

Michael Clayton & Associates

A **visual simulation** of the South Buckman Springs Option as it crosses east-west through Cameron Valley and then passes through The Narrows. This view is from Key Viewpoint 59 on Cameron Truck Trail, just north of the South Buckman Springs Option route span over Cameron Truck Trail. As shown in the simulation, the prominent transmission structures would be highly visible to travelers on Cameron Truck Trail and nearby residents and would introduce substantial industrial character into a landscape that is predominantly natural in appearance.
