

<p>A visual simulation of a monopole design from Key Viewpoint 5 at a residence on Sweet Meadow, southeast of the proposed Tower HF-03 location. This view is to the northwest toward proposed tower locations HF-03 (closest), -04, and -05. As shown in the simulation, the monopole design would have a single but more massive support pole and would be approximately 16 feet taller than the proposed H-frame structure. However, the monopole would appear more similar in design to the existing single-pole towers.</p>	<p>Key Viewpoint 5 Sweet Meadow Monopole Simulation</p>	<p>VIEJO SYSTEM TRANSMISSION LINE PROJECT AESTHETICS Figure 8-4</p>
