1 **I. SUMMARY OF ARGUMENT**

2 Three basic tenets of the California Environmental Quality Act are at issue in this case—(1)
3 CEQA’s primary purpose of disclosing to the public and decision-makers all potential significant
4 environmental impacts of a proposed project; (2) an EIR is required if a fair argument is made that the
5 proposed project may cause a significant environmental impact; and (3) a lead agency is obligated to
6 provide substantial evidence in support of its determination that a proposed project will not lead to
7 significant environmental impacts. The City of Jurupa Valley’s (“City”) environmental review of the
8 397-unit apartment project (“Apartment Project”) is plainly inconsistent with those CEQA principles.
9 The City approved the Apartment Project through a mitigated negative declaration (“MND”) that did
10 not make a single reference to an electric transmission line proposed to be located on the same property
11 as the Apartment Project, even though the City knew that an Environmental Impact Report had already
12 been certified for that transmission line. The City also did not include any analysis of why it
13 determined disclosure of the electric transmission line was not legally required under CEQA. That
14 overarching legal defect caused the City to approve the Apartment Project without fully disclosing its
15 potential environmental impacts and without substantial evidence to support its determination that the
16 Apartment Project would not lead to significant environmental impacts.

17 The only explanation provided during the Apartment Project’s entitlement process for the
18 City’s complete omission of the electric transmission line came not from the City, but from the Real
19 Parties in Interest (“Real Parties”) who argued that the transmission line was too “speculative” for the
20 City to consider in the MND. The City provided no such explanation of its own in the administrative
21 record. In their joint Opposition Brief the City and Real Parties now apparently abandon that alleged
22 explanation altogether and state that the sole justification for the omission in the MND is that the
23 electric transmission line and Apartment Project are allegedly “mutually exclusive.”

24 Yet, the administrative record does not contain any evidence that the two projects are
25 necessarily mutually exclusive. In fact, the record contains evidence that the electric transmission line
26 route had been modified to accommodate other projects in the past. As the City was informed before
27 it approved the Apartment Project, Southern California Edison Company (“SCE”) previously modified
28 the transmission line’s route to accommodate a commercial project affiliated with the Real Parties.

1 Despite knowing the potential for the transmission line route to be modified, the City conducted no
2 analyses, either in the MND or in any other document in the administrative record, as to whether the
3 two projects could successfully co-exist. Instead, the City and Real Parties now provide only a post-
4 hoc rationalization that the two projects cannot possibly co-exist.

5 The MND also provides no analysis of the two projects' potential cumulative impacts, which
6 could occur if both projects proceed on the same project site. For example, with overlapping
7 construction schedules the two projects could lead to potentially cumulative impacts related to air
8 quality, noise, and traffic. Yet, the City's post-hoc conclusion that the two projects are necessarily
9 mutually exclusive, without any supporting evidence in the administrative record, deprived the public
10 and the decision-makers of any analysis of the Apartment Project's potential cumulative impacts.

11 If the City did believe the two projects were necessarily mutually exclusive, CEQA required,
12 at a minimum, that the City disclose its conclusion and analysis that the Apartment Project would
13 make the electric transmission line infeasible in the MND. The City obviously failed to do so because
14 the transmission line is a public infrastructure project that will provide much needed electricity to the
15 broader Riverside region, and the City's conclusion that the projects are mutually exclusive necessarily
16 means that the Apartment Project could have significant impacts on regional energy supplies. Yet, the
17 Apartment Project's potential impacts to energy resources were completely omitted from any analysis
18 in the MND. In response, the City and Real Parties argue that the City was not required to consider
19 such energy impacts because it evaluated the Apartment Project through an MND instead of an
20 environmental impact report ("EIR"). That argument, however, is circular—even though a project's
21 impact on energy resources may be significant and thereby require an EIR, no such analysis is required
22 if an EIR is not prepared. CEQA does not countenance such gamesmanship—all potential
23 environmental impacts must be analyzed whether an EIR or an MND is used.

24 The City and Real Parties attempt to explain the defect in the City's environmental review
25 related to the Apartment Project's potential impacts to neighborhood traffic, alleging that residents'
26 observations supporting a fair argument that the Apartment Project could lead to traffic impacts did
27 not constitute substantial evidence. Yet, the residents surrounding the Apartment Project site are in a
28 unique position to understand the true patterns of traffic that cut through their neighborhoods, and

1 courts have repeatedly recognized that such observations may constitute substantial evidence precisely
2 because those observations can provide a unique perspective. The City readily acknowledged that its
3 traffic study did not consider the Apartment Project’s potential to add traffic that would cut through
4 surrounding neighborhoods at all, and thus had no substantial evidence to support its conclusion that
5 the local residents’ observations were unfounded. Further, if the City had any evidence to balance
6 against those traffic concerns from the local residents, CEQA recognizes that an EIR, not an MND, is
7 the proper vehicle for a lead agency to weigh such conflicting evidence.

