

F. Public Participation and Notification

Public involvement provides an opportunity to involve concerned citizens, agencies, organizations, and other stakeholders in the environmental review process. A public involvement plan was developed for the proposed Project at the start of the environmental review process that identified and summarized outreach methods that would be utilized, including the public notification process and types of informational materials. The public participation and notification processes for the proposed Project EIR/EIS focus on two areas of CEQA and NEPA: (1) Public Scoping and (2) Draft EIR public review. This section presents the basic legal and procedural requirements for public involvement in a joint CEQA/NEPA environmental review process, which is also summarized in Table F-1 below, and then describes the specific public outreach methods that were used for this Project EIR/EIS in order to comply with these basic requirements.

Table F-1. Legal/Procedural Requirements for Public Involvement in the EIR/EIS Process

Scoping Process

CEQA Requirements

- 30-day public scoping period begins with issuance of NOP [CCR §15082(b)].
- Formal scoping meetings are optional [CCR §15083], unless the project is of statewide, regional, or areawide significance (CCR §15206), and then lead agency conducts one scoping meeting [CCR §15082(c)(1); PRC §21083.9(a)].
 - Provide notice of meeting to affected county/city, responsible agency, public agency with jurisdiction, and organization or individual that provided written request [CCR §15082(c)(1)].
- Joint EIR/EIS requires scoping [CCR §15083].

NEPA Requirements

- NOI should be published as soon as practicable after the decision to prepare an EIS, but before the scoping process [40 CFR 1501.7].
- Scoping period begins with issuance of NOI, but may begin earlier with appropriate public notice and available information [40 CFR 1501.7].
- Make efforts to involve the public [40 CFR 1506.6(a)].
- Invite participation of affected agencies; Native American groups; action proponent; and interested parties [40 CFR 1501.7(a)(1)].
- Lead agency may conduct early scoping meetings [40 CFR 1501.7 (b)(4)].

Forest Service Regulations, Policy and Direction

- Responsible official publishes a legal notice for the opportunity to comment on the proposed action in the newspaper of record [36 CFR 215.5].
- Responsible official promptly mails notice about the proposed action to any individual or organization who has requested it and to those that have participated in project planning [36 CFR 215.5].
- NEPA objective is to, "Involve interested and affected agencies, State and local governments, organizations, and individuals in planning and decisionmaking." [FSM 1950.2]
- Forest Service policy is to: a. Give early notice of upcoming proposals to interested and affected persons (FSH 1909.15, sec. 07) and b. Give timely notice to interested and affected persons, Federal agencies, State and local governments, and organizations of the availability of environmental and accompanying decision documents [FSM 1950.3].

Table F-1. Legal/Procedural Requirements for Public Involvement in the EIR/EIS Process

Notices of Preparation and Intent (Subset of Scoping Process)

CEQA Requirements

- Prepare and file NOP with SCH, responsible and trustee agencies, and federal agencies, others requesting it in writing [CCR §15082(a); PRC §21080.4(a); §21092.2].
- Send NOP by method of transmittal that provides a record of receipt [CCR §15082(a)(3)].
- Comment period is 30 days from its receipt at the SCH responsible and trustee agencies [CCR §15082(b)].

CPUC Requirement

- Make any public environmental documents available to members of the public [CPUC Rule 17.1(f)(4)].
-

NEPA Requirements

- Publish NOI in the Federal Register [40 CFR 1501.7].
-

Notices of Completion and Availability

CEQA Requirements

- Publish NOA of Draft EIR [CCR §15087(a)]; send NOC to SCH [CCR §15085(a)].
- Distribute NOA to organizations and individuals that requested notice in writing, and through *at least one* of the following: publish in general circulation newspaper, post on/off project site, mail to owners/occupants of property contiguous to project [CCR §15087(a)].
- Post NOA at county clerk for 30 days and distribute to other agencies with jurisdiction over the project or locations [CCR §15087(d) and (h)].

CPUC Requirements

- Send NOA to: affected county and municipal planning commissions and legislative bodies; State highway engineer; organizations and individuals previously requesting notice; owners of land that would be on or adjacent to project [CPUC Rule 17.1(2)(b)].
 - Publish NOA ad in general circulation newspaper(s) at least once a week for two successive weeks [CPUC Rule 17.1(2)(b)].
-

NEPA Requirements

- Provide EIS notice of availability to interested persons or agencies [40 CFR 1506.6(b)].
- EPA publishes NOA in Federal Register [40 CFR 1506.10(a), which initiates the minimum 45-day public comment period [40 CFR 1506.10(c)].

Forest Service Regulations

- Responsible official publishes a legal notice for the opportunity to comment on the Draft EIS in the newspaper of record [36 CFR 215.5].
 - Responsible official promptly mails notice about availability of the Draft EIS to any individual or organization who has requested it and to those that have participated in project planning [36 CFR 215.5].
-

Draft EIR/EIS Review and Public Hearings/Meetings

CEQA Requirements

- Submit Draft EIR to SCH for review [CCR §15205(b)].
- Normal review period is 45 days for EIR [CCR §15087(e); §15105(a); §15205(d)].
- Consult with and request comments from responsible and trustee agencies; other agencies with jurisdiction; affected cities or counties; and affected transportation agencies [CCR §15086(a)].
- Lead agency **may** consult directly with any person with special expertise with the project, any person who has filed a written request for notice, and any person identified by the applicant [CCR §15086(b)].
- Formal public hearings are encouraged, but not required [CCR §15087(i); §15202(a)]. Public comments may be restricted to written communication [CCR §15202(a)].

NEPA Requirements

- Circulate Draft EIS to agencies and public before or at the same time transmitted to USEPA [40 CFR 1506.9].
 - Circulate entire Draft EIS unless it is unusually long [40 CFR 1503.19].
 - Public review of Draft EIS/EIR should be at least 45 days [40 CFR 1506.10].
 - Obtain comments from federal agencies with jurisdiction, and request comments from appropriate State and local agencies, Native American tribes, agency requesting receipt of statements, the applicant, and the public [40 CFR 1503.1(a); (b)].
 - Conduct public hearing when required by statute; there is substantial environmental controversy or interest in holding a hearing, and requested by another agency with jurisdiction [40 CFR 1506.6(c)].
-

Table F-1. Legal/Procedural Requirements for Public Involvement in the EIR/EIS Process

CPUC Requirements

- Make Draft EIRs available to public; may charge actual reproduction and handling costs [CPUC Rule 17.1(4)].
- Hold public hearing for Draft EIR for which a protest or motion is received, unless the CPUC, presiding officer or ALJ indicates otherwise [CPUC Rule 17.1(g)].

Forest Service Regulations, Policy and Direction

- Comments shall be accepted for 45 days following date of publication in the Federal Register, and FSH 1909.15, 23.2 allow a minimum of 45 days for comments on an EIS [36 CFR 215.6].
- Conduct public participation sessions, if appropriate [FSH 1909.15(23.3)].

