, it is unlikely that persistent pesticides, such as organochlorine pesticides, have been used in these areas. Organochlorinated compounds and metals are typically only observed in agricultural products manufactured and used prior to the 1980s. Following EPA regulations that were enacted in the late 1970s and early 1980s, pesticide and herbicide use became regulated, and the use of organochlorine compounds and heavy metals decreased. Based on the modern agricultural use, Dudek does not anticipate a need for contaminated soil disposal from these areas of recent agricultural use.

5 Public Agency Records Search

The regulatory database search gives a listing of sites within a 1-mile radius of the Devil's Canyon Road Site ("target property" is the term used by EDR) that are known to be chemical handlers or hazardous waste generators or have reported releases of hazardous substances or petroleum products. Information in these listings includes the location of the site relative to the Devil's Canyon Road Site, the type of potential environmental concern present, and the status of the site. On July 2, 2025, EDR provided the database search for this desktop hazards assessment.

Table 1 summarizes the databases that were searched that provide information on hazardous materials and petroleum products on the Devil's Canyon Road Site. The table also indicates the search distances from the Devil's Canyon Road Site and the number of sites identified in each database. The comprehensive list of databases is included in the EDR Radius Map Report (Appendix B).

Table 1. Regulatory Database Search Summary

Acronym	Database	Search Distance	Devil's Canyon Road Site Listed?	Number of Surrounding Sites Listed
NPL	National Priorities List (including proposed NPL sites and NPL Liens [target property only])	1 mile	No	0
Proposed NPL	Sites proposed for NPL	1 mile	No	0
NPL LIENS	Federal Superfund Liens	1 mile	No	0
Delisted NPL	National Priority List Deletions	1 mile	No	0
CERCLIS – Federal Facility	Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) with U.S. Environmental Protection Agency Federal Restoration and Reuse Office involvement	0.5 miles	No	0
CERCLIS – SEMS	CERCLA Superfund Enterprise Management System	0.5 miles	No	0
CERCLIS NFRAP (SEMS ARCHIVE)	CERCLA Superfund Enterprise Management System Archive	0.5 miles	No	3
CORRACTS	Resources Conservation and Recovery Act (RCRA) Corrective Action	1 mile	No	0
RCRA TSDF	RCRA - Transportation, Storage, and Disposal Facilities	0.5 miles	No	0
RCRA-LQG	RCRA Large Quantity Generators	0.25 miles	No	2
RCRA-SQG	RCRA Small Quantity Generators	0.25 miles	No	1
RCRA-VSQG	RCRA Very Small Quantity Generators	0.25 miles	No	0

RESPONSE	State Response Sites	1 mile	No	1
ENVIROSTOR	EnviroStor Databases	1 mile	No	11
LUCIS	Institutional Control/Engineering Control	0.5 miles	No	0

Table 1. Regulatory Database Search Summary

Acronym	Database	Search Distance	Devil's Canyon Road Site Listed?	Number of Surrounding Sites Listed
US ENG CONTROLS	Sites with Engineering Controls	0.5 miles	No	0
US INST CONTROLS	Sites with Institutional Controls	0.5 miles	No	0
SWF/LF	State and Tribal Landfill and/or Solid Waste Disposal Site	0.5 miles	No	0
LUST	State Leaking Underground Storage Tank	0.5 miles	No	26
Indian LUST	Tribal Leaking Underground Storage Tank	0.5 miles	No	0
CPS-SLIC	Statewide Cleanup Program Sites for Spills, Leaks, Investigations, and Cleanups Cases	0.5 miles	No	7
AST	State and Tribal Registered Aboveground Storage Tank	0.25 miles	No	1
UST	State and Tribal Registered Underground Storage Tank	0.25 miles	No	9
Indian UST	Registered Underground Storage Tank on Tribal Land	0.25 miles	No	0
FEMA UST	FEMA-Owned Registered Storage Tank	0.25 miles	No	0
Indian VCP	Voluntary Cleanup on Tribal Land	0.5 miles	No	0
VCP	State and Tribal Voluntary Cleanup	0.5 miles	No	0
Brownfields	State and Tribal Brownfields	0.5 miles	No	0
Additional Environmental Records, including local lists		Varies	Yes	113

Note: The search distances in the EDR Radius Map Report (Appendix B) and listed in this table are equal to or greater than the search distances required by ASTM E2247-23 (ASTM 2024); however, this report does not meet the ASTM standard for Phase I Environmental Site Assessments.

5.1 Devil's Canyon Road Site

One site was identified on the VCM Project Site in the databases searched by EDR:

- Aera Energy LLC is identified on the Devil's Canyon Road Site, in both the compressor station area and the Temporary Staging Area. The compressor station area is listed in the HWTS, HAZNET, AST, CERS, CERS Haz Waste, Ventura Co. BWT, UIC, PFAS ECHO, and ECHO databases. The Temporary Staging Area is listed in the UIC database. The UIC database indicates the presence of underground water injection wells. Three are identified on the Devil's Canyon Road Site; two are identified in the Temporary Staging Area and are active while the third well is in the compressor station area and is idle. Most of the above databases are administrative in nature; however, the site is further discussed in Section 6.1, Ventura County, and Section 6.6, California Environmental Protection Agency Regulated Site Portal.

6 Agency Records

6.1 Ventura County

6.1.1 Environmental Health Division

Ventura County Environmental Health Division (EHD) is the Certified Unified Program Agency for Ventura County. Ventura County EHD maintains information on spills, tanks, and chemical use. Ventura County EHD provides regulatory oversight for six statewide environmental programs: (1) Hazardous Materials Business Plan, (2) Hazardous Waste, (3) Tiered Permitting, (4) Underground Storage Tanks, (5) Aboveground Petroleum Storage, and (6) California Accidental Release Prevention Program. Several online databases of public records are available, including underground storage tanks (USTs), leaking underground fuel tanks, Voluntary Cleanup Program, Individual Sewage Disposal Systems (septic systems), Hazardous Materials Program (tracks storage, usage, and violations/incidents), and solid waste.

Dudek submitted a request for records on April 22, 2025, for records pertaining to hazardous materials, USTs, septic systems, on-site wastewater treatment systems, and individual sewage disposal systems for the Devil's Canyon Road Site. Dudek received a response on May 1, 2025, with several records identified for the compressor station area of the Devil's Canyon Road Site (Appendix C, Local Agency Records). Records were dated between 2006 and 2025 and included Certified Unified Program Agency inspection reports/violations and hazardous materials inventory reports for the address 600 Shell Road. Violations were administrative in nature. In May 2023 and February 2024, spillage of crude oil to the soil was reported. All contaminated soil was identified, removed, and disposed of. Considering these spills, the extensive list of hazardous materials stored at this site, and a long history of crude oil pumping and storage, the compressor station area is considered to represent an environmental concern.

In addition, Dudek reviewed each of the online databases outlined below (County of Ventura 2025a). The databases were searched by APN where possible. When an APN search was not available, the addresses at 600 Shell Road and 3891 and 3735 North Ventura Avenue were used for searching purposes. The information provided in the databases is summarized below.

Leaking Underground Fuel Tanks and Voluntary Cleanup Program

Ventura County EHD maintains online records for leaking underground fuel tanks and Voluntary Cleanup Program sites from 1984 through May 2008. Records from June 2008 to present are linked to SWRCB's GeoTracker website. The database was searched using the addresses 600 Shell Road and 3891 and 3735 North Ventura Avenue. No sites were identified.

Solid Waste

Ventura County EHD maintains online records for solid waste sites from 1980 through May 2002. Due to the lack of a specific address, the database was searched using the addresses 600 Shell Road and 3891 and 3735 North Ventura Avenue. Nothing was identified in this database search.

Individual Sewage Disposal Systems

Ventura County EHD maintains online records for septic systems from 1978 through 2016. The site was searched using the Devil's Canyon Road Site APNs. The Devil's Canyon Road Site was not identified in this database search.

Hazardous Materials Program and Underground Tanks

The Certified Unified Program Agency division of the Ventura County EHD maintains online records of hazardous materials and UST sites that were active from 1984 through July 2011. Aera Energy was identified using the address at 600 Shell Road. One inspection report was identified for June 8, 2008 (Appendix C). No violations were noted.

Inactive Underground Storage Tanks

Ventura County EHD maintains online records for inactive USTs from 1984 through May 2008. Due to the lack of a specific address, the database was searched using the addresses 600 Shell Road and 3891 and 3735 North Ventura Avenue. No tanks were identified at these locations.

Hazardous Material Release Reports

Ventura County maintains documents from 1987 to 2017 for hazardous material release reports. Due to the lack of a specific address, the database was searched using the address 600 Shell Road. Four spill reports were identified at 600 Shell Road between 2008 and 2014, including two crude oil spills (less than 25 gallons), one 1.5-gallon transmission fluid spill, and one spill of filtered injection water (Appendix C). All spills were contained and remediated.

6.1.2 Zoning

Dudek accessed the County of Ventura Planning online map for information about zoning of the Devil's Canyon Road Site (County of Ventura 2025b). According to the online map, zoning for the compressor station area was identified as "OS-160 ac" (Open Space with a minimum lot size of 160 acres), whereas the Temporary Staging Area zoning was identified as a M3-10,000 sq ft (general industrial with minimum lot area of 10,000 square feet).

6.1.3 Agricultural Commissioner

Dudek contacted the County of Ventura Agriculture Commissioner's Office on April 22, 2025, to obtain records on agricultural use pertaining to the Devil's Canyon Road Site. A response was received on April 29, 2025, indicating that no records were available for the Devil's Canyon Road Site (Appendix C).

6.1.4 Building and Safety Division

Dudek contacted the County of Ventura Building and Safety Division on April 22, 2025, to obtain building records and permits pertaining to the Devil's Canyon Road Site. A response was received on June 3, 2025 (Appendix C). Dudek also reviewed the County of Ventura online permit database (County of Ventura 2025c). For the compressor station area, the database was searched using APN 060-031-016. A total of 27 permits were identified for this APN; however, it could not be determined if the building permits were on the Devil's Canyon Road Site. Of these 27 permits, 21 were associated with the address 600 Shell Road and included permits for well pumps, water tanks,

pumping units, electrical work, and remodeling (Appendix C). For the Temporary Staging Area, the database was searched using APN 063-020-019. No building permits were identified.

6.2 State Water Resources Control Board

Dudek searched GeoTracker, the SWRCB data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. Records include sites that require cleanup, various unregulated projects, and permitted facilities (SWRCB 2025b). One site was identified on the Devil's Canyon Road Site, described as follows:

- Burma Sump is located along Taylor Ranch Road, within and adjoining the southeastern portion of the roadway/utility corridor. The Burma Sump, visible in historical aerial photographs, is a land disposal site. During construction of SR-33 in 1956, oil sumps were removed from the construction areas and their wastes were placed at the Burma Sump under a Regional Water Quality Control Board (RWQCB) Resolution (Waste Discharge Requirements). In 1999, oil from the sump was found to be seeping from the sump and flowing down toward the Ventura River. A Cleanup and Abatement Order was submitted by the RWQCB; the order stated that the sump was 30 to 40 feet deep. In 2014, it was noted that the upper 6 to 10 feet of the eastern portion of the sump (which is understood to be within the roadway/utility corridor) consisted of a viscous tar-like fluid. A remedial effort was implemented to solidify and cap the sump. This land disposal site is still open. Based on the case status (open) and the known impacts, this is considered to represent an environmental concern.

6.2.1 GeoTracker PFAS Database

Per- and polyfluoroalkyl substances (PFAS) constitute a large family of fluorinated chemicals (exceeding several thousand compounds) that vary widely in their chemical and physical properties. They have been used for commercial and industrial purposes and as a result have been found in the environment (i.e., water, soil, and air). The persistence and mobility of some PFAS, combined with decades of widespread use in industrial processes, certain types of firefighting foams, and consumer products, have resulted in their presence in the environment at trace levels across the globe (ITRC 2023).

The San Francisco Bay RWQCB published a PFAS sampling fact sheet in May 2024, outlining the following types of sites likely to have used, stored, and/or released PFAS (San Francisco Bay RWQCB 2024):

- Firefighting practice training areas and fire stations (aqueous film-forming foam sites)
- Refineries and bulk fuel terminals
- Semiconductor manufacturers
- Electronics manufacturers—including phones, TVs, and screens
- Chrome plating facilities
- Large commercial/industrial laundries
- Textile facilities—leather tanneries, upholsterers and furniture makers/processors, carpet manufacturing/ treating, large-scale clothes/textile makers
- Plastics manufacturers

- Cardboard/paper packaging manufacturers
- Recycling facilities—paper and/or plastics
- Surface coatings/paints/varnish manufacturers and high-volume users
- High-volume print shops, photos shops, and ink manufacturers
- Pesticide manufacturers
- Manufacturers of consumer products with PFAS
- Mining industry (copper, gold, aluminum, vanadium, and uranium)
- Landfills

As of April 2024, the U.S. Environmental Protection Agency (EPA) has finalized National Primary Drinking Water Regulations for six PFAS chemicals, including perfluorooctanoic acid (PFOA), perfluorooctanesulfonic acid (PFOS), perfluorononanoic acid (PFNA), perfluorohexanesulfonic acid (PFHxS), hexafluoropropylene oxide-dimer acid (HFPO-DA), and mixtures of two or more of PFHxS, PFNA, HFPO-DA, and perfluorobutanesulfonic acid (PFBS). EPA set maximum contaminant levels for these six chemicals (or chemical mixtures), which are enforceable health-based limits, and a hazard index (ratio of water sample concentration to health-based water concentration) for mixtures of two or more of PFHxS, PFNA, HFPO-DA, and PFBS (EPA 2024a). Additionally, under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), PFOA, PFOS, and their salts and structural isomers were designated hazardous substances by EPA (EPA 2024b). EPA also established regional screening levels for PFOA and PFOS in soil (EPA 2024c). As such, the presence of PFOA, PFOS, PFNA, PFHxS, and/or HFPO-DA in any combination above their maximum contaminant levels and/or reportable quantities could be identified as an environmental concern.

The SWRCB Division of Drinking Water issued multiple General Orders for investigation and monitoring of PFAS in public water systems (SWRCB 2024), along with a series of Investigative Orders issued for airports, chrome-plating facilities, landfills, bulk fuel terminals, and public water treatment facilities. The various orders, issuance of which first began in 2019, targeted public water systems and facilities likely to have PFAS, such as airports, landfills, and chrome-plating facilities. SWRCB has created the GeoTracker PFAS Map, which is a data management system for sites with PFAS investigative orders, other sites with PFAS data, and water well systems with PFAS data (SWRCB 2025c). No PFAS data were identified on the Devil's Canyon Road Site.

Based on review of the GeoTracker PFAS database, there are no records to indicate that PFAS is an environmental concern to the Devil's Canyon Road Site. However, research and studies indicate that PFAS is present in most environments; thus, it is possible that it is present on or near the Devil's Canyon Road Site.

6.3 Department of Toxic Substances Control

Dudek searched EnviroStor, the Department of Toxic Substances Control database management system used for tracking cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known contamination. No sites were identified on the Devil's Canyon Road Site.

6.4 National Pipeline Mapping System

Dudek searched the National Pipeline Mapping System online database, which provides a public map viewer application that displays data related to gas transmission and hazardous liquid pipelines, liquefied natural gas plants, and breakout tanks under Pipeline and Hazardous Material Safety Administration jurisdiction (PHMSA 2025). One active (filled) crude oil transmission pipeline, operated by Crimson Pipeline LP, was identified in the southeast portion of the compressor station area and extends south of the compressor station area. This same pipeline extends just to the south and east of the Temporary Staging Area (Appendix C).

6.5 California Department of Resources Recycling and Recovery Solid Waste Information System

The California Department of Resources Recycling and Recovery Solid Waste Information System (SWIS) portal provides information on solid waste facilities, operations, and disposal sites throughout California. Dudek queried the SWIS database for landfills, transfer stations, composting sites, in-vessel digestion sites, engineered municipal solid waste conversion facilities, transformation facilities, and closed disposal sites or documentation for the Devil's Canyon Road Site (CalRecycle 2025). No sites were identified on or within 1 mile of the Devil's Canyon Road Site.

6.6 California Environmental Protection Agency Regulated Site Portal

Dudek reviewed the California Environmental Protection Agency Regulated Site Portal, which contains data about environmentally regulated sites and facilities in California (CalEPA 2025). Data sources for the portal include the CERS, the Department of Toxic Substances Control EnviroStor, the SWRCB GeoTracker and California Integrated Water Quality System, and the Federal Toxics Release Inventory.

California Environmental Protection Agency sites are generally administrative in nature; the Regulated Site Portal identifies sites that have environmental permits or that handle hazardous materials or generate hazardous waste but that do not necessarily have an uncontrolled release of hazardous substances to the environment

One site was identified in the compressor station area: Aera Energy LLC, at 600 Shell Road, is identified as a Chemical Storage Facility, a Hazardous Waste Generator, and a RCRA LQG (large quantity generator) hazardous waste generator. A total of 24 inspections were conducted between 2013 and 2024, with no documented violations. The site is further discussed in Section 6.1. No sites were identified in the Temporary Staging Area.

6.7 California Geologic Energy Management Division

Dudek reviewed the California Geologic Energy Management Division online database, which has information for known oil and gas wells in the state, for wells on the Devil's Canyon Road Site. A total of 15 wells were identified on the Devil's Canyon Road Site (CalGEM 2025). All wells are operated by Aera Energy LLC. The compressor station area contains 8 of the wells, with 5 wells active and 3 plugged. The Temporary Staging Area contains 7 of the wells, with 6 wells active and 1 plugged. The EDR Radius Map Report (Appendix B) identified a total of 858 wells, including oil/gas and waterflood wells, within 1 mile of the Devil's Canyon Road Site.