8 Finally, the City and Real Parties present another circular argument attempting to explain why
9 the MND did not provide any analysis of the Apartment Project’s consistency with specific goals or
10 policies in the City’s General Plan. Nearby residents and the City of Riverside raised concerns during
11 the entitlement process suggesting a fair argument that the Apartment Project could conflict with
12 policies in the City’s General Plan promoting economic development. The City and Real Parties allege
13 that the City was not required to evaluate those policies in the MND because the City adopted a
14 General Plan Amendment for the Apartment Project. Yet, the City and Real Parties do not explain
15 why a General Plan Amendment changes the City’s obligations under CEQA to ensure that the
16 Apartment Project is consistent with the specific goals and policies in the City’s existing General Plan.

17 Given CEQA’s primary public purpose to disclose a project’s potential environmental impacts
18 to the public and the decision-makers, the City’s complete omission of the electric transmission line
19 in the Apartment Project’s MND and the other defects in the City’s environmental review render the
20 MND legally deficient under CEQA. Accordingly, SCE respectfully requests that the Court invalidate
21 the City’s MND and other project approvals for the Apartment Project to allow for a proper
22 environmental review that will fully disclose the project’s potential environmental impacts.

23 **II. CITY’S AND REAL PARTIES’ IMPROPER REQUEST FOR JUDICIAL NOTICE**

24 In their Opposition Brief, the City and Real Parties recite facts concerning the electric
25 transmission line (referred to as the Riverside Reliability Transmission Project (“RTRP”)) that are
26 contained in documents attached to the request for Judicial Notice (“RJN”) filed by the City and Real
27 Parties. Yet, those documents are irrelevant to the Court’s evaluation of the City’s environmental
28 review of the Apartment Project for two independent reasons. (Opp. Brief, pp. 3-4.) As explained

1 further in Riverside and SCE's Objections to that RJN, those documents post-date the City's approval
2 of the Apartment Project and, therefore, are not relevant to the adequacy of the evidence before the
3 City at the time of its approval. Further, the City and Real Parties do not cite to any of the documents
4 in their RJN in the legal argument section of their Opposition Brief (at pp. 4-19). Therefore, those
5 documents are not relevant to the legal issues before this Court and cannot be judicially noticed. (See
6 *Kilroy v. State of Cal.* (2004) 119 Cal.App.4th 140, 145.) For these reasons, SCE will not further
7 address those documents in this brief.

8 **III. STANDARD OF REVIEW**

9 As SCE explained in its Opening Brief, the CEQA Guidelines explicitly state that if a lead
10 agency is "presented with a fair argument that a project may have a significant effect on the
11 environment the lead agency shall prepare an EIR even though it may also be presented with other
12 substantial evidence that the project will not have a significant effect." (Cal. Code Regs., tit. 14, §
13 15064(f)(1) [emphasis added]; *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal.3d 68, 75.) Further,
14 under the "fair argument" standard, deference to the agency's determination is not appropriate and its
15 decision not to require an EIR can be upheld only when there is no credible evidence to the contrary."
16 (*Sierra Club v. County of Sonoma* (1992) 6 Cal.App.4th 1307, 1318 [emphasis added].) The City and
17 Real Parties do not take issue with that fair argument standard.

18 As demonstrated in SCE's Opening Brief and this brief, the administrative record contains
19 substantial evidence that supports a fair argument that the Apartment Project would have a potentially
20 significant environmental impact in the areas of cumulative impacts, traffic, energy and land use.
21 Indeed, on a number of those issues, the administrative record simply contains no evidence that the
22 City even considered those impacts, let alone provide substantial evidence that no significant impact
23 would occur. Accordingly, the administrative record contains credible evidence that contradicts the
24 City's conclusion that an EIR was not required in this case.

25 **IV. THE CITY'S COMPLETE OMISSION OF THE RTRP IN THE MND VIOLATED** 26 **CEQA'S REQUIREMENT TO FULLY DISCLOSE THE APARTMENT PROJECT'S** 27 **POTENTIAL CUMULATIVE IMPACTS**

28 **A. The City Never Demonstrated That The Apartment Project And RTRP Were** **Mutually Exclusive During The Environmental Review Process**

1 The only alleged justification that actually appears in the administrative record to support the
2 City’s complete omission of consideration of the RTRP in the MND for the Apartment Project is that
3 the RTRP is too “speculative” because the RTRP had not yet received final approval from the
4 California Public Utilities Commission (“CPUC”). (AR 4494-96.) That justification came only from
5 a letter submitted to the City Council from Real Parties. (*Id.*) The City itself remained silent and did
6 not provide a single reason in the administrative record to support its determination that it need not
7 consider the RTRP in its MND.

