## **SOIL MAP UNITS**

Map Unit Name Taxonomy	Map Unit Reference Code	Drainage Class	Depth to Restrictive Layer (cm)	Hydric Soils
<b>Modoc County</b>				
Alturas loam	103	Moderately well drained	107	No
Balman loam	104	Somewhat poorly drained	>200	Yes
Barnard gravelly loam, 0 to 9 percent slopes	106	Well drained	91	No
Barnard cobbly loam, 0 to 9 percent slopes	107	Well drained	91	No
Barnard clay loam, 9 to 15 percent slopes	108	Well drained	84	No
Bieber gravelly loam, 0 to 9 percent slopes	109	Well drained	46	No
Bieber cobbly loam, 2 to 15 percent slopes, eroded	111	Well drained	41	No
Buntingville clay loam, 0 to 2 percent slopes	112	Somewhat poorly drained	>200	No
Calimus loam, 0 to 2 percent slopes, high precip, mlra 21	114	Well drained	>200	No
Calimus loam, 2 to 9 percent slopes	115	Well drained	>200	No
Calimus gravelly loam, 2 to 5 percent slopes	116	Well drained	>200	No
Casuse sandy loam, 2 to 9 percent slopes	118	Well drained	30	No
Daphnedale stony loam, 30 to 50 percent slopes	121	Well drained	89	No
Daphnedale very cobbly loam, deep variant, 5 to 15 percent slopes	123	Well drained	>200	No
Daphnedale very cobbly loam, deep variant, 30 to 50 percent slope s	124	Well drained	>200	No
Delma loam, 15 to 30 percent slopes, eroded	126	Well drained	36	No
Delma loam, 30 to 50 percent slopes	127	Well drained	46	No
Delma cobbly loam, 0 to 9 percent slopes	128	Well drained	46	No

<b>Map Unit Name Taxonomy</b>	<b>Map Unit Reference Code</b>	<b>Drainage Class</b>	<b>Depth to Restrictive Layer (cm)</b>	<b>Hydric Soils</b>
Delma cobbly loam, 9 to 30 percent slopes	129	Well drained	46	No
Deven-rock outcrop complex, 2 to 30 percent slopes	132	Well drained	41	No
Donica gravelly clay loam, 2 to 9 percent slopes	133	Somewhat excessively drained	>200	No
Drews loam, 0 to 5 percent slopes, goose lake valley, southern part, mlra 21	134	Well drained	>200	No
Drews gravelly loam, 0 to 9 percent slopes	135	Well drained	>200	No
Drews gravelly loam, 15 to 30 percent slopes	136	Well drained	>200	No
Drews clay loam, 2 to 5 percent slopes	137	Well drained	>200	No
Drews clay loam, wet, 0 to 2 percent slopes	138	Well drained	>200	No
Gravel pits	143	N/A	>200	No
Jenny silty clay, 0-5% slopes	145	Moderately well drained	>200	No
Karcad-ninekar complex, 0 to 9 percent slopes	147	Well drained	53	No
Kinkel loam, 2 to 15 percent slopes	148	Well drained	135	No
Ladd sandy loam, 0 to 2 percent slopes	150	Well drained	>200	No
Ladd sandy loam, 2 to 9 percent slopes	151	Well drained	>200	No
Lakeview loam, 0 to 2 percent slopes, pit river area, mlra 21	152	Moderately well drained	>200	No
Lorella loam, 5 to 30 percent slopes	155	Well drained	38	No
Lorella loam, 5 to 30 percent slopes, eroded	156	Well drained	38	No
Lorella loam, 30 to 50 percent slopes	157	Well drained	38	No
Lorella cobbly clay loam, 30 to 50 percent slopes	159	Well drained	38	No
Modoc sandy loam, 0 to 9 percent slopes	168	Well drained	76	No

<b>Map Unit Name Taxonomy</b>	<b>Map Unit Reference Code</b>	<b>Drainage Class</b>	<b>Depth to Restrictive Layer (cm)</b>	<b>Hydric Soils</b>
Modoc gravelly loam, 0 to 9 percent slopes	169	Well drained	76	No
Pasquetti silty clay loam, partially drained	173	Poorly drained	>200	Yes
Pasquetti silty clay loam, drained	174	Poorly drained	>200	Yes
Pineal silt loam	175	Moderately well drained	61	No
Pit silty clay loam, 0 to 2 percent slopes	176	Somewhat poorly drained	>200	Yes
Pit clay, 2 to 5 percent slopes	177	Somewhat poorly drained	>200	Yes
Puls extremely stony clay loam, 0 to 9 percent slopes	179	Well drained	23	No
Rock outcrop-lithic xerorthents complex	183	Excessively drained	>200	No
Rumbo loam, 0 to 2 percent slopes	185	Moderately well drained	>200	No
Salisbury very fine sandy loam, 0 to 9 percent slopes	187	Well drained	25	No
Salisbury gravelly loam, 0 to 9 percent slopes	188	Well drained	25	No
Salisbury clay loam, 9 to 15 percent slopes	190	Well drained	25	No
Thoms-exel complex	192	Well drained	33	No
Tuff outcrop-casuse, eroded complex, 2 to 15 percent slopes	193	Well drained	0	No
Woodcock stony loam, 30 to 50 percent slopes	199	Well drained	117	No
Xerofluvents, occasionally flooded	200	Somewhat excessively drained	>200	No
Drews gravelly loam, 0 to 9 percent slopes	135ma	Well drained	>200	No
Kinkel loam, 2 to 15 percent slopes	148ma	Well drained	135	No
Lorella cobbly clay loam, 30 to 50 percent slopes	159ma	Well drained	38	No
<b>Sierra County</b>				

<b>Map Unit Name Taxonomy</b>	<b>Map Unit Reference Code</b>	<b>Drainage Class</b>	<b>Depth to Restrictive Layer (cm)</b>	<b>Hydric Soils</b>
Northmore sandy loam, 4 to 8 percent slopes	202	Well drained	>200	No
Northmore sandy loam, 8 to 15 percent slopes	203	Well drained	>200	No
<b>Lassen County*</b>				
Galeppi sandy loam, 2 to 5 percent slopes	215	Well drained	>200	No
Galeppi sandy loam, 5 to 30 percent slopes	216	Well drained	>200	No
Galeppi sandy loam, 8 to 15 percent slopes	671	Well drained	>200	No
Galeppi loamy coarse sand, 2 to 5 percent slopes	Gab	Well drained	>200	No
Galeppi loamy coarse sand, 5 to 30 percent slopes	Gae	Well drained	>200	No
Reba sandy loam, 2 to 30 percent slopes	Ree	Well drained	25	No
Rough broken land	Ryf	Excessively drained	>200	No
Saralegui sandy loam, 2 to 15 percent slopes	Sad	Well drained	>200	No
Ardep sandy loam, 0 to 2 percent slopes	104	Well drained	>200	No
Artray sandy loam, 2 to 9 percent slopes	109	Poorly drained	>200	Yes
Badenaugh stony sandy loam, 5 to 15 percent slopes	110	Well drained	>200	No
Barnard stony sandy loam, 2 to 15 percent slopes	114	Well drained	51	No
Bieber cobbly loam, 2 to 9 percent slopes	116	Well drained	46	No
Blickenstaff sandy loam, 0 to 2 percent slopes	120	Moderately well drained	>200	No
Honeylake clay loam, 0 to 1 percent slopes	121	Moderately well drained	>200	No
Bobert sandy loam, 0 to 2 percent slopes	122	Moderately well drained	>200	No
Bonta coarse sandy loam, 9 to 15 percent slopes	124	Well drained	91	No

<b>Map Unit Name Taxonomy</b>	<b>Map Unit Reference Code</b>	<b>Drainage Class</b>	<b>Depth to Restrictive Layer (cm)</b>	<b>Hydric Soils</b>
Buckbay-orhood- fredonyer association, 5 to 30 percent slopes	134	Well drained	74	No
Calpine sandy loam, 0 to 2 percent slopes	143	Well drained	>200	No
Calpine sandy loam, 2 to 5 percent slopes	144	Well drained	>200	No
Calpine, warm, 0 to 15 percent slopes	145	Well drained	>200	No
Cewat-mcconnel-toulon association, 2 to 15 percent slopes	149	Well drained	53	No
Chimney gravelly loamy coarse sand, 2 to 9 percent slopes	152	Somewhat excessively drained	>200	No
Chimney-waterman association, 9 to 30 percent slopes	156	Somewhat excessively drained	>200	No
Cleghorn sandy loam, 2 to 5 percent slopes	159	Well drained	>200	No
Cochran very cobbly loam, 5 to 15 percent slopes	161	Well drained	>200	No
Corral sandy loam, 5 to 15 percent slopes	164	Well drained	30	No
Corral-glenbrook complex, 15 to 50 percent slopes	168	Well drained	30	No
Devada-petescreek- fiddler association, 2 to 30 percent slopes	178	Well drained	38	No
Devada-rock outcrop association, 2 to 50 percent slopes	179	Well drained	38	No
Dryvalley silt loam, sandy substratum, 0 to 2 percent slopes	182	Well drained	>200	Yes
Dryvalley-playas complex, 0 to 2 percent slopes	183	Well drained	>200	Yes
Fiddler-orhood- petescreek association, 5 to 30 percent slopes	197	Well drained	48	No
Fivesprings-longcreek association, 9 to 30 percent slopes	198	Well drained	58	No
Fluvents-riverwash complex, 0 to 1 percent slopes	203	Poorly drained	>200	Yes

<b>Map Unit Name Taxonomy</b>	<b>Map Unit Reference Code</b>	<b>Drainage Class</b>	<b>Depth to Restrictive Layer (cm)</b>	<b>Hydric Soils</b>
Fordney loamy fine sand, wet, 0 to 2 percent slopes	206	Excessively drained	>200	No
Fortsage fine sandy loam, 0 to 2 percent slopes	209	Moderately well drained	>200	No
Fortsage silt loam, 0 to 2 percent slopes	210	Moderately well drained	>200	No
Galeppi sandy loam, 2 to 5 percent slopes	215	Well drained	>200	No
Galeppi sandy loam, 5 to 30 percent slopes	216	Well drained	>200	No
Gerlach cobbly silty clay, 2 to 9 percent slopes	221	Well drained	>200	No
Gerlach-ravendale complex, 0 to 4 percent slopes	222	Well drained	>200	No
Glenbrook-graufels- rock outcrop complex, 30 to 60 percent slopes	229	Somewhat excessively drained	31	No
Graufels-glenbrook complex, 5 to 30 percent slopes	230	Somewhat excessively drained	56	No
Herjun loamy sand, 0 to 2 percent slopes	236	Moderately well drained	>200	No
Honlak loam, 0 to 2 percent slopes	241	Somewhat poorly drained	>200	No
Horsecamp-brubeck association, 2 to 9 percent slopes	243	Well drained	117	No
Humboldt silty clay, 0 to 1 percent slopes, occasionally flooded	247	Poorly drained	>200	No
Humboldt silty clay loam, saline, 0 to 2 percent slopes, occasionally flooded	249	Poorly drained	>200	No
Indiano-searles association, 5 to 30 percent slopes	254	Well drained	69	No
Lakeview loam, 0 to 2 percent slopes, madeline plains area, mlra 21	264	Moderately well drained	>200	No
Longcreek-devada- rubble land complex, 9 to 30 percent slopes	273	Well drained	46	No
Loomis-fivesprings association, 5 to 30 percent slopes	276	Well drained	28	No
Mcconnel-mottsville complex, 2 to 9 percent slopes	283	Somewhat excessively drained	>200	No