7 Site History

Compressor Station Area

Based on a review of historical aerial photographs, historical topographic maps, and agency records, the compressor station area has been used for oil production and storage from at least 1927 until the present.

Temporary Staging Area

Based on a review of historical aerial photographs, historical topographic maps, and agency records, the Temporary Staging Area hosted oil storage and production as early as 1941. Oil storage was terminated as early as 1994; oil production is ongoing.

Roadway/Utility Corridor

Based on a review of historical aerial photographs and agency records, the northern portion of the roadway/utility corridor has been located within the Ventura oilfield since as early as 1927. Portions of the southern extent of the roadway/utility corridor were cultivated for agricultural use (orchards) as early as 2009.

7.1 Historical Aerial Photographs

Dudek reviewed historical aerial photographs obtained from EDR for 1927, 1947, 1953, 1959, 1967, 1978, 1984, 1994, 2005, 2009, 2012, 2016, and 2020 (Appendix D). Dudek also reviewed aerial photographs from Google Earth for 2025 (Google Earth 2025). The photographs provided background information to assess the possibility of past activities that could present environmental concerns. The aerial photographs are described in Tables 2a (for the compressor station area) and 2b (for the Temporary Staging Area). Results of the aerial photograph search for the roadway/utility corridor are described in Section 7.1.3.

7.1.1 Compressor Station Area

Table 2a. Aerial Photographs of the Compressor Station Area

Date	Devil's Canyon Road Site
1927	The remaining Devil's Canyon Road Site is observed to be graded land.
1947	Staged materials, likely drill pipe and other drilling materials, are observed on the western half of the Devil's Canyon Road Site. A tank farm is observed on the northern portion of the Devil's Canyon Road Site. An additional tank is observed adjacent to a sump. A north–south-trending road is observed through the center of the Devil's Canyon Road Site. An oil sump is observed in the southeastern corner of the Devil's Canyon Road Site. A large pipeline is observed entering the Devil's Canyon Road Site from the east.
1953	Additional structures are observed in the center of the Devil's Canyon Road Site. Pipelines are observed extending from the eastern tank farm to the smaller tanks to the southwest.
1959	Modifications to the eastern tank farm and various structures are observed.
1967	Pipelines are observed extending from the west-central tank farm to the south and west. The remainder of the Devil's Canyon Road Site appears similar to the 1959 aerial photograph.

Table 2a. Aerial Photographs of the Compressor Station Area

Date	Devil's Canyon Road Site
1978	The materials on the western half of the Devil's Canyon Road Site are replaced with tanks and a few scattered structures and vehicles. The oil sump in the southeastern corner is no longer observed.
1984	The Devil's Canyon Road Site appears similar to the 1978 aerial photograph.
1994	The Devil's Canyon Road Site appears similar to the 1984 aerial photograph.
2005	The tank in the center of the Devil's Canyon Road Site is no longer observed.
2009	The Devil's Canyon Road Site appears similar to the 2005 aerial photograph.
2012	The Devil's Canyon Road Site appears similar to the 2009 aerial photograph.
2016	The Devil's Canyon Road Site appears similar to the 2012 aerial photograph.
2020	The Devil's Canyon Road Site appears similar to the 2016 aerial photograph.
2025	The Devil's Canyon Road Site appears similar to the 2020 aerial photograph.

Note: See Appendix D for corresponding photographs for 1927 through 2020. The 2025 Google Earth photograph is available online and therefore is not included in Appendix D.

7.1.2 Temporary Staging Area

Table 2b. Aerial Photographs of the Temporary Staging Area

Date	Devil's Canyon Road Site
1927	The Devil's Canyon Road Site is observed to be vacant land, with a few unimproved roads observed.
1947	A tank farm is observed in the center of the Devil's Canyon Road Site. Roads are more developed, including two north–south-trending roads and an east–west-trending road.
1953	Additional tanks are observed in the center of the Devil's Canyon Road Site.
1959	Vehicles and storage are observed in the northern portion of the Devil's Canyon Road Site. A possible oil sump is observed north of the tank farm.
1967	The Devil's Canyon Road Site appears similar to the 1959 aerial photograph.
1978	The northern portion of the Devil's Canyon Road Site is vacant and graded. The oil sump is no longer observed.
1984	The Devil's Canyon Road Site appears similar to the 1978 aerial photograph.
1994	The tank farm is no longer observed in the center of the Devil's Canyon Road Site. The majority of the Devil's Canyon Road Site appears vacant with a few scattered structures.
2005	A few structures are observed along the eastern border of the Devil's Canyon Road Site.
2009	A few structures are observed in the center of the Devil's Canyon Road Site. The structures along the eastern border are no longer observed.
2012	A few structures are observed in the southern portion of the Devil's Canyon Road Site.
2016	Additional structures are observed in the northern and southern portions of the Devil's Canyon Road Site.
2020	The Devil's Canyon Road Site appears similar to the 2016 aerial photograph.
2025	The Devil's Canyon Road Site appears similar to the 2020 aerial photograph.

Note: See Appendix D for corresponding photographs for 1927 through 2020. The 2025 Google Earth photograph is available online and therefore is not included in Appendix D.

7.1.3 Roadway/Utility Corridor

Dudek reviewed aerial photographs from the University of California, Santa Barbara, Library FrameFinder online database for the years 1927, 1941, 1959, 1968, 1970, and 1984 (UCSB 2025). Dudek also reviewed 2025 aerial imagery from Google Earth (Google Earth 2025) and aerial photographs for portions of the site from EDR for 1927, 1947, 1953, 1959, 1967, 1978, 1984, 1994, 2005, 2009, 2012, 2016, and 2020.

The Burma Sump site is partially located along the southeastern roadway/utility corridor. The Burma Sump, visible in historical aerial photographs, is a land disposal site. Several additional sumps and oil wells were observed as early as 1927. Orchards were observed in the southernmost portion of the roadway/utility corridor by 2010.

7.2 Historical Topographic Maps

Dudek reviewed historical topographic maps from 1904, 1941, 1948, 1951, 1967, 2012, 2015, 2018, and 2022 (Appendix A). The topographic maps are a historical source that can be used to document the prior use of the Devil's Canyon Road Site and surrounding area. The topographic maps are described in Table 3a (for the compressor station area) and 3b (for the Temporary Staging Area). Results of the topographic map search for the roadway/utility corridor are described in Section 7.2.3.

7.2.1 Compressor Station Area

Table 3a. Topographic Maps of the Compressor Station Area

Date	Devil's Canyon Road Site
1904	The Devil's Canyon Road Site is depicted as vacant and undeveloped land.
1941	Four oil wells are depicted on the Devil's Canyon Road Site.
1948	The Devil's Canyon Road Site is depicted similarly to the 1941 topographic map.
1951	Three north–south-trending light-duty roads are depicted through the Devil's Canyon Road Site. At least seven oil tanks and one structure are depicted on the Devil's Canyon Road Site.
1967	An additional structure is depicted in the center of the Devil's Canyon Road Site. The remaining Devil's Canyon Road Site is depicted similarly to the 1951 topographic map.
2012	Individual structures, wells, and tanks are no longer depicted on the topographic map. Only one north–south-trending light-duty road (Devil's Canyon Road) is depicted through the Devil's Canyon Road Site.
2015	The Devil's Canyon Road Site is depicted similarly to the 2012 topographic map.
2018	The Devil's Canyon Road Site is depicted similarly to the 2015 topographic map.
2022	The Devil's Canyon Road Site is depicted similarly to the 2018 topographic map.

Note: See Appendix A for corresponding maps.

7.2.2 Temporary Staging Area

Table 3b. Topographic Maps of the Compressor Station Area

Date	Devil's Canyon Road Site
1904	The Devil's Canyon Road Site is depicted as vacant and undeveloped land. A north–south-trending perennial stream is depicted through the center of the Devil's Canyon Road Site. A north–south-trending railroad is depicted along the eastern border of the Devil's Canyon Road Site.
1941	An east–west-trending unimproved road is depicted through the center of the Devil's Canyon Road Site. The remaining Devil's Canyon Road Site is depicted similarly to the 1904 topographic map.
1948	The Devil's Canyon Road Site is depicted similarly to the 1941 topographic map.
1951	Six tanks and two wells are depicted on the Devil's Canyon Road Site. A north–south-trending road is depicted along the western border of the Devil's Canyon Road Site. The perennial stream and the east–west-trending unimproved road are no longer depicted.
1967	An east–west-trending road is depicted in the northern portion of the Devil's Canyon Road Site. The remaining Devil's Canyon Road Site is depicted similarly to the 1951 topographic map.
2012	Individual structures, wells, and tanks are no longer depicted on the topographic map. No roads are depicted on the Devil's Canyon Road Site.
2015	The Devil's Canyon Road Site is depicted similarly to the 2012 topographic map.
2018	The Devil's Canyon Road Site is depicted similarly to the 2015 topographic map.
2022	The Devil's Canyon Road Site is depicted similarly to the 2018 topographic map.

Note: See Appendix A for corresponding maps.

7.2.3 Roadway/Utility Corridor

Dudek reviewed historical topographic maps from 1904, 1910, 1918, 1921, 1938, 1946, 1952, 1955, 1961, 1964, 1966, 1968, 1972, 2012, 2015, 2018, and 2022 (Historic Aerials 2025). From 1904 to 1946, the roadway/utility corridor was depicted as primarily vacant land transected by several unimproved roads. Beginning in 1952, various oil wells were depicted and additional unimproved roads were depicted in the roadway/utility corridor. By 1961, a large sump was depicted on the southeastern portion of the roadway/utility corridor; the sump was no longer depicted in the 1966 topographic map. The roadway/utility corridor was depicted similarly through 1972. Beginning in 2012, minor roads, wells, and other features were no longer depicted on the topographic maps.

8 Vapor Encroachment

Dudek evaluated vapor encroachment to determine whether there is a potential for vapors originating from contaminated soil and/or groundwater to occur in the subsurface below the existing and potential future on-site structures. Information obtained from other sources (geologic and hydrogeological information, site reconnaissance, local regulatory agency responses), as discussed in this report, was also considered. The VEC assessment was conducted in accordance with ASTM E2600-22 (ASTM 2022). The EDR Radius Map Report (Appendix B) was used to evaluate listed contaminated sites as identified in federal, state, and local databases.

Based on the Devil's Canyon Road Site's known long-term operations as an oil and gas field along with tank farms, piping, and other associated equipment, a VEC cannot be ruled out.

9 Contaminated Soil Estimate

Dudek further reviewed aerial photographs and on-line databases (GeoTracker and EnviroStor) to identify the areas of likely soil contamination on the Devil's Canyon Road Site (in the proposed compressor station area and the roadway/utility corridor area, excluding the Temporary Staging Area). The following sections present a rough estimate (educated guess) of the area and depth of contamination based on Dudek's experience at other sites; note that this rough estimate cannot be more than an educated guess because there is no available subsurface sampling data for the site.

9.1 Proposed Compressor Station Area

Dudek reviewed aerial photographs from the University of California, Santa Barbara, Library FrameFinder online database (UCSB 2025) for the years 1927, 1941, 1945, 1947, 1958, 1966, 1969, 1970, 1971, 1984, 1994, and 2002. Dudek also reviewed 2025 aerial imagery from Google Earth and aerial photographs from EDR for 1953, 1959, 1967, 1978, 2005, 2009, 2012, 2016, and 2020. Dudek also reviewed the GeoTracker and EnviroStor on-line databases in the site vicinity.

Areas of likely contamination and a rough estimate (educated guess) of the area, depth, and volume of soil contamination are presented in Table 4 and on Figure 2, Areas of Likely Contamination – Compressor Station Area.