8 In the *factual* section in the Opposition Brief, the City and Real Parties attempt to misdirect
9 the Court by claiming that the RTRP was “speculative” based on documents concerning the CPUC
10 process that occurred after the City approved the Apartment Project. (Opposition Brief (“Opp. Brief”),
11 pp. 3-4.) Yet, the City and Real Parties do not make a single reference to the RTRP’s processing at the
12 CPUC or to any of the exhibits attached to their RJN in the *legal* argument section of their Opposition
13 Brief, thus conceding that there is no legal basis to conclude the RTRP was too speculative to consider
14 in the MND. (See Opp. Brief, pp. 4-12.) Further, while the City and Real Parties spend pages
15 distinguishing the cases cited by SCE concerning when related projects may be too speculative to
16 consider in a cumulative impacts analysis (Opp. Brief, pp. 9-11), the City and Real Parties do not
17 contend in that section of their brief that the RTRP was speculative. Instead, the City and Real Parties
18 state that the related projects in the cases cited by SCE were not mutually exclusive with the proposed
19 projects at issue therein, which, in the City’s and Real Parties’ view, is the sole reason to distinguish
20 those cases from the instant case. Consequently, the City and Real Parties have abandoned the legal
21 argument that the RTRP was too speculative to consider as a related project.

22 Instead, the City and Real Parties now rely on the allegation that the Apartment Project and
23 RTRP are mutually exclusive. However, the City and Real Parties cannot point to any substantial
24 evidence in the administrative record to support their current position that the two projects cannot co-
25 exist. The administrative record contains one summary statement in the staff report to the City’s
26 Planning Commission that the Apartment Project site “will be significantly affected if this
27 transmission line project is implemented, and it will make the proposed residential project infeasible.”
28 (AR 3393.) The staff report to the City Council repeats that summary contention that the Apartment

1 Project may conflict with the RTRP, although it does not state that the two projects would be mutually
2 exclusive. (AR 3475.) Finally, one City Planning Commissioner also stated at the Planning
3 Commission hearing that the City needed to put something on the Apartment Project site if the City
4 wanted to “stymie” the RTRP. (AR 3656-57.) Those summary statements, however, were all presented
5 outside of the MND itself and do not constitute “substantial evidence” within the meaning of CEQA.
6 (See Cal. Code Regs., § 15384 [emphasis added]; substantial evidence does not include “argument,
7 speculation, or unsubstantiated opinion. . .”). Indeed, if the City believed that the two projects could
8 be mutually exclusive, it had the duty to obtain the information and technical analysis that would
9 support that opinion and provide it in the MND. (See *Laurel Heights Improvement Assn. v. Regents of*
10 *Univ. of Cal.* (1988) 47 Cal.3d 376, 399.)

11 With no evidence in the administrative record they can rely on, the City and Real Parties resort
12 to summary conclusions in their Opposition Brief, stating simply that “it would be impossible to have
13 apartment buildings with 230-kv transmission towers and lines running directly through them.” (Opp.
14 Brief, p. 7.) Yet, the City and Real Parties point to no evidence in the administrative record to support
15 the conclusion that the RTRP would run “directly through” the apartment buildings. If anything, the
16 City’s own map of the proposed Apartment Project shows that the RTRP is proposed to run through
17 the western edge of the Apartment Project site along the freeway, not directly through the Apartment
18 Project site. (AR 3588-90.) Electric transmission lines and residential projects frequently co-exist
19 throughout the region, and there is no evidence in the administrative record that the same could not
20 apply for the Apartment Project and RTRP.

21 Indeed, there is evidence in the administrative record that the City knew that SCE modified the
22 RTRP route to accommodate other projects in the past. For example, before the City Council
23 considered the Apartment Project, the City received documentation showing that SCE previously
24 modified the RTRP route to accommodate an existing commercial project called the “Vernola
25 Marketplace,” a project affiliated with the Real Parties in this case. (AR 6437-40.) The City and Real
26 Parties point to no evidence in the administrative record to show that similar modifications could not
27 have been made either to the RTRP or the Apartment Project to allow the projects to co-exist. Against
28 that credible evidence and with no evidence to support their new “mutually exclusive” argument, the

1 City and Real Parties' argument amounts to nothing more than a post hoc rationalization for the City's
2 complete failure to consider the RTRP as a related project in the MND.

3 In addition to the complete absence of evidence in support of their new argument, the City and
4 Real Parties cannot explain how the complete omission of the RTRP in the City's MND complies with
5 CEQA's primary purpose to fully inform the public and decision-makers. CEQA's fundamental
6 purpose is to disclose the true extent of a project's potential environmental impacts and how those
7 potential impacts might be mitigated. (Cal. Code Regs., tit. 14, § 15002(a); see also *Laurel Heights*
8 *Improvement Assn.*, *supra*, 47 Cal.3d at pp. 391-92; *Lincoln Place Tenants Assn. v. City of Los Angeles*
9 (2007) 155 Cal.App.4th 425, 443-44 [emphasis added] [holding the "fundamental goals of
10 environmental review under CEQA are information, participation, mitigation, and accountability"].)
11 Despite that fundamental purpose of disclosure, the City's MND for the Apartment Project did not
12 include a single reference to a project that is proposed for the very same site as the Apartment Project.

