"Think"

I am against the Antelope Pardee 500 KV transmission lines project going through Leona Valley for a number of reasons, but the main reason is, it is a known fact that cancer rates increase approx 50% close to these lines. Especially children Also losing a lot of homes, There is too much undeveloped land around here to come through this area.

D.66-1

Response to Comment Set D.66: Leon and Mary Thompson

- D.66-1 Thank you for your opinion regarding Alternative 5. See General Response GR-3 regarding EMF concerns. As discussed in Section C.9.10.2, the alternative alignment would be constructed across 103 privately owned parcels. The majority of land uses that would be restricted as a result of Alternative 5 would be the erection of new structures within the alternative ROW. However, given that SCE has not conducted construction or final alignment and design studies for Alternative 5, the EIR/EIS has assumed that the removal of one or more homes may occur. As such, Section C.9.10.2 (Impact L-3) concluded that potential impacts to residential land uses as a result of Alternative 5 would be significant and unavoidable.
