I support the NO PROJECT alternative. Let Southern CA Edison go back to the drawing board. They can dig into their own deep pockets and design new systems w/o the significant deleterious environmental impacts on our communities. And, no offense to Veluzat Ranch but why should the economic impact on a single land owner merit the special consideration of researching + preparing Alternative #4. Why does Mr. Veluzats interests outweigh the needs and desires of others. Let SCA Edison pay for NO IMPACT improvements + research out of their excessive profits over the years.