<b>Map Unit Name Taxonomy</b>	<b>Map Unit Reference Code</b>	<b>Drainage Class</b>	<b>Depth to Restrictive Layer (cm)</b>	<b>Hydric Soils</b>
Modoc-truax complex, 0 to 2 percent slopes	285	Well drained	71	No
Mottsville loamy coarse sand, 0 to 2 percent slopes	286	Excessively drained	>200	No
Mottsville loamy coarse sand, 2 to 9 percent slopes	287	Excessively drained	>200	No
Mottsville gravelly loamy coarse sand, 0 to 2 percent slopes	288	Excessively drained	>200	No
Mottsville gravelly loamy coarse sand, 2 to 9 percent slopes	289	Excessively drained	>200	No
Mottsville gravelly loamy coarse sand, 9 to 15 percent slopes	290	Excessively drained	>200	No
Mottsville gravelly loamy coarse sand, 15 to 30 percent slopes	291	Excessively drained	>200	No
Mottsville-galeppi association, 15 to 50 percent slopes	292	Excessively drained	>200	No
Pit clay, 0 to 2 percent slopes	324	Poorly drained	>200	Yes
Pits and dumps	325	N/A	>200	No
Plinco gravelly sandy loam, 0 to 2 percent slopes	327	Moderately well drained	>200	No
Plinco loam, 2 to 9 percent slopes	328	Moderately well drained	>200	No
Ravendale silty clay, 0 to 2 percent slopes	333	Moderately well drained	>200	No
Ravendale silty clay, 0 to 2 percent slopes, occasionally flooded	334	Moderately well drained	>200	No
Ravendale silty clay, 0 to 2 percent slopes, ponded	335	Moderately well drained	>200	No
Ravendale silty clay, saline, 0 to 1 percent slopes	336	Moderately well drained	>200	No
Rose creek loam, 0 to 1 percent slopes	341	Poorly drained	>200	No
Rose creek loam, sodic, 0 to 2 percent slopes	342	Poorly drained	>200	No
Rubble land-longcreek-fivesprings association, 30 to 60 percent slopes	344	Well drained	152	No
Saddlerock silty clay, 0 to 2 percent slopes	348	Poorly drained	>200	No

<b>Map Unit Name Taxonomy</b>	<b>Map Unit Reference Code</b>	<b>Drainage Class</b>	<b>Depth to Restrictive Layer (cm)</b>	<b>Hydric Soils</b>
Searles-devada- fivesprings association, 2 to 30 percent slopes	356	Well drained	74	No
Searles-orhood-devada association, 5 to 30 percent slopes	360	Well drained	74	No
Shinnpeak very cobbly loam, 2 to 15 percent slopes	361	Well drained	33	No
Smocreek silt loam, sodic, 0 to 2 percent slopes	362	Somewhat poorly drained	>200	No
Smocreek silty clay loam, 0 to 2 percent slopes	363	Somewhat poorly drained	>200	No
Springmeyer sandy loam, 0 to 5 percent slopes	365	Well drained	>200	No
Springmeyer sandy clay loam, 0 to 2 percent slopes	366	Well drained	>200	No
Standish fine sandy loam, 0 to 2 percent slopes	368	Well drained	>200	No
Susanville-smocreek complex, 0 to 2 percent slopes	372	Moderately well drained	>200	No
Termo-playas complex, 0 to 1 percent slopes	380	Moderately well drained	>200	No
Termo-springmeyer- smocreek complex, 0 to 2 percent slopes	381	Moderately well drained	>200	No
Truax sandy loam, 0 to 5 percent slopes	385	Well drained	127	No
Truckee loam, 0 to 2 percent slopes	386	Poorly drained	>200	No
Tunnison very cobbly clay, 2 to 9 percent slopes	388	Well drained	79	No
Tunnison-devada association, 2 to 9 percent slopes	390	Well drained	79	No
Verdico-chalco association, 2 to 30 percent slopes	395	Well drained	8	No
Zorravista loamy sand, 0 to 5 percent slopes	407	Excessively drained	>200	No
Water	409	N/A	>200	N/A

Note:

\* Some soil map units occur in both Sierra and Lassen Counties. Refer to Appendix A, Figures 2-1 through 2-33 for soils maps.  
cm= centimeter

OHWM

GPS point: \_\_\_\_\_

**Indicators**

- ☒ Change in average sediment texture  
☒ Change in vegetation species  
☒ Change in vegetation cover

- ☒ Break in bank slope  
☐ Other: \_\_\_\_\_  
☐ Other: \_\_\_\_\_

**Comments:**

Defined bed and bank feature. OHWM evidenced by change in sediment texture, break in bank slope, and changes in vegetation species and cover. Sampling point documents a perennial stream.

Floodplain unit:

- ☒ Low-Flow Channel ☐ Active Floodplain ☐ Low Terrace

GPS point: \_\_\_\_\_

**Characteristics of the floodplain unit**

Average sediment texture \_\_\_\_\_

Total veg cover: 3 % Tree: 0 % Shrub 0 % Herb 3 %

Community successional stage

- ☐ NA ☐ Mid (herbaceous, shrubs, saplings)  
☒ Early (herbaceous & seedling) ☐ Late (herbaceous, shrubs, mature trees)

**Indicators**

- ☐ Mudcracks  
☒ Ripples  
☒ Drift and/or debris  
☒ Presence of bed and bank  
☒ Benches

- ☐ Soil development  
☒ Surface relief  
☐ Other: \_\_\_\_\_  
☐ Other: \_\_\_\_\_  
☐ Other: \_\_\_\_\_

**Comments**

## WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Date: 8/21/2019  
 Applicant/Owner: Zayo Group State: California Sampling Point: SP 02-1 Feature ID: W01-1  
 Investigator(s): M. Oats, J. Ahn Section, Township, Range: 33, T46N, R14E  
 Local relief (hillside, terrace, etc.): Depression Local Relief (concave, convex, none): Concave Slope (%): 2  
 Subregion (LRR): D Lat: 41.79015 Long: -120.36928 Datum: NAD83  
 Soil Map Unit Name: (135) Drews gravelly loam, 0 to 9 percent slopes NWI classification: PEM

Are climatic / hydrologic conditions on the site typical for this time of year? Yes ☒ No ☐ (If no, explain in Remarks.)  
 Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No significantly disturbed? Are "Normal Circumstances" present? Yes ☒ No ☐  
 Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No naturally problematic? (If needed, explain any answers in Remarks.)

**SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.**

Hydrophytic Vegetation Present? Yes ☒ No ☐  
 Hydric Soil Present? Yes ☒ No ☐  
 Wetland Hydrology Present? Yes ☒ No ☐

Is the Sampled Area within a Wetland? Yes ☒ No ☐

**Evaluation of features designated "Other Waters"**

Characteristics: Type: \_\_\_\_\_ Width: \_\_\_\_\_ Substrate: \_\_\_\_\_  
 Indicators: Defined bed and bank: \_\_\_\_\_ Scour \_\_\_\_\_ OHWM Mapped \_\_\_\_\_  
 Feature Designation: Perennial \_\_\_\_\_ Intermittent \_\_\_\_\_ Ephemeral \_\_\_\_\_  
 Natural Drainage \_\_\_\_\_ Artificial Drainage \_\_\_\_\_ Navigable Water \_\_\_\_\_

Remarks: Wetland parameters are present as indicated by hydrology indicator (saturation and high water table), hydric soils (F3), and a dominance of hydrophytic vegetation.

**VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER**

<b>Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:</b>											
<b>Remarks:</b> Wetland hydrology indicators observed; high water table and saturation within 12 inches of the soil surface.											

## WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Sampling Point: 104-1

Feature ID: U101-1

Project/Site: Zayo Fiberoptic Interconnect Project

City/County: Modoc County

Sampling Date: 8/22/2019

Applicant/Owner: Zayo Group

State: California

Investigator(s): T. Kayatsky, Z. Buecker

Section, Township, Range: 16, T46N, R14E

Local relief (hillside, terrace, etc.): Road slope

Local Relief (concave, convex, none): Convex

Slope (%): 15

Subregion (LRR): D Lat: 41.82859

Long: -120.35366

Datum: NAD 83

Soil Map Unit Name: (159) Lorella cobbly clay loam, 30 to 50 percent slopes

NW1 classification: None

Are climatic / hydrologic conditions on the site typical for this time of year? Yes ☒ No ☐ (If no, explain in Remarks.)Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No significantly disturbed? ☐ Are "Normal Circumstances" present? Yes ☒ No ☐Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No naturally problematic? ☐ (If needed, explain any answers in Remarks.)**SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.**Hydrophytic Vegetation Present? Yes ☒ No ☐Hydric Soil Present? Yes ☐ No ☒Wetland Hydrology Present? Yes ☐ No ☒Is the Sampled Area  
within a Wetland?Yes ☐ No ☒**Remarks:** Upland pair point to W101-1; dominated by Distichlis spicata (FAC), however soil and hydrology indicators were not observed.**VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECCENDING ORDER**

Feature ID: U103-1

Project/Site: Zayo Fiberoptic Interconnect Project

City/County: Modoc County

Sampling Date: 8/23/2019

Applicant/Owner: Zayo Group

State: California

Investigator(s): T. Kayatsky, Z. Buecker, M. Oats

Section, Township, Range: 4, T46N, R14E

Local relief (hillside, terrace, etc.): Terrace

Local Relief (concave, convex, none): Convex

Slope (%): 2

Subregion (LRR): D Lat: 41.84958

Long: -120.35813

Datum: NAD83

Soil Map Unit Name: (179) Puls extremely stony clay loam, 0 to 9 percent slopes

NWI classification: None

Are climatic / hydrologic conditions on the site typical for this time of year? Yes ☒ No ☐ (If no, explain in Remarks.)Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No significantly disturbed? ☐ Are "Normal Circumstances" present? Yes ☒ No ☐Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No naturally problematic? ☐ (If needed, explain any answers in Remarks.)**SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.**Hydrophytic Vegetation Present? Yes ☐ No ☒Hydric Soil Present? Yes ☐ No ☒Wetland Hydrology Present? Yes ☐ No ☒Is the Sampled Area  
within a Wetland?Yes ☐ No ☒**Remarks:** Upland pair point to W103-1, was dominated by upland vegetation, and hydric soils and hydrology indicators were not observed.**VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECCENDING ORDER**

**Dominance Test worksheet:**

Number of Dominant Species

That Are OBL, FACW, or FAC: 0 (A)

Total Number of Dominant

Species Across All Strata: 1 (B)

Percent of Dominant Species

That Are OBL, FACW, or FAC: 0% (A/B)

**Prevalence Index worksheet:**

Total % Cover of: Multiply by:

OBL species 0 x 1 = 0

FACW species 0 x 2 = 0

FAC species 10 x 3 = 30

FACU species 20 x 4 = 80

UPL species 25 x 5 = 125

Column Totals: 55 (A) 235 (B)

Prevalence Index = B/A = 4.2727

**Hydrophytic Vegetation Indicators:**

1 - Rapid Test for Hydrophytic Vegetation

2 - Dominance Test is &gt;50%

3 - Prevalence Index is ≤3.0<sup>1</sup>4 - Morphological Adaptations<sup>1</sup> (Provide supporting data in Remarks or on a separate sheet)5 - Wetland Non-Vascular Plants<sup>1</sup>6 - Problematic Hydrophytic Vegetation<sup>1</sup> (Explain)<sup>1</sup> Indicators of hydric soil and wetland hydrology must be present unless disturbed or problematic.**Hydrophytic  
Vegetation**

Present?

Yes ☐ No ☒**Remarks:** Area dominated by upland herbaceous vegetation.

