Subject: ASTM Phase I Environmental Site Assessment
Cleveland National Forest Electric Safety and Reliability Project
San Diego County, California

Ladies and Gentlemen:

The enclosed report presents the results of a Phase I environmental site assessment (Phase I assessment) conducted at the above-referenced property, located in the Cleveland National Forest, in San Diego County, California (herein referred to as the "Proposed Project area"). This work was performed by Haley & Aldrich, Inc. (Haley & Aldrich), in accordance with our mutually accepted agreement with Insignia Environmental dated 6 April 2011 ("Agreement") as authorized by Insignia Environmental on 6 April 2011. This Phase I assessment was conducted using practices consistent with the American Society of Testing and Materials (ASTM) E 1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-05 Standard) as referenced in 40 Code of Federal Regulations (CFR) Part 312 (the All Appropriate Inquiries [AAI] Rule).

The objective of a Phase I assessment is to identify known and suspect "recognized environmental conditions" (RECs), historical RECs (HRECs), and *de minimis* conditions associated with the subject site, as defined in the ASTM E 1527-05 Standard, by evaluating site history, existing observable conditions, current site use, and current and former uses of adjoining properties as well as potential releases at surrounding properties that may impact the Proposed Project area.

Our conclusions regarding the presence and potential impact of RECs on the Proposed Project area are intended to help the user evaluate the "business environmental risk" associated with the site, as defined in the ASTM E 1527-05 Standard and discussed in section 1.1 of this report.

**REPORT ON
ASTM PHASE I ENVIRONMENTAL SITE ASSESSMENT
Cleveland National Forest Electric Safety and Reliability Project San Diego County, California**

by

**Haley & Aldrich, Inc.
San Diego, California**

The undersigned declare the following:

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR Part 312, §312.10.

We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the Proposed Project area and “develop opinions and conclusions regarding conditions indicative of releases or threatened releases.” We have developed and performed the “all appropriate inquiries” (AAI) in conformance with the standards and practices set forth in 40 CFR Part 312.

File No. 37715-001

EXECUTIVE SUMMARY

Haley & Aldrich, Inc. (Haley & Aldrich) has performed a Phase I environmental site assessment (Phase I assessment) of the Cleveland National Forest Electric Safety and Reliability Project property (herein referred to as the “Proposed Project area”) in San Diego County, California. The scope of work is described and conditioned by mutually accepted agreement dated 6 April 2011. This Phase I assessment was performed in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) E 1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-05 Standard) as referenced in 40 Code of Federal Regulations (CFR) Part 312 [the All Appropriate Inquiries (AAI) Rule]. Deviations from this Standard, and/or data gaps and their significance are described in section 1.5 of this report. Our conclusions are intended to help the user evaluate the “business environmental risk” associated with the Proposed Project area, as defined in the ASTM E 1527-05 Standard and discussed in section 1.1 of this report.

The Proposed Project area is approximately 160 miles of easements associated with San Diego Gas & Electric (SDG&E) transmission and distribution electric power lines (collectively referred to as power lines) located in and around the Cleveland National Forest.

The objective of a Phase I assessment is to identify known and suspect “recognized environmental conditions” (RECs), historical RECs (HRECs), and *de minimis* conditions associated with the Proposed Project area, as defined in the ASTM E 1527-05 Standard and in section 1.1 of this report.

The following data gaps were identified during the performance of this Phase I assessment.

- Access to the portion of C442 south of Interstate-8 was not provided. Ms. Molly Dana of SDG&E visited this portion of C442 in June 2011 and indicated that the property was undeveloped ranch land on privately owned property. She did not observe use, storage, or release of hazardous materials or petroleum products.
- SDG&E did not provide files or previous reports pertaining to the Proposed Project area. However, according to personnel interviewed, use, storage, or release of hazardous materials or petroleum products has not occurred on the Proposed Project area.

Since the inaccessible property was reportedly undeveloped ranch land, and since SDG&E did have knowledge of use, storage, or release of hazardous materials or petroleum products at the Proposed Project area, these data gaps are considered insignificant.

Based on the results of this Phase I Environmental Site Assessment, our findings are as follows:

KNOWN OR SUSPECT RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-05 Standard defines an REC as “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property.” A material threat is defined by the ASTM E 1527-05 Standard as “a physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment.” Consistent

with ASTM E 1527-05 Section 12.5 (Report Format), and for the purposes of this assessment, those RECs that have been identified as being present with respect to the Proposed Project area are referred to as Known Recognized Environmental Conditions (KRECs), and those RECs that have been identified as being likely present with respect to the Proposed Project area are referred to as Suspect Recognized Environmental Conditions (SRECs).

This Phase I assessment has revealed evidence of one KRECs and no SRECs in connection with the Proposed Project area.

Our opinion of the potential impacts of the REC(s) identified in this Phase I assessment is as follows:

Known Recognized Environmental Conditions

KREC #1: Impacted groundwater from the adjacent Pine Valley Trailer Park

Explanation: A release of gasoline to soil and groundwater from two underground storage tanks occurred at the Pine Valley Trailer Park, located at 27521 and 27541 Old Highway 80, Guatay, CA. Groundwater was reportedly encountered between 15 and 20 feet below ground surface at this site. Maximum concentrations in groundwater beneath this site during March 2010 are as follows: total petroleum hydrocarbons (TPH) gasoline = 9,500 micrograms per liter (ug/L), TPH diesel = 19,000 ug/L, benzene = 390 ug/L, toluene = 410 ug/L, ethylbenzene = 460 ug/L, xylenes = 1,790 ug/L. High-vacuum dual-phase extraction remediation was conducted at the site between 2004 and 2007, which removed over 10,000 pounds of petroleum hydrocarbons from the site. Based on the existing groundwater data, it appears the concentrations of TPH, benzene, ethylbenzene, toluene, and xylenes are present beneath Old Highway 80 and therefore beneath the Proposed Project area (between poles Z173105 and Z173109). Records reviewed at DEH indicated that approximately 36 cubic yards of petroleum impacted soil remains south of the former fuel dispenser.

HISTORICAL RECs

The ASTM E 1527-05 Standard defines an HREC as an environmental condition “which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently.”

This Phase I assessment has revealed no evidence of HRECs in connection with the Proposed Project area.

DE MINIMIS CONDITIONS

The ASTM E 1527-05 Standard defines *de minimis* conditions as those conditions which “do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.” The ASTM E 1527-05 Standard notes that “conditions determined to be *de minimis* are not recognized environmental conditions.”

This Phase I assessment has revealed no evidence of *de minimis* conditions in connection with the Proposed Project area except for the following:

The western portion of TL 682 traverses through orchards (between poles Z115118 and Z118024), and smudge pots used to provide heat to the orchards in the winter months were observed at these orchards.

These smudge pots likely use petroleum products. It is unknown if spills or releases may have occurring during the operation of these smudge pots.

SUMMARY AND RECOMMENDATIONS

In summary, one REC and one *de minimis* condition were identified during this Phase I assessment. We recommend that properly trained environmental personnel be present to observe and field screen soil and groundwater that may be encountered during excavation activities at TL 682 between poles Z115118 and Z118024. Engineering plans for construction near the Pine Valley Trailer Park indicate that soil will not be excavated greater than 12 feet below ground surface. Therefore, we recommend that properly trained environmental personnel be present if excavation activities at TL-629 between poles Z173105 and Z173109 exceed 12 feet below ground surface to observe and field screen groundwater that may be encountered. Soil and groundwater in each of these areas should be observed for discoloration and odors and screened with a hand held photoionization detector (PID). If soil or groundwater is encountered with suspected contamination, soil and/or groundwater samples should be collected and analyzed by a California-certified environmental laboratory to properly characterize the soil or groundwater for off-site disposal, as deemed necessary.

The remainder of this report contains additional information regarding the Phase I assessment, the resulting findings summarized above, and limitations affecting this report.

