Response to Comment Set C.80: Don Hobart

C.80-1 Thank you for submitting your opinion and concerns regarding Alternative 5.

C.80-2 Please see General Response GR-3 regarding electric magnetic field (EMF) concerns. Potential health and safety risks associated with the Project are discussed in Section C.6 (Public Health and Safety) of the Draft EIR/EIS. Also please see General Response GR-1 regarding potential effects of on property values.

You are correct that Alternative 5 is longer than the proposed Project and Alternatives 1 through 4. Although project cost is not discussed in the Draft EIR/EIS, we agree that due to the increased length of Alternative 5, it would cost substantially more than the proposed Project. Please see General Response GR-2 regarding property acquisition.