Final EIS/EIR and Decision

CEQA Requirements

- Lead agency may provide public review period for Final EIR, but it is not required [CCR §15089(b)].
- Provide copy of responses to any public agency that submitted comments at least 10 days prior to certification of the Final EIR [PRC §21092.5(a)].
- File NOD with SCH [CCR §15094(c); §15094 (d)]
- NOD includes: project description and location, lead agency name, approval date, significant environmental effects, statement that EIR was prepared and certified pursuant to CEQA, mitigation measures and adoption of mitigation monitoring plan/program or statement of overriding considerations, findings, address of Final EIR, record of project approval [CCR §15091; §15094(b)].
- File NOD with SCH for public inspection and posting for at least 30 days [CCR §15094(f)].
- Filing of the NOD with the SCH starts a 30-day statute of limitations on court challenges to the project's approval [CCR §15094(g)].

NEPA Requirements

- Circulate Final EIS to agencies and the public before or at the same time as transmitted to the USEPA [40 CFR 1506.9].
- Circulate the Final EIS to agencies, organizations, and parties that provided substantive comments on the draft [40 CFR §1502.19].
- File Final EIS and all comments and responses with USEPA [40 CFR §1506.9], which subsequently publishes the NOA for the Final EIS in the Federal Register [40 CFR 1506.10(a)].
- Distribute Final EIS NOA similar to NOI distribution [40 CFR 1506.6(b)(1), (b)(2), and (b)(3)].
- Publish ROD [40 CFR 1505.2].
- ROD includes: lead agency decision, alternatives considered and environmentally preferable alternative, whether all practicable means to avoid or minimize environmental harm from the alternative has been adopted, and summary of adopted monitoring and enforcement program [40 CFR 1505.2].

CPUC Requirements

- Copies of the Final EIR should be served upon all parties to the proceeding [CPUC Rule 17.1(3)(b)].
- Make Final EIR available to public; may charge for actual reproduction and handling costs [CPUC Rule 17.1(4)].

Forest Service Regulations, Policy, and Direction

- Official filing date is date USEPA receives the Final EIS [FSH 1909.15(24.2)(1)].
- Besides requirements noted in 40 CFR 1505.2, ROD includes public involvement, findings, findings required by other laws, decision implementation date, review/appeal opportunities, and contact information [FSH 1909.15(27.21)].
- If all other laws are complied with (i.e., consultations are completed), for those decisions that have appeal rights, ROD may be published on the date the Final EIS is transmitted to EPA and made available to the public [FSH 1909.15, 27.21, 10].
- Distribute ROD to those who have requested it in writing, and participated in the decision-making process [FSH 1909.15(28)(1)].
- Publish a legal notice of decision in the newspaper of record [36 CFR 215.7].
- The decision is subject to appeal per 36 CFR 215.11. The appeal must be filed with the Appeal Deciding Officer within 45 days following publication of the legal notice of the decision (36 CFR 215.15(a)).

Table F-1. Legal/Procedural Requirements for Public Involvement in the EIR/EIS Process

Repository Sites

CEQA Requirements

- Make EIR and project documents available at designated repository sites [CCR §15087(c)(5) and §15087(g)].

Note: CCR = California Code of Regulations (CEQA Guidelines)
PRC = California Public Resources Code (CEQA Statutes)
CFR = Code of Federal Regulations
FSH = Forest Service Handbook
FSM – Forest Service Manual
SCH = State Clearinghouse
NOA = Notice of Availability
NOC = Notice of Completion

NEPA Requirements

- Make EISs, the comments received, and underlying documents available to the public [40 CFR 1506.6(f)].

F.1 Notices of Preparation and Intent

The CPUC issued a Notice of Preparation (NOP) for the proposed Project on June 24, 2005. Consistent with CEQA (State Guidelines § 15082), the NOP summarized the proposed Project, stated the CPUC’s intention to prepare a joint EIR/EIS, and requested comments from interested parties. The NOP was filed with the State Clearinghouse on June 28, 2005 (SCH# 2005061161), which began a 30 day comment period. The review period for the NOP ended on July 29, 2005. Seventy seven (77) copies of the NOP were distributed to federal, State, regional, and local agencies, and elected officials. Seven additional copies of the NOP were delivered to the local repository sites.

The Forest Service issued a Notice of Intent (NOI) for the proposed Project, which was published in the *Federal Register* on June 28, 2005. Consistent with NEPA (40 CFR 1501.7), the NOI serves as the official legal notice that a federal agency is commencing preparation of an EIS. The *Federal Register* serves as the United States Government’s official noticing and reporting publication.

The NOP and NOI are found in Appendix 2 of this EIR/EIS.

F.12 Scoping Process

Scoping Requirements

Scoping, or the process of involving the public and agencies in determining the scope and content of an EIR or EIS, is encouraged and utilized under both CEQA and NEPA. However, the scoping process is more formal under NEPA, whereas under CEQA it is more optional and differs according to the lead agency. Scoping is an effective way to solicit and address the environmental concerns of the public, affected agencies, and other interested parties. In addition to the purpose of informing the public about the proposed Project, the scoping process is also meant to achieve the following: (1) identify potentially significant environmental impacts for consideration in the EIR/EIS; (2) identify possible mitigation measures for consideration in the EIR/EIS; (3) identify alternatives to the proposed Project for evaluation in the EIR/EIS; and (4) compile a notification list of public agencies and individuals interested in future Project meetings and notices. Scoping can take many different forms, including public and agency consultation, scoping meetings, scoping report, and notices such as the NOP and NOI. The following sections below described some of these scoping methods in more detail.

Under CEQA, the State lead agency is authorized and encouraged to consult with interested agencies, organizations, or members of the public either before or during preparation of an EIR, but it is not a required process [CEQA Guidelines §15083]. However, when the State lead agency is preparing a joint EIR/EIS with a

federal agency, scoping would be required in order to meet the federal NEPA requirements discussed below. CEQA also states that in addition to complying with other noticing requirements, the lead agency should, when possible, make environmental information available on the internet [CEQA Guidelines §15201].

NEPA regulations state that lead agencies should conduct “an early and open process” to determine the scope and significance of issues to be addressed in an EIS [40 CFR 1501.7]. Additionally, the federal lead agency is required to make “diligent efforts to involve the public” in the NEPA process [40 CFR 1506.6(a)]. NEPA provides further guidance in the scoping process, including stating that lead agencies should engage affected federal, State, and local agencies, as well as Native American tribes, and other interested persons [40 CFR 1501.7(a)(1)], and solicit appropriate information from the public [40 CFR 1506.6(d)]. In order to facilitate public participation, NEPA also requires agencies to make project information and documents available to the public [40 CFR 1506.6(f)], and explain where interested parties can obtain this information [40 CFR 1506.6(e)].