13 The City and Real Parties can point to no provisions in CEQA or case law that justifies their position
14 that CEQA does not require disclosure of environmental impacts attributable to developing a project
15 on the same property where another project is slated for construction. Accordingly, the public and
16 decision-makers were deprived of any analysis of the Apartment Project's potential impacts combined
17 with the impacts of the RTRP or why the projects could not co-exist. Such a defect renders the City's
18 MND legally inadequate as a disclosure document under CEQA.

19 **B. The City's Failure To Consider The Apartment Project's Potential Cumulative**
20 **Impacts With The RTRP Constitutes Prejudicial Error Under CEQA**

21 In addition to arguing that the two projects are mutually exclusive, the City and Real Parties
22 attempt to explain the City's complete omission of the RTRP from the MND by arguing the two
23 projects are not "closely related" and could not have had led to cumulative impacts. Yet, the City and
24 Real Parties provide no authority—in case law, CEQA or in the administrative record—to support that
25 argument, and for good reason.¹ CEQA does not contain a definition of a "closely related" project or
26 any provision that suggests that two projects proposed to be constructed on the same property would
27 not be "closely related" for the purposes of a cumulative impacts analysis. Given the absence of law

28 ¹ The City and Real Parties rely on cases that simply do not stand for the proposition that a project
proposed for the same site is not a closely related project. (Opp. Brief, pp. 9-11.)

1 to support their novel position, the City and Real Parties instead assert that the RTRP is not a closely
2 related project because, once built, it would not create any traffic or other impacts that when combined
3 with Apartment Project's impacts would be cumulatively considerable. (Opp. Brief, p. 6.)

4 This argument, which again was never made by either the City of Real Parties during the
5 administrative process, is simply contrary to common sense. For example, there is no evidence in the
6 administrative record to suggest that the Apartment Project and RTRP would not have cumulative
7 impacts, especially if the two projects proceed with overlapping construction schedules. Such
8 overlapping construction schedules could lead to potentially cumulative impacts related to air quality,
9 noise, and traffic, especially since the two projects are proposed for the same project site. The CEQA
10 Guidelines even state that "factors to consider when determining whether to include a related project
11 should include the nature of each environmental resources being examined, the location of the project
12 and its type." (Cal. Code Regs., tit. 14, § 15130(b)(2) [emphasis added].) Given the location of the two
13 proposed projects on the same project site, the RTRP should have been considered a related project in
14 the Apartment Project's cumulative impacts analysis.

15 Since the two projects could have cumulative impacts, analysis of the two projects' potential
16 overlapping cumulative impacts would not have been meaningless as claimed by the City and Real
17 Parties. Courts have long held that a defect such as a failure to conduct a meaningful cumulative
18 impacts analysis constitutes a prejudicial error under CEQA. (See *Mountain Lion Coalition v. Cal.*
19 *Fish & Game Commission* ("*Mountain Lion*") (1989) 214 Cal.App.3d 1043 1051-53.) In *Mountain*
20 *Lion*, the Court invalidated the California Fish & Game Commission's environmental review for
21 proposed regulations regarding mountain lion hunting because the environmental review document
22 did not include an adequate cumulative impacts analysis, which made it "impossible for the public ...
23 to fully participate in the assessment of the cumulative impacts associated with this project." (*Id.* at p.
24 1051.) The *Mountain Lion* Court further held that a "cumulative impact analysis which understates
25 information concerning the severity and significance of cumulative impacts impedes meaningful
26 public discussion and skews the decisionmaker's perspective concerning the environmental
27 consequences of the project, the necessity for mitigation measures, and the appropriateness of project
28 approval." (*Id.*) Similarly in this case, the City's failure to conduct any analysis of the Apartment

1 Project’s potential cumulative impacts with the RTRP constituted a prejudicial error that impeded a
2 meaningful public discussion of the Apartment Project’s environmental impacts. (See also *Friends of*
3 *the Eel River v. Sonoma County Water Agency* (2003) 108 Cal.App.4th 859, 872 [emphasis added]
4 [holding an EIR was “inadequate as an informational document” because that EIR did not consider
5 the cumulative impacts of a river diversion project, stating “an error is prejudicial if the failure to
6 include relevant information precludes informed decisionmaking and informed public participation,
7 thereby thwarting the statutory goals of the EIR process”].) Given that prejudicial error, the MND for
8 the Apartment Project cannot be upheld.

