**DATA REQUEST SET E D - S C E - E P L - 0 0 4**

**To: Energy Division**  
**Prepared by: Thomas Diaz**  
**Job Title: Senior Advisor**  
**Received Date: 2/20/2024**

**Response Date: 3/7/2024**

---

**Question DR4-1:**

**Issue:**

CPUC understands that National Park Service and U.S. Bureau of Land Management have requested that SCE relocate a staging area because it is located within a designated wilderness area and SCE is in the process of updating the staging area location to avoid the conflict with designated wilderness areas.

**How to Address:**

Please provide updated GIS data for the project with the revised staging area location. Please update appropriate table(s) in the Draft Project Description to reflect the new location(s) of staging area(s). Provide supplemental biological and cultural resource survey data for the new staging area and any associated access roads.

**Response to Question DR4-1:**

The updated GIS data for the project with the revised staging area location is attached in file “EPL\_ProjectData\_20240301\_Agency.mpk” The revised staging area size remains relatively unchanged and therefore, the existing tables in the Draft Project Description did not need to be updated to reflect the new location.

Supplemental biological and cultural resource survey data for the new staging area and any associated access roads will be included in the biological and cultural resource survey reports to be submitted by end of the year (i.e., November/December).
