Subject: Minor Project Refinement Request (MPRR) #21—Interset Pole on Transmission Line 682— Cleveland National Forest Power Line Replacement Projects (Application No. 12-10-009)

Dear Ms. Reynolds:

On August 23, 2018, San Diego Gas & Electric (SDG&E) submitted Minor Project Refinement Request (MPRR) #21 to the California Public Utilities Commission (CPUC), to modify components of Transmission Line (TL) 682 as described in the MPRR. In summary, SDG&E requested the following project refinements:

- A request to add a new 12 kilovolt (kV) interset pole (P259149) and an associated temporary pole work area along Phase III of TL682. The pole and temporary pole work area will be accessed using an existing, approved navigation access road and a newly identified dirt navigation access road. Minor vegetation clearing may be required for use of the temporary pole work area and for fire prevention.

The CPUC voted on May 26, 2016 to approve the Cleveland National Forest Power Line Replacement Projects (Decision 16-05-038) and a Notice of Determination was submitted to the State Clearinghouse (SCH#2013091070).

The Commission decision approving the Permit to Construct (PTC) authorizes Energy Division staff to approve requests by SDG&E for minor project refinements. The decision states that minor project refinements that may be necessary due to final engineering of the project may be approved so long as such minor project refinements are located within the geographic boundary of the study area of the EIR/EIS and do not, without mitigation, result in a new significant impact or a substantial increase in the severity of a previously identified significant impact based on the criteria used in the EIR/EIS; conflict with any mitigation measure or applicable law or policy; or trigger an additional permit requirement.

This letter documents the CPUC's thorough evaluation of all activities covered in MPRR #21 and that the changes requested in MPRR #21 are allowed pursuant to the Commission decision issuing the PTC. In accordance with the Mitigation Monitoring, Compliance, and Reporting Program, MPRR #21 was reviewed by CPUC to confirm that no new impacts or increase in impact severity would result from the requested activities.

Ms. Kirstie Reynolds