9 **V. THE CITY FAILED TO SATISFY ITS OBLIGATIONS UNDER CEQA WHEN IT**
10 **IGNORED THE APARTMENT PROJECT’S POTENTIAL IMPACTS TO**
11 **REGIONAL ENERGY RESOURCES**

12 The City committed yet another violation of CEQA’s disclosure requirements when it failed
13 to consider the Apartment Project’s potential impacts to energy resources. The City and Real Parties
14 bury their response to this issue in a single paragraph on page 18 of their twenty-page Opposition
15 Brief, alleging no party exhausted the administrative remedies on this issue and that CEQA does not
16 require such analysis. Neither argument is supported by CEQA or the administrative record.

17 Both Riverside and SCE brought the Apartment Project’s potential impacts to regional energy
18 resources to the City’s attention before the City Council approved the Apartment Project.² In a letter
19 to the City Council, Riverside explained that the RTRP is a “transmission/distribution project that will
20 bring much-needed bulk power into the Riverside area for the purpose of supporting critical
21 infrastructure, meeting the needs of educational institutions, supporting emergency services, and for
22 other uses.” (AR 4492.) Riverside’s letter further explained that many of the services and facilities
23 that the RTRP would serve “provide benefits to the greater-Riverside area, including residents and
24 community within and adjacent to Jurupa Valley.” (*Id.*) SCE similarly submitted a letter to the City
25 Council explaining that the RTRP would include an electric transmission line on portions of the

26 ² The exhaustion doctrine under California Code of Civil Procedure section 1094.5 does not require
27 an objector to identify a “precise legal inadequacy.” (*Save Our Residential Environment v. City of*
28 *West Hollywood* (1992) 9 Cal.App.4th 1745, 1750.) Rather, an objector can satisfy the exhaustion
doctrine by “fairly appris[ing]” a public agency of the defect in its environmental analysis. (*Id.*; see
also *Santa Clarita Org. for Planning the Environment v. City of Santa Clarita* (2011) 197 Cal.App.4th
1042, 1052.)

1 property where the Apartment Project was proposed. (AR 4489.) Thus, the potential for the Apartment
2 Project to adversely impact energy resources was fully exhausted.

3 The City and Real Parties' only other defense is that CEQA does not require lead agencies to
4 consider potential impacts to energy resources when a negative declaration is prepared in lieu of an
5 EIR. However, CEQA does not make that distinction. As SCE demonstrated in its Opening Brief,
6 Appendix F explicitly states that a lead agency should consider a project's potential impacts to energy
7 resources where applicable, and such environmental impacts may include:

8 . . . (2) The effects of the project on local and regional energy
9 supplies and on requirements for additional capacity. . . . [and] (5)
The effects of the project on energy resources.

10 (Cal. Code Regs., tit. 14, CEQA Guidelines Appendix F, II(C) [emphasis added]; see also *Cal. Clean*
11 *Energy Committee v. City of Woodland* (2014) 225 Cal.App.4th 173, 209, 212.) The City and Real
12 Parties do not dispute those requirements in Appendix F, but rely on the fact that Appendix F refers to
13 the preparation of an "EIR." Yet the City and Real Parties cannot point to any authority to support the
14 argument that a project's potential effects on local and regional energy supplies could constitute a
15 significant environmental impact when a lead agency prepares an EIR, but not when a lead agency
16 prepares a negative declaration. CEQA simply does not afford lead agencies the discretion to ignore
17 certain environmental impacts when a lead agency prepares a negative declaration instead of an EIR.

18 Instead, CEQA obligates lead agencies to consider all potential environmental impacts of a
19 project, including impacts to energy resources, regardless of what type of environmental review
20 document the agency prepares. Specifically, CEQA Guideline 15126.4 requires that lead agencies
21 consider "energy conservation measures" that could minimize significant adverse impacts where
22 appropriate, including the energy conservation measures provided in Appendix F. (See Cal. Code
23 Regs., tit. 14, § 15126.4(a)(1).) CEQA does not limit the requirement that lead agencies consider all
24 relevant mitigation measures to matters where the lead agency prepares an EIR. Nor do courts
25 differentiate between the type of environmental review documents—a negative declaration or an
26 EIR—when evaluating whether an agency considered the appropriate mitigation measures. (See
27 *Parker Shattuck Neighbors v. Berkeley City Council* (2013) 222 Cal.App.4th 768, 778 [applying
28 CEQA Guideline 15126.4 to evaluate the adequacy of mitigation measures considered in a mitigated

1 negative declaration].) The City and Real Parties do not provide any authority to the contrary.