1 INTRODUCTION

This report presents the results of a Phase I environmental site assessment (Phase I assessment) conducted at the San Diego Gas & Electric (SDG&E) Cleveland National Forest (CNF) Electric Safety and Reliability Plan Project (Proposed Project) area in San Diego County, California (herein referred to as the “subject site”). This work was performed by Haley & Aldrich, Inc. (Haley & Aldrich) in accordance with our mutually accepted agreement with Insignia Environmental (Insignia) dated 6 April 2011 (“Agreement”) as authorized by Insignia on 6 April 2011. This Phase I assessment was performed in conformance with the scope and limitations of the American Society of Testing and Materials (ASTM) E 1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-05 Standard) to comply with 40 Code of Federal Regulations (CFR) Part 312 (the All Appropriate Inquiries [AAI] Rule).

1.1 Objective

The objective of a Phase I assessment is to identify known and suspect “recognized environmental conditions” (RECs), historical RECs (HRECs), and *de minimis* conditions associated with the Proposed Project area by evaluating site history, existing observable conditions, current site use, and current and former uses of adjoining properties as well as potential releases at surrounding properties that may impact the Proposed Project area. RECs are defined in the ASTM E 1527-05 Standard as “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water at the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.” A material threat is defined by the ASTM E 1527-05 Standard as “a physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment.”

Consistent with ASTM E 1527-05 Section 12.5 (Report Format), and for the purposes of this assessment, those RECs that have been identified as being present with respect to the Proposed Project area are referred to as Known Recognized Environmental Conditions (KRECs), and those RECs that have been identified as being likely present with respect to the Proposed Project area are referred to as Suspect Recognized Environmental Conditions (SRECs). The ASTM E 1527-05 Standard defines HRECs as environmental conditions “which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently.”

Our conclusions are intended to help the user evaluate the “business environmental risk” associated with the Proposed Project area, defined in the ASTM E 1527-05 Standard as “a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations...”

The completion of this Phase I assessment is only one component of the process required to satisfy the AAI Rule. In addition, the user must adhere to a set of user responsibilities as defined by the ASTM E 1527-05 Standard and the AAI Rule. User responsibilities are discussed in section 5.3 of this report. A user seeking protection from Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability as an innocent landowner, bona fide prospective purchaser, or contiguous property owner must complete all components of the AAI process in addition to meeting ongoing obligations. AAI components, CERCLA liability relief, and ongoing obligations are discussed in the AAI Rule and in Appendix XI of the ASTM E 1527-05 Standard.

1.2 Site Identification

The Proposed Project area is approximately 160 miles of easements associated with San Diego Gas & Electric (SDG&E) transmission and distribution electric power lines (collectively referred to as power lines) located in and around the Cleveland National Forest, San Diego County, California. Figure 1 depicts the location of the Proposed Project area. The transmission lines are identified as follows:

- Tie Line (TL) 625;
- TL 626;
- TL 629;
- TL 637;
- TL 682; and
- TL 6923.

The distribution lines are identified as follows:

- Circuit (C) 78;
- C 79;
- C 157;
- C 440;
- C 442; and
- C 449.

1.3 Scope of Services

Haley & Aldrich performed the following scope of services to complete this Phase I assessment. These services were performed either by, or under the direct supervision of, an environmental professional as defined by the AAI Rule.

1. Conducted visual observations of site conditions, and of abutting property use, to evaluate the nature and type of activities that have been or are being conducted at and adjoining to the Proposed Project area, in terms of the potential for release or threat of release of hazardous substances or petroleum products.
2. Reviewed federal, state, tribal, and local environmental database information within the ASTM-specified distance from the Proposed Project area using a database service to access records. Used 7.5-minute topographic maps to evaluate the Proposed Project area's physical setting.

3. Reviewed state environmental files pertaining to the Proposed Project area and nearby sites with the potential to impact the Proposed Project area.
4. Contacted state and local municipal agencies regarding the Proposed Project area and surrounding properties and structures.
5. Interviewed the key site manager and property tenant representatives.
6. Interpreted the information and data assembled as a result of the above work tasks, and formulated conclusions regarding the potential presence and impact of RECs, including HRECs.

1.4 Non-Scope Considerations

The ASTM E 1527-05 Standard includes the following list of “additional issues” that are non scope considerations outside of the scope of the ASTM Phase I assessment practice: asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, bio-agents, and mold. These items were not included in this Phase I assessment of the Proposed Project area.

A limited assessment of the presence of polychlorinated biphenyls (PCBs) is included in the ASTM work scope. Accordingly, our assessment of the presence of PCBs is limited to those potential sources specified in the ASTM E 1527-05 Standard as “electrical or hydraulic equipment known or likely to contain PCBs...to the extent visually and or physically observed or identified from the interview or records review.”

1.5 Exceptions and Deviations

1.5.1 Deviations

Haley & Aldrich completed this Phase I assessment in substantial conformance with the ASTM E 1527-05 Standard. In our opinion, no additions were made to or deviations and deletions made from the ASTM work scope in completing this Phase I assessment.

1.5.2 Data Gaps

The following data gaps were identified during the performance of this Phase I assessment:

- Access to the portion of C442 south of Interstate-8 was not provided. Ms. Molly Dana of SDG&E visited this portion of C442 in June 2011 and indicated that the property was ranch land on privately owned property. She did not observe use, storage, or release of hazardous materials or petroleum products.
- SDG&E did not provide files or previous reports pertaining to the Proposed Project area. However, according to personnel interviewed, use, storage, or release of hazardous materials or petroleum products has not occurred on the Proposed Project area.

Our opinion is limited by the conditions prevailing at the time our work is performed and the applicable regulatory requirements in effect.

1.5.3 Limitations

Our work for this project was performed in accordance with the standards and practices set forth in 40 CFR Part 312 and is consistent with the ASTM E 1527-05 Standard for Phase I Environmental Site Assessments. Several organizations other than ASTM, such as professional associations ASFE and AGWSE, have also developed guidelines or standards for environmental site assessments. The Phase I assessment presented in this report may vary from the specific guidelines or standards required by other organizations.

This Phase I assessment was prepared pursuant to a mutually accepted agreement (Agreement) dated 6 April 2011 between Insignia Environmental and Haley & Aldrich. All uses of this report are subject to, and deemed accepting of, the conditions and restrictions contained in the Agreement. The observations and conclusions described in this report are based solely on the Scope of Services provided pursuant to the Agreement. Haley & Aldrich has not performed any additional observations, investigations, studies, or other testing not specified in the Agreement. Haley & Aldrich shall not be liable for the existence of any condition the discovery of which would have required the performance of services not authorized under the Agreement.

This report is prepared for the exclusive use of Insignia and SDG&E in connection with the preparation of the hazardous materials evaluation section of a Proponent's Environmental Assessment for the Proposed Project area. There are no intended beneficiaries other than Insignia and SDG&E. Haley & Aldrich shall owe no duty whatsoever to any other person or entity on account of the Agreement or the report. Use of this report by any person or entity other than Insignia and SDG&E for any purpose whatsoever is expressly forbidden unless such other person or entity obtains written authorization from Insignia and SDG&E and from Haley & Aldrich. Use of this report by such other person or entity without the written authorization of Insignia and SDG&E and Haley & Aldrich shall be at such other person's or entity's sole risk, and shall be without legal exposure or liability to Haley & Aldrich.

Use of this report by any person or entity, including by Insignia and SDG&E, for a purpose other than for the preparation of the hazardous materials evaluation section of a Proponent's Environmental Assessment for the Proposed Project area is expressly prohibited unless such person or entity obtains written authorization from Haley & Aldrich indicating that the report is adequate for such other use. Use of this report by any person or entity for such other purpose without written authorization by Haley & Aldrich shall be at such person's or entity's sole risk and shall be without legal exposure or liability to Haley & Aldrich.

This report reflects site conditions observed and described by records available to Haley & Aldrich as of the date of report preparation. The passage of time may result in significant changes in site conditions, technology, or economic conditions, which could alter the findings and/or recommendations of the report. Accordingly, Insignia and SDG&E and any other party to whom the report is provided recognize and agree that Haley & Aldrich shall bear no liability for deviations from observed conditions or available records after the time of report preparation.

Use of this report by any person or entity in violation of the restrictions expressed in this report shall be deemed and accepted by the user as conclusive evidence that such use and the reliance placed on this report, or any portions thereof, is unreasonable, and that the user accepts full and

exclusive responsibility and liability for any losses, damages, or other liability which may result.