The Forest Service states that an objective of meeting these NEPA requirements is to involve interested and affected agencies, State and local governments, organizations, and individuals in planning and decisionmaking [FSM 1950.2]. The Forest Service achieves this objective through providing early notice of upcoming proposals to interested and affected persons, and providing timely notice to interested and affected persons, Federal agencies, State and local governments, and organizations of the availability of environmental and accompanying decision documents [FSM 1950.3]. A responsible official of the Forest Service is required to promptly mail notice about the proposed action to any individual or organization who has requested it and to those that have participated in project planning, and additionally, must publish a legal notice for the opportunity to comment on the proposed action in the newspaper of record [36 CFR 215.5].

Proposed Project EIR/EIS - Scoping

The scoping process for the Antelope-Pardee 500-kV Transmission Line Project EIR/EIS consisted of four main elements, which are listed below and described in more detail above and in the following sections.

- 1) Publish a Notice of Preparation (NOP) of an EIR and a Notice of Intent (NOI) to prepare an EIS, which marked the beginning of the 30-day scoping period (Section F.1), announced public scoping meetings, and solicited comments from affected public agencies and members of the public.
- 2) Conduct public scoping meetings and meetings with agencies.
- 3) Summarize scoping comments in a Scoping Report.
- 4) Establish an Internet web site, electronic mail address, a telephone hotline, and local EIR/EIS Information Repositories.

As is encouraged by CEQA and NEPA, the scoping process was intended and developed to inform the public and allow interested parties to express their concerns regarding the proposed Project, thereby ensuring that relevant opinions and comments were considered in the environmental analysis for the EIR/EIS. ~~Scoping is an effective way to solicit and address the environmental concerns of the public, affected agencies, and other interested parties.~~ Members of the public, relevant federal, State, regional and local agencies, interests groups, community organizations, and other interested parties ~~may~~ were given the opportunity to participate in the scoping process through attendance at scoping meetings and by providing comments or recommendations regarding issues to be investigated in the EIR/EIS.

~~In addition to the purpose of informing the public about the proposed Project, the scoping process is also meant to achieve the following: (1) identify potentially significant environmental impacts for consideration in the EIR/EIS; (2) identify possible mitigation measures for consideration in the EIR/EIS; (3) identify alternatives to the proposed Project for evaluation in the EIR/EIS; and (4) compile a mailing list of public agencies and individuals interested in future Project meetings and notices.~~

F.1.1 Notices of Preparation and Intent

NOP/NOI Requirements

As part of the scoping process, both State and federal lead agencies are required to prepare and distribute a notice informing interested parties that the lead agency will be preparing an EIR or EIS, respectively. CEQA requires State lead agencies to prepare a Notice of Preparation (NOP), while NEPA similarly requires federal lead agencies to prepare a Notice of Intent (NOI). The purpose of an NOP and NOI is to notify interested parties of the project or action and to solicit their participation in determining the scope of the EIR or EIS.

CEQA Guidelines state that immediately after deciding that an EIR is necessary, the State lead agency must prepare and send the NOP to the State Clearinghouse (Office of Planning and Research), responsible¹ and trustee² agencies, and involved federal agencies [CEQA Guidelines, CCR §15082(a)]. The California Public Resources Code further indicates that those requesting a notice in writing should also receive copies of the NOP [PRC §21092.2]. As stated below in California Public Resources Code §21092.2, the NOP can be sent to any interested party who requests it and the party can be charged an appropriate fee.

PRC §21092.2 states, “The notices required...shall be mailed to every person who has filed a written request for notices with either the clerk of the governing body or, if there is no governing body, the director of the agency....The request may also be filed with any other person designated by the governing body or director to receive these requests....The public agency may charge a fee, except to other public agencies, that is reasonably related to the costs of providing this service.”

In addition to the CEQA requirements regarding NOP distribution described above, the CPUC also requires that all environmental documents, including the NOP, be generally available to members of the public [CPUC Rule 17.1(f)(4)], who may be charged for the cost of reproduction and handling.

CEQA also regulates the content of a NOP by stating that the NOP must include sufficient information that describes the project, including project location, and the project’s potential environmental effects [CEQA Guidelines, CCR §15082(a)(1)]. The review period during which interested parties may submit comments on the NOP is 30 days from when the State Clearinghouse and responsible and trustee agencies receive it [CEQA Guidelines, CCR §15082(b)].

Similar to the CEQA and CPUC requirements presented above, NEPA states that a federal lead agency must prepare and publish a NOI in the Federal Register “as soon as practicable” after its decision to prepare an environmental impact statement [40 CFR 1501.7]. Similar to CEQA for an NOP, NEPA also dictates the contents of a NOI when it states that a NOI must describe the proposed action and possible alternatives; describe the proposed scoping process, including any scoping meetings that may be held; and provide the name and address for a person at the lead agency that can answer questions related to the EIS [40 CFR 1508.22].

¹ A responsible agency is a public agency, other than the lead agency (CPUC or Forest Service) which has responsibility for carrying out or approving a project.

² A trustee agency is a state agency that has jurisdiction by law over natural resources affected by a project, that are held in trust for the people of the State of California.

Proposed Project EIR/EIS – NOP/NOI

Based upon the above State and federal requirements, a NOP and NOI were prepared and distributed for the proposed Project. The details of the Project’s NOP and NOI are described below.

The CPUC issued a NOP for the proposed Project on June 24, 2005. Consistent with CEQA (State CEQA Guidelines §15082), the NOP summarized the proposed Project, stated the CPUC’s intention to prepare a joint EIR/EIS, and requested comments from interested parties. The NOP additionally described the EIR/EIS process and the proposed scope of the EIR/EIS; listed possible alternatives; identified public repository sites and other information sources (Project website, phone/fax hotline, and e-mail address) where Project information and documents were posted; and described the proposed Project’s scoping process and details of the scoping meetings.

The NOP was mailed via certified mail to federal, State, and local agencies. The NOP was filed with the State Clearinghouse on June 28, 2005 (SCH# 2005061161), which began a 30-day comment period. The review period for the NOP ended on July 29, 2005. Seventy-seven (77) copies of the NOP were distributed to federal, State, regional, and local agencies, Native American tribal representatives, and elected officials. The State agencies that received the NOP included: the Department of Transportation, Department of Fish and Game, Regional Water Quality Control Board, California Air Resources Board, and Office of Historic Preservation, and the federal agencies that received the NOP included: the U.S. Fish and Wildlife Service, U.S. Army Corps of Engineers, Advisory Council on Historic Preservation, the U.S. Environmental Protection Agency, and the Bureau of Land Management. Seven additional copies of the NOP were delivered to the local repository sites. A public scoping meeting notice, which contained information similar to that required by CEQA for the NOP, was mailed to over 2,500 individuals and agencies, and published in five newspapers (see Section F.2.1).

