EMB TLRR - PEA Completeness Review Transfer No 2.zip

59.1 MB

Please find Southern California Edison's formal response to the Energy Division's additional findings of deficiency for SCE's Application A.24-07-21 and related Proponent's Environmental Assessment (PEA) received on April 16, 2025 .

The supplemental data can be assessed thorough the attached link. This additional information is intended to supplement the previously provided PEA. Also included is the tracking spreadsheet with response comments.

The team is still working through the Geology, Soils, and Paleontological Resources section. As the paleo report/records search will take several weeks. We expect this information will be available at the end of June 2025.

Include attached zip (EMB TLRR - PEA Completeness Review Transfer No 2)

Please let us know if you have any questions. Thank You.

Jason Bruce
