**Subject:** Antelope-Pardee transmission line

I respectfully request that additional time to study the EIR/EIS impact report on Alternative Route 5 for the Antelope-Pardee transmission line be granted. I would like my e-mail put on record. My request is being made so that the devastating social, economical and environmental impact of this route, on the communities like Agua Dulce, be brought to light. After attending the Agua Dulce Town Council meeting I am also infuriated at the lack of notification given to those of us affected by Route 5. This route must be eliminated from consideration, especially when existing alternative routes through forest service land is available. This is more than a "not in my backyard" argument. Forest service land should be utilized when it is barren and rarely used. Such is the case here. We are serious about our commitment to stopping use of this route. We will use all legal, political and media options available to us. Please help us make sure the right thing is done.

## Response to Comment Set C.77: David Baral

C.77-1 On September 13, the CPUC, as the CEQA Lead Agency, and the USDA Forest Service, as the NEPA Lead Agency, extended the public review period for the Project from 45 days to 60 days, now ending on October 3, 2006.

Please see General Response GR-5 regarding noticing procedures and the review period for the Draft EIR/EIS.

Thank you for expressing your concern regarding Alternative 5. Your comments will be shared with the decision-makers who are reviewing the Project and alternatives at the USDA Forest Service and the CPUC.