2 Further, the City and Real Parties' argument is circular. Under their logic, if the City had
3 conducted an analysis of the Apartment Project's potential impacts to energy resources, the City may
4 have determined that the Apartment Project would lead to significant environmental impacts, which
5 should have required preparation of a full EIR. However, because the City did not prepare an EIR, it
6 was not required to analyze the Apartment Project's impact on energy resources. Such a tautology
7 cannot excuse the City's failure to discharge its duties under CEQA to disclose fully all potential
8 environmental impacts to the public. (See *Laurel Heights Improvement Assn.*, *supra*, 47 Cal.3d at pp.
9 402-03 [describing "CEQA's fundamental goal of fostering informed decision making"].)

10 **VI. THE CITY FAILED TO COMPLY WITH CEQA'S REQUIREMENT TO EVALUATE**
11 **THE APARTMENT PROJECT'S POTENTIAL TO ADD TRAFFIC THAT WOULD**
12 **CUT THROUGH SURROUNDING NEIGHBORHOODS**

13 The City and Real Parties attempt to explain another defect in the City's review related to the
14 Apartment Project's potential traffic impacts that will cut through surrounding neighborhoods by
15 attacking the quality of the observations made by such residents on that topic. The City and Real
16 Parties' argument misses the point. CEQA mandates that the City evaluate the Apartment Project's
17 potential traffic impacts in full, including traffic impacts in surrounding neighborhoods. (See
18 *Taxpayers for Accountable School Bond Spending v. San Diego Unified School Dist.* (2013) 215
19 Cal.App.4th 1013, 1054-55.) During the entitlement process for the project, the City readily
20 acknowledged that its traffic study did not evaluate any potential for the traffic generated from the
21 Apartment Project to cut through neighborhoods surrounding the Apartment Project site. As the City
22 explained in a response to a written comment from a concerned resident, "[p]roject traffic was not
23 assigned to streets within the adjacent community identified by the [commenter], as any cut-through
24 traffic is expected to be nominal and, if any, would be well below 50 peak hour thresholds that warrants
25 analysis." (AR 3574 [emphasis added].) In addition to assigning the traffic trips from the Apartment
26 Project to *only* the major streets and intersections, the City's traffic study did not include any traffic
27 counts in the neighborhood streets to determine the existing level of cut through traffic. (AR 2575-77,
28 2615-16, 2626-30.) Thus, the only evidence in the administrative record to support the City's
conclusion that the Apartment Project would not lead to any potential traffic impacts in surrounding

1 neighborhoods is that one summary, conclusory sentence (with no citations to the City’s traffic study).

2 During the City’s approval process for the Apartment Project, several residents commented in
3 writing and at the public hearings that traffic is already cutting through their neighborhoods that
4 surround the Apartment Project site and that they were concerned the Apartment Project would worsen
5 the problem. (See AR 3580, 3582, 3639, 3640, 3648, 3720, 3725.) Courts recognize that such personal
6 observations can constitute substantial evidence of potential environmental impacts because of the
7 residents’ unique position to best understand the circumstances in their neighborhood. (See *Pocket*
8 *Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 932 [emphasis added] [holding personal
9 observations from “neighbors familiar with the [project] site” constituted substantial evidence of a fair
10 argument].) As the testimony of the residents in the neighborhood surrounding the Apartment Project
11 confirms, they were in the best position to relay the facts on the ground concerning traffic that cuts
12 through their neighborhood.

13 The City and Real Parties argue that those unique perspectives from the nearby residents did
14 not constitute substantial evidence. Yet, in the cases cited by the City and Real Parties asserting that
15 such personal observations do not constitute substantial evidence, the lead agencies had substantial
16 evidence in the form of expert reports that contradicted the personal observations made in those cases.
17 (See *Banker’s Hill, Hillcrest, Park West Community Preservation Group v. City of San Diego*
18 (“*Banker’s Hill*”) (2006) 139 Cal.App.4th 249, 274 [citing to a study conducted by a traffic engineer
19 that contradicted the personal observations related to safety hazards at a particular intersection]; see
20 also *Leonoff v. Monterey County Bd. of Supervisors* (“*Leonoff*”) (1990) 222 Cal.App.3d 1337, 1351-
21 52 [citing to a study conducted by an engineer that addressed the concerns from personal observations
22 related to sight distance and appropriate speed limit at a particular driveway].) Unlike the
23 circumstances in *Banker’s Hill* and *Leonoff*, however, the City and Real Parties cannot point to any
24 evidence in the administrative record to show that the City conducted any technical or expert analysis
25 of the Apartment Project’s potential to add traffic that would cut through surrounding neighborhoods.

