We want to express out sincere concern over the proposed Antelope-Pardee 500-kv Transimission Project.

This project should not be put through our community, it should be kept away from our residential areas. We hope this will not come to be as it will not only destroy our lands but also many lives.

I Jack Cutlip am afflicted with Parkinsons Disease and don't want to have these high powered lines anywhere near our home and community that we love and have appreciated for many years. We live in Leona Valley not for just its beauty but also for the choice of being away from Smog and Contaminated City living. Please keep the high powered lines out of Leona Valley, keep our communtiy free from this project, there are plenty of places to put them without interfering with our Leona Valleyt residential area.

Thank you, Patti and Jack Cutlip

C.85-1

## Response to Comment Set C.85: Patti and Jack Cutlip

- C.85-1 Thank you for submitting your opinion regarding Alternative 5. Your comments will be shared with the decision-makers who are reviewing the Project and alternatives at the USDA Forest Service and the CPUC.
