Subject:

To Who it may concern,

We oppose the proposed Antelope-Pardee 500-kV Transmission Project for many reasons.

1. This project will decrease the property value of our homes in Leona Valley. We would not have bought our home if these lines were already here and do not want them here now.
2. The existence of these power lines will cause firefighting efforts to be hampered.
3. The project will conflict with recreation. (The Pacific Crest Trail)
4. It is an inefficient route. It will lose 5% of the total energy produced over the longer distance it must be transmitted.
5. The issue of the noise these lines will emit is a great concern as well.

In conclusion,. We love our country life out here and would not like to see it ruined by this ugly, noisy, unhealthy project. Electromagnetic fields are believed to be associated with higher cancer rates, brain anomalies, and other ailments.

Please find another route that would not affect so many people. Keep these lines away from our homes.