The Forest Service issued a NOI for the proposed Project, which was published in the *Federal Register* on June 28, 2005 (Vol. 70, No. 123, p. 37080). Consistent with NEPA (40 CFR 1501.7), Consistent with NEPA (40 CFR 1508.22), the NOI included a description of the proposed action and five possible alternatives, a description of the scoping process and two scoping meetings, and identification of the official at the Forest Service who could answer Project-related questions. In addition to these items required by NEPA, the NOI also included the following, which are required by the Forest Service: name and address of the responsible official, description of the nature and scope of the proposed action and the decision to be made, preliminary issues, identification of permits or licenses required for the proposed action, the lead and cooperating agencies, estimated dates for filing of the Draft and Final EIR/EIS, reminder that the reviewer is obligated to comment during the review period, and a standard paragraph inserted into NOIs prepared by the Forest Service [FSH 1909.15(21.1)].

Based upon guidance in NEPA [40 CFR 1506.2], which encourages cooperation between federal and State lead agencies, and in the Forest Service Handbook (FSH 1909.15), only the NOP and a public scoping meeting notice were distributed to 77 federal, State, regional, and local agencies, Native American tribal representatives, and elected officials, to over 2,500 individuals, and published in newspapers, as described above.

The NOP and NOI are found in Appendix 2 of this EIR/EIS.

F.1.22-1 Scoping Meetings

Scoping Meeting Requirements

Generally, formal scoping meetings are optional under CEQA unless requested by the lead agency, responsible or trustee agencies, the State Clearinghouse, or the project applicant [CEQA Guidelines, CCR §15082(c)]. However, the State lead agency is required to conduct at least one scoping meeting if the project has been determined to be of statewide, regional, or areawide significance, as defined by CEQA Guidelines §15206 [CEQA Guidelines, CCR §15082(c)(1)]. Further, as stated above in Section F.2, CEQA encourages consultation with any organization or person believed to be interested in the project, but it is not required [CEQA Guidelines, CCR §15083].

As stated below, CEQA [CEQA Guidelines, CCR §15082(c)] states that notices of the scoping meeting must be sent to the county or cities where the proposed project would occur, responsible agencies, other public agencies with jurisdiction over the project, and any organization or member of the public that submitted a written request for the notice.

“(1) For projects of statewide, regional or areawide significance pursuant to Section 15206, the lead agency shall conduct at least one scoping meeting. The lead agency shall provide notice of the scoping meeting to all of the following: (A) any county or city that borders on a county or city within which the project is located, unless otherwise designated annually by agreement between the lead agency and the county or city; (B) any responsible agency; (C) any public agency that has jurisdiction by law with respect to the project; (D) any organization or individual who has filed a written request for the notice.”

NEPA states that a federal lead agency may hold a scoping meeting whenever it deems it appropriate pursuant to 40 CFR 1501.7(b)(4), which states:

“As part of the scoping process the lead agency may: Hold an early scoping meeting or meetings which may be integrated with any other early planning meeting the agency has. Such a scoping meeting will often be appropriate when the impacts of a particular action are confined to specific sites.”

The required noticing for public hearings or public meetings for actions of local concern is similar to that described for the NOI under Section F.1.

Proposed Project EIR/EIS – Scoping Meetings

Public scoping meeting notices were prepared that provided a brief description of the Project including a map, information on the meeting locations, information on where to send comments, contact information, and the duration of the public comment period. The notices were mailed to over 2,500 individuals in the proposed Project area. In addition, the date and location of the public scoping meetings were posted on the Project website, and also advertised in five local newspapers. The advertisements provided a brief synopsis of the Project and encouraged attendance at the meetings to share comments on the Project. The meeting advertisements were placed in the following newspapers:

- *Antelope Valley Press* on June 26, 2005
- *Daily News* on June 26, 2005
- *Los Angeles Times, Valley Edition* on June 26, 2005
- *The Signal* on June 26, 2005
- *Agua Dulce/Acton Country Journal* on July 9, 2005

As part of the public scoping process of the proposed Project, two public scoping meetings were held to present information to the public on the Project and to take public comments on the scope and content of this EIR/EIS,

as well as alternatives and mitigation measures to be considered. The following public scoping meetings were held prior to selection of alternatives to be analyzed in this EIR/EIS:

- June 29, 2005, at 6:30 p.m. at the Desert Inn Hotel, Lancaster, California
- July 14, 2005, at 6:30 p.m. at the City of Santa Clarita Activities Center, Santa Clarita, California

The basic format of the meeting included a presentation of the proposed Project, including background, project description, location using maps, and potential environmental impacts. After the presentation, the meeting attendees were allowed to present verbal comments or submit prepared written comments.

F.1.32-2 Scoping Report Summary

Scoping Report Requirements

There are no CEQA or State requirements regarding the preparation of a scoping report. However, NEPA states that the federal lead agency may prepare a scoping report in order to document and publicize the comments, opinions, and issues that were made during the scoping process, but it is not required [Council on Environmental Quality Memorandum: Scoping Guidance, April 30, 1981, II(b)(6)]. The Scoping Guidance, April 30, 1981, II(b)(6) states:

“Several agencies have made a practice of sending out a post-scoping document to make public the decisions that have been made on what issues to cover in the EIS. This is not a requirement, but in certain controversial cases it can be worthwhile. Especially when scoping has been conducted by written comments, and there has been no face-to-face contact, a post-scoping document is the only assurance to the participants that they were heard and understood until the draft EIS comes out.”

Proposed Project EIR/EIS – Scoping Report

In August 2005, a comprehensive Scoping Report was issued, summarizing issues and concerns received from the public and various agencies during the scoping period. A total of 13 written comments were submitted and nine individuals presented verbal comments during the public scoping meetings. In addition, 21 phone messages were received on the Project hotline (661-215-5152).

The specific issues raised during the public scoping process are summarized below according to the following major themes:

- Human Environment Issues and Concerns
- Physical Environment Issues and Concerns
- Alternatives

Human Environmental Issues and Concerns

The majority of public comments focused on the potential effect of the Project on the human environment, most often expressing concerns with health risks arising from changes in electric and magnetic fields (EMF), visual and scenic impacts to private property, and the potential for noise and environmental justice impacts.

- **EMF-Related Health and Safety Issues.** The potential impacts of EMFs from the proposed Project and proximity of the Project to residences were some of the key concerns. Some members of the public would like to see SCE assume responsibility for the potential EMF impacts that may be caused from the proposed Project. Other comments stated that EMFs would significantly increase as a result of the Project.
- **Visual and Aesthetic Impacts.** Concerns were expressed regarding the potential aesthetic impacts of the Project on private properties. The concerns centered on the potential decrease in property values and the potential for the Project to limit use of private lands for business purposes (Movie Ranch) where aesthetics of the land play an important role.

- **Operational Noise Impacts.** A number of residents expressed concerns with the crackling noise (corona noise) caused by the current transmission lines, and are concerned about the increase of noise that would result from the proposed Project. A number of residents stated that the crackling noise is a nuisance to them and to the surrounding community.
- **Environmental Justice.** The U.S. Environmental Protection Agency (USEPA) expressed concerns regarding the environmental population within the geographic area of the Project. The agency recommends that if environmental justice is an issue, that the Draft EIR/EIS address the potential for disproportionate adverse impacts to minority and low-income populations.

