

Michael Clayton & Associates

The **existing view** to the north-northeast toward proposed structure location C32, from Calle De Las Rosas at Via La Cantera, just south of Rancho Penasquitos Boulevard. Chicarita Substation is barely visible at the crest of the lower hill, at the left edge of the image (to the left of the left tubular steel pole). The two existing transmission lines (tubular steel pole and H-frame) crossing the hilltop are prominently visible from the adjacent residential subdivision along Calle De Las Rosas.