26 Even if weight were given to the City’s one, conclusory statement about cut-through traffic in
27 its responses to public comments, the City should have prepared a full EIR to weigh any evidence it
28 had that conflicted with the neighbors’ personal observations. (See Cal. Code Regs., tit. 14, §

1 15064(f)(1) [stating, “if a lead agency is presented with a fair argument that a project may have a
2 significant effect on the environment, the lead agency shall prepare an EIR even though it may also
3 be presented with other substantial evidence that the project will not have a significant effect”]; see
4 also *Pocket Protectors, supra*, 124 Cal.App.4th at p. 935 [holding “[i]t is the function of an EIR, not
5 a negative declaration, to resolve conflicting claims, based on substantial evidence, as to the
6 environmental effects of a project”].) At a minimum, the personal observations from the residents
7 should have been accorded the same weight as the City’s one, conclusory statement under the fair
8 argument standard. That fair argument standard requires the preparation of an EIR.

9 **VII. THE CITY FAILED TO FOLLOW ITS OBLIGATIONS UNDER CEQA TO**
10 **EVALUATE THE APARTMENT PROJECT’S POTENTIAL CONFLICTS WITH**
11 **THE CITY’S GENERAL PLAN**

12 Faced with a flaw in its CEQA review arising from the Apartment Project’s potential conflict
13 with the City’s General Plan, the City and City and Real Parties again present a response that is not
14 supported by CEQA or the administrative record. The City and Real Parties first assert that there was
15 no exhaustion of this issue and further argue that no additional analysis was required because the
16 Apartment Project approvals included a General Plan amendment that made the project consistent with
17 the General Plan. Neither argument has merit.

18 Several residents alerted the City to the potential conflicts between the Apartment Project and
19 the City’s land use policies, both in written comments and in public testimony presented at the
20 hearings. Many residents noted that commercial development on the project site, as opposed to
21 residential units, could bring the type of economic opportunities to create permanent, long-term jobs
22 that are called for by policies in the General Plan. (See, e.g., AR 3580, 3641-42.) (Prior to project
23 approval, the Apartment Project site was zoned “Light Industrial” and “Industrial Park”; AR 101.)
24 Other residents commented at the City’s public hearings that the Apartment Project site is an ideal
25 location near the I-15 freeway for commercial uses that could attract local and commuter consumers
26 to the area. (See AR 3639, 3641-42, 3650, 4514.) In a letter to the City Council, Riverside also stated
27 that there is a “fair argument that significant land use conflicts” will result from the project. (AR 4493
28 [emphasis added].) Thus, the City was placed on notice before its approval that the Apartment Project
could lead to potential land use impacts.

1 The City’s next argument—that the Apartment Project was necessarily consistent with the
2 City’s General Plan because the project approvals included a General Plan amendment—is not
3 supported by CEQA. As part of the analysis of a project’s potential environmental impacts, CEQA
4 requires lead agencies to examine “whether the project would be consistent with existing zoning,
5 plans, and other applicable land use controls.” (Cal. Code Regs., tit. 14, § 15063(d)(5).) As SCE
6 explained in its Opening Brief, to be consistent with an applicable general plan, a lead agency must
7 show that a project is “compatible with the objectives, policies, general land uses, and programs
8 specified in the applicable plan.” (*Sequoyah Hills Homeowners Assn. v. City of Oakland* (“*Sequoyah*
9 *Hills*”) (1993) 23 Cal.App.4th 704, 717-18.) Additionally, “[a]n action, program, or project is
10 consistent with the general plan if, considering all its aspects, it will further the objectives and policies
11 of the general plan” (*Friends of Lagoon Valley v. City of Vacaville* (“*Friends of Lagoon Valley*”)
12 (2007) 154 Cal.App.4th 807, 817.)

13 In their Opposition Brief, the City and Real Parties do not attempt to distinguish the well-
14 established standard in *Sequoyah Hills* or *Friends of Lagoon Valley* concerning land use consistency.
15 Instead, the City and Real Parties rely on the circular argument that the City approved a General Plan
16 amendment and therefore the Apartment Project is necessarily consistent with the City’s General Plan
17 (Opp. Brief, pp. 17-18.) Yet, that amendment does not excuse the City from complying with its
18 obligations under CEQA to evaluate the project’s potential conflicts with applicable land use policies.

19 The City also argues that the only General Plan policies applicable to the project site are
20 economic in nature and not intended to mitigate or avoid environmental impacts, thus rendering this
21 section of the Initial Study Checklist inapposite.³ (Opp. Brief, pp.18.) Yet, the one-page discussion of
22 this issue in the City’s MND fails to cite to, let alone describe, any specific applicable goal or policy
23 in the City’s General Plan, instead making only conclusory statements about the purported policies in
24 the General Plan. (AR 192.) (That same defect also infects the City’s findings in support of the General

25 ³Section X(b) in the Initial Study Checklist (CEQA Guidelines, Appendix G) provides that a lead
26 agency must consider whether a project will “[c]onflict with any applicable land use plan, policy, or
27 regulation of any agency with jurisdiction over the project (including, but not limited to the general
28 plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or
mitigating an environmental effect.”