Table 4. Areas of Likely Contamination – Proposed Compressor Station Area

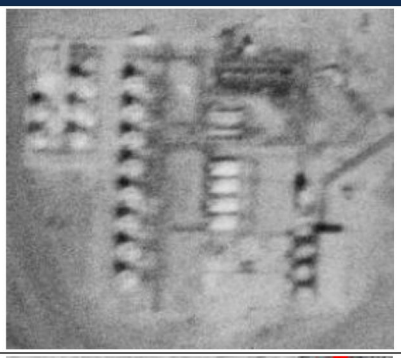

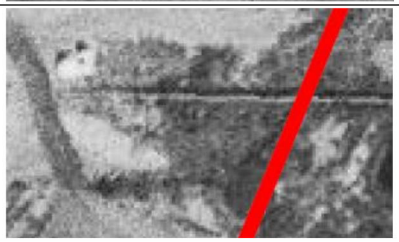

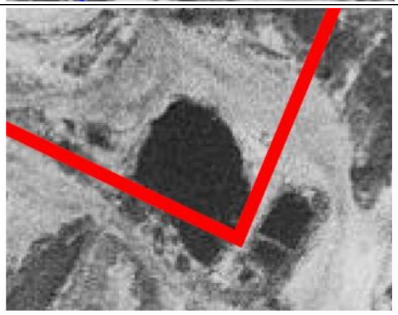

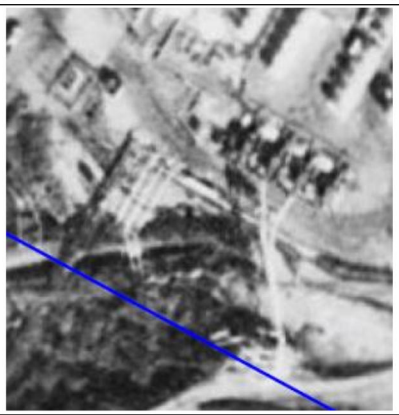

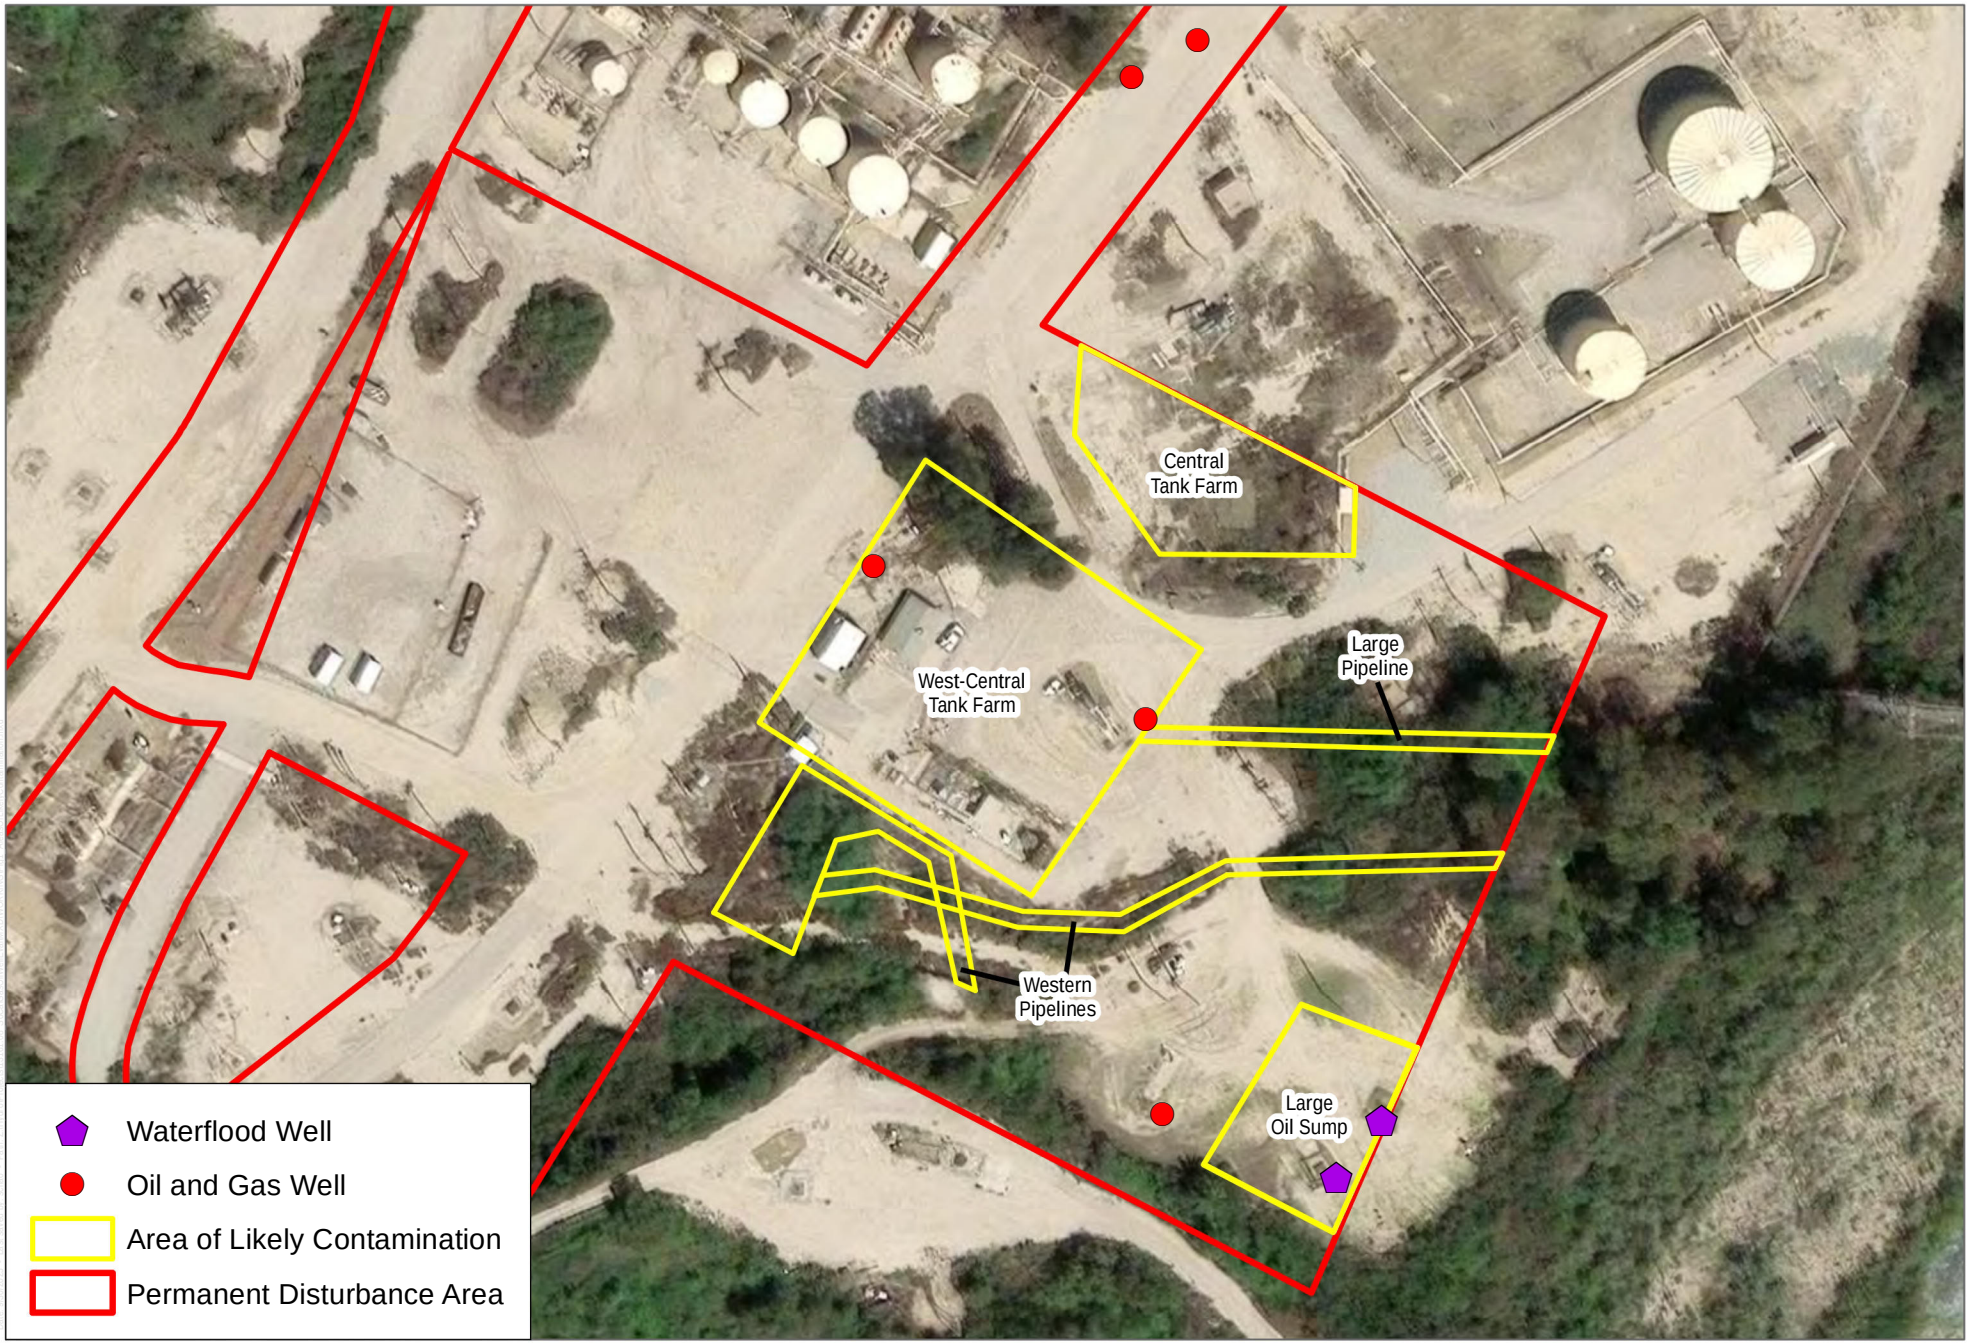

Areas of Likely Contamination	Images	Rough Estimate (Educated Guess) of Extent of Contamination (Area, Depth, and Approximate Volume)
A portion of the central tank farm that is located within the compressor station area (site) boundary (1927–2002, different layouts and tanks over time)		14,000 sf Assume half of area (7,000 sf) is impacted to 10–15 feet bgs 84,000 cf
A large pipeline that enters the site from the southwest (1941–2002)		700 sf Assume half of area (350 sf) is impacted to 5–10 feet bgs 2,450 cf

Table 4. Areas of Likely Contamination – Proposed Compressor Station Area

Areas of Likely Contamination	Images	Rough Estimate (Educated Guess) of Extent of Contamination (Area, Depth, and Approximate Volume)
A tank farm in the west-central area of the site, at the termination of the large pipeline (1945–1947 and 1966–1984)		20,000 sf Assume half of area (10,000 sf) is impacted to 10–15 feet bgs 120,000 cf
A large oil sump in the western corner of the site (1947–1971)		6,000 sf Assume entire area is impacted to 20–40 feet bgs 180,000 cf
Pipelines that extend from the west-central tank farm to the south and west (1966–2002)		5,000 sf Assume half of area (2,500 sf) is impacted to 5–10 feet bgs 17,500 cf
Oil wells: ▪ 3 active (drilled in 1929 [2] and 2009 [1]) ▪ 2 plugged (abandoned in 1947 and 2012) ▪ 2 waterflood (drilled in 1988 and 2010)		10 × 10 feet (100 sf) per oil well Assume entire area for each oil well is impacted to 10 feet bgs 5,000 cf
Unidentified collection and shipping pipelines	Unknown locations	Unknown area Assume the impacted area for each pipeline is 5–10 feet bgs

Notes: sf = square feet; bgs = below ground surface; cf = cubic feet.

Combining the potential impact volumes in the areas discussed above and shown on Figure 2 (excluding the unidentified collecting and shipping pipelines, the locations and volumes of which are unknown) results in a total of approximately 408,950 cf of potentially impacted soils, or 15,146 cy.

Areas of Likely Contamination - Devil's Canyon Road Site Alternative Compressor Station Area

Ventura Compressor Station Modernization Project (VCM Project) - Devil's Canyon Road Site Desktop Hazards Assessment

9.2 Roadway/Utility Corridor

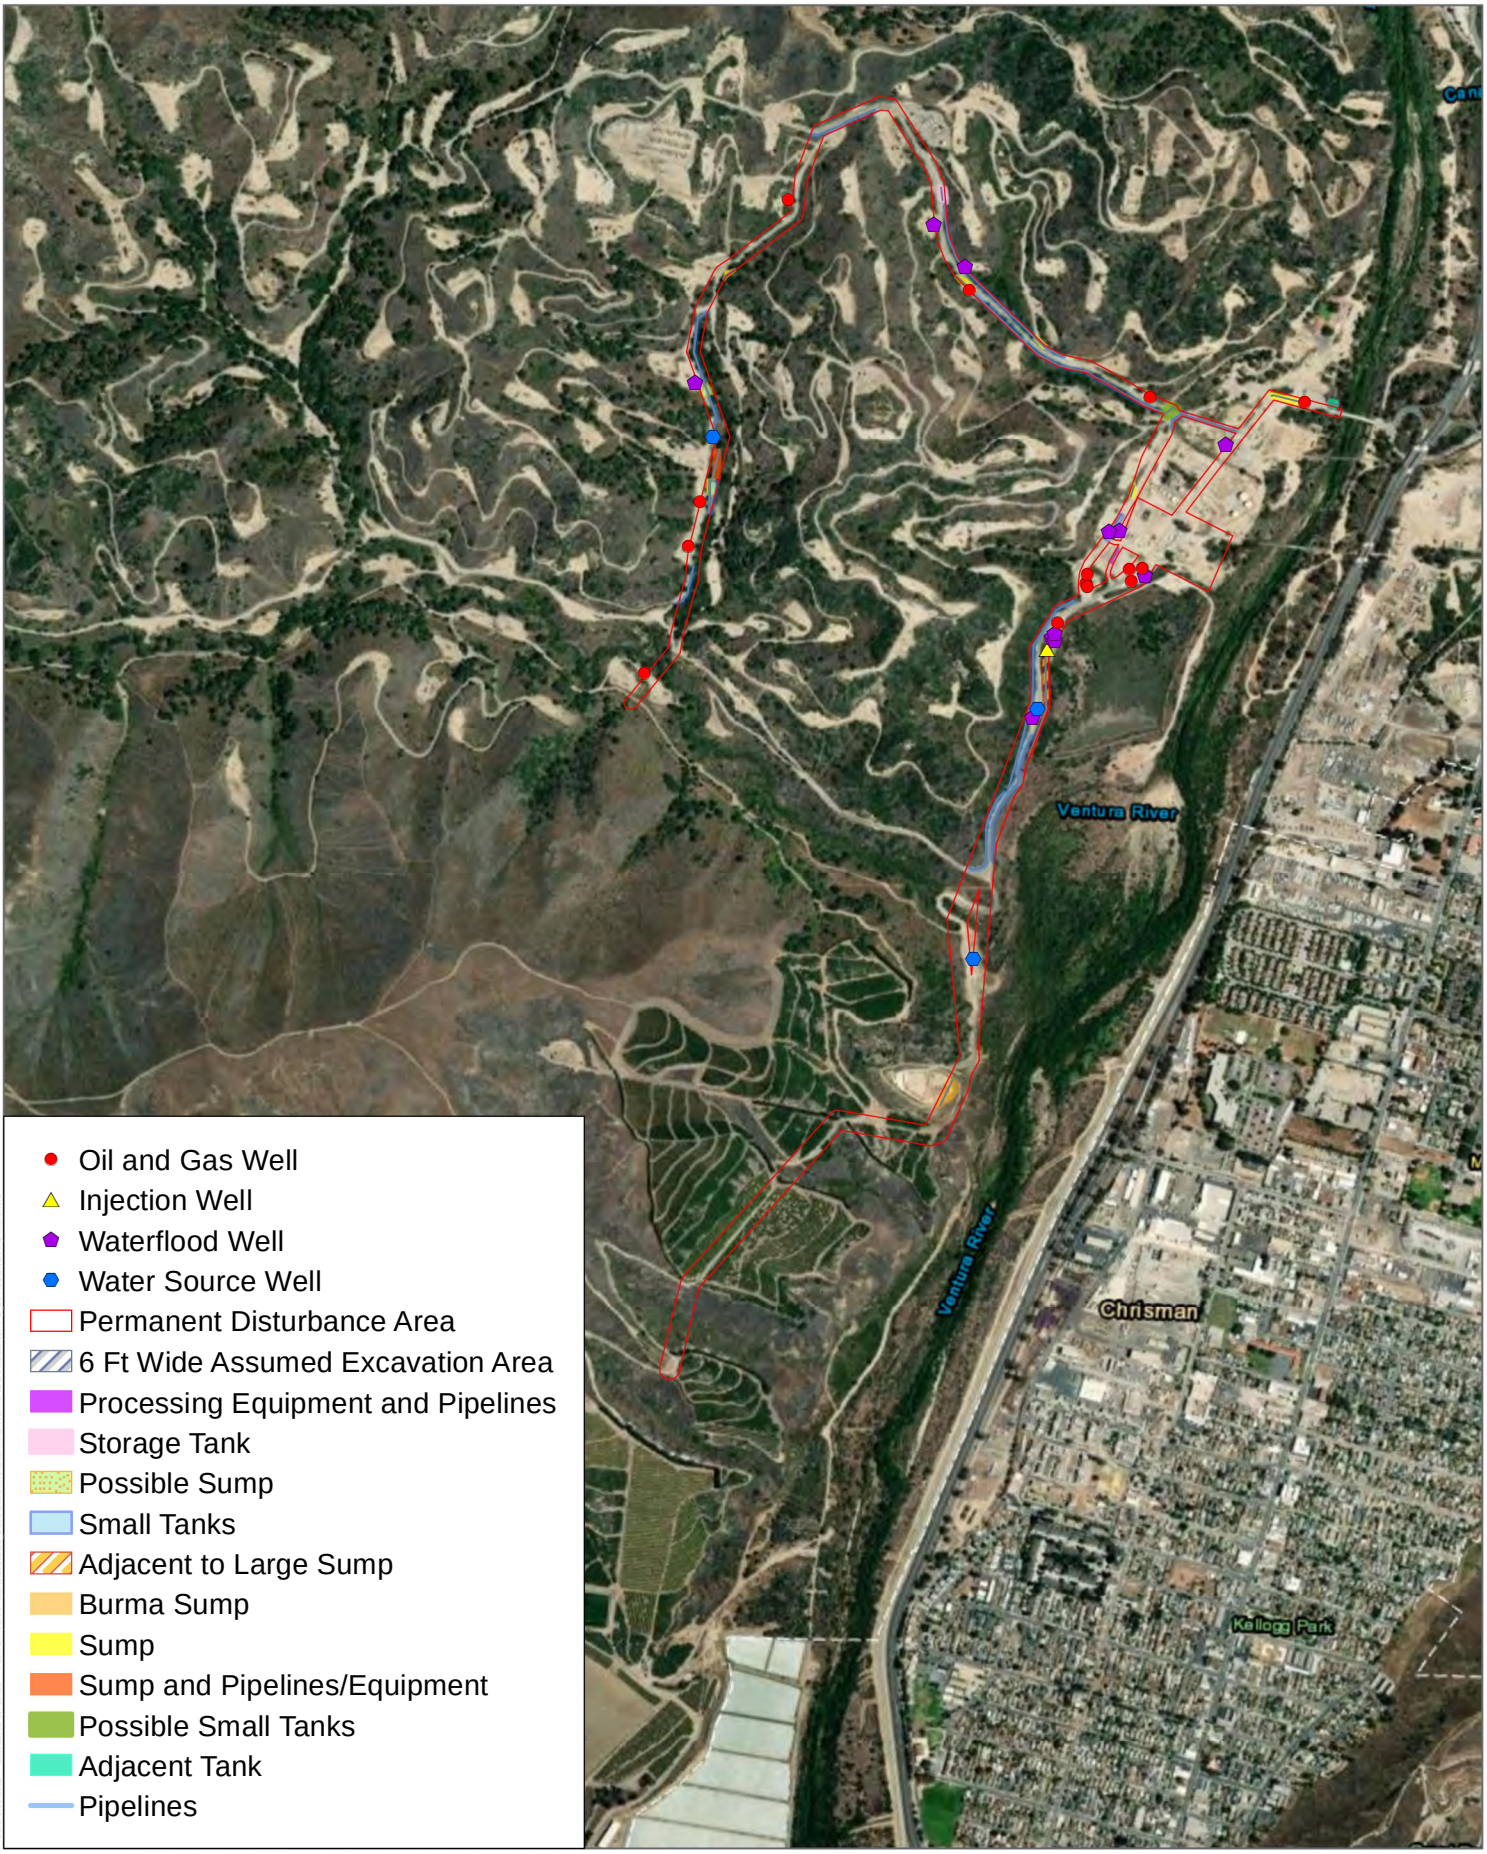

Based on a review of aerial photographs from the University of California, Santa Barbara, Library FrameFinder online database (UCSB 2025) for the years 1927, 1941, 1959, 1968, 1970, and 1984, as well as a current aerial photograph from Google Earth (2025), Dudek identified areas of potential impacts within the roadway/utility corridor portion of the Devil's Canyon Road Site (Devil's Canyon Road Site areas west of SR-33, excluding the compressor station area; Figure 3, Areas of Likely Contamination – Roadway/Utility Corridor). Dudek also reviewed the GeoTracker and EnviroStor on-line databases and identified a release site that has impacted the Roadway/Utility Corridor of the Devil's Canyon Road Site area. These areas and potential impacts are described as follows:

- Pipelines are located along the roadway in many portions of the roadway/utility corridor. Dudek identified approximately 9,262 linear feet of existing pipelines along the roadway/utility corridor. Assuming that half of the area is impacted to a depth of approximately 6 feet bgs and a width of 6 feet 4 inches, the approximate volume of possible impacts is 175,980 cf, or **6,518 cy**.
- Several small sumps were located along the roadway/utility corridor (Figure 3). Additionally, a very large sump was visible in aerial photographs south of the compressor station area. The roadway/utility corridor is located immediately adjacent to this very large sump. Lastly, the Burma Sump was visible in aerial photographs (southeastern roadway/utility corridor area); the Burma Sump is further discussed in Section 6.2. It is likely that any excavation or grading work at the Burma Sump site would not be allowed and at the very least would require approval from RWQCB. The potential area of impacts within an area that may be excavated for future pipeline placement at the Burma Sump site is approximately 1,504 square feet. Assuming a depth of impacts to 6 feet bgs within the proposed pipeline excavation, the approximate volume of likely impacts is approximately 9,024 cf, or 334 cy. Other than the Burma Sump, approximately 11,424 square feet of sumps were identified in the aerial photographs as being within the roadway/utility corridor area and within an approximately 6-foot future pipeline excavation width. Assuming a depth of impacts of approximately 6 feet bgs within the proposed pipeline excavation area, the approximate volume of likely impacts is 68,544 cf, or approximately 2,540 cy, for a total of 2,874 cy.
- Several areas along the roadway/utility corridor overlapped with tanks, including small and large tanks (Figure 3). The area of overlap between the tank areas and the roadway/utility corridor within an approximately 6-foot future pipeline excavation width was approximately 5,036 square feet. Assuming approximately half of this area is impacted to 6 feet bgs within the proposed pipeline excavation area, the approximate volume of assumed impacts is 15,108 cf, or approximately 560 cy.
- One area of what appeared to be oil field equipment and piping was observed along the roadway/utility corridor immediately southwest of the compressor station area. Assuming approximately half of this area (half of 798 square feet) is impacted to 6 feet bgs within the proposed pipeline excavation area, the approximate volume of assumed impacts is approximately 2,394 cf, or 89 cy.
- Fourteen oil wells were located on or immediately adjacent to the roadway/utility corridor. Assuming an area of impact for each well of approximately 10 feet long, 6 feet wide, and 6 feet deep within the proposed pipeline excavation area, these areas include likely impacts of approximately 5,040 cf, or 187 cy.

