Email: mrrro@firedept.net

RECEIVED  
OCT - 4 2006

I'm opposed to Alternative 5 because of the following reasons.

Health issues; Cancer, Leukemia, abortions and related illness associated with EMF's.

BY:-----

increased air pollution, this alternative causes the 2<sup>nd</sup> highest air pollution according to your own report.

I have property in close proximity of the proposed route which will greatly affect property values.

being in a high brush area, with the overhead lines in the area, In the event of a Fire, the overhead wires would hinder Fire Suppression, causing more loss of property.

it would also increase Fire Insurance for everyone.

Destroying natural habitat of domestic animals, and existing wildlife

Being on a fixed income, the financial impact added to my electric bill to pay for the project will be a hardship.

This being a Military corridor, the Tower height would require beacons on them, which is against Leona Valley cc&r, where no street lights, intruding flashing lights are not permitted.

I moved to Leona Valley 30 yrs. Ago to raise our family in a safe healthy environment.

At this time there are 3 generations of family living here. Raising animals, Learning about life growing up to be responsible citizens and living in a clean environment.

With your project with SCE, you would be destroying the value to this valley.

This area will be impacted with all the environmental changes. The personal feelings of everyone, not just

The immediate families under the proposed route.

Thank you

Virginia Sue Rohaley