Hydrogeomorphic Floodplain Units					
<b>Procedure for identifying and characterizing the floodplain units to assist in identifying the OHWM:</b>					
1. Walk the channel and floodplain within the study area to get an impression of the geomorphology and vegetation present at the site.					
2. Select a representative cross section across the channel. Draw the cross section and label the floodplain units.					
3. Determine a point on the cross section that is characteristic of one of the hydrogeomorphic floodplain units.					
a) Record the floodplain unit and GPS position.					
b) Describe the sediment texture (using the Wentworth class size) and the vegetation characteristics of the floodplain unit.					
c) Identify any indicators present at the location.					
4. Repeat for other points in different hydrogeomorphic floodplain units across the cross section.					
5. Identify the OHWM and record the indicators. Record the OHWM position via:					
<input type="checkbox"/> Mapping on aerial photograph		<input checked="" type="checkbox"/> GPS			
<input type="checkbox"/> Digitized on computer		<input type="checkbox"/> Other:

<b>Project:</b> <u>Zayo Fiberoptic Interconnect Project</u>					
<b>Location:</b> <u>Modoc County, California</u>			<b>Photo begin/end file#:</b> <u>See Field Photos</u>		
<b>Investigator(s):</b> <u>PF, MW</u>					
Y <input checked="" type="checkbox"/> / N <input type="checkbox"/> Do normal circumstances exist on the site? Y <input type="checkbox"/> / N <input checked="" type="checkbox"/> Is the site significantly disturbed?		<b>Location Details:</b> <u>Adjacent to U.S. 395 just south of Davis Creek</u> <b>Projection:</b> <u>Lambert</u> <b>Datum:</b> <u>NAD83</u> <b>Coordinates:</b> <u>41.70917, -120.37509</u>			
<b>Potential anthropogenic influences on the channel system:</b> <u>Agriculture and roadway adjacent, within roadway ROW.</u>					
<b>Brief site description:</b> <u>Maintained roadway ROW with ephemeral channel draining to W106. Drainage emerges from wetland as D101-2 and drains to C109-2. Top of bank and OHW M are the same. No</u>					
<b>Checklist of resources (if available)</b> <div style="display: flex; justify-content: space-between;"> <div style="width: 45%;"> <input checked="" type="checkbox"/> Aerial photography  <b>Dates:</b> <u>ESRI GIS imagery</u>  <input checked="" type="checkbox"/> Topographic maps  <input type="checkbox"/> Geologic maps  <input type="checkbox"/> Vegetation maps  <input checked="" type="checkbox"/> Soils maps  <input type="checkbox"/> Rainfall/precipitation maps  <input type="checkbox"/> Existing delineation(s) for site  <input checked="" type="checkbox"/> Global positioning system (GPS)  <input type="checkbox"/> Other studies         </div> <div style="width: 45%;"> <input type="checkbox"/> Stream gage data  <b>Gage number:</b> _____  <b>Period of record:</b>  <input type="checkbox"/> History of recent effective discharges  <input type="checkbox"/> Results of flood frequency analysis  <input type="checkbox"/> Most recent shift-adjusted rating  <input type="checkbox"/> Gage heights for 2-, 5-, 10-, and 25-year events and the most recent event exceeding a 5-year event         </div> </div>					
<p align="center"><b>Hydrogeomorphic Floodplain Units</b></p>					
<b>Procedure for identifying and characterizing the floodplain units to assist in identifying the OHW M:</b> 1. Walk the channel and floodplain within the study area to get an impression of the geomorphology and vegetation present at the site. 2. Select a representative cross section across the channel. Draw the cross section and label the floodplain units. 3. Determine a point on the cross section that is characteristic of one of the hydrogeomorphic floodplain units. a) Record the floodplain unit and GPS position. b) Describe the sediment texture (using the Wentworth class size) and the vegetation characteristics of the floodplain unit. c) Identify any indicators present at the location. 4. Repeat for other points in different hydrogeomorphic floodplain units across the cross section. 5. Identify the OHW M and record the indicators. Record the OHW M position via: <div style="display: flex; justify-content: space-around; margin-top: 10px;"> <div style="text-align: center;"> <input type="checkbox"/> Mapping on aerial photograph  <input type="checkbox"/> Digitized on computer         </div> <div style="text-align: center;"> <input checked="" type="checkbox"/> GPS  <input type="checkbox"/> Other: _____         </div> </div>					

### Wentworth Size Classes

Inches (in)	Millimeters (mm)	Wentworth size class	
10.08	256	Boulder	Gravel
2.56	64	Cobble	
0.157	4	Pebble	
0.079	2.00	Granule	
0.039	1.00	Very coarse sand	Sand
0.020	0.50	Coarse sand	
1/2 0.0098	0.25	Medium sand	
1/4 0.005	0.125	Fine sand	
1/8 0.0025	0.0625	Very fine sand	
1/16 0.0012	0.031	Coarse silt	Silt
1/32 0.00061	0.0156	Medium silt	
1/64 0.00031	0.0078	Fine silt	
1/128 0.00015	0.0039	Very fine silt	
		Clay	Mud

Feature ID: D100-2

Cross section ID:

Date: 8/20/2019 Time:

**Cross section drawing:****OHWM**

GPS point: \_\_\_\_\_

**Indicators:**

Change in average sediment texture

Break in bank slope

Change in vegetation species

Other: \_\_\_\_\_

Change in vegetation cover

Other: \_\_\_\_\_

**Comments:**

Bed and bank feature with scoured channel. OHWM evidenced by change in sediment texture, break in bank slope, and change in vegetation cover. Sampling point documents an ephemeral stream.

**Floodplain unit:**

Low-Flow Channel

Active Floodplain

Low Terrace

GPS point: \_\_\_\_\_

**Characteristics of the floodplain unit:**

Average sediment texture: \_\_\_\_\_

Total veg cover: \_\_\_\_\_ % Tree: \_\_\_\_\_ % Shrub: \_\_\_\_\_ % Herb: \_\_\_\_\_ %

Community successional stage:

NA

Mid (herbaceous, shrubs, saplings)

Early (herbaceous &amp; seedlings)

Late (herbaceous, shrubs, mature trees)

**Indicators:**

Mudcracks

Soil development

Ripples

Surface relief

Drift and/or debris

Other: \_\_\_\_\_

Presence of bed and bank

Other: \_\_\_\_\_

Benches

Other: \_\_\_\_\_

<p style="text-align: center;"><b>Hydrogeomorphic Floodplain Units</b></p>					
<b>Procedure for identifying and characterizing the floodplain units to assist in identifying the OHW M:</b>					
1. Walk the channel and floodplain within the study area to get an impression of the geomorphology and vegetation present at the site.					
2. Select a representative cross section across the channel. Draw the cross section and label the floodplain units.					
3. Determine a point on the cross section that is characteristic of one of the hydrogeomorphic floodplain units.					
a) Record the floodplain unit and GPS position.					
b) Describe the sediment texture (using the Wentworth class size) and the vegetation characteristics of the floodplain unit.					
c) Identify any indicators present at the location.					
4. Repeat for other points in different hydrogeomorphic floodplain units across the cross section.					
5. Identify the OHW M and record the indicators. Record the OHW M position via:					
<input type="checkbox"/> Mapping on aerial photograph		<input checked="" type="checkbox"/> GPS			
<input type="checkbox"/> Digitized on computer		<input type="checkbox"/> Other:			

### Wentworth Size Classes

Inches (in)	Millimeters (mm)	Wentworth size class	
10.08	256	Boulder	Gravel
2.56	64	Cobble	
0.157	4	Pebble	
0.079	2.00	Granule	
0.039	1.00	Very coarse sand	Sand
0.020	0.50	Coarse sand	
1/2 0.0098	0.25	Medium sand	
1/4 0.005	0.125	Fine sand	
1/8 0.0025	0.0625	Very fine sand

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Point: 001-2 Feature ID: W001a-2  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/19/2019  
 Investigator(s): JA/ZB Section, Township, Range: 1, T43N, R13E  
 Local relief (hillside, terrace, etc.): Depression Local Relief (concave, convex, none): Concave Slope (%): 1  
 Subregion (LRR): D Lat: 41.58992 Long: -120.42756 Datum: NAD 83  
 Soil Map Unit Name: (121) Daphnedale stony loam, 30 to 50 percent slopes NWI classification: PEM  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present?	Yes <u>x</u> No <u>    </u>	Is the Sampled Area within a Wetland? Yes <u>x</u> No <u>    </u>
Hydric Soil Present?	Yes <u>x</u> No <u>    </u>	
Wetland Hydrology Present?	Yes <u>x</u> No <u>    </u>	

Remarks: All three indicators met, area is a wetland. Data part of segments A and B.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECEENDING ORDER

3/3 Abbrev.	Species Name	Absolute	Dominant	Indicator
Tree Stratum	(Plot size: _____)	% Cover	Species?	Status

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Feature ID: W005a-2  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/19/2019  
 Investigator(s): JA/ZB Section, Township, Range: 36, T44N, R13E  
 Local relief (hillside, terrace, etc.): Depression Local Relief (concave, convex, none): Concave Slope (%): 5  
 Subregion (LRR): D Lat: 41.61363 Long: -120.41689 Datum: NAD 83  
 Soil Map Unit Name: (126) Delma loam, 15 to 30 percent slopes, eroded NWI classification: PEM  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes x No       
 Hydric Soil Present? Yes x No       
 Wetland Hydrology Present? Yes x No       
 Is the Sampled Area within a Wetland? Yes x No     

Remarks: All three indicators met, area is a wetland. Segments A, B, and C have same characteristics.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECCENDING ORDER

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Point: 015-2 Feature ID: U007-2  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/9/2019  
 Investigator(s): TK, ZB. Section, Township, Range: 19, T44N, R14E  
 Local relief (hillside, terrace, etc.): Agriculture field Local Relief (concave, convex, none): Concave Slope (%): 2  
 Subregion (LRR): D Lat: 41.64373 Long: -120.39908 Datum: NAD 83  
 Soil Map Unit Name: (192) Thoms-Exel complex NWI classification: None  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes x No       
 Hydric Soil Present? Yes      No x  
 Wetland Hydrology Present? Yes      No x  
 Is the Sampled Area within a Wetland? Yes      No x

Remarks: Upland pair point to W007a-2 (014-2) was dominated by Equisetum. Though area was dominated by hydrophytic vegetation, both soil and hydrology indicators were not observed.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECCENDING ORDER

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Date: 8/20/2019

Applicant/Owner: Zayo Group State: California Sampling Point: 57-2 Feature ID: W55-2

Investigator(s): MO, JA Section, Township, Range: 5, T44N, R14E

Local relief (hillside, terrace, etc.): Depression Local Relief (concave, convex, none): Concave Slope (%): 1

Subregion (LRR): D Lat: 41.68535 Long: -120.3771 Datum: NAD83

Soil Map Unit Name: (137) Drews clay loam, 2 to 5 percent slopes NWI classification: None

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)

Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No     

Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes x No     

Hydric Soil Present? Yes x No     

Wetland Hydrology Present? Yes x No     

Is the Sampled Area within a Wetland? Yes x No     

## Evaluation of features designated "Other Waters"

Characteristics: Type:      Width:      Substrate:     

Indicators: Defined bed and bank:      Scour      OHWM Mapped     

Feature Designation: Perennial      Intermittent      Ephemeral     

Natural Drainage      Artificial Drainage      Navigable Water     

Remarks: Wetland parameters are present as indicated by hydrology indicators, hydric soil indicator (F3), and a dominance of hydrophytic vegetation.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECEENDING ORDER

3/3 Abbrev. Species Name Absolute Dominant Indicator

<b>Remarks:</b> Hydrology indicators present as evidenced by the presence of vegetation matting in the form of drift deposits on the depression of the wetland.								

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Date: 8/20/2019

Applicant/Owner: Zayo Group State: California Sampling Point: 60-2 Feature ID: U59-2

Investigator(s): MO, JA Section, Township, Range: 18, T44N, R14E

Local relief (hillside, terrace, etc.): Roadside slope Local Relief (concave, convex, none): Convex Slope (%): 2

Subregion (LRR): D Lat: 41.66002 Long: -120.39054 Datum: NAD83

Soil Map Unit Name: (176) Pit silty clay loam, 0 to 2 percent slopes NWI classification: None

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)

Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No     

Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes      No x

Hydric Soil Present? Yes      No x

Wetland Hydrology Present? Yes      No x

Is the Sampled Area within a Wetland? Yes      No x

## Evaluation of features designated "Other Waters"

Characteristics: Type:      Width:      Substrate:     

Indicators: Defined bed and bank:      Scour      OHWM Mapped     

Feature Designation: Perennial      Intermittent      Ephemeral     

Natural Drainage      Artificial Drainage      Navigable Water     

Remarks: Sample point lacks all indicators of wetland parameters; sample point is within roadside prism at wetland boundary. Upland pair point to W59-2.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECEENDING ORDER

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Date: 8/21/2019

Applicant/Owner: Zayo Group State: California Sampling Point: 65-2 Feature ID: U61-2

Investigator(s): MO, JA Section, Township, Range: 5, T45N, R14E

Local relief (hillside, terrace, etc.): Roadside slope Local Relief (concave, convex, none): Convex Slope (%): 3

Subregion (LRR): D Lat: 41.76908 Long: -120.3753 Datum: NAD83

Soil Map Unit Name: None NWI classification: None

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)

Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No     

Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## **SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.**

Hydrophytic Vegetation Present? Yes      No x

Hydric Soil Present? Yes      No x

Wetland Hydrology Present? Yes      No x

Is the Sampled Area within a Wetland? Yes      No x

## **Evaluation of features designated "Other Waters"**

Characteristics: Type:      Width:      Substrate:     

Indicators: Defined bed and bank:      Scour      OHWM Mapped     

Feature Designation: Perennial      Intermittent      Ephemeral     

Natural Drainage      Artificial Drainage      Navigable Water     

Remarks: Sample point lacks all indicators of wetland parameters. Upland pair point to W61-2.