The aerial photographs indicate that several portions of the southern roadway/utility corridor area were developed for agriculture in recent years. While these areas have recently been developed for agriculture, it is unlikely that

persistent pesticides, such as organochlorine pesticides, have been used in these areas. Dudek does not anticipate a need for contaminated soil disposal from these areas of recent agricultural use.

Combining the potential impact volumes in the areas discussed above and shown on Figure 3 results in a total of approximately 276,090 cf of potentially impacted soils, or 10,226 cy.

10 Findings and Conclusions

Information gathered for this report indicated the following:

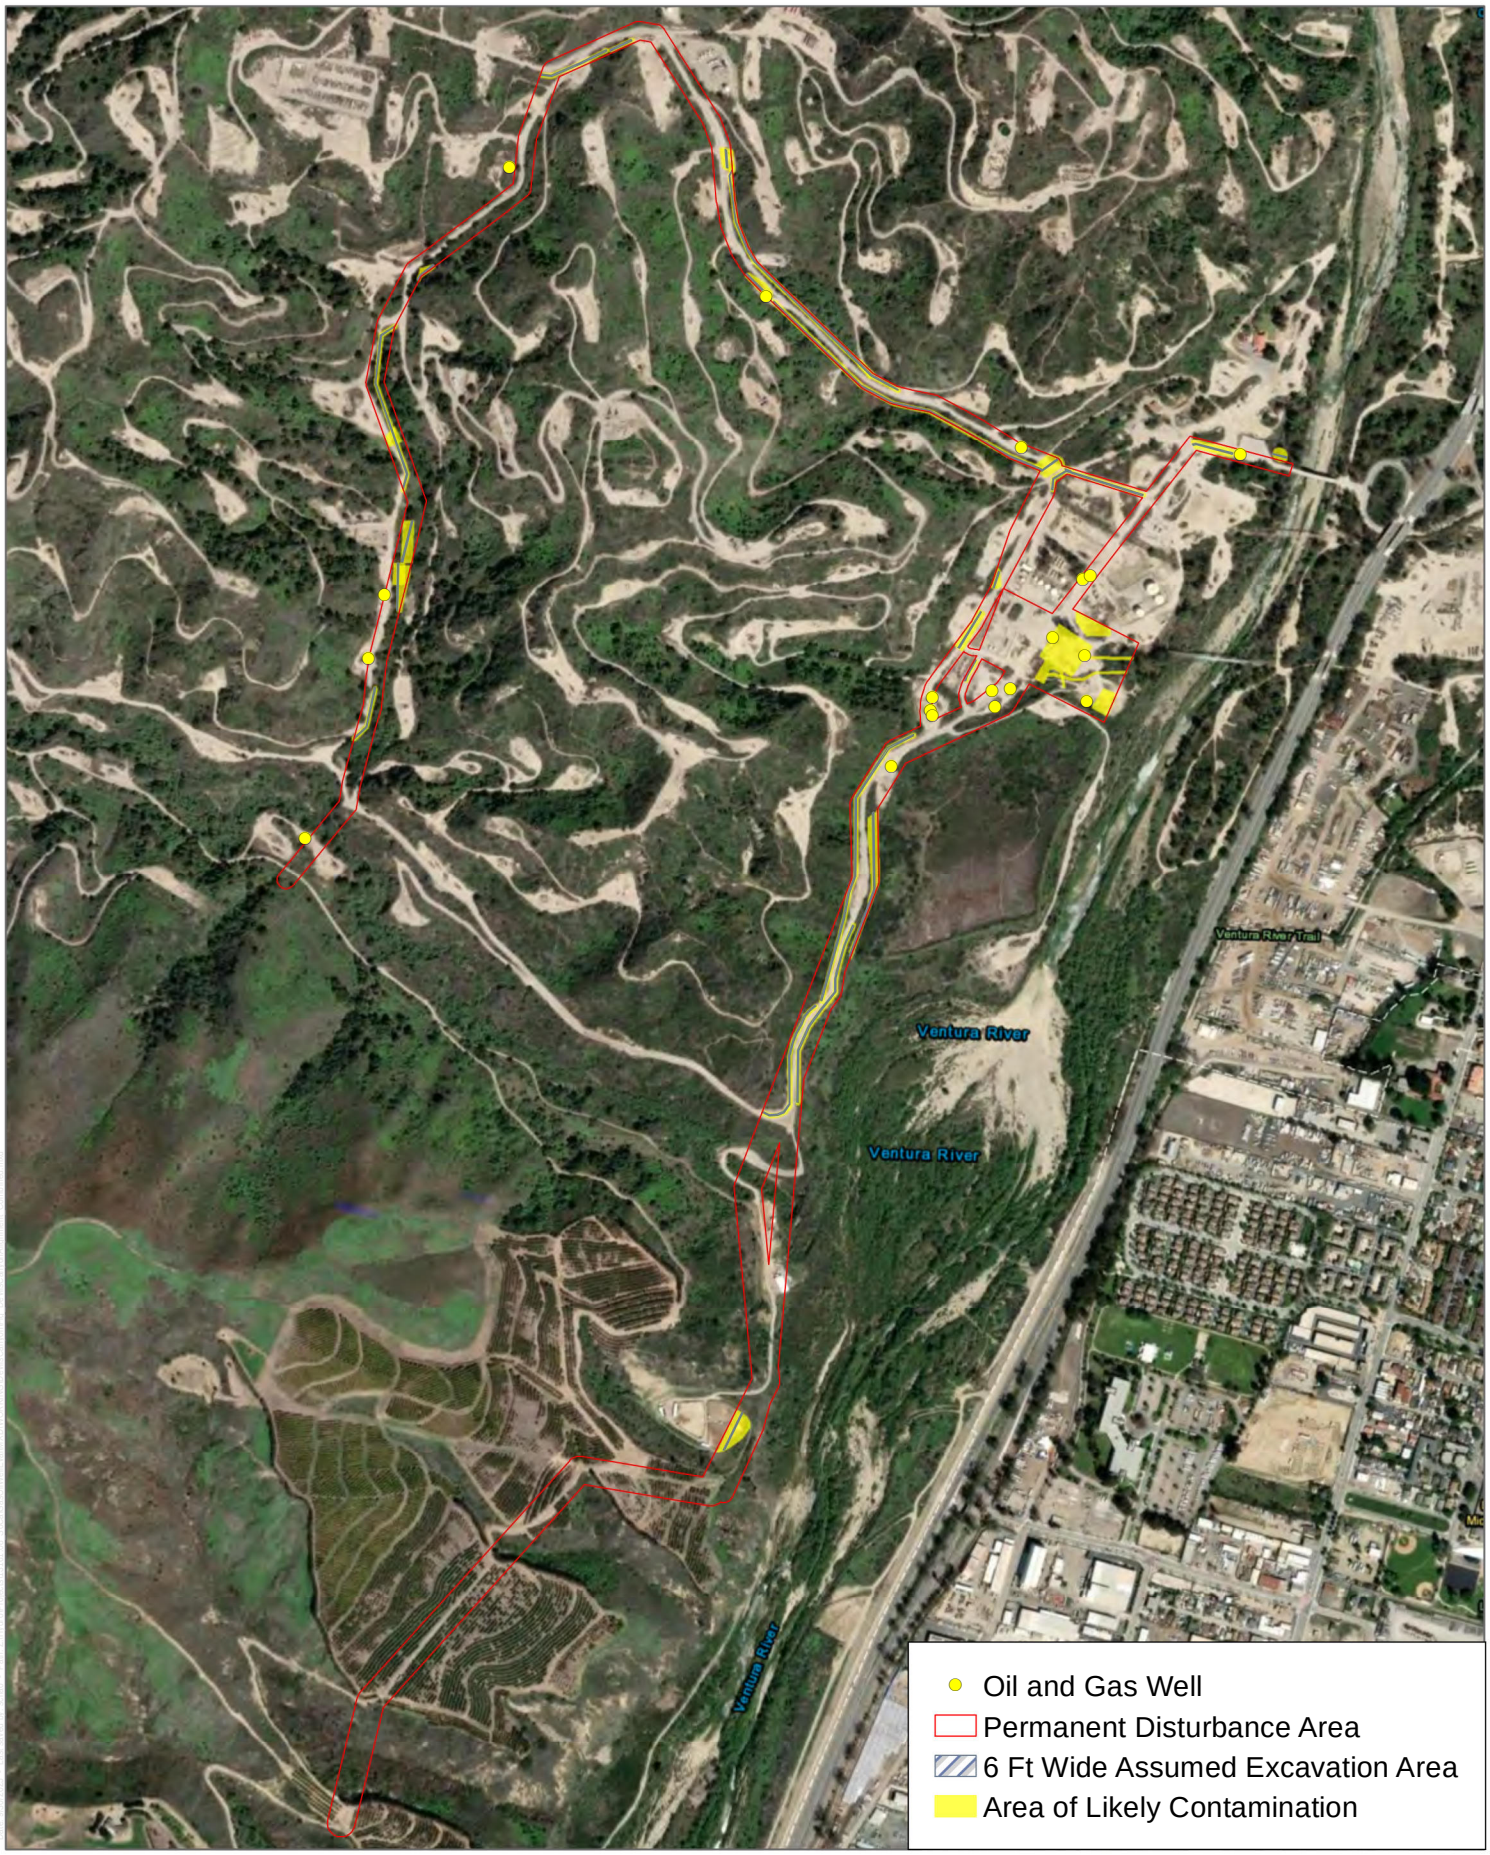

- The compressor station area has been used for oil production and storage from at least 1927 until the present. The Temporary Staging Area hosted oil storage and production as early as 1941. Oil storage was terminated as early as 1994; oil production is ongoing.
- State Route (SR) 33 trends north–south between the compressor station area and the Temporary Staging Area. The Ventura River also flows north–south between the compressor station area and the Temporary Staging Area.
- The roadway/utility corridor portion of the Devil's Canyon Road Site is located within the Ventura Oil Field and includes active oil and gas operations. The southernmost portion of the Devil's Canyon Road Site is located within an orchard.

The assessment revealed the following environmental concern:

- The historical and ongoing use of the Devil's Canyon Road Site as an oil production and storage facility since at least 1927 is considered an environmental concern for the compressor station area, roadway/utility corridor, and the Temporary Staging Area of the Devil's Canyon Road Site. Multiple sumps, oil wells, tank farms, and piping have been located on the Devil's Canyon Road Site since as early as 1927. This long-term use also represents the risk of a VEC.

The assessment revealed the potential presence of the following estimated impacted soils (Figure 4):

- Compressor Station Area – approximately 15,146 cubic yards (cy) of potentially impacted soils
- Roadway/Utility Corridor – approximately 10,228 cy of potentially impacted soils

Report Limitations

The findings and conclusions presented in this report are professional opinions based solely on the indicated data described in this report and our interpretation of the available historical information and documents reviewed. This desktop hazards assessment does not meet the burden of the ASTM standard for Phase I environmental site assessments. Dudek makes no warranty as to the accuracy of statements made by others or the accuracy of information included in documentation reviewed in connection with this study. This study was not intended to be a definitive investigation of potential contamination at the Devil's Canyon Road Site, and the recommendations do not necessarily include all conditions that may be present. It is possible that conditions or contamination exist at the Devil's Canyon Road Site that have not been previously identified or that are not identified in this report.

No warranties or guarantees or representations, expressed or implied, are made by Dudek, except for the representation that this report has been prepared in accordance with current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professionals performing the same or similar services in the same or similar locality. The conclusions are intended exclusively for the purpose outlined herein and may not be suitable for, or relied upon, by others, and any use of this document is at the sole risk of the user, SoCalGas.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by DUDEK were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/27/2025 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/21/2025 has revealed that there are 11 ENVIROSTOR sites within approximately 1 mile of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 7 CPS-SLIC sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 26 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

ECHO: ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

A review of the ECHO list, as provided by EDR, and dated 03/23/2025 has revealed that there is 1 ECHO site within approximately 0.001 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
AERA ENERGY LLC - VE	***34.314068, - 119.301***	***0 - 1/8 (0.000 mi.)***	***A3***	***10***
Registry ID: 110071138460				

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 03/24/2025 has revealed that there are 5 PFAS ECHO sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 15 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 10 HIST CORTESE sites within approximately 0.5 miles of the target property.

HWT: A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

A review of the HWT list, as provided by EDR, and dated 03/31/2025 has revealed that there is 1 HWT site within approximately 0.25 miles of the target property.

O S T PIPEYARD, INC.	***2951 N VENTURA AVE***	***ESE 1/8 - 1/4 (0.245 mi.)***	***K74***	***286***
Reg Num: 4052				

HWTS: DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

A review of the HWTS list, as provided by EDR, and dated 07/19/2024 has revealed that there is 1 HWTS site within approximately 0.001 miles of the target property.

AERA ENERGY LLC - VE	***LAT/LONG_USED***	***0 - 1/8 (0.000 mi.)***	***A5***	***12***

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2024 has revealed that there is 1

HAZNET site within approximately 0.001 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 01/12/2025 has revealed that there is 1 CERS site within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto

sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
Registry ID: 110055672829

Environmental Interest/Information System:

The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently

OST TRUCKS AND CRANES (Continued) **1023303319**

implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G.,

O S T PIPEYARD, INC. (Continued) **U001579008**

inorganic salts and heavy metals) are included in this category.
Primary Waste: STORMS
Waste Type2: Not reported
Waste2: Stormwater Runoff
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The California Environmental Reporting System (CERS) is a statewide web-based user and information exchange system to support over 140,000 regulated businesses and over 130 local agencies in electronically collecting and reporting significant hazardous materials, hazardous waste and compliance and enforcement data as mandated by California law. Under oversight by Cal/EPA, certified local governing agencies (Unified Program Agencies - UPAs) consolidate, coordinate and provide consistent regulatory activities for six state and federal environmental programs.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters,

OJAI RUBBISH SERVICE INC (Continued) **1000245003**

storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

CA BOND EXP. PLAN:

Reponsible Party:	DETAILED SITE EXPENDITURE PLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The RPs have been found to be in noncompliance with an order issued by the Department. Therefore, it will be necessary to utilize Bond funds to remediate this site. DHS will undertake appropriate cost recovery actions. This site has not been identified as an NPL site, nor does it appear to be a likely candidate in the future. Therefore, it appears unlikely that federal funds are a viable source of revenue for this site.
Site Description:	This site is a chemical blending and storage facility, constructed in and operating since 1969. Inspections by Ventura County and State Health Department personnel in March, 1985, March, 1986 and June, 1986 documented contamination of the site soilsby many of the chemicals used in the blending operations at the facility.
Hazardous Waste Desc:	The following were among some of the numerous chemicals detected in the soils at the Chem-O-Lene facility: xylene, toluene, naphthalene, ethylbenzene, n-propyl benzene, and trimethyl benzene isomers.
Threat To Public Health & Env:	There is a potential health threat through direct human and animal contact with contaminated soil or through surface runoff. The Ventura River is 200 feet from the facility. Ground water, while not used for domestic purposes, is very shallow, and there is the potential for contaminant migration to the Ventura River and the underlying aquifer. Ground water contamination has not been verified yet. There is no known exposure at this time.
Site Activity Status:	A remedial action order was issued by the Department in October of 1986 directing the responsible parties (RPs) to mitigate the site. The site is currently in the RI/FS phase. DHS has directed its contractor to prepare a RI/FS work plant for this site.

Background Info:	This site is a chemical blending and storage facility, constructed in and operating since 1969. Inspections by Ventura Co. Environmental Health Department(VCEHD) and DHS personnel in 1985, 1986, 1987, and 1988, documented contamination of the site soils by many of the chemicals used in the blending operations at the facility. The following were among some of the numerous chemicals detected in the soils at the Chem-O-Lene facility: xylene, toluene, naphthalene, ethylbenzene, n-propyl benzene,and trimethyl benzene isomers. A Remedial Action Order (RAO) was issued in October 1986, directing the RP to investigate and mitigate the site. In May 1987, the RP was found in noncompliance with the RAO and a Final Determination of Noncompliance was issued. The RP has since agreed to comply with the RAO and investigate groundwater and soil contamination. In March 1990, the RP submitted an RI/FS workplan to the Department for review and approval. Three groundwater wells were installed in June and July 1990. Samples have been collected on a quarterly basis. Chem-O-Lene is negotiating with Shell Refinery concerning the mitigation of an abandoned petroleum well and associated contaminated soil that is located onsite. There is a potential health threat through direct human and animal contact with contaminated soil or through surface runoff. The Ventura River is 200 feet from the facility. The initial RI/FS indicates that groundwater is not contaminated. Groundwater is not used for domestic purposes. There is no known human exposure at this time.