2 SITE DESCRIPTION

2.1 Site Ownership and Location

2.1.1 Name of Site Owner

SDG&E owns the Proposed Project area power lines. The easements containing the Proposed Project area power lines are owned by multiple entities, including SDG&E, United States Forest Service (USFS) Cleveland National Forest (CNF), the United States Bureau of Land Management (BLM), the La Jolla Band of Luiseno Indians, and the Rincon Band of Luiseno Indians, the Campo Band of Diegueno Mission Indians, and private land owners.

2.1.2 Name of Site Operator

SDG&E operates the power lines associated with the Proposed Project area.

2.1.3 Project Locus Map

The Proposed Project area is located in San Diego County. The United States Geologic Survey (USGS) topographic maps for the Proposed Project area are as follows:

- Viejas Mountain Quadrangle;
- Tule Springs Quadrangle;
- Cuyamaca Peak Quadrangle;
- Barrett Lake Quadrangle;
- Descanso Quadrangle;
- Morena Reservoir Quadrangle;
- Goat Island Quadrangle;
- Cameron Corners Quadrangle;
- Alpine Quadrangle;
- San Ysabel Quadrangle;
- Mount Laguna Quadrangle;
- Live Oak Springs Quadrangle;
- Ramona Quadrangle;
- Boucher Hill Quadrangle;
- Palomar Observatory Quadrangle;
- Mesa Grande Quadrangle;
- Warner Springs Quadrangle; and
- Warner Ranch Quadrangle;

Figure 1 and Figure 2 show the location of the Proposed Project area.

2.2 Site and Vicinity Description

Figure 2 is a site plan of the Proposed Project area and shows relevant features of the Proposed Project area and immediately adjoining properties, as described below.

- The Proposed Project area consists of approximately 118.6 miles of SDG&E transmission lines and SDG&E 41.8 miles of distribution lines, and is approximately 290 acres.
- The Proposed Project area generally traverses vacant, undeveloped land. Portions of the Proposed Project area traverse residential properties, ranch land, CNF campgrounds, and nurseries.

2.3 Physical Setting

Subsurface explorations were not performed for this Phase I assessment; therefore, the Proposed Project area geology and hydrology were evaluated on the basis of readily available public information or references, and/or based upon our experience and understanding of subsurface conditions in the Proposed Project area vicinity.

2.3.1 Topography

Topographically, the Proposed Project area elevation ranges between approximately 1,500 to over 3,000 feet above mean sea level (MSL). Groundwater depth is expected to range from relatively shallow (within 50 feet of ground surface) in some areas to several hundred feet below ground surface (bgs) in others.

2.3.2 Geology

The general Proposed Project area lies within the Peninsular Ranges geomorphic province. Mountains of the Peninsular Ranges are predominantly north-south trending and extend approximately 900 miles from Southern California to the southern tip of Mexico's Baja California peninsula. These mountains are part of the North American Coast Ranges that run along the Pacific coast from Alaska to Mexico. Elevations range from about 500 to 11,500 feet above mean sea level. According to data provided by the San Diego Natural History Museum, mountains of the Peninsular Ranges are mainly composed of extensive Mesozoic (from roughly 251 million years ago to the beginning of the Cenozoic Era 65 million years ago) granitic plutons, overlain in areas by metasedimentary rocks, such as marbles, slates, schist, quartzites, and gneiss. The Proposed Project area is primarily underlain by Mesozoic tonalite, Cretaceous plutonic, and Mesozoic gabbro deposits.

3 PREVIOUS REPORTS

Haley & Aldrich requested previous environmental reports pertaining to the Proposed Project area from SDG&E. SDG&E indicated that they do not have previous environmental reports pertaining to the Proposed Project area.

4 SITE HISTORY

According to SDGG&E personnel interviewed, the Proposed Project area power line was originally owned and operated by the Mountain Empire Cooperative. SDG&E reportedly purchased the power line in the early 1970s. SDG&E did not provide any other information or documents pertaining to the history of the Proposed Project area.

5 ENVIRONMENTAL RECORDS REVIEW

5.1 Standard Environmental Records Review

Haley & Aldrich used the electronic database service Environmental Data Resources (EDR) to complete the environmental records review. The database search was used to identify properties that may be listed in the referenced agency records, located within the ASTM-specified approximate minimum search distances as shown in the table below. Section 5.1.1 presents a description of each database searched.

Database Searched	Approximate Minimum Search Distance	Proposed Project area Listed?	Number of Sites within Search Distance
NPL Sites	1 mile	No	0
Delisted NPL Sites	0.5 mile	No	0
CERCLIS Sites	0.5 mile	No	0
CERCLIS-NFRAP Sites	0.5 mile	No	0
Federal ERNS	Site only	No	0
RCRA non-CORRACTS TSD Facilities	0.5 mile	No	0
RCRA CORRACTS TSD Facilities	1 mile	No	0
RCRA Generators	Site & Adjoining	No	4
Federal Institutional Controls/Engineering Controls	Site Only	No	0
State and Tribal Equivalent NPL Sites	1 mile	No	0
State and Tribal Equivalent CERCLIS Sites	0.5 mile	No	0
State and Tribal Registered Storage Tanks	Site & Adjoining	No	30
State and Tribal Landfills and Solid Waste Disposal Sites	0.5 mile	No	4
State and Tribal Leaking Storage Tanks	0.5 mile	No	17
State and Tribal Institutional Controls/Engineering Controls	Site Only	No	0
State and Tribal Voluntary Cleanup Sites	0.5 mile	No	0
State and Tribal Brownfield Sites	0.5 mile	No	0
State Spills, Leaks, Investigation and Cleanup	0.5 mile	No	9
State CORTESE	0.5 mile	No	7
State DTSC (ENVIROSTOR)	1 mile	No	0

Database Searched	Approximate Minimum Search Distance	Proposed Project area Listed?	Number of Sites within Search Distance
State Dry Cleaner Facilities	0.25 mile	No	0
State California Hazardous Materials Incident Report System (CHMIRS)	Site Only	No	6
State Notify 65	1 mile	No	1
State No Further Action Determination (NFA)	0.25 mile	No	0
State – Unconfirmed Properties Referred to Another Agency (REF)	0.25 mile	No	0
State – School Property Evaluation Program (SCH)	0.25 mile	No	0
State – Properties Needing Further Evaluation (NFE)	0.25 mile	No	0

The Environmental Data Resources (EDR) report also contains search results of other State environmental databases that are relevant to the Proposed Project area.

Haley & Aldrich also searched the Orphan Site List provided in the EDR report for the Proposed Project area and sites adjoining the Proposed Project area. Orphan sites are those that, due to incorrect or incomplete addresses, could not be mapped. Neither the Proposed Project area nor the adjoining properties were identified on the Orphan Site List. The complete environmental database report is provided in Appendix A.

5.1.1 Descriptions of Databases Searched

Numerous regulatory databases were searched during this Phase I assessment. Each database reviewed is described in the EDR report presented in Appendix A. Those databases required by the ASTM E 1527-05 Standard are identified below.

1. **NPL Sites:** The National Priorities List (NPL) is a list of contaminated sites that are considered the highest priority for cleanup by the U.S. Environmental Protection Agency (USEPA).
2. **Delisted NPL Sites:** The Delisted National Priorities List (NPL) is a list of formal NPL sites formerly considered the highest priority for cleanup by the USEPA that met the criteria of the National Oil and Hazardous Substances Pollution Contingency Plan for deletion from the NPL because a no further response was appropriate.
3. **CERCLIS Sites:** The Comprehensive Environmental Response, Compensation, and Liability Act Information System (CERCLIS) list identifies sites which are suspected to have contamination and require additional investigation to assess whether they should be considered for inclusion on the NPL.
4. **CERCLIS-NFRAP Sites:** CERCLIS-NFRAP status indicates that a site was once on the CERCLIS List but has No Further Response Actions Planned (NFRAP). Sites on the CERCLIS-NFRAP List were removed from the CERCLIS List in February 1995 because, after an initial investigation was performed, no contamination was found, contamination was removed quickly, or the contamination was not significant enough to warrant NPL status.

