

Comment Set C.181: Kathryn Stanley

Re: Antelope-Pardee
500k Transmission
Project

RECEIVED
OCT - 3 2006

BY:.....

Julie Halligon, E/R Project Manager and
Administrative Law Judge,

I write to you in hopes that
you are fair and open in regards
to the SCE Proposal Alternative 5.

Residents of Leona Valley received
no advanced notification of the
pending proposal. Leona Valley
was not included in the initial
planning studies.

C.181-1

If Proposal 5 is adopted:

Property values will drop in one
of the highest value zip codes
in Northern Los Angeles County,
93551. They will drop due to
the diminished values of the over
100 properties that will be directly
effected by the power lines.

C.181-2

Electromagnetic fields are directly
associated with higher cancer rates,
brain anomalies and other ailments.

C.181-3

The proposed Alternate 5 appears dis-
jointed and unattractive. Power
Corridors should be adopted and
adhered to for aesthetics as well
as common sense throughout all of
California

I, along with all residents
of Leona Valley anxiously await
your communication.