Description:	Caller states while excavating a small drain line to put in a sump, a sink hole was discovered in the center of the building beneath the floor. Caller states that the pipes are corroded and it's unknown if any of the substance listed have entered the sink hole. Caller states that the drain line has not been used since February. Caller states a plug sample was tested today and tested a 9.5 PH.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Address: 2509 N VENTURA AVE
City,State,Zip: VENTURA, CA 93001
Site ID: 519187
CERS ID: 10785046
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 519187
Site Name: H&E Equipment Services Ventura (4163)
Violation Date: 07-11-2023
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 07/18/2023.
The business failed to electronically submit complete and accurate chemical inventory information for all hazardous materials on site at or above reportable quantities. Diesel Fuel is being under-reported as (x2) 55-gal drums, when a 250-gal aboveground storage tank (AST) is on site. Compressed gases at or above reportable quantities not being reported (Oxygen and Argon/CO2 mix).

Log in to CERS at cers.calepa.ca.gov to submit complete and accurate chemical inventory information for all hazardous materials on site at or above reportable quantities.
Violation Division: Ventura City Fire Department
Violation Program: HMRRP

Eval Notes:
Onsite to verify that the facility has changed ownership from Giffin to H&E Rentals. According to Branch Manager, Adrian Gonzalez,

BJ-HUGHES INC. (Continued) **S101619886**

Giffin was bought out by H&E Rentals and that Bobcat has moved to Santa Paula.<p> H&E Equipment has added (4) aboveground storage tanks onsite:
 - Hydraulic oil: (x1) 275-gallon AST
 - Motor oil: (x1) 275-gallon AST
 - Waste motor oil: (x1) 275-gallon AST
 - Diesel fuel: (x1) 500-gallon AST*<p> Facility also had varies 55-gal drums containing petroleum and waste filters. Operations Manager, Mariela Canas, informed me that these drums will be gone once all the product is used and the ASTs will be the primary petroleum storage and the only remaining 55-gal drums will be (2), one for waste metal filters and the other for waste paper filters. Please note that 55-gal drums storing petroleum product (whether full or empty) are to be counted toward the maximum petroleum storage capacity.... [TRUNCATED: Refer to full Inspection Report]

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to discuss in the SPCC Plan the appropriate general containment, diversionary structures, or equipment to prevent a discharge, including typical failure mode and most likely quantity of discharge for the following: bulk storage containers, mobile/portable containers, oil-filled equipment, piping and related appurtenances, mobile refuels or non-transportation-related tank cars, and transfer areas, equipment and activities.
Violation Notes: Returned to compliance on 05/08/2024.
Failure to discuss in the SPCC Plan the appropriate general containment, diversionary

SUNBELT RENTALS PC 763 (Continued) **S108743297**

structures, or equipment to prevent a discharge for the following:
 - Bulk storage containers. Waste oil drum and hydraulic oil AST inside oil room not included in Table G-4 (Containers with Potential for an Oil Discharge).
 - Piping and related appurtenances. Piping for Diesel Fuel AST not included in Table G-4 (Containers with Potential for an Oil Discharge).<p> In addition, secondary containment method of Table G-4 not addressed properly. "2ndary cont." does not suffice. See footnote 4 at the bottom of page 6 of SPCC Plan for the methods of secondary containment or its equivalent.

Update SPCC plan to address the general containment, diversionary structures, and equipment in use at facility of all bulk storage containers and piping that will remain at the facility. Keep in mind that adding or removing oil storage containers to a SPCC Plan is considered a technical amendment.

Violation Division: Ventura City Fire Department
Violation Program: APSA
Violation Source: CERS,

Site ID: 403170
Site Name: Sunbelt Rentals PC 763
Violation Date: 03-05-2024
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to provide systems or follow procedures to prevent overfills as described in the SPCC Plan, and/or failure to routinely test to ensure proper operation.
Violation Notes: Returned to compliance on 05/15/2024.
Failure to follow procedures to prevent overfills as described in the SPCC Plan (page 11) and failure to routinely test to ensure proper operation. SPCC Plan says that "visual monitoring is conducting during filling operations" of oil containers, however, it was confirmed that the filling of waste oil tanks are not monitored. Monthly visual inspections of diesel AST do not include overfill prevention test.

Begin following procedures to prevent overfills as described in SPCC plan, and routinely test or verify systems or devices used to prevent overfilling.

Violation Description: Failure to adequately discuss in the SPCC Plan facility drainage or drainage controls such as secondary containment around containers and other structures, equipment, and procedures for the control of a discharge.
Violation Notes: Returned to compliance on 05/15/2024.
 Failure to adequately discuss facility drainage or drainage controls, or no discussion of facility drainage included within the SPCC Plan. Facility has a diked area with a drainage valve which they use after significant rainfall, however, it is not address in the SPCC Plan and no logs of drainage are kept (page 18).

Revise SPCC Plan to adequately discuss facility drainage or drainage controls (page 11).

Violation Date: 03-05-2024
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to discuss in the SPCC Plan the appropriate general containment, diversionary structures, or equipment to prevent a discharge, including typical failure mode and most likely quantity of discharge for the following: bulk storage containers, mobile/portable containers, oil-filled equipment, piping and related appurtenances, mobile refuels or non-transportation-related tank cars, and transfer areas, equipment and activities.
Violation Notes: Returned to compliance on 05/08/2024.
Failure to discuss in the SPCC Plan the appropriate general containment, diversionary structures, or equipment to prevent a discharge for the following:
 - Bulk storage containers. Waste oil drum and hydraulic oil AST inside oil room not included in Table G-4 (Containers with Potential for an Oil Discharge).
 - Piping and related appurtenances. Piping for

SUNBELT RENTALS PC 763 (Continued) **S108743297**

Diesel Fuel AST not included in Table G-4 (Containers with Potential for an Oil Discharge).<p> In addition, secondary containment method of Table G-4 not addressed properly. "2ndary cont." does not suffice. See footnote 4 at the bottom of page 6 of SPCC Plan for the methods of secondary containment or its equivalent.

Update SPCC plan to address the general containment, diversionary structures, and equipment in use at facility of all bulk storage containers and piping that will remain at the facility. Keep in mind that adding or removing oil storage containers to a SPCC Plan is considered a technical amendment.

Violation Division: Ventura City Fire Department

Site ID: 403170
Site Name: Sunbelt Rentals PC 763
Violation Date: 03-05-2024
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to provide systems or follow procedures to prevent overfills as described in the SPCC Plan, and/or failure to routinely test to ensure proper operation.
Violation Notes: Returned to compliance on 05/15/2024.
Failure to follow procedures to prevent overfills as described in the SPCC Plan (page 11) and failure to routinely test to ensure proper operation. SPCC Plan says that "visual monitoring is conducting during filling operations" of oil containers, however, it was confirmed that the filling of waste oil tanks are not monitored. Monthly visual inspections of diesel AST do not include overfill prevention test.

Begin following procedures to prevent overfills as described in SPCC plan, and routinely test or verify systems or devices used to prevent overfilling.

Site ID: 403170
Site Name: Sunbelt Rentals PC 763
Violation Date: 03-05-2024
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to address in the SPCC Plan the type of oil and storage capacity for each fixed container. For mobile or portable containers, either provide the type of oil and storage capacity, or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities.
Violation Notes: Returned to compliance on 05/15/2024.
Failure to address in the SPCC Plan the type of oil and storage capacity for each fixed container. Waste oil 55-gal drum not in SPCC plan. Empty hydraulic oil and motor oil 55-gal drums not listed in plan.

Amend the SPCC Plan to properly address the type and storage capacity of all fixed and portable and/or mobile containers as required. Keep in mind that adding or removing oil storage containers to a SPCC Plan is considered a technical amendment.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/27/2025

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/02/2025
Date Data Arrived at EDR: 06/04/2025

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Next Scheduled EDR Contact: 10/13/2025
Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

SCG DEVILS CANYON ROAD
NOT REPORTED
VENTURA, CA 93001

TARGET PROPERTY COORDINATES

Latitude (North):	34.313887 - 34° 18' 49.99''
Longitude (West):	119.300326 - 119° 18' 1.17''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	288328.7
UTM Y (Meters):	3799160.8
Elevation:	124 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	50006233 VENTURA, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

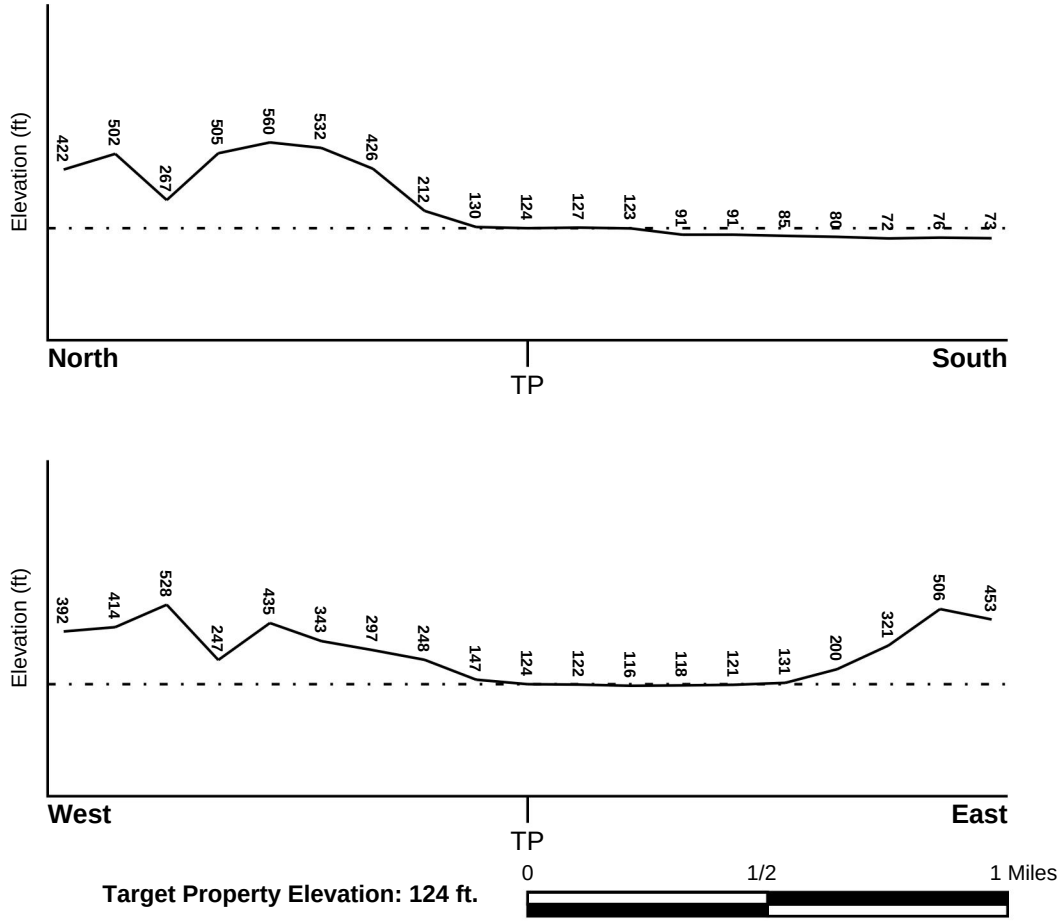

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 124 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06111C0733E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06111C0730E	FEMA FIRM Flood data
06111C0740E	FEMA FIRM Flood data
06111C0745E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
VENTURA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: SORRENTO

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	18 inches	59 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: GULLIED LAND

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 3

Soil Component Name: SANDY ALLUVIAL LAND

Soil Surface Texture: loamy sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
2	11 inches	38 inches	stratified sand to loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
3	38 inches	59 inches	stratified sand to silt loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6

Soil Map ID: 4

Soil Component Name: RIVERWASH

Soil Surface Texture: sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 76 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified coarse sand to sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 5

Soil Component Name: SAN BENITO

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	25 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0 Min: 0	Max: Min:
2	25 inches	59 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0 Min: 0	Max: Min:
3	59 inches	64 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0 Min: 0	Max: Min:

Soil Map ID: 6

Soil Component Name: Azule

Soil Surface Texture: gravelly loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.1
2	9 inches	40 inches	gravelly sandy clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.1
3	40 inches	59 inches	gravelly sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.1

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

Inspection Summary

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: Verified owner/operator information as reported to the California Environmental Reporting System (CERS).
This facility is a hazardous waste generator of greater than 1000kg/month (2,200lbs/month).
Hazardous waste containers and bins observe accessible, closed, properly labeled and in good condition.
hazardous waste containers (drums) observed secondarily contained. Hazardous waste containers (drums) and Universal Wastes, are secured inside storage buildings.
Acceptable accumulation times noted.
**Note: Universal wastes are reported to be picked-up every 90 days, along with other hazardous wastes generated and stored on site.
Hazardous waste storage area and secondary containment observed free of incidental spillage. Spill cleanup materials available on site.
Functioning portable fire extinguishers observed in the hazardous waste storage area and are reported stored in company vehicles as well.
Last pick-up of non-RCRA hazardous waste solids and hazardous waste solids (not otherwise specified) was performed on 12/16/2019 and 12/11/2019, respectively.
Designated facility signed copies of unified hazardous waste manifests available at Aera office off School Canyon Rd, Ventura (paper and electronic copies).
Generator copies of uniform hazardous waste manifests properly submitted to the Sate Department of Toxic Substances Control within 30 days of shipment.
Records of employee training maintained available electronically at the Aera office off School Canyon Rd, Ventura.
Verified employee annual training for 2017-2019 on hazardous waste management (MEST - Mandatory Environmental Safety Training, completed annually by all employees).
Copy of Contingency Plan available at the Aera office off School Canyon Rd, Ventura.
Review of Contingency Plan indicates that the CUPA/UPA phone number should be updated to read 805/654-2813 and the updated copy uploaded to CERS.

***Note: Due to inclement weather, the Hazardous Materials Business Plan Program inspection was not conducted this date and will be rescheduled.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at , https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

A copy of this inspection report/Notice to Comply was provided to KIM DREWS.

Inspection Violations and Comments

BUSINESS PLAN

1. BUSINESS PLAN INCOMPLETE - 42 00094220 Comply by 7/27/2006

HAZARDOUS MATERIALS BUSINESS PLAN IS INCOMPLETE OR INACCURATE. [CHSC 2554]

SUBMIT HAZARDOUS MATERIALS BUSINESS PLAN REVISION(S) TO ENVIRONMENTAL HEALTH DIVISION. HAZARDOUS MATERIALS BUSINESS PLAN MUST INCLUDE ALL THE FOLLOWING COMPONENTS: EMERGENCY CONTACTS, CHEMICAL INVENTORY, SITE MAP, EMERGENCY RESPONSE PLAN AND PROCEDURES, AND EMPLOYEE TRAINING PLAN.

Violation Comments:

Chemical inventory not up-to-date. Submit an updated chemical inventory to VCEHD. Include the changes noted in the attached spreadsheet, "Aera Energy FA0007102".

2. BUSINESS PLAN INCOMPLETE - 42 00094220 Comply by 7/27/2006

HAZARDOUS MATERIALS BUSINESS PLAN IS INCOMPLETE OR INACCURATE. [CHSC 2554]

SUBMIT HAZARDOUS MATERIALS BUSINESS PLAN REVISION(S) TO ENVIRONMENTAL HEALTH DIVISION. HAZARDOUS MATERIALS BUSINESS PLAN MUST INCLUDE ALL THE FOLLOWING COMPONENTS: EMERGENCY CONTACTS, CHEMICAL INVENTORY, SITE MAP, EMERGENCY RESPONSE PLAN AND PROCEDURES, AND EMPLOYEE TRAINING PLAN.

Violation Comments:

Facility map not available for review at time of inspection. Submit an updated facility map to VCEHD.

General Comments:
-Updated Owner/Operator Contact Information
-Reviewed Chemical Inventory (See Violations)
+Add Sulfa Clear 8411C
+Add Alvania Grease
+Add Omala Oil
+Add Waste Aqueous Cleaning Solution
+Add Waste Aerosol Cans
+Delete Ethyl Mercaptan
-Emergency Action Plan Available

HAZ WASTE GENERATOR

COUNTY OF VENTURA

Internet Web Site Address: www.ventura.org/envhealth

CUPA PROGRAM INSPECTION REPORT/NOTICE TO COMPLY

Facilty Name: AERA ENERGY LLC
Site Address: 3051 N VENTURA AVE
VENTURA, CA 93001

Owner Mailing Address: T.D. PALMER
AERA ENERGY LLC
3382 N VENTURA AVE
VENTURA, CA 93001

Inspection Date: 6/27/2006

1. WASTE DETERMINATION - 44 00014420 Comply by 7/27/2006

GENERATOR HAS NOT DETERMINED IF THE WASTE GENERATED IS A HAZARDOUS WASTE. (CCR 66262.11)

DETERMINE IF WASTE IS HAZARDOUS BY DETERMINING IF THE WASTE IS A LISTED HAZARDOUS WASTE OR IF THE WASTE EXHIBITS A HAZARDOUS CHARACTERISTIC THROUGH LABORATORY TESTING OR APPLYING GENERATOR KNOWLEDGE.

Violation Comments:

Observed the following drums located at McJunkin Warehouse. Determine if the contents are waste or usable product: label appropriately. If waste, determine if hazardous. If hazardous waste contact a registered hazardous waste hauler to properly dispose and document. Maintain waste determination and disposal documentation for 3 years.