## **VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECEENDING ORDER**

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Date: 8/21/2019

Applicant/Owner: Zayo Group State: California Sampling Point: 68-2 Feature ID: W64-2

Investigator(s): MO, JA Section, Township, Range: 5, T45N, R14E

Local relief (hillside, terrace, etc.): Depression Local Relief (concave, convex, none): Concave Slope (%): 2

Subregion (LRR): D Lat: 41.77093 Long: -120.37533 Datum: NAD83

Soil Map Unit Name: (135) Drews gravelly loam, 0 to 9 percent slopes NWI classification: None

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)

Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No     

Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## **SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.**

Hydrophytic Vegetation Present? Yes x No     

Hydric Soil Present? Yes x No     

Wetland Hydrology Present? Yes x No     

Is the Sampled Area  
within a Wetland? Yes x No     

## **Evaluation of features designated "Other Waters"**

Characteristics: Type:      Width:      Substrate:     

Indicators: Defined bed and bank:      Scour      OHWM Mapped     

Feature Designation: Perennial      Intermittent      Ephemeral     

Natural Drainage      Artificial Drainage      Navigable Water     

**Remarks:** Wetland parameters are present as indicated by hydrology indicator (saturation and high water table), hydric soils (F3), and a dominance of hydrophytic vegetation.

## **VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECEENDING ORDER**

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc Sampling Point: 105-2 Feature ID: U102-2  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/19/2019  
 Investigator(s): PF, MW Section, Township, Range: 32, T45N, R14E  
 Local relief (hillside, terrace, etc.): Hillslope Local Relief (concave, convex, none): Concave Slope (%): 2  
 Subregion (LRR): D Lat: 41.6966 Long: -120.37518 Datum: NAD 83  
 Soil Map Unit Name: (111) Bieber cobbly loam, 2 to 15 percent slopes, eroded NWI classification: None  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed? No Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil No, or Hydrology No naturally problematic? No (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes      No x  
 Hydric Soil Present? Yes      No x  
 Wetland Hydrology Present? Yes      No x  
 Is the Sampled Area within a Wetland? Yes      No X

Remarks: Hydric soil indicators not observed, hydrophytic vegetation not observed, and hydrology indicators not observed. All three criteria not met. Area is not a wetland.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECCENDING ORDER

3/3 Abbrev.	Species Name	Absolute	Dominant	Indicator

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc Sampling Point: 112-2 Feature ID: W108-2  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/20/2019  
 Investigator(s): MW & PF Section, Township, Range: 20, T45N, R14E  
 Local relief (hillside, terrace, etc.): Hillside Local Relief (concave, convex, none): Concave Slope (%): 5  
 Subregion (LRR): D Lat: 41.72879 Long: -120.37504 Datum: NAD 83  
 Soil Map Unit Name: (177) Pit clay, 2 to 5 percent slopes NWI classification: PEM  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed? No Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil No, or Hydrology No naturally problematic? No (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present?	Yes <u>x</u> No <u>    </u>	Is the Sampled Area within a Wetland? Yes <u>X</u> No <u>    </u>
Hydric Soil Present?	Yes <u>x</u> No <u>    </u>	
Wetland Hydrology Present?	Yes <u>x</u> No <u>    </u>	

Remarks: Hydrology indicators observed, hydrophytic vegetation observed, and hydric soil indicators observed. All three criteria met. Area is a wetland.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc Sampling Point: 115-2 Feature ID: U110-2  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/20/2019  
 Investigator(s): PF, MW Section, Township, Range: 20, T45N, R14E  
 Local relief (hillside, terrace, etc.): Flat Local Relief (concave, convex, none): None Slope (%): 0  
 Subregion (LRR): D Lat: 41.73192 Long: -120.3751 Datum: NAD 83  
 Soil Map Unit Name: (188) Salisbury gravelly loam, 0 to 9 percent slopes NWI classification: None  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed? No Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil No, or Hydrology No naturally problematic? No (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present?	Yes <u>    </u> No <u>X</u>	Is the Sampled Area within a Wetland? Yes <u>    </u> No <u>X</u>
Hydric Soil Present?	Yes <u>    </u> No <u>X</u>	
Wetland Hydrology Present?	Yes <u>    </u> No <u>X</u>	

**Remarks:** Hydrology indicators not observed, hydrophytic vegetation not observed, and hydric soil indicators not observed. All three criteria not met. Area is not a wetland.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECCENDING ORDER

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc Sampling Point: 124-2 Feature ID: W115-2  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/22/2019  
 Investigator(s): PF, MW Section, Township, Range: 17, T45N, R14E  
 Local relief (hillside, terrace, etc.): Hillside Local Relief (concave, convex, none): Concave Slope (%): 5  
 Subregion (LRR): D Lat: 41.7433 Long: -120.37562 Datum: NAD 83  
 Soil Map Unit Name: (138) Drews clay loam, wet, 0 to 2 percent slopes NWI classification: PEM  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed? No Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil No, or Hydrology No naturally problematic? No (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes x No       
 Hydric Soil Present? Yes x No       
 Wetland Hydrology Present? Yes x No       
 Is the Sampled Area within a Wetland? Yes x No     

Remarks: Hydrophytic vegetation observed, hydric soil indicators observed, hydrology indicators observed. All three criteria met. Area is a wetland.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECCENDING ORDER

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc Sampling Point: 129-2 Feature ID: U117-2  
Applicant/Owner: Zayo Group State: California Sampling Date: 8/20/2019  
Investigator(s): PF, MW Section, Township, Range: 8, T45N, R14E  
Local relief (hillside, terrace, etc.): Hillside Local Relief (concave, convex, none): Concave Slope (%): 5  
Subregion (LRR): D Lat: 41.74897 Long: -120.37544 Datum: NAD 83  
Soil Map Unit Name: (109) Bieber gravelly loam, 0 to 9 percent slopes NWI classification: PEM  
Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
Are Vegetation No, Soil No, or Hydrology No significantly disturbed? No Are "Normal Circumstances" present? Yes X No       
Are Vegetation No, Soil No, or Hydrology No naturally problematic? No (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes      No x  
Hydric Soil Present? Yes      No x  
Wetland Hydrology Present? Yes      No x  
Is the Sampled Area within a Wetland? Yes      No X

Remarks: Hydrology indicators not observed, hydrophytic vegetation not observed, and hydric soil indicators not observed. All three criteria not met. Area is not a wetland.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECCENDING ORDER

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Point: 011-2 Feature ID: NW001-2  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/20/2019

Investigator(s): ZB, TK Section, Township, Range: 30, T44N, R14E  
 Local relief (hillside, terrace, etc.): Floodplain Local Relief (concave, convex, none): None Slope (%): 0

Subregion (LRR): D Lat: 41.626755 Long: -120.40796 Datum: NAD 83  
 Soil Map Unit Name: (109) Bieber gravelly loam, 0 to 9 percent slopes NWI classification: PEM

Are climatic / hydrologic conditions on the site typical for this time of year? Yes ☒ No ☐ (If no, explain in Remarks.)

Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No significantly disturbed? Are "Normal Circumstances" present? Yes ☒ No ☐

Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No naturally problematic? (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes ☐ No ☒  
 Hydric Soil Present? Yes ☐ No ☒  
 Wetland Hydrology Present? Yes ☒ No ☐

Is the Sampled Area within a Wetland? Yes ☐ No ☒

Remarks: Suspect area was dominated by Alopecurus and Bromus. Area had wetland hydrology indicators; however, both vegetation and soil indicators were not observed. Fresh emergent wetland previously mapped north of non-wetland.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Date: 8/20/2019

Applicant/Owner: Zayo Group State: California Sampling Point: 53-2 Feature ID: NW50-2

Investigator(s): MO, JA Section, Township, Range: 8, T44N, R14E

Local relief (hillside, terrace, etc.): Depression Local Relief (concave, convex, none): Concave Slope (%): 4

Subregion (LRR): D Lat: 41.66967 Long: -120.38542 Datum: NAD83

Soil Map Unit Name: (188) Salisbury gravelly loam, 0 to 9 percent slopes NWI classification: None

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)

Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No     

Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes      No x

Hydric Soil Present? Yes      No x

Wetland Hydrology Present? Yes x No     

Is the Sampled Area within a Wetland? Yes      No x

## Evaluation of features designated "Other Waters"

Characteristics: Type:      Width:      Substrate:     

Indicators: Defined bed and bank:      Scour      OHWM Mapped     

Feature Designation: Perennial      Intermittent      Ephemeral     

Natural Drainage      Artificial Drainage      Navigable Water     

Remarks: Suspect wetland. Culvert present under 395 leading to suspect area. Hydrology indicators present; however, the other two parameters were not observed. No hydric soil indicators and no vegetation present, as the sample point lacked vegetation.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECEENDING ORDER

3/3 Abbrev. Species Name Absolute Dominant Indicator

<b>Location:</b> Modoc County, California			<b>Photo begin/end file#:</b> See Field Photos		
<b>Investigator(s):</b> PF, TK					
Y <input checked="" type="checkbox"/> / N <input type="checkbox"/> Do normal circumstances exist on the site? Y <input type="checkbox"/> / N <input checked="" type="checkbox"/> Is the site significantly disturbed?		<b>Location Details:</b> Located in Alturas <b>Projection:</b> Lambert <b>Datum:</b> NAD83 <b>Coordinates:</b> 41.48143, -120.54232			
<b>Potential anthropogenic influences on the channel system:</b> Bridge over feature. Agriculture and roadway adjacent.					
<b>Brief site description:</b> South Fork Pit River. Relatively confined, no floodplain observed.					
<b>Checklist of resources (if available)</b> <div style="display: flex; justify-content: space-between;"> <div style="width: 45%;"> <input checked="" type="checkbox"/> Aerial photography  <b>Dates:</b> ESRI GIS imagery  <input checked="" type="checkbox"/> Topographic maps  <input type="checkbox"/> Geologic maps  <input type="checkbox"/> Vegetation maps  <input checked="" type="checkbox"/> Soils maps  <input type="checkbox"/> Rainfall/precipitation maps  <input checked="" type="checkbox"/> Existing delineation(s) for site  <input checked="" type="checkbox"/> Global positioning system (GPS)  <input type="checkbox"/> Other studies         </div> <div style="width: 45%;"> <input type="checkbox"/> Stream gage data  <b>Gage number:</b> G  <b>Period of record:</b>  <input type="checkbox"/> History of recent effective discharges  <input type="checkbox"/> Results of flood frequency analysis  <input type="checkbox"/> Most recent shift-adjusted rating  <input type="checkbox"/> Gage heights for 2-, 5-, 10-, and 25-year events and the most recent event exceeding a 5-year event         </div> </div>					
<b>Hydrogeomorphic Floodplain Units</b> 					
<b>Procedure for identifying and characterizing the floodplain units to assist in identifying the OHW M:</b> 1. Walk the channel and floodplain within the study area to get an impression of the geomorphology and vegetation present at the site. 2. Select a representative cross section across the channel. Draw the cross section and label the floodplain units. 3. Determine a point on the cross section that is characteristic of one of the hydrogeomorphic floodplain units. a) Record the floodplain unit and GPS position. b) Describe the sediment texture (using the Wentworth class size) and the vegetation characteristics of the floodplain unit. c) Identify any indicators present at the location. 4. Repeat for other points in different hydrogeomorphic floodplain units across the cross section. 5. Identify the OHW M and record the indicators. Record the OHW M position via: <div style="display: flex; justify-content: space-around;"> <input type="checkbox"/> Mapping on aerial photograph           <input checked="" type="checkbox"/> GPS           <input type="checkbox"/> Digitized on computer           <input type="checkbox"/> Other:         </div>

<input type="checkbox"/> Other studies					
<p style="text-align: center;"><b>Hydrogeomorphic Floodplain Units</b></p>					
<b>Procedure for identifying and characterizing the floodplain units to assist in identifying the OHW M:</b>					
1. Walk the channel and floodplain within the study area to get an impression of the geomorphology and vegetation present at the site.					
2. Select a representative cross section across the channel. Draw the cross section and label the floodplain units.					
3. Determine a point on the cross section that is characteristic of one of the hydrogeomorphic floodplain units.					
a) Record the floodplain unit and GPS position.					
b) Describe the sediment texture (using the Wentworth class size) and the vegetation characteristics of the floodplain unit.					
c) Identify any indicators present at the location.					
4. Repeat for other points in different hydrogeomorphic floodplain units across the cross section.					
5. Identify the OHW M and record the indicators. Record the OHW M position via:					
<input type="checkbox"/> Mapping on aerial photograph		<input checked="" type="checkbox"/> GPS			
<input type="checkbox"/> Digitized on computer		<input type="checkbox"/> Other:

## WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Alturas/Modoc Co. Sampling Point: 02-3 Feature ID: W01-3  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/26/2019  
 Investigator(s): PF, TK Section, Township, Range: 13, T42N, R12E  
 Local relief (hillside, terrace, etc.): Hillside Local Relief (concave, convex, none): Concave Slope (%): 30  
 Subregion (LRR): D Lat: 41.481373 Long: -120.54232 Datum: NAD 83  
 Soil Map Unit Name: (112) Buntingville clay loam, 0 to 2 percent slopes NWI classification: R2UBH  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes ☒ No ☐ (If no, explain in Remarks.)  
 Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No significantly disturbed? ☐ No Are "Normal Circumstances" present? Yes ☒ No ☐  
 Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No naturally problematic? ☐ (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes ☒ No ☐  
 Hydric Soil Present? Yes ☒ No ☐  
 Wetland Hydrology Present? Yes ☒ No ☐  
 Is the Sampled Area within a Wetland? Yes ☒ No ☐

Remarks: Vegetation dominated by FACW species. Hydrology indicator observed. No soil pit due to access, soils assumed hydric based on location and present of other wetland indicators.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER

3/3 Abbrev.	Species Name	Absolute	Dominant	Indicator
Tree Stratum	(Plot size: _____)	% Cover	Species?	Status
1	_____	_____	_____	_____
2	_____	_____	_____	_____
3	_____	_____	_____	_____
4	_____	_____	_____	_____
		0	= Total Cover	
Sapling/Shrub Stratum	(Plot size: _____)			
1	_____	_____	_____	_____
2	_____	_____	_____	_____
3	_____	_____	_____	_____
4	_____	12	_____	_____
5	_____	_____	_____	_____
		12	= Total Cover	
Herb Stratum	(Plot size: 5' radius)			
1	Phaaruru Phalaris arundinacea	60	YES	FACW
2	_____	_____	_____	_____
3	_____	_____	_____	_____
4	_____	_____	_____	_____
5	_____	_____	_____	_____
6	_____	_____	_____	_____
7	_____	_____	_____	_____
8	_____	_____	_____	_____
9	_____	_____	_____	_____
10	_____	_____	_____	_____
11	_____	_____	_____	_____
		60	= Total Cover	
Woody Vine Stratum	(Plot size: _____)			
1	_____	_____	_____	_____
2	_____	_____	_____	_____
		0	= Total Cover	

%Bare Ground in Herb Stratum: 25 % Cover of Biotic Crust: 0

## Dominance Test worksheet:

Number of Dominant Species That Are OBL, FACW, or FAC: 1 (A)

Total Number of Dominant Species Across All Strata: 1 (B)

Percent of Dominant Species That Are OBL, FACW, or FAC: 100% (A/B)

## Prevalence Index worksheet:

Total % Cover of:	Multiply by:
OBL species 0	x 1 = 0
FACW species 60	x 2 = 120
FAC species 0	x 3 = 0
FACU species 0	x 4 = 0
UPL species 0	x 5 = 0
Column Totals: 60 (A)	120 (B)
Prevalence Index = B/A = 2	

## Hydrophytic Vegetation Indicators:

- 1 - Rapid Test for Hydrophytic Vegetation  
 Yes 2 - Dominance Test is >50%  
 3 - Prevalence Index is ≤3.0<sup>1</sup>  
 4 - Morphological Adaptations<sup>1</sup> (Provide supporting data in Remarks or on a separate sheet)  
 5 - Wetland Non-Vascular Plants<sup>1</sup>  
 6 - Problematic Hydrophytic Vegetation<sup>1</sup> (Explain)  
<sup>1</sup> Indicators of hydric soil and wetland hydrology must be present unless disturbed or problematic.

Hydrophytic Vegetation Present?

Yes ☒ No ☐

Remarks: Hydrophytic vegetation (FACW) dominant.

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Date: 8/26/2019

Applicant/Owner: Zayo Group State: California Sampling Point: SP 104-3 Feature ID: W100-3

Investigator(s): MO, JA Section, Township, Range: 30, T41N, R13E

Local relief (hillside, terrace, etc.): Depression Local Relief (concave, convex, none): Concave Slope (%): 3

Subregion (LRR): D Lat: 41.35848 Long: -120.52565 Datum: NAD83

Soil Map Unit Name: (112) Buntingville clay loam, 0 to 2 percent slopes NWI classification: PEM

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)

Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No     

Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes x No     

Hydric Soil Present? Yes x No     

Wetland Hydrology Present? Yes x No     

Is the Sampled Area within a Wetland? Yes x No     

## Evaluation of features designated "Other Waters"

Characteristics: Type:      Width:      Substrate:     

Indicators: Defined bed and bank:      Scour      OHWM Mapped     

Feature Designation: Perennial      Intermittent      Ephemeral     

Natural Drainage      Artificial Drainage      Navigable Water     

Remarks: Wetland parameters are present as indicated by hydrology indicator (water stained leaves, saturation), hydric soils (F6), and a dominance of hydrophytic vegetation.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECEENDING ORDER

<b>Remarks:</b> Hydrology indicators observed including surface water, high water table, saturation, drift deposits, and FAC-neutral test.						

**WETLAND DETERMINATION DATA FORM -Arid West Region**

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Alturas/Modoc Sampling Point: 209-3 Feature ID: U205-3  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/27/2019  
 Investigator(s): Mike Williams/Justin Ahn Section, Township, Range: 4, T42N, R13E  
 Local relief (hillside, terrace, etc.): Road slope Local Relief (concave, convex, none): Convex Slope (%): 2  
 Subregion (LRR): D Lat: 41.51605 Long: -120.48208 Datum: NAD 83  
 Soil Map Unit Name: (112) Buntingville clay loam, 0 to 2 percent slopes NWI classification: PSSC  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

**SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.**

Hydrophytic Vegetation Present?	Yes <u>    </u> No <u>x</u>	Is the Sampled Area within a Wetland? Yes <u>    </u> No <u>x</u>
Hydric Soil Present?	Yes <u>    </u> No <u>x</u>	
Wetland Hydrology Present?	Yes <u>    </u> No <u>x</u>	

**Remarks:** No wetland indicators present. Upland vegetation dominant. Upland pair point to W205-3.

**VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECCENDING ORDER**

3/3 Abbrev.	Species Name	Absolute	Dominant	Indicator
Tree Stratum	(Plot size: _____ )	% Cover	Species?	Status

<p style="text-align: center;"><b>Hydrogeomorphic Floodplain Units</b></p>					
<b>Procedure for identifying and characterizing the floodplain units to assist in identifying the OHW M:</b>					
1. Walk the channel and floodplain within the study area to get an impression of the geomorphology and vegetation present at the site.					
2. Select a representative cross section across the channel. Draw the cross section and label the floodplain units.					
3. Determine a point on the cross section that is characteristic of one of the hydrogeomorphic floodplain units.					
a) Record the floodplain unit and GPS position.					
b) Describe the sediment texture (using the Wentworth class size) and the vegetation characteristics of the floodplain unit.					
c) Identify any indicators present at the location.					
4. Repeat for other points in different hydrogeomorphic floodplain units across the cross section.					
5. Identify the OHW M and record the indicators. Record the OHW M position via:					
<input type="checkbox"/> Mapping on aerial photograph		<input checked="" type="checkbox"/> GPS			
<input type="checkbox"/> Digitized on computer		<input type="checkbox"/> Other:			

### Wentworth Size Classes

Inches (in)	Millimeters (mm)	Wentworth size class	
10.08	256	Boulder	Gravel
2.56	64	Cobble

<input type="checkbox"/> Other studies					
<p style="text-align: center;"><b>Hydrogeomorphic Floodplain Units</b></p>					
<b>Procedure for identifying and characterizing the floodplain units to assist in identifying the OHW M:</b>					
1. Walk the channel and floodplain within the study area to get an impression of the geomorphology and vegetation present at the site.					
2. Select a representative cross section across the channel. Draw the cross section and label the floodplain units.					
3. Determine a point on the cross section that is characteristic of one of the hydrogeomorphic floodplain units.					
a) Record the floodplain unit and GPS position.					
b) Describe the sediment texture (using the Wentworth class size) and the vegetation characteristics of the floodplain unit.					
c) Identify any indicators present at the location.					
4. Repeat for other points in different hydrogeomorphic floodplain units across the cross section.					
5. Identify the OHW M and record the indicators. Record the OHW M position via:					
<input type="checkbox"/> Mapping on aerial photograph		<input checked="" type="checkbox"/> GPS			
<input type="checkbox"/> Digitized on computer		<input type="checkbox"/> Other:			

### Wentworth Size Classes

Inches (in)	Millimeters (mm)	Wentworth size class	
10.08	256	Boulder	Gravel
2.56	64	Cobble	
0.157	4	Pebble	
0.079	2.00	Granule	
0.039	1.00	Very coarse sand	Sand
0.020	0.50	Coarse sand	
1/2 0.0098	0.25	Medium sand	
1/4 0.005	0.125	Fine sand	
1/8 0.0025	0.0625	Very fine sand	
1/16 0.0012	0.031	Coarse silt	Silt
1/32 0.00061	0.0156	Medium silt	
1/64 0.00031	0.0078	Fine silt	
1/128 0.00015	0.0039	Very fine silt	
		Clay	Mud

Feature ID: D03-4

Cross section ID:

Date: 8/27/2019 Time:

**Cross section drawing:****OHW**

GPS point: \_\_\_\_\_

**Indicators:**

- |  |   |
|--|---|
| <input checked="" type="checkbox"/> Change in average sediment texture | <input checked="" type="checkbox"/> Break in bank slope |
| <input type="checkbox"/> Change in vegetation species                  | <input type="checkbox"/> Other: _____                   |
| <input checked="" type="checkbox"/> Change in vegetation cover         | <input type="checkbox"/> Other: _____                   |

**Comments:**

Perennial stream flowing below road through a culvert. Minimal stagnant water present. OHWM evidenced by change in sediment texture, break in bank slope, and change in vegetation cover.

**Floodplain unit:**
☒ Low-Flow Channel    ☐ Active Floodplain    ☐ Low Terrace

GPS point: \_\_\_\_\_

**Characteristics of the floodplain unit:**Average sediment texture: SiltyTotal veg cover: 0 % Tree: 0 % Shrub: 0 % Herb: 0 %

Community successional stage:

- |   |  |
|---|--|
| <input checked="" type="checkbox"/> NA                  | <input type="checkbox"/> Mid (herbaceous, shrubs, saplings)      |
| <input type="checkbox"/> Early (herbaceous & seedlings) | <input type="checkbox"/> Late (herbaceous, shrubs, mature trees) |

**Indicators:**

		Clay	Mud

Feature ID: D200-4

Cross section ID:

Date: 8/27/2019 Time:

**Cross section drawing:**

**OHWM**

GPS point: \_\_\_\_\_

**Indicators:**

☒ Change in average sediment texture

☒ Change in vegetation species

☒ Change in vegetation cover

☒ Break in bank slope

☐ Other: \_\_\_\_\_

☐ Other: \_\_\_\_\_

**Comments:**

Bed and bank feature with scoured channel. OHWM evidenced by change in sediment texture, break in bank slope, and changes in vegetation species and cover. Sampling point documents an ephemeral stream.