Physical Environmental Issues and Concerns

Public agencies and residents expressed concerns with the potential impacts that the Project may have on the physical environment, particularly to air quality, biological, cultural, geological, hazardous materials and hazardous wastes, hydrological and recreation resources, and traffic and transportation. In addition, some comments focused on the impacts to public service that would occur from the proposed Project.

- **Air Quality.** The USEPA requested that a full discussion of ambient air conditions, National Ambient Air Quality Standards (NAAQS), criteria pollutant in non-attainment areas, and potential air quality impacts be conducted for the proposed Project and for each fully evaluated alternative. In addition, the agency requested a discussion of construction-related impacts.
- **Biological Resources Issues.** Most of the concerns addressed the possible effects of the proposed Project on wildlife movement and corridors, and the potential disruption to sensitive habitat, including the Antelope Valley Poppy Preserve. Consideration of sensitive habitats and appropriate mitigation measures to compensate for potential impacts, such as conservation easements, was requested. Other concerns included the potential increase and invasion of noxious and exotic plant species from soil disturbance into sensitive areas as a result of the proposed Project. It was requested that the Forest Service not use herbicides in their attempt to manage noxious and exotic plants, as this would impact biological resources in the near future. It was further requested that the Draft EIR/EIS identify all petitioned and listed threatened and endangered species, and critical habitats that might occur within the Project area, as well as compliance with Executive Order 13112 (Invasive Species).
- **Cultural Resources Issues.** Comments centered on the need to conduct a thorough analysis of the potential impacts on archeological resources. It was requested that a site evaluation be part of the environmental analysis process, and not be considered as a mitigation measure.
- **Geology and Soils.** Concerns were expressed regarding the Project's potential to affect soil resources and the geology of the area. More specifically, the potential of the Project construction to cause soil erosion in private property and cause soil compaction in farmlands.
- **Hazardous Materials and Hazardous Waste.** Hazardous waste impacts from construction and operation equipment was a concern. It was requested that the Draft EIR/EIS identify potential hazardous waste types and volumes, and expected disposal and management plans.
- **Hydrology and Water.** A complete evaluation of the potential impacts to water resources and water quality was requested, specifically, the need for the Project to comply with the appropriate permits and regulations, including SWRCB, and Section 404 and 303 (d) of the CWA.
- **Recreation Resources.** Concerns were expressed regarding the potential of the proposed transmission line to impact recreation facilities, specifically recreation trails, within the unincorporated area of Los Angeles County. A thorough analysis of recreation resources in the EIR/EIS was requested.
- **Transportation and Traffic.** Public agency comments expressed significant concern regarding the impact to transportation and traffic during the Project construction and maintenance. Specifically, potential effects to the nearby residents from utility vehicles accessing the Project towers and power lines. In addition, the potential of the proposed Project to cross major transportation corridors.
- **Utilities and Public Service Systems.** The potential of the transmission lines to cause disruption of home receivers, such as radio, television, and cellular phones was a concern. It was requested that a full analysis be conducted and measures be identified to reduce potential impacts.

Alternatives

Many of the comments received focused on providing alternatives to the proposed Project. Specifically, the possibility of utilizing tubular steel poles instead of lattice steel towers, exploring other routes for the proposed transmission line, and placing the line underground for portions of the proposed route.

- **Tubular Steel Poles.** The possibility of using tubular steel poles as an alternative to the proposed lattice towers was identified, as residents are concerned with the aesthetic impacts that may result from the lattice towers and believe that tubular steel poles will have less of an impact than the proposed towers. In addition, some comments stated that tubular steel poles may have the potential to decrease EMFs in the area.
- **Alternate Routes.** Discontent with the proposed transmission line route was expressed. Comments focused on realigning the proposed route, specifically between the proposed towers T-102 and T-105 to avoid proximity to home and orchard sites, rerouting the alignment away from an existing film-production ranch, and developing an alternative that maximizes avoidance of National Forest System land and existing and planned development along the proposed Project route.
- **Underground Construction.** Consideration of burying or undergrounding a portion of the line or along the entire route was requested. Specifically, burying the line adjacent to the Northpark neighborhood and through sensitive habitat.

F.23 Notices of Completion and Availability

NOC/NOA Requirements

CEQA and NEPA require that lead agencies notify the public of the availability of environmental documents. Both State and federal lead agencies must prepare and distribute a Notice of Availability (NOA) indicating that the lead agency has prepared a Draft EIR or Draft EIS, respectively, and it is available for public review. In addition to a NOA, CEQA also requires that a State lead agency file a Notice of Completion (NOC) with the State Clearinghouse.

CEQA indicates that the NOA should include a project description, including location; dates of the comment period; notice of public meetings or hearings; significant environmental effects of the project; repository sites for project information and documents, and if the project site is a listed toxic site [CEQA Guidelines §15087(c)]. During distribution the NOA should be mailed to the last known name and address of organizations or persons who have previously requested the notice in writing, and one of the following three methods: (1) publication at least one time in a newspaper of general circulation in the affected area, or when more than one area is affected, publication in the newspaper of largest circulation among the newspapers of general circulation in the areas; (2) posting on and off the project site; and (3) direct mailing to the owners and occupants of property contiguous to the parcels on which the project is located [CEQA Guidelines §15087(a)]. These property owners should be identified through the most current equalized assessment roll. Other entities that should receive the NOA according to CEQA include the county clerk of each county in which the project would be located [CEQA Guidelines §15087(d)], and other agencies that have jurisdiction by law and/or special experience with respect to the project [CEQA Guidelines §15087(h)].

CEQA Guidelines also require that a State lead agency file a notice of completion (NOC) with the State Clearinghouse “as soon as the draft EIR is completed” [CEQA Guidelines §15085(a)]. The NOC should also be filed with other areawide clearinghouses in order to assist in the distribution of the Draft EIR to State, regional, and local agencies for review [CEQA Guidelines §15087(f)]. In order to facilitate public review of the Draft EIR, the lead agency should provide copies of the Draft EIR to public libraries in the project area, and copies should also be available in offices of the lead agency [CEQA Guidelines §15087(g)]. The NOC should include a project description, location of the project, an address where the Draft EIR is available for review, and the dates of the public review period [CEQA Guidelines §15085(b)].

In addition to the above CEQA requirements, the CPUC further requires that the NOC/NOA be sent by direct mail to the county and municipal planning commissions and legislative bodies for each county or city affected by the project, the State highway engineer, and owners of land under or on which the project would be located [CPUC Rule 17.1(2)(b)]. CPUC also requires that notice of availability of the Draft EIR be provided to the public through newspaper advertisements at least once a week for two successive weeks in newspaper(s) of general circulation in the areas affected by the project [CPUC Rule 17.1(2)(b)].