1 Plan amendment and the other entitlements approved for the Apartment Project; AR 6-9.)⁴ Thus, while
2 the City and Real Parties assert that the record is “replete” with evidence on this issue (Opp. Brief, pp.
3 17-18), their cites are to the same one page in the MND, two pages in a staff report and two pages in
4 a hearing transcript that do not discuss any specific goals and policies of the General Plan. Without
5 any analysis of specific goals or policies, the MND did not inform the public or the decision-makers
6 of how the Apartment Project is consistent (or inconsistent) with the City’s General Plan. Given the
7 absence of that required analysis, the City’s MND violated CEQA and must be invalidated.⁵

8 **VIII. CONCLUSION**

9 It was prejudicial error for the City to certify a CEQA disclosure document that did not disclose
10 the RTRP as a related project proposed for the same site as the Apartment Project, and to not conduct
11 any analysis of the potential cumulative impacts of those two projects. Nor can the City legally justify
12 its failure to analyze the Apartment Project’s impact on energy resources, particularly when the City
13 now claims that the Apartment Project would render the RTRP infeasible. The City’s use of an MND
14 instead of an EIR is also improper because evidence in the record demonstrates that there is a fair
15 argument that the Apartment Project may cause significant traffic and land use impacts, and the City
16 and Real Parties provided no evidence, substantial or otherwise, to the contrary. Accordingly, the
17 City’s MND and its approvals of the Apartment Project should be invalidated.

23
24 ⁴ Nor can the City and Real Parties’ record citations on this issue save their General Plan Amendment
25 from State law (see SCE’s Second Cause of Action) since they cite only to speculative predictions
made by the developer and staff that are not supported by any technical analysis. (Opp. Brief, pp.19-
20; AR 3711-14, 3474-77.)

26 ⁵ The City and Real Parties argue that SCE is precluded from asserting this CEQA claim because it
27 did not also make a claim under planning and zoning law. Yet, land use consistency is an independent
28 claim under CEQA as confirmed by the CEQA Guidelines, Checklist and case law (see *supra*, pp. 13-
14.) That same case law also confirms that the fair argument standard applies to this issue and not the
more deferential standard of review cited by the City and Real Parties. (See *Pocket Protectors, supra*,
124 Cal.App.4th at p. 930-31.)

1 **PROOF OF SERVICE**

2 I, Dana Camacho, declare:

3 I am employed in the County of Los Angeles, State of California. I am over the age of 18 and
4 not a party to the within action. My business address is Alston & Bird LLP, 333 South Hope Street,
5 Sixteenth Floor, Los Angeles, California 90071. I am over the age of eighteen years and not a party
6 to the action in which this service is made.

7 On February 16, 2016, I served the document(s) described as **PETITIONER SOUTHERN
8 CALIFORNIA EDISON COMPANY'S REPLY BRIEF IN SUPPORT OF VERIFIED
9 PETITION FOR WRIT OF ADMINISTRATIVE MANDAMUS, WRIT OF MANDAMUS,
10 AND INJUNCTIVE RELIEF** on the interested parties in this action by enclosing the document(s)
11 in a sealed envelope addressed as follows:

12 **SEE ATTACHED SERVICE LIST**

- 13 BY MAIL: I am "readily familiar" with this firm's practice for the collection and the
14 processing of correspondence for mailing with the United States Postal Service. In the
15 ordinary course of business, the correspondence would be deposited with the United
16 States Postal Service at Alston & Bird LLP, 333 South Hope Street, 16th Floor, Los
17 Angeles, CA 90071 with postage thereon fully prepaid the same day on which the
18 correspondence was placed for collection and mailing at the firm. Following ordinary
19 business practices, I placed for collection and mailing with the United States Postal
20 Service such envelope at Alston & Bird LLP, 333 South Hope Street, 16th Floor, Los
21 Angeles, CA 90071.
- 22 UPS NEXT DAY AIR I deposited such envelope in a facility regularly maintained by
23 UPS with delivery fees fully provided for or delivered the envelope to a courier or driver
24 of UPS authorized to receive documents at Alston & Bird LLP, 333 South Hope Street,
25 16th Floor, Los Angeles, CA 90071.
- 26 BY FACSIMILE: I telecopied a copy of said document(s) to the following addressee(s)
27 at the following number(s) in accordance with the written confirmation of counsel in this
28 action.
- 29 BY ELECTRONIC MAIL TRANSMISSION WITH ATTACHMENT: On this date, I
30 transmitted the above-mentioned document by electronic mail transmission with
31 attachment to the parties at the electronic mail transmission address set forth on the
32 attached service list.
- 33 [State] I declare under penalty of perjury under the laws of the State of California that the
34 above is true and correct.
- 35 [Federal] I declare under penalty of perjury that the foregoing is true and correct.

Executed on February 16, 2016, at Los Angeles, California.