5. **Federal ERNS:** The Federal Emergency Response Notification System (ERNS) list tracks information on reported releases of oil and hazardous materials.
6. **RCRA non-CORRACTS TSD facilities:** The Resource Conservation and Recovery Act (RCRA) non-CORRACTS TSD Facilities List tracks facilities which treat, store, or dispose of hazardous waste and are not associated with corrective action activity.
7. **RCRA CORRACTS TSD facilities:** The RCRA CORRACTS TSD Facilities list catalogues facilities that treat, store, or dispose of hazardous waste and have been associated with corrective action activity.
8. **RCRA Generators:** The RCRA Generator list is maintained by the USEPA to track facilities that generate hazardous waste.
9. **Federal Institutional Controls/Engineering Controls:** The Federal Institutional Control list and Engineering Control list are maintained by the USEPA. Some Institutional Control and Engineering Control information may not be made publicly available and therefore will not be included on this registry.
10. **State and Tribal Equivalent NPL/CERCLIS Sites:** The ASTM E 1527-05 Standard requires searching “State and Tribal Equivalent CERCLIS Sites.” In California, the equivalent CERCLIS is the Cal-Sites database, which is maintained by the Department of Toxic Substances Control (DTSC).
11. **State and Tribal Registered Storage Tanks:** In California, local regulatory agencies (e.g., County health departments and fire departments) and the State Water Resources Control Board (SWRCB) maintain lists of aboveground and underground storage tanks registered with those agencies (e.g., County health departments). For tribal property, the USEPA Region 9 maintains a list of underground storage tanks on Indian land.
12. **State and Tribal Landfills and Solid Waste Disposal Sites:** In California, the SWRCB in coordination with the Regional Water Quality Control Boards (RWQCBs), and the Integrated Waste Management Board (IWMB) maintain lists of regulated waste disposal sites.
13. **State and Tribal Leaking Storage Tanks:** In California, the SWRCB in coordination with the RWQCBs maintains lists of Leaking Underground Storage Tanks/Leaking Aboveground Storage Tanks (LUST/LAST). The LUST/LAST lists are a listing of release sites that have an underground or aboveground storage tank listed as the source. For tribal property, the USEPA Region 9 maintains a list of leaking underground storage tanks (USTs) on Indian land.
14. **State and Tribal Institutional Controls/Engineering Controls:** The USEPA maintains lists of sites with Institutional controls or Engineering controls in place. In addition, DTSC maintains a list of environmental deed restrictions.
15. **State and Tribal Voluntary Cleanup Sites:** In California, the DTSC, RWQCBs, and local regulatory agencies (e.g., County health departments) maintain lists of Voluntary Cleanup sites.
16. **State and Tribal Brownfield Sites:** In California, the DTSC maintains a list of Brownfield sites which includes any property where a redevelopment or re-use may be compromised by the presence or presumed presence of hazardous materials or petroleum.

17. **Other State Hazardous Waste Sites and Releases:** In California, the California Environmental Protection Agency (Cal/EPA) including DTSC, and the SWRCB including RWQCBs have created and/or maintain databases that identify hazardous waste sites and locations of hazardous substance releases/spills. These databases include:
- **SLIC** – The Spills, Leaks, Investigation and Cleanup (SLIC) database maintained by the RWQCBs identifies sites that are being investigated and/or remediated for known releases other than those associated with leaking USTs.
 - **AWP** – The Annual Workplan Sites lists, formerly Bond Expenditure Plan list, maintained by DTSC, identifies known hazardous substance sites targeted for cleanup.
 - **CORTESE** – The CORTESE Hazardous Waste and Substances Sites list includes a list of public drinking water wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release, and all solid waste disposal facilities from which there is known migration. The sites on this list were those included on the SWRCB LUST list, the IWMB Solid Waste Information System (SWF/LF, also referred to as (SWIS), and the DTSC Cal-Sites. The CORTESE listing is no longer updated.
 - **NOTIFY 65** - Notify 65 records contain facility notifications about any release that could impact drinking water and thereby expose the public to a potential health risk. The data comes from the SWRCB's Proposition 65 database.
 - **CHMIRS** - The California Hazardous Material Incident Report System (CHMIRS), maintained by the Cal/EPA Office of Emergency Services, contains information on reported hazardous material incidents (accidental releases or spills).
 - **NFA:** No Further Action Determination (NFA) sites are properties for which DTSC has made a clear determination that the property does not pose a problem to the environment or to public health.
 - **REF:** Unconfirmed Properties Referred to Another Agency (REF) sites are properties where contamination has not been confirmed and which were determined as not requiring direct DTSC Site Mitigation Program action or oversight. Accordingly, these sites have been referred to another state or local regulatory agency.
 - **SCH:** School Property Evaluation Program (SCH) sites are proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the Cal-Sites category depending on the level of threat to public health and safety or the environment they pose.
 - **NFE:** Properties Needing Further Evaluation (NFE) are properties that are suspected of being contaminated. These are unconfirmed contaminated properties that need to be assessed using the Preliminary Endangerment Assessment (PEA) process. PEA in Progress indicates properties where DTSC

is currently conducting a PEA. PEA Required indicates properties where DTSC has determined a PEA is required, but it is not currently underway.

5.1.2 Detailed Description of Relevant Proposed Project area Listings

The Proposed Project area was not identified in the EDR report.

5.1.3 Detailed Descriptions of Relevant Nearby Site Listings

Only those adjacent or upgradient sites in close proximity to the Proposed Project area that have impacted groundwater, or have the potential to impact the Proposed Project area, are identified below. Information pertaining to the remainder of the sites can be found in the EDR report in Appendix A.

Santa Ysabel Former Chevron, 30350 Hwy 78, Santa Ysabel, CA (Map ID #9): This facility, located approximately ¼ mile from TL 626, was identified as a LUST site. A release of gasoline impacted soil and groundwater. According to information obtained from the Geotracker website, the upgradient groundwater has not been impacted by the release of gasoline, and the impacted groundwater plume is migrated west and away from the Proposed Project area. Therefore, this release is unlikely to impact soil or groundwater beneath the Proposed Project area.

San Ysabel Barn Site, Washington Street, Santa Ysabel, CA (no Map ID): A release to soil occurred at this facility. EDR did not identify the chemical released. The case was under the jurisdiction of the DEH Voluntary Assistance program. A review of DEH files indicates that this was a release of organochlorine pesticides to soil located within a barn located on the northwest corner of Washington Street and Grutley in Santa Ysabel, approximately ¼ mile from the Proposed Project area. The pesticides impacts to soil were mostly contained within the barn building. Due to the distance from the Proposed Project area, this release is unlikely to impact soil or groundwater beneath the Proposed Project area.

Descanso Burn Site, 10054 Anderson Ranch Road, Descanso, CA (Map ID #14): This facility was a landfill operated by the County of San Diego Department of Public Works and accepted ash and municipal waste. It was closed in 1997. It is listed as a SLIC site with reported releases of copper, lead, other metals, and polynuclear aromatic hydrocarbons in soil. To date, the RWQCB has not identified records associated with this site.

Power Pole on East side of 10368 Oak Grove Road, Descanso, CA (Map ID #19): This facility was identified as a SLIC site that was referred to the DEH Local Oversight Program (LOP). The nature of the release was not identified by EDR. The case was reportedly closed in 1999. Records were requested from DEH, and DEH indicated that records associated with this site have been lost. To date, the RWQCB has not identified records associated with this site.

Pine Valley Trailer Park, 27521 and 27541 Old Highway 80, Guatay, CA (Map ID 37): A release of gasoline occurred from two 1,000-gallon USTs and impacted groundwater. Groundwater was reportedly encountered between 15 and 20 feet below ground surface at this site. Maximum concentrations in groundwater beneath this site during March 2010 are as follows: total petroleum hydrocarbons (TPH) gasoline = 9,500 micrograms per liter (ug/L), TPH diesel = 19,000 ug/L, benzene = 390 ug/L, toluene = 410 ug/L, ethylbenzene = 460

ug/L, xylenes = 1,790 ug/L. High-vacuum dual-phase extraction remediation was conducted at the site between 2004 and 2007, which removed over 10,000 pounds of petroleum hydrocarbons from the site. Based on the existing groundwater data, it appears the concentrations of TPH, benzene, ethylbenzene, toluene, and xylenes are present beneath Old Highway 80 and therefore beneath the Proposed Project area. Records reviewed at DEH indicated that approximately 36 cubic yards of petroleum impacted soil remains south of the former fuel dispenser.