NEPA states that the federal lead agency must provide public notice of the availability (NOA) of environmental documents, including the Draft EIS, to inform interested parties [40 CFR 1506.6(b)]. The NOA will be published in the Federal Register [40 CFR 1506.10(a)] after the U.S. Environmental Protection Agency (USEPA) receives five copies of the Draft EIS [FSH 1909.15(23.2)(2)]. In addition, a responsible official of the Forest Service is required to promptly mail notice about the proposed action to any individual or organization who has requested it and to those that have participated in project planning, and additionally, must publish a legal notice for the opportunity to comment on the proposed action in the newspaper of record [36 CFR 215.5].

Proposed Project EIR/EIS – NOC/NOA

Per State CEQA Guidelines Section 15085, the Notice of Completion (NOC) is a document that must be filed with the State Clearinghouse, Office of Planning and Research, as soon as the Draft EIR is completed. The NOC was filed with the State Clearinghouse on July 24, 2006. The NOC included: a description of the proposed Project, including location; the address where copies of the Draft EIR are available for review; the agencies that should receive a copy of the Draft EIR, and the review period during which public comments may be received. The CEQA Lead Agency shall also provide public notice of the availability of the Draft EIR at the same time it sends the NOC to the State Clearinghouse (State CEQA Guidelines Section 15087). In addition to the information disclosed in the NOC, the NOA included a description of the proposed Project and alternatives including a map, details for the scheduled public meetings or hearings (date, time, and place); dates of the comment period; and other sources for Project information a list of significant environmental effects; and whether the project site is listed under Section 65962.5 of the Government Code (hazardous waste facilities). The NOA was mailed or e-mailed to over 2,500 interested parties, and posted in the Los Angeles County Clerk's Office from August 1 through August 30, 2006. In addition, the NOA was published as a legal notice in the *Los Angeles Times* on August 5, 2006, and in the following six newspapers:

- *Antelope Valley Press* on July 28, 2006
- *Daily News* on July 28, 2006
- *Los Angeles Times, Valley Edition* on July 28, 2006
- *The Signal* on July 28, 2006
- *Antelope Valley Journal* on July 28, 2006
- *Acton/Agua Dulce News* on July 31, 2006

In compliance with NEPA(40 CFR 1506.6(b)(2), a NOA of the Draft EIS was mailed to the USEPA, who subsequently published it in the *Federal Register* on August 4, 2006, thus beginning the public comment period. The NOA should be mailed to the USEPA, which is required to review all EISs; the USEPA is also responsible for publishing the NOA once it is received (40 CFR 1506.9, 1506.10).

F.34 Draft EIR/EIS Review and Public Hearings/Meetings

Draft EIR/EIS Review and Public Hearing/Meeting Requirements

As discussed in the previous sections, both CEQA and NEPA place a high priority on public involvement throughout the environmental review process. The provision of opportunities to the public to review and comment on the Draft EIR or Draft EIS is important to achieving this objective. Both CEQA and NEPA require lead agencies to provide public review periods, however CEQA does not require a public hearing on the Draft EIR, whereas NEPA provides criteria when a public hearing should be held or sponsored. These criteria are when there is substantial environmental controversy concerning the proposal or substantial interest in holding the hearing; or if a jurisdictional agency requests a public hearing.

CEQA states that the public review, or comment, period for a Draft EIR should be between 30 to 60 days, except when the Draft EIR has been submitted to the State Clearinghouse, in which case the review period is not less than and is normally 45 days [CEQA Guidelines, CCR §15087(e); §15105(a); §15205(d)]. The State lead agency must request comments on the Draft EIR from responsible and trustee agencies; other federal, State, or local agencies that have jurisdiction with respect to the project; cities or counties bordering the affected cities and counties; and transportation planning agencies [CEQA Guidelines, CCR §15086(a)], and may consult with persons with special expertise, members of the public that filed a written request for notice, and persons identified by the applicant [CEQA Guidelines, CCR §15086(b)].

The State lead agency may conduct public hearings on the Draft EIR, but formal hearings are not required under CEQA [CEQA Guidelines, CCR §15087(i) and §15202(a)]. Further, the State lead agency can also implement its own public hearing procedures as part of the hearing process [CEQA Guidelines, CCR §15202(f)]. The CPUC requires that public hearings be held for each Draft EIR for which motions have been made, unless the CPUC, presiding officer, or Administrative Law Judge (ALJ) determines otherwise [CPUC Rule 17.1(g)]. Notices of public hearings should be timely, and may be formatted in the same manner as other notices prepared by the Lead Agency [CEQA Guidelines, CCR §15202(e)]. In addition, if a project website is available, notice of public hearings should be included on the website.

NEPA indicates that the Draft EIS shall be circulated to agencies and the public prior to or at the same time as it is transmitted to the EPA [40 CFR 1506.9], however if it is unusually long, a summary may be circulated instead [40 CFR 1502.19]. Federal agencies with jurisdiction by law or expertise, environmental regulatory agencies, the applicant, and those requesting copies of the full EIS must still be sent a full copy of the Draft EIS [40 CFR 1502.19]. The federal lead agency must obtain comments from federal agencies with jurisdiction by law or special expertise regarding the action, or who are authorized to develop and enforce environmental standards [40 CFR 1503.1(a); (1); 40 CFR 1503.2], can request comments from other State and local agencies, Native American tribes, those requesting notices, the applicant, and the public [40 CFR 1503.1(2); (3); (4)]. Generally, the federal lead agency must allow at least 45 days for comments on the Draft EIS [40 CFR 1506.10(c)]. Comments shall be accepted for 45 days following date of publication of the NOA in the Federal Register, and FSH 1909.15(23.2) allows for a minimum of 45 days for comments on an EIS [36 CFR 215.6].

The federal lead agency shall hold or sponsor public hearing or public meetings whenever appropriate or in accordance with statutory requirements applicable to the agency. Criteria shall include whether there is substantial environmental controversy regarding the action or substantial interest in a hearing; and a request for a hearing by an agency with jurisdiction over the action [40 CFR 1506.6(c)]. Forest Service regulations state that public participation sessions should be conducted, if appropriate to solicit comments on the Draft EIS [FSH 1909.15(23.3)]. The lead agency must provide public notice of public hearings or public meetings, and must

always mail a notice to those who have requested it [40 CFR 1506.6(b)(1)]. The required noticing for public hearings or public meetings for actions of local concern is identical to that described for the NOP under Section F.1.

Proposed Project EIR/EIS - Draft EIR/EIS Review and Public Hearing/Meeting Requirements

The Draft EIR/EIS was filed at the State Clearinghouse on July 24, 2006, with the NOC, as discussed in Section F.3, and at the U.S. EPA on July 24, 2006. One hundred forty-seven (147) copies of the bound Draft EIR/EIS were distributed to federal, State, and local agencies and elected officials, as well as Native American representatives, organizations, and other interested parties. An additional 135 electronic copies of the Draft EIR/EIS on compact disc (CD) were mailed to interested parties. The Executive Summary of the Draft EIR/EIS was sent to 12 interested parties, including elected officials; and 16 federal agencies received a one-page special notice of the Draft EIR/EIS. In addition, as stated above in Section F.3, the NOA notifying the public of the availability of the Draft EIR/EIS was mailed or e-mailed to over 2,700 people.

