there is an extremely diverse & plentiful  
wildlife population residing in the path of the Alt  
5 route. Although the forest service claims impact  
to the forest if SCE exchanges power lines and  
towers for some that meet the 500kV requirement,  
there would be equal or greater impact to flora  
and fauna that currently live in the path of Alt 5.  
Animals unique to the forest do not just disappear  
at the border between forest and private land.  
many home owners <sup>have</sup> property that is frequently  
used by wildlife from the neighboring forest.  
To our knowledge, an adequate wildlife  
environmental impact study has not been  
done.

D.53-1

\*Please print. Your name, address, and comments become public information and may be released to interested parties if requested.

Please either deposit this sheet at the sign-in table before you leave today, or fold, stamp, and mail. Insert additional sheets if needed. Comments must be postmarked by September 18, 2006. Comments may also be faxed to the project hotline at (661) 215-5152 or emailed to antelope-pardee@aspenerg.com.

## **Response to Comment Set D.53: Kimberly Wright**

- D.53-1 Section C.3.10 of the Draft EIR/EIS describes the vegetation communities, plant species, and wildlife species that are known or have the potential to occur along Alternative 5, and Section C.3.10.2 provides a detailed discussion of the anticipated impacts to these species associated with the construction and operation of the alternative.