County of San Diego – Mount Laguna Road Station, 33947 Mt. Laguna Drive, Mt. Laguna, CA (Map ID 17): Four gasoline and diesel USTs were removed from this site in 1998. A soil investigation indicated concentration of the following chemicals: Benzene = 8 mg/kg, toluene = 348 mg/kg, ethylbenzene = 130 mg/kg, xylenes = 754 mg/kg, and methyl tert butyl ether = 38 mg/kg. The three most recent rounds of groundwater monitoring reported that these analytes were below laboratory detection limit. It was estimated that approximately 50 cubic yards of TPH impacted soil remains in the UST excavation area. This LUST site was closed in 2003. This release is not likely to impact the Proposed Project area.

County of San Diego Site #17 – Alpine Road Station, 2914 Tavern Road, Alpine, CA (Map ID 54): A release of gasoline and diesel from on-site USTs impacted soil and groundwater. A No Further Action Letter dated 9 July 2002 was issued by DEH for this site. According to information obtained from the DEH, this site is over 0.5 miles north of the Proposed Project area and therefore is unlikely to impact soil or groundwater beneath the Proposed Project area.

CALTRANS Descanso Maintenance Station, 24171 Japatul Valley Road, Descanso, CA (Map ID 48): A release of gasoline impacted soil only. The EDR report indicates that preliminary assessment is underway; however, the Geotracker website does not have information associated with this release. A 350 gallon waste oil UST was removed from this site in 1988, and two 5,000-gallon diesel and gasoline USTs were removed from this site in 1997. Based on information obtained from the DEH file review, the USTs was located approximately 250 feet east of Japatul Road, and the Proposed Project area is located on the west side of Japatul Road. Residual concentrations of diesel only were detected in the vicinity of the UST excavations and did not appear to migrate off-site. In addition, petroleum hydrocarbons and related chemicals were not detected in a groundwater supply well located on this site. DEH issued a No Further Action letter for this site on 21 December 2005. Therefore, a release from this UST is unlikely to have impacted the Proposed Project area.

Pine Valley Texaco, 28880 Old Highway 80, Pine Valley, CA (Map ID 47): This facility was listed as a LUST site. A release of gasoline from former USTs impacted groundwater that is located near municipal groundwater wells. Based on information obtained from the EDR report and Geotracker, this facility is located approximately ¼ mile from the Proposed Project area, and concentrations of chemicals in groundwater appear to be contained within this facility. Therefore, this release is unlikely to have impacted the Proposed Project area.

I-8 Westbound/S-1 (Sunrise Hwy), (Map ID 53): This location was identified on the California Hazardous Material Incident Report System (CHMIRS) database. A release of an unknown chemical occurred at this location on 20 December 1990. No other information was provided in the EDR report. Haley & Aldrich requested public information regarding this release from the California Emergency Management Agency (CEMA) in 9 August 2011. The CEMA provided the incident report on 10 August 2011, which indicated that a release of oil occurred

on I-8 Westbound near Sunrise Highway on 20 December 1990 due to a traffic accident. No other information was identified in the incident report, and the CEMA indicated that no follow-up documentation was provided to the CEMA. Since this incident occurred on a paved interstate highway, it is unlikely to have impacted the Proposed Project area.

Barrett Honor Camp, 21077 Lyons Valley Road, Alpine, CA (Map ID 64): This facility was listed as a SLIC site and contained former USTs. The case was closed in 1987. A letter dated 26 August 1987 from the DEH indicated that the release from a UST at this site had been adequately mitigated. In addition, and 8,000-gallon diesel UST and a 5,000-gallon gasoline UST were removed from this site in May 1996. Approximately 7 cubic yards of diesel contaminated soil were excavated, and DEH issued no further action for these USTs on 2 July 1996. This site is unlikely to impact the Proposed Project area.

CDF Morena Conservation Camp, 3080 Buckman Springs Road, Campo, CA (Map ID 66): This facility was listed as a LUST site. A 2,000-gallon diesel UST and a 1,000-gallon gasoline UST were excavated in 1997. Concentrations of gasoline, diesel, and BTEX compounds were detected in soil samples, but appeared to be contained to beneath the former USTs and did not reach the groundwater, located approximately 30 feet below ground surface. Gasoline, diesel, and benzene were not detected in the groundwater samples, and very low concentrations of ethylbenzene (0.51 ug/L), toluene (0.69 ug/L), and xylenes (2.9 ug/L) were detected in only one of the three groundwater sampling events. The DEH requested that the groundwater monitoring wells be abandoned. It was requested that DEH grant closure for this release. The subject pipeline is located approximately 1/8 mile east of this site. It is unlikely that soil or groundwater has been impacted beneath the Proposed Project area.

5.2 Additional Environmental Records Review

To supplement the (ASTM E 1527-05 Standard) environmental record sources, we contacted the following state and local government agencies, and/or reviewed the following additional sources:

5.2.1 California Public Utilities Commission (CPUC)

Haley & Aldrich requested to review CPUC files associated with the Proposed Project area 15 June 2011. The CPUC indicated in a letter dated 21 June 2011 that they do not have files associated with the Proposed Project area.

5.2.2 San Diego Regional Water Quality Control Board (SDRWQCB)

Haley & Aldrich requested to review SDRWQCB files associated with the Proposed Project area 15 June 2011. The SDRWQCB indicated that they do not have files associated with the Proposed Project area.

The State Water Resources Control Board Geotracker Website contains information on releases or cases under the jurisdiction of the local RWQCBs. Haley & Aldrich conducted a search on the website on 15 June 2011 to identify any releases or cases that may be associated with the Proposed Project area. Haley & Aldrich used the following search criteria to identify potential releases or cases:

- San Diego Gas & Electric;

- SDGE;
- SDG&E;
- Mountain Empire;
- Transmission Line;
- Tie Line;
- TL;
- Circuit;
- Distribution Line;
- Cleveland National Forest; and
- CNF.

The Proposed Project area was not identified during the search on the Geotracker website.

5.2.3 California Department of Toxic Substance Control (DTSC)

The DTSC Envirostor Website contains information on releases or cases under the jurisdiction of the DTSC. Haley & Aldrich conducted a search on the website on 15 June 2011 to identify any releases or cases that may be associated with the Proposed Project area. Haley & Aldrich used the following search criteria to identify potential releases or cases:

- San Diego Gas & Electric;
- SDGE;
- SDG&E;
- Mountain Empire;
- Transmission Line;
- Tie Line;
- TL;
- Circuit;
- Distribution Line;
- Cleveland National Forest; and
- CNF.

The Proposed Project area was not identified during the search on the Envirostor website.

5.3 User Responsibilities

The AAI Rule requires that the user of the report consider the following:

- Whether the user has specialized knowledge about previous ownership or uses of the Proposed Project area that may be material to identifying RECs;
- Whether the user has determined that the Proposed Project area's Title contains environmental liens or other information related to the environmental condition of the property, including engineering and institutional controls and Activity and Use Limitations (AULs), as defined by ASTM;

- Whether the user is aware of commonly known or reasonably ascertainable information about the Proposed Project area including whether or not the presence of contamination is likely on the Proposed Project area and to what degree it can be detected; and
- Whether the user has prior knowledge that the price of the Proposed Project area has been reduced for environmentally related reasons.

Though neither the AAI Rule nor the ASTM E 1527-05 Standard requires that this information be provided to the environmental professional(s), failure on the part of the user to obtain such information for their own records, should it be reasonably ascertainable, may invalidate the user's compliance with the AAI Rule for CERCLA liability protection in the future.