+Blue 55-gallon poly drum in the "Hazardous Waste Cage" labeled "Unclassified Waste".
+Red 15-gallon steel drum near the parts washer has an illegible hazardous waste label.

2. RECORD KEEPING- RECEIPTS - 44 00274420 Comply by 7/27/2006

HAZARDOUS WASTE DISPOSAL RECEIPT(S) NOT MAINTAINED ONSITE FOR AT LEAST 3 YEARS. (HSC 25160.2)

MAINTAIN A COPY OF EACH HAZARDOUS WASTE DISPOSAL RECEIPT ONSITE FOR AT LEAST 3 YEARS.

Violation Comments:

Hazardous waste disposal receipts were not available for review at the time of inspection. Schedule a follow-up inspection to review the disposal receipts from the last 3 years.

3. EMPLOYEE TRAINING- SQG, CESQG - 44 00244420 Comply by 7/27/2006

EMPLOYEE TRAINING NOT CONDUCTED OR IS INADEQUATE. (CCR 66262.34(d)(2)

ALL EMPLOYEES MUST BE THOROUGHLY FAMILIAR WITH THE PROPER WASTE HANDLING AND EMERGENCY PROCEDURES RELEVANT TO THEIR RESPONSIBILITIES DURING NORMAL FACILITY OPERATIONS AND EMERGENCIES.

Violation Comments:

Employee Hazardous Waste Handling and Emergency Response training not available at the time of inspection. Provide evidence that annual employee training was conducted.

General Comments: The hazardous waste permit for this facility is inactive. This facility currently generates hazardous waste (i.e. waste parts cleaner solution, waste aerosol paint cans) and requires the hazardous waste generator permit to be reactivated.

NOTES:
-Observed oil contaminated gravel along the road on the east side of the Butane Bullets. Clean up the contaminated material and properly dispose.

Inspection Summary

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (INSPECTION, ROUTINE)

General Comments: Aera Energy is regulated by the California Geologic Energy Management (CalGEM), Department of Transportation, the Environmental Protection Agency (EPA) and Ventura County CUPA.
A representative sample of aboveground storage tanks (ASTs), containers and equipment used to store petroleum products in aboveground containers were inspected at the facility. The facility was not able to locate all required documentation for the SPCC Plan/APSA facility at the time of inspection.
At this time the facility is requesting to be taken out of the APSA program as the facility is an oil lease, regulated by CalGEM and DOT. The facility provided the MOA between CalGEM and the Department of Forestry and Fire Protection Office of the State Fire Marshal (CAL FIRE-OSFM) from 2014 which states: OSFM is responsible for administering the Above ground Petroleum Storage Act (APSA) and giving CAL FIRE-OSFM jurisdiction over certain tank facilities with 1,320 gallons or more of petroleum, excluding tanks under the jurisdiction of CalGEM. CalGEM has jurisdiction over tank facilities that are “attendant to” oil and gas production, including pipelines located within oil and gas fields and not subject to regulation by CAL FIRE- OSFM pursuant to Chapter 5.5 (commencing with Section 51010) of Part 1 of Division 1 of Title 5 of the California Government Code. “Attendant to” oil and gas production, for purposes of the MOA means: tanks and pipelines that are located within the lease areas of oil and gas fields, and are integrally associated with oil and gas production, are generally “attendant to” oil and gas production and therefore under CalGEM jurisdiction.
This division will contact CalGEM to verify areas of inspection, review all chemicals stored on site to determine if they are petroleum products or fraction thereof and determine if the facility falls into APSA regulation. Once the status of the APSA program is determined this division will move forward with reviewing all paperwork and required documents if needed.
A follow-up inspection will be conducted to inform the facility of the APSA status and note any violations and observations from the inspection conducted.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

Inspection Summary

HAZARDOUS WASTE GENERATOR (COMPLAINT INVESTIGATION)

General Comments: TODAY'S INSPECTION IS IN RESPONSE TO A REPORTED OIL SPILL THAT OCCURRED ON 5/16/2023 AT THE AERA FACILITY, 600 SHELL RAOD VENTURA (OES REPORT 23-3238, DIVISION COMPLAINT NUMBER CO0032650).

12:30 PM, WAIT AT SITE (GATED ENTRANCE) FOR ED DE LA LLAVE, AERA ENERGY, FOR ESCORT INTO PROPERTY. ATTEMPTED TO LOG INTO TEAMS MEETING PER EMAIL INVITATION, ONLY CATCH THE TAIL END OF THE MEETING. ED DE LA LLAVE TO PROVIDE THE UPDATED INFORMATION DURING THIS INSPECTION.

NOTE: CONTENT OF MEETING PROVIDED TO ATTENDEES (INCLUDING DIVISION INSPECTOR) ON THE MORNING OF MAY 17 VIA EMAIL FROM TRISHA BOTTEN OF AERA ENERGY. ATTACHMENT INCLUDED A WRITTEN INCIDENT ACTION PLAN, WITH SITE MAP AND 10 DAY WEATHER FORECAST INFORMATION. ATTENDEES INCLUDED FISH & WILDLIFE OSPR PERSONNEL, AERA REPRESENTATIVES AND SEVERAL OTHER PARTIES.

DUE TO A SUPPORT SERVICE RIG BROKEN DOWN ON THE NARROW ACCESS ROAD, HAD TO TAKE THE BACK WAY TO GET TO THE RELEASE SITE.

AS STATED BY ED DE LA LLAVE, A SECURITY PERSONNEL OBSERVED EVIDENCE OF THE RELEASE LATER THE EVENING OF 5/16/2023. UPON IDENTIFICATION OF THE SOURCE, THE ELECTRICAL SERVICE TO TAYLOR WELL 612 WAS CUT AND THE VALVE AT THE HEADER INLET FOR THE LINE WAS CLOSED AND TAGGED (NOTE THAT THE DATE WAS INCORRECTLY MARKED AS 5/14/2023). CONTAINMENT ACTIVITIES WERE THEN INITIATED.

BASED ON DISCUSSIONS WITH ED DE LA LLAVE, OIL HAD BEEN RELEASED FROM A FLOW LINE ASSOCIATED WITH WELL TAYLOR 612. THE POINT OF RELEASE WAS ACTUALLY FURTHER DOWN LINE FROM THE WELL LOCATION, ADJACENT TO THE LOCATION OF TAYLOR HEADER 11 WHERE THE ABOVE GROUND FLOW LINES (3 INDIVIDUAL LINES) TRANSITIONED BELOW GRADE, PASSING UNDERGROUND TO TAYLOR HEADER 11. THE RELEASE IS SUSPECTED TO BE DUE TO CORROSION BELOW GRADE OF THE LINE FROM TAYLOR 612. OIL THAT SURFACED, DRAINED DOWN THE ASPHALT/DIRTS ACCESS ROAD, DOWN HILL, EVENTUALLY MAKING IT TO A DRAINAGE BOX, NEAR WELL SITE TAYLOR 628. ONCE FLOW ENTERED THE DRAINAGE BOX, IT WAS CONVEYED SUBSURFACE BY PIPE, UNDER THE ACCESS ROAD, DISCHARGING INTO AN ADJACENT, UNNAMED, DRY RAVINE. AT THE TIME OF THIS INSPECTION, THE FULL EXTENT OF THE RELEASE (BOTH ON SURFACE AND BELOW SURFACE) IS STILL UNKNOWN AND RESPONSE PLANS WILL BE MODIFIED ACCORDINGLY AS NEW INFORMATION IS GATHERED.

COUNTY OF VENTURA
ENVIRONMENTAL HEALTH DIVISION

CUPA PROGRAM INSPECTION REPORT

Facilty Name: AERA ENERGY LLC
Site Address: 600 SHELL RD
VENTURA, CA 93001
CERS #:10336582

Owner Mailing Address: AERA ENERGY LLC
3051 N VENTURA AVE
VENTURA, CA 93001

Inspection Date: **5/17/2023**

AT THE TIME OF THIS INSPECTION, AERA HAD CONTRACTED CREWS WHO WERE ACTIVELY REMOVING THE VERY HEAVY VEGETATION AT THE BOTTOM OF THE VERY STEEP SIDED AND DEEP RAVINE SO THAT CONDITIONS MAY BE BETTER EVALUATED. ALSO, CD LYON HAD A BACKHOE AND CREW ADDRESSING SURFACE ASPHALT AND SOIL (SOIL SCRAPING) ALONG THE UPPER REACH OF THE AFFECTED ACCESS ROAD. SOME PATRIOT STAFF WERE ON SITE READY TO ASSIST WITH CLEANUP UPON DEPLOYMENT. OBSERVED A SOIL BERM HAD BEEN CONSTRUCTED ABOUT 2/3 UP THE ROAD FROM THE DRAIN BOX TO INTERCEPT AND PREVENT ANY ADDITIONAL FLOW DOWN HILL.

THE CLEANUP PLAN IS TO ADDRESS CRUDE IMPACT SURFACES, SURFACE SOIL, VEGETATION, AND LATER ADDRESS SUBSURFACE CONDITIONS AND THE SUBSURFACE PIPE BETWEEN THE DRAINAGE BOX AND RAVINE, SLATED TO BE REPLACED LATER IN THE WORK SCOPE.

OIL CONTAMINATED SOILS WILL BE SEPARATED FROM OIL CONTAMINATED VEGETATION. A LINED ROLL OFF BIN CONTAINING SOIL WAS OBSERVED STAGED ON SITE NEAR TAYLOR HEADER 11 ALONG WITH ABSORBENT SUPPLIES, PLASTIC BAGS, AND PPE. BAGGED VEGETATION WAS OBSERVED SITUATED ON THE GROUND PENDING GATHERING FOR DISPOSITION. OIL IMPACTED ABSORBENTS AND PPE WILL BE BAGGED SEPARATELY.

WORK WILL CONTINUE ONLY UNTIL DUSK DUE TO SAFETY CONCERNS AND RESUME TOMORROW AT DAYLIGHT.

ED DE LA LLAVE AND DIVISION INSPECTOR DETERMINE TO KEEP CONTACT AT LEAST DAILY THROUGH CLEANUP, EXPECTED COMPLETED BY FRIDAY 5/19/2023. INFORMATION ON UPDATES TO PROGRESS OR ANY CHANGES IN SCOPE WILL BE PROVIDED THIS DIVISION.

DIVISION REQUESTS THAT ALL DOCUMENTATION FOR THE PROPER DISPOSAL OF ALL DERIVED WASTES ASSOCIATED WITH THIS CLEANUP BE PROVIDED AT THE END OF THE PROJECT AS THEY BECOME AVAILABLE.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

Inspection Summary

HAZARDOUS WASTE GENERATOR (COMPLAINT INVESTIGATION)

General Comments: TODAY'S INSPECTION IS IN RESPONSE TO A REPORTED OIL SPILL THAT OCCURRED ON 5/16/2023 AT THE AERA FACILITY, 600 SHELL ROAD, VENTURA (OES REPORT 23-3238, DIVISION COMPLAINT NUMBER CO0032650).

UPDATE TO DIVISION 5/17/2023 INSPECTION REPORT AS FOLLOWS.
- NRC NOTIFICATION #1367458

- ATTENDEES TO MAY 17, 2023 TEAMS MEETING INCLUDE
- JOANNA CISNEROS, CALGEM
- JOSH CROKER, WARDEN, CAL DEPT FISH & WILDLIFE OSPR
- THOMAS DELANO, CAL DEPT FISH & WILDLIFE OSPR
- DIANE WAHL, VENTURA COUNTY ENVIRONMENTAL HEALTH
- TRISHA BOTTEN, AERA ENERGY LLC
- MATT WYATT, AERA ENERGY LLC
- ERIN LARNER, AERA ENERGY LLC
- NICK CASTANON, AERA ENERGY LLC
- ED DE LA LLAVE, AERA ENERGY LLC
- MATT PURNELL, AERA ENERGY LLC

MET THIS DATE WITH ED DE LA LLAVE, AERA ENERGY LLC, TO OBSERVE POST CLEAN UP CONDITIONS AT THE TAYLOR 612 FLOW LINE INCIDENT SITE. AS STATED BY ED DE LA LLAVE, CLEANUP WAS COMPLETED ON THE 18TH.

THE TWO SUBSURFACE STORMWATER CONVEYANCE PIPES THAT TREND FROM THE DRAINAGE BOX TO THE OUTFALL POINT AT THE UNNAMED RAVINE WERE REPORTED TO HAVE BEEN BENT BACK USING AN EXCAVATOR TO THE POINT OF PINCHING THEM CLOSED, THEN SHEARED OFF. PIPE ENDS WERE OBSERVED STORED IN THE OPEN SPACE NEAR WELL TAYLOR 628. THE DRAINAGE BOX AND REMAINING SUBSURFACE PIPING WAS REPORTED BACKFILLED THIS DATE WITH CONCRETE TO CLOSE OFF THE DRAINAGE SYSTEM. OBSERVATION INTO THE DRAINAGE BOX CONFIRMED WET CONCRETE FILLED THE BOX. THIS ACTION WAS TAKEN IN LIEU OF REMOVAL. THE VISIBLE PORTION OF CONCRETE CULVERT LEADING TO THE DRAINAGE BOX (NOT BLOCKED FROM VIEW BY HEAVY VEGETATION) WAS OBSERVED TO BE FREE OF ANY RESIDUAL OIL AS NOTED ON 5/17/2023.

VEGETATION WAS OBSERVED REMOVED AT THE BASE OF THE RAVINE BELOW THE PIPE DISCHARGE LOCATION, AT THE TOP OF THE RAVINE IN THE AREA OF THE PIPE DISCHARGE LOCATION, AROUND THE AREA OF THE DRAINAGE BOX AND ADJOINING CONCRETE CULVERT, AND ALONG THE SIDE OF THE ACCESS ROAD

Facilty Name: AERA ENERGY LLC

3051 N VENTURA AVE
VENTURA, CA 93001

Inspection Date: **5/19/2023**

(ALONG THE PATH OF CRUDE OIL SURFACE FLOW AS OBSERVED ON 5/17/2023).

AT THE REPORTED RELEASE LOCATION, THE 3 FLOW LINES IN THE AREA OF TAYLOR HEADER 11, WERE BEING HYDROEXCAVATED BY CD LYON TO SAFELY EXPOSE THE SUBSURFACE PIPING. APPROXIMATELY 15-LINEAR FEET OF TRENCH WAS OBSERVED FROM THE POINT WHERE THE 3 FLOW LINES TREND SUBSURFACE, TOWARDS TAYLOR HEADER 11. EXCAVATED MUD/SOIL WAS VACUUMED AS TRENCHING PROGRESSED USING A VACUUM TRUCK. OBSERVATION OF THE TRENCH SIDEWALLS AND BASE INDICATED NO VISUAL EVIDENCE OF SUBSURFACE CRUDE OIL IMPACTS.

AS PER ED DE LA LLAVE, SOILS REMOVED BY VACUUM TRUCK WILL BE TRANSPORTED TO AERA'S ON SITE, APCD PERMITTED, MIXING PIT LOCATED IN 20 CANYON. AT THAT POINT, DRY SOILS WILL BE MIXED INTO THE MUD TO DRY THE MUD FOR TRANSPORT TO AERA'S BELL RIDGE FACILITY FOR PROCESSING. THIS SOIL WILL BE TRANSPORTED AS NON-HAZARDOUS WASTE.

ONE 20-YARD ROLL OFF BIN CONTAINING WASTE SOILS WAS OBSERVED STAGED NEXT TO HEADER 11 AND A SECOND BIN WAS OBSERVED STAGED AT WELL SITE TAYLOR 693, NEAR THE LOWER TERMINUS OF THE RAVINE. THE BINS WERE COVERED WITH PLASTIC SHEETING AND LABELED AS OILY DIRT. AS PER ED DE LA LAVEE, THE WASTE SOILS/DEBRIS/VEGETATION WILL BE MOVED FOR TEMPORARY STORAGE TO THE TAYLOR "BIN CITY" LOCATION, A SECURED STORAGE LOCATION ON THE LEASE SITE. OFFSITE TRANSPORT AND DISPOSAL IS PENDING. AS STATED BY ED DE LA LLAVE, THIS MATERIAL WILL BE TRANSPORTED FOR OFF SITE DISPOSAL AS NON-HAZARDOUS WASTE.

OBSERVATION OF THE CRUDE FLOW PATH ALONG THE SIDE OF THE ACCESS ROAD WAS MADE THIS DATE. ALTHOUGH REPORTED TO HAVE BEEN CLEANED AND SCRAPED AS NECESSARY TO REMOVE SURFACES (DEGRADED ASPHALT AND SOIL) IMPACTED BY CRUDE, CLEAN SOIL HAD SINCE BEEN PLACED AND SPREAD OUT AND THE EXTENT OF CLEAN UP COULD NOT BE READILY OBSERVED. AT SEVERAL LOCATIONS ALONG THE FLOW PATH, THE HEEL OF A SHOE WAS USED TO SCRAPE INTO THE CLEAN SOIL TO OBSERVE POTENTIAL RESIDUAL OIL BELOW. NO RESIDUAL OIL WAS OBSERVED.

ACCORDING TO ED DE LA LLAVE, PURSUANT TO AERA'S DISCUSSIONS WITH WARDEN JOSH CROKER, CAL DEPT FISH & WILDLIFE OSPR, OSPR DEEMS THIS INCIDENT AS A RELEASE TO LAND AND NO FURTHER ACTION IS REQUIRED. FURTHERMORE, THERE WILL BE NO UPDATE TO THE ORIGINAL OES REPORT. OSPR APPROVES PROCEEDING WITH AERA'S PLANNED WASTE DISPOSAL ACTIVITIES.