**Floodplain unit:**

☐ Low-Flow Channel

☐ Active Floodplain

☐ Low Terrace

GPS point: \_\_\_\_\_

**Characteristics of the floodplain unit:**

Average sediment texture: Silty loam

Total veg cover: \_\_\_\_\_ % Tree: \_\_\_\_\_ % Shrub: \_\_\_\_\_ % Herb: \_\_\_\_\_ %

Community successional stage:

☐ NA

☐ Early (herbaceous & seedlings)

☐ Mid (herbaceous, shrubs, saplings)

☐ Late (herbaceous, shrubs, mature trees)

**Indicators:**

☐ Mudcracks

☐ Ripples

☐ Drift and/or debris

☐ Presence of bed and bank

☐ Benches

☐ Soil development

☐ Surface relief

☐ Other: Inundated

☐ Other: \_\_\_\_\_

☐ Other: \_\_\_\_\_

<p style="text-align: center;"><b>Hydrogeomorphic Floodplain Units</b></p>					
<b>Procedure for identifying and characterizing the floodplain units to assist in identifying the OHW M:</b>					
1. Walk the channel and floodplain within the study area to get an impression of the geomorphology and vegetation present at the site.					
2. Select a representative cross section across the channel. Draw the cross section and label the floodplain units.					
3. Determine a point on the cross section that is characteristic of one of the hydrogeomorphic floodplain units.					
a) Record the floodplain unit and GPS position.					
b) Describe the sediment texture (using the Wentworth class size) and the vegetation characteristics of the floodplain unit.					
c) Identify any indicators present at the location.					
4. Repeat for other points in different hydrogeomorphic floodplain units across the cross section.					
5. Identify the OHW M and record the indicators. Record the OHW M position via:					
<input type="checkbox"/> Mapping on aerial photograph		<input checked="" type="checkbox"/> GPS			
<input type="checkbox"/> Digitized on computer		<input type="checkbox"/> Other:

<p style="text-align: center;"><b>Hydrogeomorphic Floodplain Units</b></p>					
<b>Procedure for identifying and characterizing the floodplain units to assist in identifying the OHW:</b>					
1. Walk the channel and floodplain within the study area to get an impression of the geomorphology and vegetation present at the site.					
2. Select a representative cross section across the channel. Draw the cross section and label the floodplain units.					
3. Determine a point on the cross section that is characteristic of one of the hydrogeomorphic floodplain units.					
a) Record the floodplain unit and GPS position.					
b) Describe the sediment texture (using the Wentworth class size) and the vegetation characteristics of the floodplain unit.					
c) Identify any indicators present at the location.					
4. Repeat for other points in different hydrogeomorphic floodplain units across the cross section.					
5. Identify the OHW and record the indicators. Record the OHW position via:					
<input type="checkbox"/> Mapping on aerial photograph		<input checked="" type="checkbox"/> GPS			
<input type="checkbox"/> Digitized on computer		<input type="checkbox"/> Other:

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Date: 8/27/2019

Applicant/Owner: Zayo Group State: California Sampling Point: SP 04-4 Feature ID: W01-4

Investigator(s): MO, KD Section, Township, Range: 8, T39N, R13E

Local relief (hillside, terrace, etc.): Roadside depression Local Relief (concave, convex, none): Concave Slope (%): 1

Subregion (LRR): D Lat: 41.2338 Long: -120.50388 Datum: NAD83

Soil Map Unit Name: (152) Lakeview loam, 0 to 2 percent slopes, Pit River area, mlra 21 NWI classification: None

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)

Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No     

Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes x No     

Hydric Soil Present? Yes x No     

Wetland Hydrology Present? Yes x No     

Is the Sampled Area within a Wetland? Yes x No     

## Evaluation of features designated "Other Waters"

Characteristics: Type:      Width:      Substrate:     

Indicators: Defined bed and bank:      Scour      OHWM Mapped     

Feature Designation: Perennial      Intermittent      Ephemeral     

Natural Drainage      Artificial Drainage      Navigable Water     

Remarks: Wetland parameters are present as indicated by hydrology indicator (water stained leaves) and a dominance of hydrophytic vegetation. Soils are problematic likely due to the nearby agricultural influences; it is also likely that soil has had recent movement. See soil remarks.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECEENDING ORDER

3/3 Abbrev. Species Name Absolute Dominant Indicator  
Tree Stratum (Plot size: 30' radius) % Cover Species? Status

1                           
2                           
3                           
4                           
0 = Total Cover

Sapling/Shrub Stratum (Plot size: 15' radius)

100 = Total Cover

Woody Vine Stratum (Plot size:     )  
1                           
2                           
0 = Total Cover

% Bare Ground in Herb 0 % Cover of Biotic     

## Dominance Test worksheet:

Number of Dominant Species  
That Are OBL, FACW, or FAC: 2 (A)

Total Number of Dominant  
Species Across All Strata: 2 (B)

Percent of Dominant Species  
That Are OBL, FACW, or FAC: 1 (A/B)

## Prevalence Index worksheet:

Total % Cover of: Multiply by:  
OBL species 0 x 1 = 0  
FACW species 95 x 2 = 190  
FAC species 5 x 3 = 15  
FACU species 0 x 4 = 0  
UPL species 0 x 5 = 0  
Column Totals: 100 (A) 205 (B)  
Prevalence Index = B/A = 2.05

## Hydrophytic Vegetation Indicators:

1 - Rapid Test for Hydrophytic Vegetation  
Yes 2 - Dominance Test is >50%  
Yes 3 - Prevalence Index is ≤3.0<sup>1</sup>  
4 - Morphological Adaptations<sup>1</sup> (Provide supporting data in Remarks or on a separate sheet)  
5 - Wetland Non-Vascular Plants<sup>1</sup>  
6 - Problematic Hydrophytic Vegetation<sup>1</sup> (Explain)  
<sup>1</sup> Indicators of hydric soil and wetland hydrology must be present unless disturbed or problematic.

## Hydrophytic Vegetation Present?

Yes X No     

Remarks: Hydrophytic vegetation present as indicated by a dominance of FACW species.

[illegible]

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Date: 8/27/2019

Applicant/Owner: Zayo Group State: California Sampling Point: SP 09-4 Feature ID: W03-4b

Investigator(s): MO, KD Section, Township, Range: 5, T39N, R13E

Local relief (hillside, terrace, etc.): Roadside depression Local Relief (concave, convex, none): Concave Slope (%): 3

Subregion (LRR): D Lat: 41.2401 Long: -120.50403 Datum: NAD83

Soil Map Unit Name: (112) Buntingville clay loam, 0 to 2 percent slopes NWI classification: PEM

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)

Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No     

Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes x No     

Hydric Soil Present? Yes x No     

Wetland Hydrology Present? Yes x No     

Is the Sampled Area within a Wetland? Yes x No     

## Evaluation of features designated "Other Waters"

Characteristics: Type:      Width:      Substrate:     

Indicators: Defined bed and bank:      Scour      OHWM Mapped     

Feature Designation: Perennial      Intermittent      Ephemeral     

Natural Drainage      Artificial Drainage      Navigable Water     

Remarks: Wetland hydrology indicators present and vegetation dominated by hydrophytic species. Soils problematic and assumed hydric.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECEENDING ORDER

3/3 Abbrev. Species Name Absolute Dominant Indicator  
Tree Stratum (Plot size: 30' radius) % Cover Species? Status

1				
2				
3

## Dominance Test worksheet:

Number of Dominant Species That Are OBL, FACW, or FAC: 3 (A)

Total Number of Dominant Species Across All Strata: 3 (B)

Percent of Dominant Species That Are OBL, FACW, or FAC: 1 (A/B)

## Prevalence Index worksheet:

Total % Cover of:		Multiply by:
OBL species	90	x 1 = 90
FACW species	70	x 2 = 140
FAC species	0	x 3 = 0
FACU species	0	x 4 = 0
UPL species	0	x 5 = 0
Column Totals:	160	(A) 230 (B)
Prevalence Index = B/A =		1.4375

## Hydrophytic Vegetation Indicators:

- 1 - Rapid Test for Hydrophytic Vegetation
- Yes 2 - Dominance Test is >50%
- Yes 3 - Prevalence Index is  $\leq 3.0$ <sup>1</sup>
- 4 - Morphological Adaptations<sup>1</sup> (Provide supporting data in Remarks or on a separate sheet)
- 5 - Wetland Non-Vascular Plants<sup>1</sup>
- 6 - Problematic Hydrophytic Vegetation<sup>1</sup> (Explain)

<sup>1</sup> Indicators of hydric soil and wetland hydrology must be present unless disturbed or problematic.

## Hydrophytic Vegetation Present?

Yes X No     

Remarks: Hydrophytic vegetation present as indicated by a dominance of FACW and OBL species.

SOIL							Sampling Point: SP 09-4

## WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Madeline/Lassen Co Sampling Point: 215-4 Feature ID: W203-4  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/28/2019  
 Investigator(s): Mike Williams/Justin Ahn Section, Township, Range: 17, T38N, R13E  
 Local relief (hillside, terrace, etc.): Hillslope Local Relief (concave, convex, none): Concave Slope (%): 3  
 Subregion (LRR): D Lat: 41.12542 Long: -120.49402 Datum: NAD 83  
 Soil Map Unit Name: (178) Devada Petescreek-Fiddler association, 2 to 30 percent slopes NWI classification: None  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes x No       
 Hydric Soil Present? Yes x No       
 Wetland Hydrology Present? Yes x No       
 Is the Sampled Area within a Wetland? Yes x No     

Remarks: Sample point documents a wetland. Hydrophytic vegetation dominant. Indicators of hydric soils and hydrology present. Strong groundwater presence at site.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Modoc County Sampling Date: 8/26/2019

Applicant/Owner: Zayo Group State: California Sampling Point: SP 01-4 Feature ID: NW01-4

Investigator(s): MO, KD Section, Township, Range: 17, T40N, R13E

Local relief (hillside, terrace, etc.): Depression/Roadside Swale Local Relief (concave, convex, none): Concave Slope (%): 2

Subregion (LRR): D Lat: 41.29812 Long: -120.50459 Datum: NAD83

Soil Map Unit Name: (132) Deven-Rock Outcrop Complex, 2 to 30 percent slopes NWI classification: None

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)

Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No     

Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes      No x

Hydric Soil Present? Yes      No x

Wetland Hydrology Present? Yes x No     

Is the Sampled Area within a Wetland? Yes      No x

## Evaluation of features designated "Other Waters"

Characteristics: Type:      Width:      Substrate:     

Indicators: Defined bed and bank:      Scour      OHWM Mapped     

Feature Designation: Perennial      Intermittent      Ephemeral     

Natural Drainage      Artificial Drainage      Navigable Water     

**Remarks:** Non-wetland sample point as indicated by the presence of hydrology indicators (biotic crust and drainage patterns), but lacks hydric soil indicators and lacks a dominance of hydrophytic vegetation. While it appears that the area is inundated by water periodically, it lacks indicators to evidence that it is a wetland or other waters.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECEENDING ORDER

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project, Group #5 City/County: Lassen County Sampling Point: SP 50-5 Feature ID: W5-5  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/12/2019  
 Investigator(s): HR/ PF Section, Township, Range: S23, T25N, R13E  
 Local relief (hillside, terrace, etc.): Swale Local Relief (concave, convex, none): Concave Slope (%): 0 to 2  
 Subregion (LRR): D Lat: 41.00208 Long: -120.49274 Datum: NAD83  
 Soil Map Unit Name: (334) Ravendale silty clay, 0 to 2 percent, occasionally flooded NWI classification: PSSA  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil yes, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present?	Yes <u>x</u> No <u>    </u>	Is the Sampled Area within a Wetland? Yes <u>x</u> No <u>    </u>
Hydric Soil Present?	Yes <u>x</u> No <u>    </u>	
Wetland Hydrology Present?	Yes <u>x</u> No <u>    </u>	

**Remarks:** Wetland parameters evidenced by indicators of hydrophytic vegetation and primary hydrology (surface soil cracks and biotic crust). Soils meet criteria for naturally problematic soils in feature subject to recent inundation.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER

3/3 Abbrev.	Species Name	Absolute % Cover	Dominant Species?	Indicator Status

### Dominance Test worksheet:

Number of Dominant Species  
That Are OBL, FACW, or FAC: 1 (A)

Total Number of Dominant  
Species Across All Strata: 1 (B)

Percent of Dominant Species  
That Are OBL, FACW, or FAC: 100% (A/B)

### Prevalence Index worksheet:

Total % Cover of:	Multiply by:	
OBL species <u>0</u>	x 1 =	<u>0</u>
FACW species <u>90</u>	x 2 =	<u>180</u>
FAC species <u>0</u>	x 3 =	<u>0</u>
FACU species <u>0</u>	x 4 =	<u>0</u>
UPL species <u>10</u>	x 5 =	<u>50</u>
Column Totals: <u>100</u> (A)		<u>230</u> (B)
Prevalence Index = B/A =		<u>2.3</u>

### Hydrophytic Vegetation Indicators:

1 - Rapid Test for Hydrophytic Vegetation  
Yes 2 - Dominance Test is >50%  
Yes 3 - Prevalence Index is ≤3.0<sup>1</sup>  
     4 - Morphological Adaptations<sup>1</sup> (Provide supporting data in Remarks or on a separate sheet)  
     5 - Wetland Non-Vascular Plants<sup>1</sup>  
     6 - Problematic Hydrophytic Vegetation<sup>1</sup> (Explain)  
<sup>1</sup> Indicators of hydric soil and wetland hydrology must be present unless disturbed or problematic.