6 SITE RECONNAISSANCE AND KEY PERSONNEL INTERVIEW(S)

A site visit to observe site conditions was conducted by Mr. Mathew Raithel of Haley & Aldrich, Inc. on 23 through 25 May, 3 June, 6 June, 11 July, and 6 September 2011. Access to the Proposed Project area was provided by SDG&E. Haley & Aldrich observed the exterior portions of the Proposed Project area, including the property boundaries, and observed adjoining property conditions from the Proposed Project area boundaries and/or public thoroughfares. The Proposed Project area does not contain buildings or structures other than the power lines and poles. Portions of the Proposed Project area traverse terrain that was not assessable during the site visit. In these areas, the Proposed Project area was viewed from public roadways and during a helicopter tour conducted on 11 July 2011. As stated earlier, access to the portion of C442 south of Interstate-8 was not provided.

An interview with Mr. Robert Hawkins of the United States Forest Service was conducted on 9 June 2011. Mr. Hawkins was not aware of storage or use of chemicals or petroleum products at the Proposed Project area. Mr. Hawkins was not aware of pesticide or herbicide application at the Proposed Project area during the past decade, and that vegetation was removed manually when needed at the Proposed Project area. He did not have knowledge of pesticide or herbicide application prior to the past decade. Mr. Hawkins was not aware of incidents of leaking pole mounted transformers at the Proposed Project area. He was not aware of spills or releases of chemicals or petroleum products at the Proposed Project area, with the exception of one incident. Heavy equipment batteries were observed few years ago on the Proposed Project area on TL 625 near Lions Valley Road. He indicated that the casings to the batteries were not cracked, and there was no evidence that liquid leaked from the batteries to the ground surface. Mr. Hawkins indicated that SDG&E subsequently removed the batteries from the Proposed Project area.

An interview with Mr. Jim Vanlandingham of SDG&E was conducted on 25 May 2011. Mr. Vanlandingham is the Electric Construction Supervisor for the Proposed Project area powerlines. Mr. Vanlandingham was not aware of any was not aware of any storage, use, or releases of hazardous substances or petroleum projects along the Proposed Project area. He indicated that transformers would not be located along the transmission lines but are located along the circuit lines; he indicated that these transformers do not store PCBs.

The findings of the site visit and interviews are discussed below. Site photographs are included in Appendix B.

ASTM E 1527-05 Standard Section 10.8 requires that, prior to the site visit, the current Proposed Project area owner or key site manager and user, if different from the current owner or key site manager, be asked if there are any helpful documents that can be made available for review. These consist of environmental site assessment reports, audits, permits, tank registrations, Material Safety Data Sheets, Community Right-to-Know plans, safety plans, hydrogeologic or geotechnical reports, or hazardous waste generator reports. We made such a request and were not provided with any such documents.

6.1 Proposed Project area Observations

6.1.1 Current Use of the Property

The Proposed Project area is currently used as an easement for SDG&E transmission and distribution power lines.

6.1.2 General Description of Structures

Other than the power line poles and approximately 20 residences located within the power line rights-of-way, there are no structures located along the Proposed Project area.

6.1.3 Potable Water Supply and Sewage Disposal System or Septic Systems

The Proposed Project area does not utilize a potable water supply, sewage disposal, or septic system.

6.1.4 Use of Petroleum Products and Hazardous Materials

Evidence of the use of petroleum products or hazardous materials was not observed at the subject site during the site visit, with one exception. TL 682 traverses through orchards, and smudge pots used to provide heat to the orchards in the winter months were observed at these orchards. These smudge pots likely use a petroleum product.

6.1.5 Storage of Petroleum Products and Hazardous Materials (Storage Tanks, Drums)

Evidence of the storage of petroleum products or hazardous materials was not observed at the subject site during the site visit.

6.1.6 Disposal of Petroleum Products and Hazardous Materials

Evidence of the disposal of petroleum products or hazardous materials was not observed at the subject site during the site visit.

6.1.7 Storage Tanks

Evidence of the storage tanks was not observed at the subject site during the site visit, with the following exception. An aboveground storage tank (AST) was observed on apparently bare earth along TL 682 during a helicopter tour over the Proposed Project area. The AST was located next to a residence. Evidence of staining or releases beneath the AST was not observed during the helicopter tour.

6.1.8 Odors

Evidence of unusual odors was not observed at the Proposed Project area during the site visit.

6.1.9 PCBs Associated with Electrical or Hydraulic Equipment

Evidence of PCBs associated with electrical or hydraulic equipment was not observed at the subject site during the site reconnaissance. As stated earlier, Mr. Vanlandingham indicated that transformers located along the distribution lines do not contain PCBs.

6.1.10 Unidentified Substance Containers

Evidence of unidentified substance containers was not observed at the subject site during the site visit.

6.1.11 Heating and Cooling System

Evidence of heating and cooling systems was not observed at the Proposed Project area during the site visit. There are no buildings at the Proposed Project area.

6.1.12 Stains or Corrosion on Floors, Walls, or Ceilings

Evidence of stains or corrosion on floors, walls, or ceilings was not observed at the Proposed Project area during the site visit. There are no buildings at the Proposed Project area.

6.1.13 Floor Drains and Sumps

Evidence of floor drains and sumps was not observed at the Proposed Project area during the site visit. There are no buildings at the Proposed Project area.

6.1.14 Hydraulic Elevators

Evidence of hydraulic elevators not observed at the Proposed Project area during the site visit. There are no buildings at the Proposed Project area.

6.1.15 Vehicle Maintenance Lifts

Evidence of vehicle maintenance lifts was not observed at the Proposed Project area during the site visit. There are no buildings at the Proposed Project area.

6.1.16 Emergency Generators and Sprinkler System Pumps

Evidence of emergency generators or sprinkler system pumps was not observed at the Proposed Project area during the site visit.

6.1.17 Catch Basins

Evidence of catch basins was not observed at the Proposed Project area during the site visit.

6.1.18 Dry Wells

Evidence of dry wells was not observed at the Proposed Project area during the site visit.

6.1.19 Pits, Ponds, Lagoons, and Pools of Liquid

The Proposed Project area traverses through the following lakes: Lake Henshaw (TL 682), Loveland Reservoir (TL 625), and Barrett Lake (C157). Evidence of other pits, ponds, lagoons, or pools of liquid were not observed at the Proposed Project area during the site visit.

6.1.20 Stained Soil or Pavement

Evidence of stained soil or pavement was not observed at the Proposed Project area during the site visit.

6.1.21 Stressed Vegetation

Evidence of stressed vegetation was not observed at the Proposed Project area during the site visit.

6.1.22 Solid Waste and Evidence of Waste Filling

An area of concrete building debris was observed in a wash area near the corner of Mountain Empire High School at pole P45477.

6.1.23 Wastewater and Stormwater Discharge

Evidence wastewater or stormwater discharge was not observed at the Proposed Project area during the site visit.

6.1.24 Monitoring, Water Supply, or Irrigation Wells

Evidence of monitoring, water supply, or irrigation wells was not observed at the Proposed Project area during the site visit.

6.2 Adjoining Property Observations

Properties adjoining the Proposed Project area are mostly vacant, undeveloped land.

The Proposed Project area traverses adjacent to the following:

- Barrett Camp (honor school);
- Mountain Empire High School;
- Nurseries/Orchards on TL 682;
- Campsites on Mount Laguna;
- Campsites on Lake Morena;
- Pine Valley – restaurant, general store, gasoline service station;
- La Jolla Indian Reservation;
- Rincon Indian Reservation;
- Campo Indian Reservation;
- Lake Henshaw;

- Loveland Reservoir; and
- Barrett Lake.

The Proposed Project area traverses adjacent to the following roadways:

- Interstate 8;
- Old Highway 80;
- Buckmann Springs Road;
- Corral Canyon Road;
- Lake Morena Drive;
- Japatul Road;
- Lions Valley Road;
- Barrett Camp Road;
- Boulder Creek Road;
- State Highway 76;
- State Highway 79; and
- Sunrise Highway.

7 FINDINGS AND CONCLUSIONS

Haley & Aldrich, Inc. (Haley & Aldrich) has performed a Phase I environmental site assessment (Phase I assessment) of the Cleveland National Forest Electric Safety and Reliability Project property (herein referred to as the “Proposed Project area”) in San Diego County, California. The scope of work is described and conditioned by mutually accepted agreement dated 6 April 2011. This Phase I assessment was performed in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) E 1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E 1527-05 Standard) as referenced in 40 Code of Federal Regulations (CFR) Part 312 [the All Appropriate Inquiries (AAI) Rule]. Deviations from this Standard, and/or data gaps and their significance are described in section 1.5 of this report. Our conclusions are intended to help the user evaluate the “business environmental risk” associated with the Proposed Project area, as defined in the ASTM E 1527-05 Standard and discussed in section 1.1 of this report.