BASED ON INFORMATION PROVIDED AND SITE OBSERVATION, THIS DIVISION DOES NOT REQUIRE FURTHER CLEANUP AT THIS TIME.

SUBMIT DOCUMENTATION OF PROPER DISPOSAL OF ALL CLEANUP DERIVED WASTES TO THIS DIVISION AS SOON AS AVAILABLE.

Inspection Summary

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: Available for today's inspection (in full or part), were Kim Drews, Dan Starkey, Craig Martinez, Derek Wallace, and Ed De LaLava with Aera Energy and Diane Wahl and Melisa Custer with this Division.

Verified owner/operator information as reported to the California Environmental Reporting System (CERS).
Complete CERS Hazardous Materials Business Plan submittal available electronically on site (electronically via CERS) for calendar year 2020.
Representative locations were inspected this date to verify chemical inventory. The following areas were included for inspection: Central Bulk Chemical Storage, Central Water Treating, Central Water Treating/Solids Area, Compressor Plants 2 and 3, Taylor Bin City, Taylor Tank Farm, Waterflood Plant 4 and several well sites. Verified inventory.

Kim Drews reports that chemical quantities and largest container sizes (example: 55 gallon drums versus larger capacity totes) frequently change. Examples noted today, in particular at the Central Chemical Storage area, for which many inventory items reported into CERS were not present on site this date, and some discrepancies in largest container size.

Observed 2-55 gallon drums of CLO3022 Cleaner and 1-55 gallon drum of Red Dye in the Central Bulk Chemical Storage area that are not in the current inventory as reported to CERS. Update CERS accordingly if these materials will continue to be stored on site.

For chemicals reported to CERS that were not observed on site at the time of inspection, the facility will determine if these chemicals will no longer be used/stored on site, and if no longer used, the chemicals may be removed from the hazardous materials inventory reported to CERS.

Annotated site maps reviewed.
Verified employee annual training for 2020 and prior 2 years on hazardous materials management (MEST - Mandatory Environmental Safety Training, completed annually by all employees).

Emergency response plan available and reviewed. Update the plan to record the new Manager of Operations contact information and upload the corrected Plan into CERS. Please discard outdated plans.

As reported by Kim Drews, minor updates to inventory information (largest container sizes, maximum daily amounts, hazardous waste stream descriptions, and annual waste amounts) as discussed this date, will be made in CERS.

Inspection Date: **6/23/2021**

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (SPOT CHECK INSPECTION)

General Comments: Annual tank facility statement, as submitted to the California Environmental Reporting System (CERS), was most recently made on 5/4/2021.
This facility maintains a Spill Prevention Control and Countermeasure (SPCC) Plan and the Plan is maintained available for review at the AERA facility located at 1800 School Canyon Rd, in Ventura, California.
The Plan is a PE Certified and is correct for this facility.
Plan date is August 2009, which was PE certified on 8/1/2019 and management certification of availability of resources signed 8/6/2019.
Tanks and containers have sized secondary containment.
Containments observed free of oil.
Monthly inspections are performed and documented.
Inspection documentation maintained electronically at the 1800 School Canyon Road office and an example inspection record was provided for review.
Annual briefings for employees are performed and documented. Documentation for employee briefing for 2020 were reviewed.
Spill kits are maintained available within the facility.

Ensure that any technical amendments to the Plan are PE certified within 6 months of: commissioning or decommissioning containers; replacement, reconstruction, or movement of containers; reconstruction, replacement, or installation of piping systems; construction or demolition that might alter secondary containment structures; changes of product or service; or revision of standard operation or maintenance procedures at a facility if the change in facility design, construction, operation or maintenance materially affects its potential for a discharge.

***Note: Aera Energy is requesting this Division to contact Cal Fire OSFM office to discuss the definition of ‘attendant to’ oil and gas production. Aera Energy’s understanding is that all refined petroleum products used to maintain equipment on-site is subject to CalGEM jurisdiction, therefore making them no longer subject to the Aboveground Petroleum Storage Tank Act (APSA) requirements.
The MOU between the Department of Conservation Division of Oil, Gas, and Geothermal Resources and the Department of Forestry and Fire Protection Office of the State Fire Marshal in 2014 states that: under California Public Resource Code (PRC), Section 3106, subdivision (a), CalGEM has jurisdiction over tanks and facilities that are “attendant to” oil and gas production, including pipelines located within oil and gas fields and not subject to regulation by Cal Fire – OSFM pursuant to Chapter 5.5 (commencing with Section 51010) of Part 1 of Division 1 of Title 5 of the California Government Code (PRC 3106, subdivision (a)). “Attendant to” is defined as tanks and pipelines that are located within the lease areas of oil and gas fields, and are integrally associated with oil and gas production.
This Division will be reaching out to Jennifer Lorenzo with Cal Fire OSFM to discuss the interpretation of ‘attendant to’ and determine if Aera Energy is no longer subject to APSA. Please understand that this determination is only in regard to the APSA program and the facility may still be subject to 40 CFR 112. ***
***Note: At the time of this inspection, the CERS hazardous material inventory does not match the SPCC Plan, due to several items such as production well locations being excluded from the Plan. These items were excluded due to Area Energy’s understanding that the

pumps are regulated by CalGEM and not under CUPA regulation.***

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: Verified owner/operator information as reported to the California Environmental Reporting System (CERS).
This facility is a hazardous waste generator of various construction, demolition, and maintenance activities associated with oil and gas production. Based on review of manifests, some months this facility is a generator of greater than 1000 kg/2200 lbs of hazardous waste, and other months at less than 1000kg/2200 lbs per month.
As reported by Dan Starkey, hazardous waste at this facility is managed assuming a generator status of Large Quantity Generator (>1,000kg/2200 lbs per month), even if a given month's hazardous waste generation is below that threshold.
Hazardous waste containers and bins observed accessible, closed, properly labeled and in good condition.
hazardous waste containers (drums) observed secondarily contained. Hazardous waste containers (drums) and Universal Wastes, are secured inside storage buildings.
At least weekly inspections of hazardous waste storage areas are reported to be performed.
Acceptable accumulation times noted.

Note: Universal wastes are reported to be usually picked-up every 90 days, along with other hazardous wastes generated and stored on site, and are reported never stored for over 1 year.

Note: According to Dan Starkey, this facility reports that it recently tested out its used oil and determined it can be handled as "Highly Controlled Used Oil" (HCUO) in accordance with HSC 25250.19(b)(3), such that by meeting certain conditions, the generator then can manage HCUO as a recycled oil and not as a hazardous waste. Prior to this determination, used oil was reinjected into the crude oil pipeline (recycled on site). This facility reports that it also recently tested out its oily waste/oily debris and verified that it is non-hazardous and no longer manages this material as hazardous waste. Ensure to keep all relevant testing documentation available for review upon request.

Hazardous waste storage area and secondary containment observed free of incidental spillage. Spill cleanup materials available on site.
Functioning portable fire extinguishers observed in the hazardous waste storage area and are reported stored in company vehicles as well.
Designated facility signed copies of unified hazardous waste manifests for the prior 3 years were made available via email for review.
According to Kim Drews, generator copy of each uniform hazardous waste manifest is properly submitted to the Sate Department of Toxic Substances Control within 30 days of shipment.
Records of employee training maintained available electronically at the Aera Energy office off School Canyon Rd, Ventura.
Verified employee annual training for 2020 and prior years on hazardous waste management (MEST - Mandatory Environmental Safety Training, completed annually by all employees).
Copy of Contingency Plan available at the Aera Energy office at 1800 School Canyon Rd, in Ventura, California.
Contingency Plan as submitted to CERS reviewed. Update the Plan to record the new

Inspection Summary

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: Paperwork review was conducted at the AERA Energy office at 1800 School Canyon Rd., Ventura on 12/13/2022.

Verified owner/operator information as reported to CERS.

Update the EPA ID Number reported in CERS to report CAR000327197.

This facility is a hazardous waste generator of various construction, demolition, and maintenance activities associated with oil and gas production.

3 Years of hazardous waste manifests are maintained available on site (electronically). Based on review of manifests, this facility is currently generating hazardous waste at greater than 100 kg and less than 1000 kg per month.
As reported by Dan Starkey, hazardous waste at this facility is managed assuming a generator status of Large Quantity Generator (>1,000kg/2200 lbs per month), even if a given month's hazardous waste generation is below that threshold, and accumulation therefore does not exceed 90 days.

At least weekly inspections of the hazardous waste storage areas are reported to be performed. Ensure inspections performed for hazardous waste containers (lab wastes) and waste oil stored outside of the central storage area at Taylor Bin City.

At the Taylor Bin City Location, the hazardous waste and solid waste consolidation area is manned daily during typical work week hours and is also monitored remotely by camera.

Spill cleanup materials and portable fire extinguishers are available on site throughout the lease.

Hazardous waste containers and universal waste containers (aerosols) were observed closed, labeled, in good condition and accessible. At Taylor Bin City, containers are secured within two storage buildings. Some containers observed stored on secondary containment. No spillage observed in secondary containment or on the ground in hazardous waste storage areas on site.
Acceptable accumulation times noted for hazardous waste and universal waste.

This facility is managing used oil as "Highly Controlled Used Oil" (HCUO) in accordance with HSC 25250.19(b)(3), such that by meeting certain operating conditions, the generator then can manage HCUO as a recycled oil and not as a hazardous waste. Review of facility information indicates that this facility qualifies as a generator of HCUO.
Annual testing for purity was last performed in 2022 and a 11/1/2022 Oilfield Environmental &

VENTURA, CA 93001

Inspection Date: **12/14/2022**

Compliance, Inc. analytical report was made available for review. Verified that target constituents tested within the required parameters to demonstrate purity to qualify for management as HCUO. HCUO containers were observed properly labeled as non-Hazardous waste with generator information and accumulation start date.

This facility has also recently tested out its oily waste/oily debris and verified that it is non-hazardous and no longer manages this material as hazardous waste. AERA made available for review a 5/26/2020 Oilfield Environmental & Compliance, Inc. analytical report. Review of the analytical results indicate that oily debris was confirmed not to exceed Total Threshold Limit Concentrations for metals, recorded a flashpoint greater than 200 degrees, and passed an acute aquatic 96-hour test for LC50.

Records of employee training maintained available electronically on site at the AERA office. Verified employee annual training for 2022 which includes hazardous waste management. (MEST - Mandatory Environmental Safety Training, completed annually by all employees). Employees also receive DOT training.

Copy of Contingency Plan available on site and reviewed. The plan was updated to include the emergency coordinator names and phone numbers. Ensure the updated plan is uploaded to CERS. Discard older versions of the plan.

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: Paperwork review was conducted at the AERA Energy office at 1800 School Canyon Rd., Ventura on 12/13/2022.
Verified owner/operator information as reported to the California Environmental Reporting System (CERS).

Complete CERS Hazardous Materials Business Plan submittal available on site (electronically via CERS) for calendar year 2022.

Representative lease locations were inspected this date to verify chemical inventory. The following areas were included for inspection: Central Bulk Chemical Storage, Central Water Treating, Central Water Treating Solids Area, Compressor Plant 2, Compressor Plant 3, Drilling Fluids Site, Taylor Bin City, Taylor Tank Farm, Taylor Trap Farm 8, Waterflood Plant 1, Waterflood Plant 4, and several well sites.

Verified inventory and noted several updates warranted to 'Largest Container' sizes and 'Maximum Daily Amounts'. Update the inventory in CERS as discussed during the field inspection. Note that some chemicals listed as stored at the Central Bulk Chemical Area were not on site at the time of this inspection but Aera is continuing to report them as they may be brought to the site at other times in the future. Ensure all inventory items include a ‘Maximum Daily Amount’.

Baker-Petrolite HSW-700 at the Taylor Sulfa Check can be deleted from the inventory as this is no longer stored on site. Add HCUO at CP2 to the hazardous materials inventory.

Annotated site maps reviewed (based on the earlier 6/30/2021 CERS submittals). It appears that more recent CERS submittals errantly included site maps for the adjoining portion of the

Inspection Date: **12/14/2022**

least (1800 School Canyon Rd). Update CERS to ensure the corrected maps for the 600 Shell Road facility are uploaded to CERS and the errant maps are discarded.

Update all site maps to call out primary hazardous materials storage areas (HMS) and hazardous waste storage areas (HWS) and evacuation staging areas.

***Note: Pursuant to an inspection performed 7/13/2022, the Aboveground Petroleum Storage Tank Act (APSA) Program was inactivated for this facility. Update the Business Activities Page and select “No” to the question “does your facility store greater than 1320 gallons of petroleum products?”.

3 years of employee training records maintained electronically. Reviewed example training records for an employee for 2022. (MEST - Mandatory Environmental Safety Training, completed annually by all employees). Employees also receive DOT training.

Emergency response plan available and reviewed. As noted by Dan Starkey, the Emergency Coordinator names and phone numbers were written into the hard copy of the plan at the time of this inspection. Ensure the updated plan is uploaded to CERS.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

Inspection Summary

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (SPOT CHECK INSPECTION)

General Comments: This facility maintains a Spill Prevention Control and Countermeasure (SPCC) Plan and the Plan is maintained available for review at the AERA facility located at 1800 School Canyon Rd, in Ventura.
The updated SPCC Plan is dated 8/1/2019 and was updated to account for an administrative and technical amendment as recorded in the plan, dated 8/1/2019.
The Plan is a PE Certified Plan and is correct for this facility.
Tanks and containers have sized secondary containment.
**Some containers observed stored within individual secondary containment features and were observed to hold rain water from the last storm event. No oil observed. Ensure timely inspection and removal of collected rain water from secondary containment features.
Monthly inspections are performed and documented. Inspection documentation maintained on site and reviewed.
Annual briefings for employees are performed and documented. Documentation for employee briefings for 2019 reviewed.

***The Hazardous Waste Program inspection for this facility was performed on 12/23/2019. Due to inclement weather at that time, inspection for the Hazardous Materials Business Plan Program and Aboveground Petroleum Storage Act Program inspections was rescheduled for this date.

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: Verified owner/operator information as reported to the California Environmental Reporting System (CERS).
Complete CERS Hazardous Materials Business Plan submittal available electronically on site.
Hazardous materials inventory reviewed.
***Operator reports that maximum daily amounts of chemicals stored at “various well sites” will be reviewed to ensure information reported to CERS is accurate. Update CERS accordingly.
For chemicals reported to CERS that were not observed on site at the time of inspection, the facility will determine if these chemicals will no longer be used/stored on site, and if no longer used, the chemicals will be removed from the hazardous materials inventory reported to CERS.
Annotated site maps reviewed.
Verified employee annual training for 2017-2019 on hazardous materials management (MEST - Mandatory Environmental Safety Training, completed annually by all employees).
Emergency response plan available and reviewed.
*** Review of the Emergency Response Plan indicates that the CUPA/UPA phone number should be updated

Inspection Summary

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: Facility owner/operator contact information verified as reported in California Environmental Reporting System (CERS).
Hazardous material inventory verified on site. Add as noted below.
Site map available and reviewed for accuracy.
Emergency response plan available and reviewed.
Employee training records reviewed for 2013-15. Maintain annual training records for at least three years.

Your annual HMBP submittal is due on or before 3-16-2016.
Note: An update to your HMBP is required, if at any time during the year there is: a 100% change in inventory, addition of previously unreported hazardous chemical and/or waste, change of address, change of name, change of ownership, or any other substantial change in operation that could inhibit immediate response during an emergency and is separate from the annual update.

Make the following corrections to CERS and submit within 30 days:
1. Update Business Activities page to indicate YES, aboveground storage tanks containing 1320 gallons or more of petroleum are stored on site.
2. Submit APSA element indicating "stored elsewhere in CERS" and "hazardous material inventory".
3. Add oil-filled electrical equipment to inventory (Currently inventoried only in SPCC plan).
4. Add total oil-filled equipment volume (including but not limited to: pumping units with 55 gallons or greater each).

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: Facility currently operates as a hazardous waste large quantity generator (LQG) of more than 1000 kg per month.
Hazardous waste containers were closed, labeled, accessible, and in good condition.
Acceptable accumulation times noted.
Properly located and maintained spill response kits available on site.
Properly maintained fire extinguishers available throughout facility.
EPA ID number verified as active.
Emergency Contingency plan available and reviewed.
Manifests/consolidated disposal receipts from previous three years were available and reviewed.

(TAY526) oil field in Ventura which is a permitted facility.

On 2/1/2024 at approximately 12:29 p.m., called Chris Logan, Environmental Advisor for details of the incident. Chris Logan stated at 10:25 a.m., a flow line that was in service had a leak at TAYLOR 526 Oil Field at Aera Energy in Ventura. The flow line is attached to a well line and connects to a larger line and header in the system. There was a release of 0.5 barrel of crude oil and 10.0 barrels of produce water on the premises which did not leave the property and no water ways were impacted. Per Chris Logan stated that the crude oil flowed onto some very hard to reach areas in the hills. Due to the rain event today, a team on behalf of Aera Energy has been able to remove contaminated soil by hand due to the saturated ground surface. CD Lyon which was the first contractor on site and Patriot Environmental Services are assisting the faciity with the cleanup especially in the hard-to-reach areas that are affected in the remote hills on site. He stated that the flow line that leaked will need to be repaired once the line is excavated to find the failure.

Chris Logan stated that the crude oil and produce water flowed on a vegetative hillside which is part of the oil lease and no waterways have been affected. Per Chris Logan said that the section of the equipment with the non-functional flow line has been shut off and not conveying oil since the discovery of the release this morning.