There was a 45-day public review period scheduled for the Draft EIR/EIS, which began on August 4, 2006, originally ended on September 18, 2006, and was extended 15 days to October 3, 2006. The notice of extension of the public comment period was mailed to over 3,400 interested parties, and was posted in the Los Angeles County Clerk’s Office from September 19 through October 19, 2006. In addition, this notice was published as a legal notice in the Federal Register, the *Los Angeles Times* on September 17, 2006, and in the seven following newspapers:

- Antelope Valley Journal on September 15, 2006
- Antelope Valley Press on September 15, 2006
- Daily News on September 15, 2006
- Los Angeles Times, Valley Edition on September 15, 2006
- The Signal on September 15, 2006
- Agua Dulce/Acton Country Journal on September 16, 2006
- Acton/Agua Dulce News on September 18, 2006

No formal public hearings were held on the Draft EIR/EIS; however, during the public review period, public meetings ~~will be held at the dates and times indicated in the Notice of Availability~~ were held on August 28, 29, and 30, 2006, at the following locations and times. These meetings provided another forum for providing comments on the project.

<u>Location</u>	<u>Quartz Hill, CA</u>	<u>Santa Clarita, CA</u>	<u>Agua Dulce, CA</u>
<u>Date</u>	<u>Monday, August 28, 2006</u>	<u>Tuesday, August 29, 2006</u>	<u>Wednesday, August 30, 2006</u>
<u>Time</u>	<u>6:30 to 8:30 p.m.</u>	<u>2:30 to 4:30 p.m.</u> <u>6:30 to 8:30 p.m.</u>	<u>6:30 to 8:30 p.m.</u>
<u>Address</u>	<u>George Lane Park</u> <u>Auditorium</u> <u>5520 West Avenue L-8</u> <u>Quartz Hill, CA 93536</u>	<u>City of Santa Clarita Activities Center</u> <u>Santa Clarita Room</u> <u>20880 Centre Point Parkway</u> <u>Santa Clarita, CA 91350</u>	<u>Agua Dulce Women’s Club</u> <u>Clubhouse</u> <u>33201 Agua Dulce Canyon Road</u> <u>Agua Dulce, CA 91390</u>

These meetings were noticed in the NOA and in newspaper advertisements for the NOA (see Section F.3). In addition, a second set of newspaper advertisements were published in the following newspapers to specifically notify interested parties of the public meetings.

- Antelope Valley Journal on August 18, 2006

- Antelope Valley Press on August 21, 2006
- Daily News on August 21, 2006
- Los Angeles Times, Valley Edition on August 21, 2006
- The Signal on August 21, 2006
- Acton/Agua Dulce News on August 21, 2006

Various materials were distributed at each public meeting, including a meeting agenda, six fact sheets describing the proposed Project and each alternative, a Project information sources handout, comment cards, NOAs, and copies of the Executive Summary from the Draft EIR/EIS. Following the public meetings all meeting materials and handouts were posted on the Project website.

In addition to the four public meetings referenced above, the Forest Service gave an informational presentation about the proposed Project, particularly Alternative 5, to the Leona Valley Town Council and the Agua Dulce Town Council at the request of these organizations on September 11, 2006. Various materials, including information on Forest Service regulations, policy, and processes, were available at this meeting.

F.4 Final EIR/EIS and Decision

Final EIR/EIS Requirements

CEQA and NEPA differ on public involvement requirements for the Final EIR. CEQA does not require public notice or review of a Final EIS, however under NEPA a Final EIS must be given similar notice and public as was given to the Draft EIS.

CEQA says that the State lead agency is not required to provide a public review period for members of the public or commenting agencies for the Final EIR [CEQA Guidelines, CCR §15089(b)], nor is it required to respond to comments that are not received within the specific comment period [California Public Resources Code §21092.5(c)]. The lead agency must provide a written response to any public agency that submitted comments on the Draft EIR at least 10 days prior to certifying the Final EIR [California Public Resources Code §21092.5(a)]. However, the CPUC requires that the Final EIR be distributed to all parties to the proceeding [CPUC Rule 17.1(3)(b)], and be made available to members of the general public for a fee [CPUC Rule 17.1(4)].

The State lead agency also must file a notice of determination (NOD) with the State Clearinghouse within five working days of approval of the project [CEQA Guidelines, CCR §15094(a)]. The NOD will be available for public inspection at the State Clearinghouse for 30 days [CEQA Guidelines, CCR §15094(d)]. In addition, the filing of the NOD start a 30-day statute of limitations on court challenges to the approval of the project under CEQA [CEQA Guidelines, CCR §15094(g)].

NEPA states that the federal lead agency must circulate the Final EIS to the same agencies, organizations, and people, using the same methods, that received the Draft EIS [40 CFR 1502.19]. Part of this process includes filing the Final EIS and all comments with the EPA, and also distributing it to other agencies and the public prior to or at the same time as the EPA [40 CFR 1506.9]. The EPA will then publish the NOA of the Final EIS in the Federal Register. At the time of its decision, the federal lead agency will prepare a public record of decision (ROD) (40 CFR 1505.2, FSH 1909.15, 27.2), and distribute it to interested or affected agencies, organizations, and persons, including those who requested it, and those that participated in decisionmaking process (FSH 1909.15(28)(1)).

The Forest Service must also publish a legal notice of decision in the newspaper of record [36 CFR 215.7]. In addition, the decision is subject to appeal per 36 CFR 215.11, and the appeal must be filed with the Appeal Deciding Officer within 45 days following the publication of the legal notice of the decision [36 CFR 215.15(a)]. For decisions that have appeal rights, and if other laws, such as completing consultations, are complied with, the ROD may be published on the date the Final EIS is transmitted to the EPA and made available to the public [FSH 1909.15(27.21)(10)].