The objective of a Phase I assessment is to identify known and suspect “recognized environmental conditions” (RECs), historical RECs (HRECs), and *de minimis* conditions associated with the Proposed Project area, as defined in the ASTM E 1527-05 Standard and in section 1.1 of this report.

The following data gaps were identified during the performance of this Phase I assessment.

- Access to the portion of C442 south of Interstate-8 was not provided. Ms. Molly Dana of SDG&E visited this portion of C442 in June 2011 and indicated that the property was undeveloped ranch land on privately owned property. She did not observe use, storage, or release of hazardous materials or petroleum products.
- SDG&E did not provide files or previous reports pertaining to the Proposed Project area. However, according to personnel interviewed, use, storage, or release of hazardous materials or petroleum products has not occurred on the Proposed Project area.

Since the inaccessible property was reportedly undeveloped ranch land, and since SDG&E did have knowledge of use, storage, or release of hazardous materials or petroleum products at the Proposed Project area, these data gaps are considered insignificant.

Based on the results of this Phase I Environmental Site Assessment, our findings are as follows:

KNOWN OR SUSPECT RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E 1527-05 Standard defines an REC as “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property.” A material threat is defined by the ASTM E 1527-05 Standard as “a physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment.” Consistent with ASTM E 1527-05 Section 12.5 (Report Format), and for the purposes of this assessment, those RECs that have been identified as being present with respect to the Proposed Project area are referred to as Known Recognized Environmental Conditions (KRECs), and those RECs that have been identified

as being likely present with respect to the Proposed Project area are referred to as Suspect Recognized Environmental Conditions (SRECs).

This Phase I assessment has revealed evidence of one KRECs and no SRECs in connection with the Proposed Project area.

Our opinion of the potential impacts of the REC(s) identified in this Phase I assessment is as follows:

Known Recognized Environmental Conditions

KREC #1: Impacted groundwater from the adjacent Pine Valley Trailer Park

Explanation: A release of gasoline to soil and groundwater from two underground storage tanks occurred at the Pine Valley Trailer Park, located at 27521 and 27541 Old Highway 80, Guatay, CA. Groundwater was reportedly encountered between 15 and 20 feet below ground surface at this site. Maximum concentrations in groundwater beneath this site during March 2010 are as follows: total petroleum hydrocarbons (TPH) gasoline = 9,500 micrograms per liter (ug/L), TPH diesel = 19,000 ug/L, benzene = 390 ug/L, toluene = 410 ug/L, ethylbenzene = 460 ug/L, xylenes = 1,790 ug/L. High-vacuum dual-phase extraction remediation was conducted at the site between 2004 and 2007, which removed over 10,000 pounds of petroleum hydrocarbons from the site. Based on the existing groundwater data, it appears the concentrations of TPH, benzene, ethylbenzene, toluene, and xylenes are present beneath Old Highway 80 and therefore beneath the Proposed Project area (between poles Z173105 and Z173109). Records reviewed at DEH indicated that approximately 36 cubic yards of petroleum impacted soil remains south of the former fuel dispenser.

HISTORICAL RECs

The ASTM E 1527-05 Standard defines an HREC as an environmental condition “which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently.”

This Phase I assessment has revealed no evidence of HRECs in connection with the Proposed Project area.

DE MINIMIS CONDITIONS

The ASTM E 1527-05 Standard defines *de minimis* conditions as those conditions which “do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.” The ASTM E 1527-05 Standard notes that “conditions determined to be *de minimis* are not recognized environmental conditions.”

This Phase I assessment has revealed no evidence of *de minimis* conditions in connection with the Proposed Project area except for the following:

The western portion of TL 682 traverses through orchards (between poles Z115118 and Z118024), and smudge pots used to provide heat to the orchards in the winter months were observed at these orchards. These smudge pots likely use petroleum products. It is unknown if spills or releases may have occurring during the operation of these smudge pots.

SUMMARY AND RECOMMENDATIONS

In summary, one REC and one *de minimis* condition were identified during this Phase I assessment. We recommend that properly trained environmental personnel be present to observe and field screen soil and groundwater that may be encountered during excavation activities at TL 682 between poles Z115118 and Z118024. Engineering plans for construction near the Pine Valley Trailer Park indicate that soil will not be excavated greater than 12 feet below ground surface. Therefore, we recommend that properly trained environmental personnel be present if excavation activities at TL-629 between poles Z173105 and Z173109 exceed 12 feet below ground surface to observe and field screen groundwater that may be encountered. Soil and groundwater in each of these areas should be observed for discoloration and odors and screened with a hand held photoionization detector (PID). If soil or groundwater is encountered with suspected contamination, soil and/or groundwater samples should be collected and analyzed by a California-certified environmental laboratory to properly characterize the soil or groundwater for off-site disposal, as deemed necessary.

8 CREDENTIALS

This Phase I assessment report was prepared by Mr. Mathew T. Raithel, under the direct supervision of Mr. Mehdi Miremadi, who served as the Project Manager and Officer-in-Charge of this project, respectively. Qualification information for the project personnel is provided below.

MATHEW T. RAITHEL **Senior Scientist**

This report was prepared by Mathew Raithel, who served as the project scientist for this project. Mr. Raithel has over fourteen years experience managing and conducting Phase I and Phase II environmental site assessments and investigations throughout Southern California and Arizona, including commercial and industrial facilities.

Mehdi Miremadi **Officer-in-Charge**

Mr. Miremadi has over 28 years of experience in investigation, remediation, and closure of contaminated sites with particular focus on redevelopment of large contaminated industrial properties. Mr. Miremadi is currently the program manager for redevelopment of over 10 large industrial properties in Southern California involving soil excavation, facility decommissioning, demolition, and construction oversight. He specializes in remedial investigations/feasibility studies, evaluation of remedial alternatives, hydrogeologic investigations, health risk assessment, conceptual and detail design of soil and groundwater remediation systems, contaminant fate and transport assessment and modeling, regulatory compliance, and water resources studies, remediation of sites contaminated with chlorinated hydrocarbons and metals. Mr. Miremadi has also been retained as an expert in the area of degradation of chlorinated hydrocarbons and their fate and transport in the subsurface.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

The Map ID column refers to the Map ID-Focus Map(s) of the listed site.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

FEDERAL RECORDS

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/11/2011 has revealed that there are 4 RCRA-SQG sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>

MLTS: The Material Licensing Tracking System is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and are subject to NRC licensing requirements.

A review of the MLTS list, as provided by EDR, and dated 03/18/2010 has revealed that there is 1 MLTS site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
CALIFORNIA ARMY NATIONAL GUARD	3080 BUCKMAN SPRINGS RO	66-49

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/14/2010 has revealed that there are 13

Notify 65: Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

A review of the Notify 65 list, as provided by EDR, and dated 10/21/1993 has revealed that there is 1 Notify 65 site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
POWER POLE ON E/SIDE	10368 OAK GROVE RD	19-27

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2009 has revealed that there are 26 HAZNET sites within the searched area.

