I am writing to request an extension on the time to come to a final decision. We were not properly notified & would like to have a better understanding on the possibilities and what has to happen. We do not want to see our forest defaced nor do we want people kicked out of their homes. There are possibilities with underground lines and making developers put the price in the sales of their homes on the ~~sp~~ subject of power, why aren't developers required to provide their own power, by putting solar panels that connect to the edison grid? I had that option as a custom home builder. That's what this whole project is for - developing more homes. Please give us some time for a better solution.