F.5 Document Repository Sites

Document Repository Site Requirements

Both CEQA [CCR §15087(c)(5) and §15087(g)] and NEPA [40 CFR 1506.6(f)] require lead agencies to make project documents available to the public for review. Placing documents in repository sites is an effective way of providing ongoing information about the project to a large number of people. The CEQA/NEPA documents prepared as part of the proposed Project, which include the NOP, NOI, NOA, and Draft EIR/EIS, and other notices including the notice of public meetings and notice of extension of the public review period were made available at the following public repository sites:

Repository Site	Address
Lancaster Area	
City of Lancaster	44933 N. Fern Avenue, Lancaster, CA 93534
Lancaster Public Library	601 W. Lancaster Blvd., Lancaster, CA 93534
Antelope Valley Chamber of Commerce	554 W. Lancaster Blvd., Lancaster, CA 93534
Palmdale Area	
Quartz Hill Library	42018 N. 50th St. W., Quartz Hill, CA 93536-3509
Littlerock Library	35119 80th Street East, Littlerock, CA 93543-9702
Palmdale City Library	700 East Palmdale Blvd., Palmdale, CA 93550
Lake Los Angeles Library	16921 E. Ave. O, #A, Palmdale, CA 93550
Palmdale Chamber of Commerce	817 E. Ave Q-9, Palmdale, CA 93550
Palmdale City Hall	38300 Sierra Highway, Palmdale, CA 93550
Angeles National Forest Area	
Santa Clara/Mojave Rivers Ranger Station	30800 Bouquet Canyon Road, Saugus, CA 91390
ANF Supervisor's Office	701 N. Santa Anita Ave., Arcadia, CA 91006
Santa Clarita Area	
City of Santa Clarita City Hall	23920 Valencia Blvd., Santa Clarita, CA 91355
Canyon Country JoAnn Darcy Library	18601 Soledad Canyon Rd., Canyon Country, CA 91351
Newhall Library	22704 W. 9th Street, Newhall, CA 91321
Valencia Library	23743 W. Valencia Blvd., Valencia, CA 91355
Santa Clarita Community Center	24406 San Fernando Road Santa Clarita 22421 Market St., Newhall, CA 91321

A telephone hotline for project information was established at (661) 215-5152. This number receives voice messages and faxes. The Project hotline also included an introductory message that was changed with each key Project milestone in order to provide the most current Project information. In addition to using the Project hotline as a method to communicate information to the general public, interested parties were able to fax comment letters and leave voice messages identifying specific questions, inquires, or requests to the EIR/EIS team.

EIR/EIS information, including proposed Project information, the environmental review process, the Draft EIR/EIS, notices, and public meeting materials have been posted on the Internet at:

<http://www.cpuc.ca.gov/environment/info/aspen/antelopepardee/antelopepardee.htm>

This website has been used to post public Project documents during the environmental review process and to announce upcoming public meetings. The Project website has also been updated after each key milestone in the EIR/EIS process in order to provide the most current information, including Project Background and Other Information, Proponent's Environmental Assessment (PEA), Project Notices and Scoping, Public Meetings (including Draft EIR/EIS public meetings on August 28, 29, and 30, 2006 and joint Leona Valley Town Council/Agua Dulce Town Council meeting on September 11, 2006), release of the Draft EIR/EIS, and Extension of the Public Review Period. The Project website provides links to notices, including the NOP, NOI, NOA, and notice of extension of the public review period; environmental documents, including the PEA and the Draft EIR/EIS; other Project materials and information, including meeting presentation and handouts, maps, Project contact information, repository sites and addresses, and the Administrative Law Judge's Order Granting Extension.

F.6 Project Notification List/Document Distribution List

Several of the preceding sections discuss CEQA and NEPA requirements for who must be noticed during each phase of the environmental review process, and how the notification must be conducted. The Antelope-Pardee 500-kV Transmission Project notification list was developed from the agency service lists, government officials and interest groups, responsible and trustee agencies, and the property owner list provided by SCE in Appendix G of the Antelope-Pardee Transmission Project PEA³. However, the Project notification list was updated throughout the environmental review process to reflect changes or additions to interested parties. All parties who signed-in at the scoping meetings and/or the public meetings for the Draft EIR/EIS, and those who submitted verbal or written comments during the scoping period or the Draft EIR/EIS public review period were added to the notification list using the mailing address information that was provided. Property owners along the proposed Project and alternative routes were also added to the notification list. Other parties added to the Project notification list include any person or agency that requested to be added to the list, or those suggested by the CPUC and/or the Forest Service. Currently, the notification list includes over 3,200 names of individuals, interest groups, and agencies. Property owners make up more than 85 percent of the notification list.

~~Notices regarding the availability of environmental documents, such as the NOP, NOI, NOA, and Draft EIR/EIS, were mailed to approximately 3,423 addresses, including community organizations, interest groups, and property owners in the vicinity of the proposed Project route.~~

The Project notification list was used to distribute the NOP, public scoping meeting notices, Notice of Availability of the Draft EIR/EIS, and the Draft EIR/EIS public comment period extension notice. In addition, the Project distribution list, which is a subset of the larger notification list, was used to mail hardcopy and

³ SCE was required to provide notice of its filing of a CPCN application for the Antelope Transmission Project, Segments 2 and 3 pursuant to Section XI of CPUC General Order No. 131-D. Section XI requires that electric public utilities provide notice of their filing of a CPCN application or Permit to Construct within ten days via the following methods: (1) by direct mail to planning commission and legislative body of affected counties or cities, various State and federal agencies, those who request it, and property owners where the project would be located and those within 300 feet of the right-of-way based upon the most recent local assessor's parcel roll available; (2) by newspaper advertisement at least once per week for two successive weeks in newspapers of general circulation; and (3) posting on and off the project site [CPUC General Order No. 131-D, Section XI(A)]. The list provided in the PEA and included as part of the environmental review process was developed and based on these requirements.

Antelope-Pardee 500-kV Transmission Project
F. PUBLIC PARTICIPATION AND NOTIFICATION

electronic versions (on CD) of the Draft EIR/EIS, and the Executive Summary, as described below. In addition, a copy of the Project distribution list for the proposed Project is at the end of this section.

- Notice of Preparation (NOP) and Notice of Intent (NOI). Seventy-seven (77) copies of the NOP were distributed to federal, State, regional, and local agencies, and elected officials. The USDA Forest Service issued a NOI for the proposed Project, which was published in the Federal Register on June 28, 2005. A public scoping meeting notice was mailed to over 2,500 individuals in Project area;
- Notice of Availability (NOA) of the Draft EIR/EIS. The Notice of Availability (NOA) of the Draft EIR/EIS was mailed to approximately 2,700 addresses, including community organizations, interest groups, and property owners in the vicinity of the proposed Project route, and the NOA was also sent to property owners along the Alternative 5 route;
- Draft EIR/EIS. Copies of the full Draft EIR/EIS were sent to 147 interested parties and agencies, and to the 16 information repositories, which include eight area libraries, three City offices, three community organizations, and two USDA Forest Service offices. Twelve copies of the Executive Summary, 120 emails with the NOA, and 110 CDs (pdf version of the Draft EIR/EIS) with the NOA were also sent out; and
- Extension Notice. An extension notice was distributed to everyone on the Project notification list, which included over 3,400 individuals, that announced that the public comment period for the Draft EIR/EIS was extended from September 18 to October 3, 2006.;

Newspaper Notices. Notices were also published in local and regional newspapers to announce the public scoping meetings, the release of the Draft EIR, the Draft EIR/EIS public meetings, and the extension of the public comment period. The newspaper advertisements included information on the Project website address, phone information line, email address, and when applicable, the dates, locations and times of the public meetings. The notices were published as noted below.
