

Michael Clayton & Associates

The existing view to the south, from Corral Canyon Road, approximately 1.5 miles southwest of Corral Canyon Campground. The Modified Route D Alternative Option A would traverse a distant ridgeline and pass adjacent and just beyond the chicken ranch, which is visible in the clearing in the right-center of the image above. The landscape of rocky ridges and low-growing vegetation is predominantly natural in appearance with no visible evidence of industrial structures or character. The panoramic views are open and unobstructed.
