P. 01

To whom its concern:
September 10 2006
John Boccio/Marian Kadota
CPUC/USDA Forest Service c/o Aspen Environmental Gp.

On the upset resident to finally receive the notice ranchers market that a proposal was in the works for Edison high-voltage lines crossing the community of Leona Valley residents. I cannot understand what phase of all six proposal could mean to the people in Valley but I believe the most important phase is No. 5 that would affect the community of Leona Valley this would significantly impact of financial value of the homes near high-voltage lines. If all possible could you seek a better plans for Leona Valley community. My own concerns are listed below if you can answer the following items.

C.54-1

1. Beginning construction for the Edison high-powered lines through Leona Valley.

C.54-2

2. Will my new house be affected at 8310 Calva Street across from the Leona Valley community center.

C.54-3

3. When was this project propose public notified CPUC.

C.54-4

4. If affected will Edison buy the properties dominant domain at what costs.

C.54-5

Thank You

Richard Johnson

Response to Comment Set C. 54: Richard Johnson

- C.54-1 Please see General Response GR-1 regarding potential effects on property values.
- C.54-2 As discussed in Section B.4.5.3, it is estimated that the construction of Alternative 5 would require approximately 16 months to complete. See Table B.4-18 for an estimated construction schedule for Alternative 5.
- C.54-3 8310 Calva Street would be located approximately 2.5 miles east of the Alternative 5 route.
- C.54-4 Please see General Response GR-5 regarding the noticing procedures for this Draft EIR/EIS.
- C.54-5 Please see General Response GR-2 regarding property acquisition.