According to Chris Logan stated that the cleanup is still in process. He stated that he will send a couple photos, segregate the waste streams such as contaminated vegetation, used personal protective equipment, PPE and removed contaminated soil from the release in bins and provide a non-hazardous emergency temporary manifest.

Inspection Summary

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (INSPECTION, ROUTINE)

General Comments: Multi day inspection:

A facility walk through was conducted on 2/3/16 to evaluate tanks, containers and equipment that are used to store liquid petroleum products in aboveground containers.
Health and Safety Code 6.67 (APSA) gives the responsibility and authority of enforcing and implementing this program to CUPA.
APSA specifically excludes "Oil Production tanks" that are subject to Public Resources Code (PRC) 3106 (regulated under DOGGR) from the definition of an aboveground tank.
PRC restricts DOGGR's regulatory authority to drilling, operations, maintenance and abandonment of wells and the removal or abandonment of tanks. Additionally, facilities attendant to oil and gas production, including pipelines that are within an oil and gas field are included. If the oil and gas field are outside the oil and gas map boundaries, DOGGER does not regulate them. US EPA has further stated that if a facility is not within the boundaries of the oil and gas field, it must comply with 40 CFR 112.8 and not 40 CFR 112.9. CUPA regulates facilities subject to 40 CFR 112.8 and DOGGR regulates facilities subject to 40 CFR 112.9.
"Oil Production tanks" do not include: totes, drums or tanks of petroleum based materials (diesel or gasoline, motor or hydraulic oils, liquid petroleum waste, petroleum based liquid condensate, gas plant tanks with liquid petroleum products), oil filled equipment (compressors, Lufkin pumps, flowthrough process equipment requiring lube oil and mineral oil in transformers), mobile equipment (mobil pumper trucks) or loading and unloading activities (Lloyd shaker facility, occasional loading to tankers at LACT units). Only tanks, containers and equipment with 55 gallon or larger capacity and that contain petroleum products (or mixtures) that are liquid at room temperature are subject to APSA.

The areas and equipment inspected on 2/3/16 included: Trap Plant 8, RBU Trap Farm 1, Central Water Plant, Compressor Plant 3, Central Chemical Storage, Taylor Tank Farm, Taylor LACT unit, Bin City, Fire School and several Oil well pumping stations (Lufkins).
The tank integrity tests were verified on 2/2/16 in the gas plant office. The next internal tank testing is due by 12/2017.
Paperwork and documentation was reviewed on 2/3/16.

The SPCC plan contains all content required by 40 CFR 112.
SPCC Plan available for review on site and PE certified on 2/6/13.
Management authorization of resources and implementation complete.
Plan review conducted and PE certified on 6/28/15.
Amendments to the plan are documented in the plan.
The facility has had reportable spills. All reportable spill and incidents are recorded and

records provided in the Integrated Contingency Plan. The last reportable spill was in 1997.
Verified SPCC plan petroleum storage matches the HMBP inventory storage.
Site diagram is accurate and up to date.
Oil storage containers, loading areas and AST's are in good condition, have sized secondary containment (with freeboard for precipitation), do not have oil in secondary containment and are compatible for contents.
Overfill protection matches the SPCC plan, is tested 2 times per year and documentation provided.
Oil filled equipment, oil loading/unloading/transfer areas, piping and mobile pumper trucks have spill kits readily available and sufficient general containment.
Open exterior containment structures and sumps have closed valves (or no valves), are sized to contain 100% of the volume of the largest container plus precipitation, are in good condition, are sufficiently impermeable to contain a spill and records of rain water discharge are maintained.
Facility has adequate security.
Records of inspections, integrity testing and procedures, training/annual discharge briefing are available on site for 3 years.
Annual hazardous materials business plan submitted electronically in CERS to satisfy Tank Facility Statement requirement completed on 3/16/15. The lead user is in the process of the annual review and will submit the APSA element in CERS with the Business Plan submittal no later than 3/16/15.

Inspection Summary

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: BUSINESS PLAN SUBMITTED A COMPLETE BUSINESS PLAN INTO CERS
Updates submitted into CERS on March 25, 2015

Facility maintains a copy of the Business Plan onsite and includes:
Emergency contacts,
Chemical inventory
Site map,
Emergency contingency plan

Hazardous materials throughout lease and well heads stored in secondary containment
Annual employee training on hazardous materials implemented and documented.

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: Hazardous waste inventory submitted into CERS and updated March 25, 2015.

Hazardous waste containers are stored at "Taylor Bin City"
Hazardous waste "Universal Waste" labeled, closed and stored in a secure storage unit.
Recommend securing the 55 gallon drums of Universal waste stacked in the storage unit.
Hazardous waste solids, labeled and stored in a roll off bin at the Taylor Bin City.

Hazardous waste manifests reviewed and available onsite.
Emergency contingency plan submitted into CERS and available at the facility.
Site maps throughout facility submitted into CERS and available onsite.
Annual employee training on hazardous waste management implemented and documented.

NOTE: Central water treatment plant has a 5000 gallon tank that stores "filtered water".

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at http://www.ventura.org/rma/envhealth/hawd.html. You may also scan this code with your mobile device.

Inspection Summary

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (INSPECTION, ROUTINE)

General Comments: This facility is regulated both by the Division of Oil Gas and Geothermal Resources (DOGGR) and the Environmental Protection Agency (EPA)/CUPA.

A representative sample of aboveground storage tanks (ASTs), containers and equipment that are used to store petroleum products in aboveground containers were inspected at the facility.
The areas inspected included: Taylor Trap Farm 8, RBU Trap Farm 1, Central Water Plant, Compressor Plant 3, Central Chemical Storage, Taylor Tank Farm, Taylor LACT unit and D & N facility.

Documentation and records for this facility were reviewed at Aera's office following and as part of the Aera School Canyon facility inspection conducted on April 1, 2019.

The Spill Prevention Control and Countermeasure (SPCC) Plan contains a cross reference and all required content of 40 CFR 112.
SPCC Plan was last certified by a professional engineer on 10/6/2017.
Management authorization of resources and implementation complete. Recently updated by the new management on 8/20/18.
Facility has accurately completed the Substantial Harm Criteria Certification.
All facility technical and administrative amendments are documented in the SPCC Plan.
The facility has had reportable spills. All reportable spill and incidents are documented. A recent release that occurred at the School Canyon facility on February 12, 2019 was properly responded to, reported, and documented.
Facility has adequate security.
Oil storage containers, loading areas and AST's are in good condition, have sized secondary containment (with freeboard for precipitation), do not have oil in secondary containment and are compatible for contents.
Overfill prevention matches the SPCC plan, is tested 2 times per year and documentation maintained.
Oil filled equipment, oil loading/unloading/transfer areas, piping and mobile pumper trucks have spill kits readily available and sufficient general containment (including bermed areas).
Open exterior containment structures and sumps have closed valves (or no valves), are sized to contain 100% of the volume of the largest container plus precipitation, are in good condition, are sufficiently impermeable to contain a spill and records of rain water discharge are maintained.
Several catchment (spill containment) basins are located throughout the facility to prevent a release from leaving the facility. These spill containment basins are regularly inspected and maintained.
Loading and unloading procedures are in place for the occasional loading/unloading that

Inspection Summary

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (INSPECTION, FOLLOW-UP)

General Comments: After further review and consultations with the California Geologic Energy Management Division and the Office of State Fire Marshal it has been determined the facility does not meet the minimum threshold for APSA regulation and not subject to APSA. The facility will be inactivated from the APSA program.

For purposes of APSA (per HSC Section 25270.2(a)(3)), any tanks (including containers or equipment) and pipelines that are attendant to oil and gas production within the lease areas of an oil and gas field are subject to CalGEM and not subject to APSA. The 'attendant to oil and gas production' includes those that are directly or indirectly related to oil and gas production.

All tanks and containers storing petroleum products located on-site, at this time, have been determined as attendant to oil and gas production and are stored within the lease. Thus, subject to CalGEM.

The vehicles on site are maintained and fueled off site at local facilities. In the future if the facility has fuel tanks used for vehicles, fresh and used oils for maintenance of work vehicles, etc and storing greater than 1,320 gallons of petroleum product for the vehicles, the facility will be subject to SPCC and APSA.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at , https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

Inspection Summary

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments:

-Verified owner/operator contact information.
-Emergency Response Plan and all business plan forms (Owner/Operator page, Business Activities Page, & Chemical Inventory Pages) were available on site at the time of the inspection.
-Chemical inventory verified during the inspection.
-Facility map verified.
-Employee training conducted.

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: -Verified the owner/operator information.
-The hazardous waste containers were in good condition, secondarily contained, closed, accessible, and properly labeled.
-Designated Facility signed copies of the uniform hazardous waste manifests were available on site for the past 3 years at the time of the inspection.
-The facility had an active EPA ID# at the time of the inspection.
-Spill clean-up materials were available.
-Contingency plan was available and current.
-Employee training was conducted and documentation was available on site.

A copy of this inspection report/Notice to Comply was provided to MATT WYATT.

Inspection Summary

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: A joint inspection was conducted on today's date by Melanie Sebastian & Diane Wahl with the Ventura County Environmental Health Division.

Facility representatives present at the time of inspection included:
- Chris Logan, HSE Environmental Advisor
- Doug Koenig, Belridge Environmental Complex Lead
- Jo Cochran, HSE Advisor
- Kevin Brown, Process Specialist

Routine inspection was based upon the California Environmental Reporting System (CERS) submittal made on 8/28/2024.

Hazardous materials business plan (HMBP) was available electronically via CERS.
Verified owner/operator contact information as reported in the CERS.
Site map available electronically and reviewed on-site.
The following areas were inspected to verify chemical inventory:
1) Central Bulk Chemical Storage
2) Compressor Plant 3
3) Waterflood Plant 4
4) Taylor Bin City
5) Taylor Tank Farm
6) Central Water Treating

***Note: Perlite located in Waterflood Plant 4 was erroneously recorded in pounds. Facility evaluated quantity and submitted updates into the Hazardous Materials Inventory in CERS after the inspection.

Note: Businesses are required to electronically submit and certify their Hazardous Materials Business Plan (HMBP) annually using the California Environmental Reporting System (CERS) website (http://cers.calepa.ca.gov). The HMBP consists of the Owner/Operator Page, Business Activities Page, Hazardous Materials/Waste Inventory, and Emergency Response Plan.

An update to your HMBP is required within 30 days if at any time during the year there is: 1) a 100% change in inventory, and/or 2) addition of previously unreported hazardous chemical and/or waste, and/or 3) change of address, and/or 4) change of name of business, and/or 5) change of ownership, and/or 6) change in emergency contacts or their telephone numbers, and/or 7) any other substantial change in operation that could inhibit immediate response during an emergency and is separate from the annual update.

Inspection Date: **8/29/2024**

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: EPA ID#: CAR000327197 is active on the Hazardous Waste Tracking System (HWTS).

After review of manifests facility currently generates hazardous waste at greater than 100kg (220lbs/27 gallons) and less than 1000kg (2,200lbs/270g) per calendar month.
Per Doug Koenig, hazardous waste at this facility is managed assuming a generator status of Large Quantity Generator (>1000kg/ 270 gallons/2,200 pounds per month), even if a given month's hazardous waste generation is below that threshold, and accumulation therefore does not exceed 90 days.

***NOTE: In the Business Activities page in CERS, facility self-reports as a generating 2,200 pounds of federal RCRA hazardous waste (in any single calendar month), or 2.2 pounds of RCRA acute hazardous waste; or more than 220 pounds of spill cleanup materials contaminated with RCRA acute hazardous waste. Per Aera representatives, this option was selected because they are an episodic generator of RCRA hazardous waste during special projects, demolitions and maintenance activities associated with oil and gas production. Based on this information, the RCRA-Large Quantity Hazardous Waste Generator program will be activated for this facility and the hazardous waste generator program will inactivated.

Hazardous waste and universal waste containers were observed accessible, labeled, closed, in good
condition and secondarily contained. Acceptable accumulation times noted for hazardous waste and universal waste.

***NOTE: There were several empty containers (approximately 55 gallons each) located at Taylor Bin City that previously held hazardous materials not marked "Empty" along with the date it was emptied. Per Chris Logan, empty containers are managed quarterly. After inspection of the facility, Chris Logan emailed this Division a photo of the empty containers marked "empty" with today's date.

Inspections of the hazardous waste storage areas are conducted weekly and logged electronically.

3 years of uniform hazardous waste manifests and bill of ladings are maintained available on site electronically.

The hazardous waste disposal company is MP Environmental Services and Safety Kleen. Based on review of manifest, last pick up occurred on 6/13/2024.

As reported on the previous report, this facility is managing used oil as "Highly Controlled Used Oil" (HCUO) in accordance with HSC 25250.19(b)(3). such that by meeting certain operating conditions, the generator then can manage HCUO as a recycled oil and not as a hazardous waste. Review of facility information indicates that this facility qualifies as a generator of HCUO.

On May 27, 2020, AERA Energy LLC notified DTSC a Certification of Compliance with HSC 25250.19(b)(3).

COUNTY OF VENTURA

CUPA PROGRAM INSPECTION REPORT

Facilty Name: AERA ENERGY LLC
Site Address: 600 SHELL RD
VENTURA, CA 93001
CERS #:10336582

Owner Mailing Address: AERA ENERGY LLC
3051 N VENTURA AVE
VENTURA, CA 93001

Inspection Date: **8/29/2024**

Annual testing for purity was last performed in 2024 and analytical report for HCOU by Oilfield Environmental & Compliance, Inc., dated May 28, 2024, was provided to the Division during a routine inspection at the 1800 N School Canyon Rd. site on July 25, 2024. Review of the HCUO analytical report for 2022 was provided and reviewed this date. HCUO analytical report for 2023 was unable to be located. Per Chris Logan, person managing this process left the company in 2023 and are unable to locate his records.

During inspection it was verified that target constituents tested within the required parameters to demonstrate purity to qualify for management as HCUO.

As reported on the previous report, this facility has also recently tested out its oily waste/oily debris and verified that it is non-hazardous and no longer manages this material as hazardous waste. AERA made
available for review a 5/26/2020 Oilfield Environmental & Compliance, Inc. analytical report during routine inspection at the 1800 N School Canyon Rd. site on July 25, 2024.

Spill response materials, fire extinguishers, first aid kits, and eye wash stations were available throughout the facility.

Emergency response/contingency plan reviewed and available electronically.
***NOTE: *The FACILITY ID# is incorrect in the Consolidated Emergency Response/Contingency Plan. Update Facility ID# to FA0007102 and upload into CERS.
Employees demonstrated knowledge on hazardous waste procedure and spill response. Employee training records from 2022-2024 reviewed. Mandatory Environmental Safety Training (MEST) completed annually by all employees. MEST topics includes health and safety, hazardous materials management, hazardous waste management, emergency response/procedures, and spill response/procedures.

Maintain annual training records for at least three years.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at , https://vcrma.org/customer-service-evaluation-form-field-inspection. You may also scan this code with your mobile device.

A copy of this inspection report/Notice to Comply was provided to CHRIS LOGAN.

Inspection Summary

ABOVEGROUND PETROLEUM TANKS >10,000 GALLONS (SPOT CHECK INSPECTION)

General Comments: SPOT CHECK INSPECTION:
(Full routine inspection conducted on 2/3/2016)
Facility stores more than 10,000 gallons of petroleum products in aboveground storage tanks and is in the >10,000 gallon Aboveground Petroleum Storage Act (APSA) Program.
Facility has a complete PE-certified Spill Prevention Control and Countermeasure (SPCC) Plan. SPCC Plan last amended, signed, and dated on October 6, 2017.
Technical amendments were updated in the recently amended SPCC Plan.
No leaky components observed. Spill kits available. Secondary containments are free of oil.
Leaks and spills are cleaned up upon discovery.
Logs and records maintained as part of SPCC Plan. Annual training conducted and documentation available.

BUSINESS PLAN (INSPECTION, ROUTINE)

General Comments: Facility has submitted the required Hazardous Materials Business Plan (HMBP) information to the California Environmental Reporting System (CERS).
An annual HMBP/CERS submittal for 2017 was completed in March 2017.
Aerial site maps and detail site maps and Emergency Response/Contingency Plan available on site, uploaded to CERS, and reviewed.
Reviewed hazardous materials inventory and facility contact information.
Three years of documented employee training records available and reviewed.

HAZARDOUS WASTE GENERATOR (INSPECTION, ROUTINE)

General Comments: Facility operates as a hazardous waste large quantity generator (LQG) of more than 1,000 kg/month. "Taylor Bin City" located at the Shell Road site is the central hazardous waste storage area for the Aera Energy Ventura Fields
Hazardous waste drums and bins were accessible, in good condition, maintained closed, and properly labeled. Spill response kits were accessible.
Update the EPA ID number for this location to reflect the correct address. TSDF-signed copies of hazardous waste manifests available and reviewed.
Emergency Response/Contingency Plan available. Documented employee training available and reviewed.

Please take a moment to provide feedback from today's inspection. An opinion form can be completed at http://www.vcrma.org/envhealth/hawd.html. You may also scan this code with your mobile device.

Subject: Your County of Ventura public records request #25-1095 has been closed.

-- Attach a non-image file and/or reply ABOVE THIS LINE with a message, and it will be sent to staff on this request. --

County of Ventura Public Records

Record request #25-1095 has been closed. The closure reason supplied was:

Dear Requester,
The Ventura County Dept. of Agriculture/Weights and Measures has received your Public Records Act request. Please be advised that there are no pesticide records associated with the requested APN's. These are industrial sites that would not require site specific pesticide use reports be made to our office.
Thank you,
John Mikesell

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.
