

Michael Clayton & Associates

A **visual simulation** of the Proposed Project from Key Viewpoint 5 on eastbound Old Kane Springs Road, approximately 0.8 mile east of the junction with SR 78. The Proposed Project would parallel Old Kane Springs Road adjacent and to the south (right) of the road. This view to the west illustrates the transfer of an existing wood-pole 92 kV transmission line to an underbuild position on the proposed 500 kV lattice structures. The proposed structure and conductors would be prominently visible (accentuated by structure skylining) to travelers on Old Kane Springs Road.