FType: Drinking Water Aquifer Impacted
FStatus: 3
Date: 6/12/1997
Date Began: 6/12/1997

9 SANTA YSABEL (FORMER CHEVRON)
30350 HWY 78
SANTA YSABEL, CA 92070

LUST S103723466
N/A

LUST:

Region: STATE
Global Id: T0607302306
Latitude: 33.109773133
Longitude: -116.6731446
Case Type: LUST Cleanup Site
Status: Open - Remediation
Status Date: 2005-03-28 00:00:00
Lead Agency: SAN DIEGO RWQCB (REGION 9)
Case Worker: SM
Local Agency: Not reported
RB Case Number: 9UT3537
LOC Case Number: H03198-002
File Location: Regional Board
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: Not reported

MAP FINDINGS
FOCUS MAP 27

Map ID	Site	Database(s)	EPA ID Number
	OAK GROVE FISH FARMS (Continued) Agency Telephone: Not reported Agency Type: Private SIC Code: 279 SIC Code 2: 4951 Primary Waste: Domestic Sewage Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category. Secondary Waste: Filter Backwash Brine Waters Secondary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category. Design Flow: 1 Baseline Flow: 0 Reclamation: No reclamation requirements associated with this facility. POTW: The facility is not a POTW. Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality. Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds. 	OAK GROVE FISH FARMS (Continued) water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category. Design Flow: 1 Baseline Flow: 0 Reclamation: No reclamation requirements associated with this facility. POTW: The facility is not a POTW. Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality. Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds. Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSLEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

	Environmental Interest/Information System		
		RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ORC placed in RW wells after wells sampled. 3/12/04 Wells sampled MW-3, 4, 5, 6, 7, 9 4/15/04 Wells sampled MW-3, 4, 5, 6, 7, 9 5/19-20/04 MW-2, 3, 4, 5, 6, 7, 8, 9, 10, 12, 13, 15, 16, 17 (FP in MW1, MW2, RW5b, 6, 7, 13, 14, 17, 19, 24, C3) Highest dissolved benzene concentrations were in wells MW-3, 4, 5: Benzene (ug/l)/Dissolved Oxygen (mg/l) by date Well 1/2004* 3/2004** 4/2004* 5/2004** MW-3 1400/1.3 860/2.1 1200/4.74 880/4.37 MW-4 3200/0.1 2200/1.95 2400/1.69 3100/3.66 MW-5 3800/0.2 2700/1.75 3000/0.87 2100/3.19 *Before ORC added **After ORC added The table shows that benzene decreased slightly (possibly due to the presence of FP), but that dissolved oxygen increased significantly. This suggests that diffusion and or dispersion of oxygen occurred, suggesting that chemical oxidation could be useful. 6/8/2004 Work Plan for HVDPE pilot test approved. HVDPE proposed due to the unexpected occurrence of FP in numerous wells. Historical FP: MW-1 had FP as early as Jan. 1998; May 2002, FP in wells MW-1, RW12, 13, 19, 24; and May 2004, FP in wells MW1, MW2, RW5b, 6, 7, 13, 14, 17, 19, 24, C3 8/17-19/04 Monitoring wells MW-1 thru MW-17 sampled. 9/29/04- 7-day HVDPE Pilot Test conducted. 10/6/04 2800 Gal. GW removed, none disposed used as makeup for liquid ring pump. 455 Gal. Gasoline removed and treated by thermal oxidation. 12/16/04 Results of pilot test submitted along with a work plan proposing up to four 30-day HVDPE events. 12/30/04	LUST UST	U003789810 N/A

PINE VALLEY TRAILER PARK (Continued)

U003789810

Monitoring wells MW-1 thru MW-17 sampled. 1/24/05 Work Plan approved for up to four 30-day HVDPE events. 4/11/05- 31-day HVDPE event: 5/12/05 37,370 Gal. GW removed 8,370 Gal. used as makeup for liquid ring pump 29,000 Hauled as non-haz. Waste 353 Gal. Gasoline removed and treated by thermal oxidation. 6/26/06 Monitoring wells MW-1 thru MW-17 sampled. 7/6/06 Meeting with consultant and RP, we requested work plan for sampling wells (including remediation wells with FP) before each HVDPE event. 7/31/06 Work Plan approved for sampling wells. 9/20-22/06 Monitoring wells MW-1 thru MW-17 and remediation wells RW-5b, 6, 7, 12, 13, 14, 17, 19, and 24 sampled. 10/16/06 Cleanup Fund (Ramesh) denies pre-approval request to do remaining HVDPE events (3 events), citing that the technology's performance and effectiveness seem unremarkable for the site. Ramesh wants chemical oxidation researched and used. 10/31/06 Chuck Houser of PETRA sends an E-mail to Ramesh requesting they be allowed to do another HVDPE event while they research chemical oxidation. 11/7/06 Ramesh and Steve Sager of the Cleanup Fund, at the request of Alan Patton, call John O'Flynn (RP) to explain their denial of his pre-approval

Environmental Interest/Information System

SDWIS [WS] (Safe Drinking Water Information System (Water System)). Water Systems can have one or more water system facilities. The water system will purchase water from several facilities. Drinking water information is stored in EPA's SDWIS, which contains information about public water systems and their violations of EPA's regulations for safe drinking water. These statutes and accompanying regulations establish maximum contaminant levels (MCL), treatment techniques, and monitoring and reporting requirements to ensure that water provided to customers is safe for human consumption.

Case Worker:	TVS
Local Agency:	SAN DIEGO COUNTY LOP
RB Case Number:	9UT4023
LOC Case Number:	H13153-001
File Location:	Local Agency
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	Release occurred from former underground fuel tanks. Site is located near municipal production wells in a groundwater dependent basin. Geologic conditions on the site consist of thin alluvial material overlying decomposed granodiorite which transitions into unwathered fractured rock. Verification monitoring indicates that the plume is stable and concentrations are decreasing.

Agency Contact:	CORY BINNS
Agency Telephone:	6196883626
Agency Type:	State
SIC Code:	1611
SIC Code 2:	Not reported
Primary Waste:	Stormwater Runoff
Primary Waste Type:	Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.

MAP FINDINGS
FOCUS MAP 41

Map ID	Site	Database(s)	EPA ID Number
	DESCANSO MAINTENANCE FACILITY (Continued) POTW: The facility is not a POTW. Treat To Water: Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances. Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.		S105558045

	CA WDS: Facility ID: San Diego 371017939 Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping. Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements. NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board Subregion: 9 Facility Telephone: 6194739022 Facility Contact: CARROLL STEPHEN Agency Name: MOUNTAIN EMPIRE USD Agency Address: 3291 Buckman Springs Rd Agency City,St,Zip: Pine Valley 919624003 Agency Contact: CARROLL STEPHEN Agency Telephone: 6194739022 Agency Type: ? SIC Code: 0 SIC Code 2: Not reported Primary Waste: Not reported Primary Waste Type: Not reported Secondary Waste: Not reported Secondary Waste Type: Not reported Design Flow: 0 Baseline Flow: 0 Reclamation: Not reported POTW: Not reported Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality. Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds. Facility ID: San Diego 000000063 Facility Type: Municipal/Domestic - Facility that treats sewage or a mixture of predominantly sewage and other waste from districts, municipalities, communities, hospitals, schools, and publicly or privately owned systems (excluding individual subsurface leaching systems disposing of less than 1,000 gallons per day). Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements. NPDES Number: Not reported Subregion: 9 Facility Telephone: Not reported

SECTION 4 - EPA WASTE CODES

There are no epa codes to report for this search area.

Section 5

Databases Searched and Update Dates

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 04/13/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 07/25/2011
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A

Number of Days to Update: 62	Next Scheduled EDR Contact: 07/25/2011
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56

Source: EPA
Telephone: 202-564-4267
Last EDR Contact: 05/16/2011
Next Scheduled EDR Contact: 08/29/2011
Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011
Date Data Arrived at EDR: 03/01/2011

Number of Days to Update: 62

Source: EPA
Telephone: 703-412-9810
Last EDR Contact: 06/14/2011
Next Scheduled EDR Contact: 09/12/2011
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/25/2011
Date Data Arrived at EDR: 03/01/2011

Next Scheduled EDR Contact: 09/12/2011
Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2011

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/11/2011

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/11/2011
Date Data Arrived at EDR: 04/05/2011
Date Made Active in Reports: 05/02/2011
Number of Days to Update: 27

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Data Release Frequency: Quarterly

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/19/2006

Data Release Frequency: No Update Planned

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/14/2010	Source: EPA
Date Data Arrived at EDR: 04/16/2010	Telephone: (415) 947-8000
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 06/14/2011
Number of Days to Update: 41	Next Scheduled EDR Contact: 09/26/2011

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

Number of Days to Update: 36	Next Scheduled EDR Contact: 07/25/2011
	Data Release Frequency: Varies

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/01/2007	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 11/19/2008	Telephone: 202-307-1000

Next Scheduled EDR Contact: 07/11/2011
Data Release Frequency: No Update Planned

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 03/18/2011
Date Data Arrived at EDR: 03/18/2011

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.