**Hydrophytic  
Vegetation  
Present?**

Yes X No     

**Remarks:** Hydrophytic vegetation is dominant. Upland species establishing as soil is drying seasonally.

SOIL						Sampling Point: SP 50-5		
<b>Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)</b>

<b>Remarks:</b> Primary wetland hydrology indicators were observed (surface soil cracks, and biotic crust), and one secondary indicator (dominant species pass FAC-neutral test).								

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project, Group #5 City/County: Lassen County Sampling Point: SP 51-5 Feature ID: U50-5  
 Applicant/Owner: Zayo Group State: California Sampling Date: 8/12/2019  
 Investigator(s): HR/PF Section, Township, Range: S23,T25N,R13E  
 Local relief (hillside, terrace, etc.): Hillslope Local Relief (concave, convex, none): None Slope (%): 3 to 6  
 Subregion (LRR): D Lat: 41.00208 Long: -120.49274 Datum: NAD83  
 Soil Map Unit Name: (334) Ravendale silty clay, 0 to 2 percent, occasionally flooded NWI classification: None  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present?	Yes <u>    </u> No <u>x</u>	Is the Sampled Area within a Wetland? Yes <u>    </u> No <u>X</u>
Hydric Soil Present?	Yes <u>    </u> No <u>x</u>	
Wetland Hydrology Present?	Yes <u>    </u> No <u>x</u>	

Remarks: Sample confirmed as upland along slope where indicators of all three parameters are absent; upland pair point to W50-5.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER

### Hydrophytic Vegetation Indicators:

     1 - Rapid Test for Hydrophytic Vegetation  
No 2 - Dominance Test is >50%  
No 3 - Prevalence Index is ≤3.0<sup>1</sup>  
     4 - Morphological Adaptations<sup>1</sup> (Provide supporting data in Remarks or on a separate sheet)  
     5 - Wetland Non-Vascular Plants<sup>1</sup>  
     6 - Problematic Hydrophytic Vegetation<sup>1</sup> (Explain)  
<sup>1</sup> Indicators of hydric soil and wetland hydrology must be present unless disturbed or problematic.

Hydrophytic Vegetation Present?

Yes      No X

Remarks: Dominance of hydrophytic vegetation not observed.

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project, Group #5 City/County: Lassen County, CA Sampling Point: SP 201-5 Feature ID: W200-5a  
 Applicant/Owner: Zayo Group State: Oregon Sampling Date: 8/14/2019  
 Investigator(s): LH/CG Section, Township, Range: S22, T26N, R13E  
 Local relief (hillside, terrace, etc.): Toeslope Local Relief (concave, convex, none): None Slope (%): 1  
 Subregion (LRR): D Lat: 40.97658 Long: -120.49832 Datum: NAD83  
 Soil Map Unit Name: (324) Pit clay, 0 to 2 percent slopes, Hydric NWI classification: PSSA  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed? No Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil Yes, or Hydrology No naturally problematic? Yes (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present?	Yes <u>x</u> No <u>    </u>	Is the Sampled Area within a Wetland? Yes <u>x</u> No <u>    </u>
Hydric Soil Present?	Yes <u>x</u> No <u>    </u>	
Wetland Hydrology Present?	Yes <u>x</u> No <u>    </u>	

**Remarks:** Fresh emergent wetland dominated by Carex species, runs parallel to Highway for over 2 miles; strong hydrology indicators observed. Soils meet criteria for problematic hydric soils based on the presence of moderately strong alkaline soils; therefore considered hydric in area subject to frequent inundation.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Project/Site: Zayo Fiberoptic Interconnect Project, Group #5 City/County: Lassen County, CA Sampling Point: SP 204-5 Feature ID: W202-5  
 Applicant/Owner: Zayo Group State: Oregon Sampling Date: 8/14/2019  
 Investigator(s): LH/CG Section, Township, Range: S21, T37N, R13E  
 Local relief (hillside, terrace, etc.): Depression Local Relief (concave, convex, none): Concave Slope (%): 3  
 Subregion (LRR): D Lat: 41.03294 Long: -120.48344 Datum: NAD83  
 Soil Map Unit Name: (334) Ravendale silty clay, 0 to 2 percent slopes, occasionally flooded NWI classification: PEM1Fx  
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)  
 Are Vegetation No, Soil No, or Hydrology No significantly disturbed? No Are "Normal Circumstances" present? Yes X No       
 Are Vegetation No, Soil Yes, or Hydrology No naturally problematic? Yes (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present?	Yes <u>x</u> No <u>    </u>	Is the Sampled Area within a Wetland? Yes <u>x</u> No <u>    </u>
Hydric Soil Present?	Yes <u>x</u> No <u>    </u>	
Wetland Hydrology Present?	Yes <u>x</u> No <u>    </u>	

**Remarks:** Fresh emergent wetland dominated by Juncus and Rumex species in the herb layer; strong hydrology indicators observed. Soils meet criteria for problematic hydric soils based on the presence of moderately strong alkaline soils; therefore considered hydric in area subject to frequent inundation. Feature appears to be anthropogenically influenced, may serve as irrigation canal for nearby agriculture.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER

3/3 Abbrev.	Species Name	Absolute % Cover	Dominant Species?	Indicator Status

### Dominance Test worksheet:

Number of Dominant Species That Are OBL, FACW, or FAC: 2 (A)  
  
 Total Number of Dominant Species Across All Strata: 3 (B)  
  
 Percent of Dominant Species That Are OBL, FACW, or FAC: 67% (A/B)

### Prevalence Index worksheet:

Total % Cover of:	Multiply by:
OBL species <u>0</u>	x 1 = <u>0</u>
FACW species <u>40</u>	x 2 = <u>80</u>
FAC species <u>30</u>	x 3 = <u>90</u>
FACU species <u>5</u>	x 4 = <u>20</u>
UPL species <u>5</u>	x 5 = <u>25</u>
Column Totals: <u>80</u> (A)	<u>215</u> (B)
Prevalence Index = B/A = <u>2.6875</u>	

### Hydrophytic Vegetation Indicators:

1 - Rapid Test for Hydrophytic Vegetation  
Yes 2 - Dominance Test is >50%  
Yes 3 - Prevalence Index is ≤3.0<sup>1</sup>  
     4 - Morphological Adaptations<sup>1</sup> (Provide supporting data in Remarks or on a separate sheet)  
     5 - Wetland Non-Vascular Plants<sup>1</sup>  
     6 - Problematic Hydrophytic Vegetation<sup>1</sup> (Explain)  
<sup>1</sup> Indicators of hydric soil and wetland hydrology must be present unless disturbed or problematic.

Hydrophytic Vegetation Present?

Yes X No     

**Remarks:** Sample contains a dominance of hydrophytic vegetation.

SOIL							Sampling Point: SP 204-5	
Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)								
Depth (inches)	Matrix		Redox Features				Texture	Remarks
	Color (moist)	%	Color (moist)	%	Type <sup>1</sup>	Loc <sup>2</sup>		
0-3	Organic							O-layer
3-16	10YR 2.5/3	100					Loamy clay	

<sup>1</sup>Type: C=Concentration, D=Depletion, RM=Reduced Matrix, CS=Covered or Coated Sand Grains.
<sup>2</sup>Location: PL=Pore Lining, M=Matrix.

**Hydric Soil Indicators: (Applicable to all LRRs, unless otherwise noted.)**

<input type="checkbox"/> Histosol (A1) <input type="checkbox"/> Histic Epipedon (A2) <input type="checkbox"/> Black Histic (A3) <input type="checkbox"/> Hydrogen Sulfide (A4) <input type="checkbox"/> Stratified Layers (A5) ( <b>LRR C</b> ) <input type="checkbox"/> 1 cm Muck (A9) ( <b>LRR D</b> ) <input type="checkbox"/> Depleted Below Dark Surface (A11) <input type="checkbox"/> Thick Dark Surface (A12) <input type="checkbox"/> Sandy Mucky Mineral (S1) <input type="checkbox"/> Sandy Gleyed Matrix (S4)	<input type="checkbox"/> Sandy Redox (S5) <input type="checkbox"/> Stripped Matrix (S6) <input type="checkbox"/> Loamy Mucky Mineral (F1) <input type="checkbox"/> Loamy Gleyed Matrix (F2) <input type="checkbox"/> Depleted Matrix (F3) <input type="checkbox"/> Redox Dark Surface (F6) <input type="checkbox"/> Depleted Dark Surface (F7) <input type="checkbox"/> Redox Depressions (F8) <input type="checkbox"/> Vernal Pools (F9)	<b>Indicators for Problematic Hydric Soils<sup>3</sup>:</b> <input type="checkbox"/> 1 cm Muck (A9) ( <b>LRR C</b> ) <input type="checkbox"/> 2 cm Muck (A10) ( <b>LRR B</b> ) <input type="checkbox"/> Reduced Vertic (F18) <input type="checkbox"/> Red Parent Material (TF2) <input checked="" type="checkbox"/> Other (Explain in Remarks)
--	---	---

<sup>3</sup>Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic.

**Restrictive Layer (if present):**

Type:                     None                    

Depth (inches):                     NA

**Hydric Soil Present?**

Yes ☒ No ☐

**Remarks:** Hydric soil indicators not observed in sample. Soils are presumed as problematic hydric soils due to presence of alkaline soils which may inhibit the development of iron or manganese concentrations; soils also have low chroma colors which may obscure redox; strong vegetation and hydrology indicators are present in this feature which functions as a wetland.

**HYDROLOGY**

**Wetland Hydrology Indicators:**

Primary Indicators (minimum of one required; check all that apply)

<input checked="" type="checkbox"/> Surface Water (A1) <input checked="" type="checkbox"/> High Water Table (A2) <input checked="" type="checkbox"/> Saturation (A3) <input type="checkbox"/> Water Marks (B1) ( <b>Nonriverine</b> ) <input type="checkbox"/> Sediment Deposits (B2) ( <b>Nonriverine</b> ) <input type="checkbox"/> Drift Deposits (B3) ( <b>Nonriverine</b> ) <input type="checkbox"/> Surface Soil Cracks (B6) <input checked="" type="checkbox"/> Inundation Visible on Aerial Imagery (B7) <input type="checkbox"/> Water-Stained Leaves (B9)	<input type="checkbox"/> Salt Crust (B11) <input checked="" type="checkbox"/> Biotic Crust (B12) <input checked="" type="checkbox"/> Aquatic Invertebrates (B13) <input type="checkbox"/> Hydrogen Sulfide Odor (C1) <input type="checkbox"/> Oxidized Rhizospheres along Living Roots (C3) <input type="checkbox"/> Presence of Reduced Iron (C4) <input type="checkbox"/> Recent Iron Reduction in Tilled Soils (C6) <input type="checkbox"/> Thin Muck Surface (C7) <input type="checkbox"/> Other (Explain in Remarks)
---	--

Secondary Indicators (2 or more required)

<input type="checkbox"/> Water Marks (B1) ( <b>Riverine</b> )
<input type="checkbox"/> Sediment Deposits (B2) ( <b>Riverine</b> )
<input type="checkbox"/> Drift Deposits (B3) ( <b>Riverine</b> )
<input type="checkbox"/> Drainage Patterns (B10)
<input checked="" type="checkbox"/> Dry-Season Water Table (C2)
<input type="checkbox"/> Crayfish Burrows (C8)
<input type="checkbox"/> Saturation Visible on Aerial Imagery (C9)
<input type="checkbox"/> Shallow Aquitard (D3)
<input checked="" type="checkbox"/> FAC-Neutral Test (D5)

**Field Observations:**

Surface Water Present?	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	Depth (inches): <u>          0          </u>
Water Table Present?	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	Depth (inches): <u>          0          </u>
Saturation Present?	Yes <input checked="" type="checkbox"/>	No <input type="checkbox"/>	Depth (inches): <u>          0          </u>

(includes capillary fringe)

**Wetland Hydrology Present?**

Yes ☒ No ☐

**Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:**

**Remarks:** Multiple primary and secondary wetland hydrology indicators observed in sample.

### Dominance Test worksheet:

Number of Dominant Species  
That Are OBL, FACW, or FAC: 0 (A)

Total Number of Dominant  
Species Across All Strata: 2 (B)

Percent of Dominant Species  
That Are OBL, FACW, or FAC: 0% (A/B)

### Prevalence Index worksheet:

Total % Cover of:	Multiply by:	
OBL species	<u>0</u> x 1 =	<u>0</u>
FACW species	<u>0</u> x 2 =	<u>0</u>
FAC species	<u>10</u> x 3 =	<u>30</u>
FACU species	<u>60</u> x 4 =	<u>240</u>
UPL species	<u>30</u> x 5 =	<u>150</u>
Column Totals:	<u>100</u> (A)	<u>420</u> (B)
Prevalence Index = B/A =		<u>4.2</u>

### Hydrophytic Vegetation Indicators:

     1 - Rapid Test for Hydrophytic Vegetation  
No 2 - Dominance Test is >50%  
No 3 - Prevalence Index is ≤3.0<sup>1</sup>  
     4 - Morphological Adaptations<sup>1</sup> (Provide supporting data in Remarks or on a separate sheet)  
     5 - Wetland Non-Vascular Plants<sup>1</sup>  
     6 - Problematic Hydrophytic Vegetation<sup>1</sup> (Explain)  
<sup>1</sup> Indicators of hydric soil and wetland hydrology must be present unless disturbed or problematic.

Hydrophytic  
Vegetation  
Present?

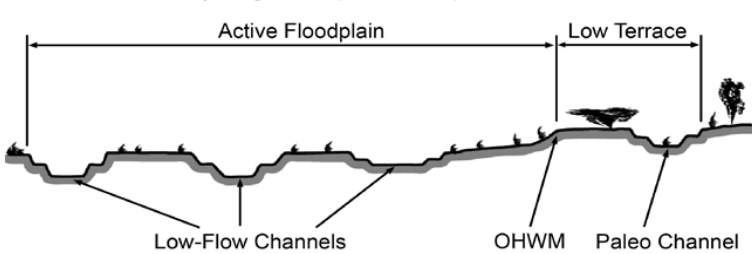

Yes      No X

**Remarks:** Sample does not contain a dominance of hydrophytic vegetation.

SOIL							Sampling Point: SP 200-5	
<b>Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)</b>

Y <input type="checkbox"/> / N <input checked="" type="checkbox"/> Is the site significantly disturbed?		<b>Location Details:</b> Adjacent to US 395. <b>Projection:</b> Lambert <b>Datum:</b> NAD83 <b>Coordinates:</b>			
<b>Potential anthropogenic influences on the channel system:</b> Intermittent drainage adjacent to Highway					
<b>Brief site description:</b> Intermittent drainage at C200-6. OHWM and TOB are the same.					
<b>Checklist of resources (if available):</b> <div style="display: flex; justify-content: space-between;"> <div style="width: 45%;"> <input checked="" type="checkbox"/> Aerial photography  <b>Dates:</b> ESRI GIS imagery  <input checked="" type="checkbox"/> Topographic maps  <input type="checkbox"/> Geologic maps  <input type="checkbox"/> Vegetation maps  <input checked="" type="checkbox"/> Soils maps  <input type="checkbox"/> Rainfall/precipitation maps  <input type="checkbox"/> Existing delineation(s) for site  <input checked="" type="checkbox"/> Global positioning system (GPS)  <input type="checkbox"/> Other studies:         </div> <div style="width: 45%;"> <input type="checkbox"/> Stream gage data  <b>Gage number:</b> _____  <b>Period of record:</b>  <input type="checkbox"/> History of recent effective discharges  <input type="checkbox"/> Results of flood frequency analysis  <input type="checkbox"/> Most recent shift-adjusted rating  <input type="checkbox"/> Gage heights for 2-, 5-, 10-, and 25-year events and the most recent event exceeding a 5-year event         </div> </div>					
<b>Hydrogeomorphic Floodplain Units</b> 					
<b>Procedure for identifying and characterizing the floodplain units to assist in identifying the OHWM:</b> 1. Walk the channel and floodplain within the study area to get an impression of the geomorphology and vegetation present at the site. 2. Select a representative cross section across the channel. Draw the cross section and label the floodplain units. 3. Determine a point on the cross section that is characteristic of one of the hydrogeomorphic floodplain units. <div style="margin-left: 20px;">           a) Record the floodplain unit and GPS position.             b) Describe the sediment texture (using the Wentworth class size) and the vegetation characteristics of the floodplain unit.            c) Identify any indicators present at the location.         </div> 4. Repeat for other points in different hydrogeomorphic floodplain units across the cross section. 5. Identify the OHWM and record the indicators. Record the OHWM position via: <div style="display: flex; justify-content: space-around; margin-top: 10px;"> <div style="text-align: center;"> <input type="checkbox"/> Mapping on aerial photograph  <input type="checkbox"/> Digitized on computer         </div> <div style="text-align: center;"> <input checked="" type="checkbox"/> GPS  <input type="checkbox"/> Other:         </div> </div>

Cross section drawing:

OHWM

GPS point: \_\_\_\_\_

Indicators:

☒ Change in average sediment texture

☐ Change in vegetation species

☒ Change in vegetation cover

☒ Break in bank slope

☐ Other: Drift deposits

☐ Other: \_\_\_\_\_

Comments:

Bed and bank feature with scoured channel. OHWM evidenced by change in sediment texture, break in bank slope, change in vegetation cover, and drift deposits. Sampling point documents an intermittent stream.

Floodplain unit:

☒ Low-Flow Channel

☐ Active Floodplain

☐ Low Terrace

GPS point: \_\_\_\_\_

**Characteristics of the floodplain unit:**

Average sediment texture: \_\_\_\_\_

Total veg cover: 0 % Tree: 0 % Shrub: 0 % Herb: 0 %

Community successional stage:

☐ NA

☒ Early (herbaceous & seedlings)

☐ Mid (herbaceous, shrubs, saplings)

☐ Late (herbaceous, shrubs, mature trees)

Indicators:

☒ Mudcracks

☐ Ripples

☐ Drift and/or debris

☒ Presence of bed and bank

☐ Benches

☐ Soil development

☒ Surface relief

☐ Other: Surface soil cracks

☐ Other: \_\_\_\_\_

☐ Other: \_\_\_\_\_

Comments:

No water present in low-flow channel. Surface relief is present and the bed has surface soil cracks in the low-flow channel.

# WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project City/County: Lassen County Sampling Date: 8/14/2019

Applicant/Owner: Zayo Group State: California Sampling Point: SP 13-6 Feature ID: W5-6

Investigator(s): MO/ JA Section, Township, Range: S14, T32N, R15E

Local relief (hillside, terrace, etc.): Depression Local Relief (concave, convex, none): Concave Slope (%): 3

Subregion (LRR): D Lat: 40.64243 Long: -120.25506 Datum: NAD83

Soil Map Unit Name: (276) Loomis-Fivespring association, 5 to 30 percent slopes NWI classification: Emergent wetland

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)

Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No     

Are Vegetation No, Soil Yes, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes x No     

Hydric Soil Present? Yes x No     

Wetland Hydrology Present? Yes x No     

Is the Sampled Area within a Wetland? Yes x No     

## Evaluation of features designated "Other Waters"

Characteristics: Type:      Width:      Substrate:     

Indicators: Defined bed and bank:      Scour      OHWM Mapped     

Feature Designation: Perennial      Intermittent      Ephemeral     

Natural Drainage      Artificial Drainage      Navigable Water     

Remarks: Wetland parameters are present as indicated by hydrology indicators, and a dominance of hydrophytic vegetation. Site meets criteria for problematic hydric soils subject to ponding.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECEENDING ORDER

3/3 Abbrev. Species Name Absolute Dominant Indicator  
Tree Stratum (Plot size: 30' radius) % Cover Species? Status

Investigator(s): TK/PF/MO Section, Township, Range: S6,T33N, R15E

Local relief (hillside, terrace, etc.): Swale Local Relief (concave, convex, none): Concave Slope (%): 5

Subregion (LRR): D Lat: 40.74573 Long: -120.32345 Datum: NAD83

Soil Map Unit Name: (356) Searles-Devada-Fivesprings association, 2 to 30 percent slopes NWI classification: None

Are climatic / hydrologic conditions on the site typical for this time of year? Yes X No      (If no, explain in Remarks.)

Are Vegetation No, Soil No, or Hydrology No significantly disturbed?      Are "Normal Circumstances" present? Yes X No     

Are Vegetation No, Soil No, or Hydrology No naturally problematic?      (If needed, explain any answers in Remarks.)

## SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes      No x

Hydric Soil Present? Yes      No x

Wetland Hydrology Present? Yes      No x

Is the Sampled Area within a Wetland? Yes      No x

## Evaluation of features designated "Other Waters"

Characteristics: Type:      Width:      Substrate:     

Indicators: Defined bed and bank:      Scour      OHWM Mapped     

Feature Designation: Perennial      Intermittent      Ephemeral     

Natural Drainage      Artificial Drainage      Navigable Water     

Remarks: Sample confirmed as upland along slope where all three parameters are absent. Upland pair point to W200-6.

## VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECEENDING ORDER

3/3 Abbrev. Species Name Absolute Dominant Indicator  
Tree Stratum (Plot size:     ) % Cover Species? Status

1				
2				
3				
4				
		0	= Total Cover	

Sapling/Shrub Stratum (Plot size: 15 foot radius)

1	Arttri	Artemisia tridentata	5	YES	UPL
2

1				
2				
		0	= Total Cover	

% Bare Ground in Herb 95 % Cover of Biotic 0

## Dominance Test worksheet:

Number of Dominant Species  
That Are OBL, FACW, or FAC: 0 (A)

Total Number of Dominant  
Species Across All Strata: 2 (B)

Percent of Dominant Species  
That Are OBL, FACW, or FAC: 0 (A/B)

## Prevalence Index worksheet:

Total % Cover of:		Multiply by:
OBL species	0	x 1 = 0
FACW species	0	x 2 = 0
FAC species	0	x 3 = 0
FACU species	0	x 4 = 0
UPL species	10	x 5 = 50
Column Totals:	10	(A) 50 (B)
Prevalence Index = B/A =		5

## Hydrophytic Vegetation Indicators:

- 1 - Rapid Test for Hydrophytic Vegetation
- No 2 - Dominance Test is >50%
- No 3 - Prevalence Index is ≤3.0<sup>1</sup>
- 4 - Morphological Adaptations<sup>1</sup> (Provide supporting data in Remarks or on a separate sheet)
- 5 - Wetland Non-Vascular Plants<sup>1</sup>
- 6 - Problematic Hydrophytic Vegetation<sup>1</sup> (Explain)

<sup>1</sup> Indicators of hydric soil and wetland hydrology must be present unless disturbed or problematic.

## Hydrophytic Vegetation Present?

Yes      No X

Remarks:

[illegible]

<b>Potential anthropogenic influences on the channel system:</b> Roadside Adjacent to Highway U.S. 395					
<b>Brief site description:</b> Small meandering intermittent stream through shrubland. Cross apply D02-7 (a tributary of D01-7). No floodplain present. Top of bank and OHWM are the same.					
<b>Checklist of resources (if available):</b> <div style="display: flex; justify-content: space-between;"> <div style="width: 45%;"> <input checked="" type="checkbox"/> Aerial photography  <b>Dates:</b> ESRI GIS imagery  <input checked="" type="checkbox"/> Topographic maps  <input type="checkbox"/> Geologic maps  <input type="checkbox"/> Vegetation maps  <input type="checkbox"/> Soils maps  <input type="checkbox"/> Rainfall/precipitation maps  <input type="checkbox"/> Existing delineation(s) for site  <input checked="" type="checkbox"/> Global positioning system (GPS)  <input type="checkbox"/> Other studies:         </div> <div style="width: 45%;"> <input type="checkbox"/> Stream gage data  <b>Gage number:</b>          Period of record:  <input type="checkbox"/> History of recent effective discharges  <input type="checkbox"/> Results of flood frequency analysis  <input type="checkbox"/> Most recent shift-adjusted rating  <input type="checkbox"/> Gage heights for 2-, 5-, 10-, and 25-year events and the most recent event exceeding a 5-year event         </div> </div>					
<b>Hydrogeomorphic Floodplain Units</b>					
<b>Procedure for identifying and characterizing the floodplain units to assist in identifying the OHWM:</b>					
1. Walk the channel and floodplain within the study area to get an impression of the geomorphology and vegetation present at the site.					
2. Select a representative cross section across the channel. Draw the cross section and label the floodplain units.					
3. Determine a point on the cross section that is characteristic of one of the hydrogeomorphic floodplain units.					
a) Record the floodplain unit and GPS position.					
b) Describe the sediment texture (using the Wentworth class size) and the vegetation characteristics of the floodplain unit.					
c) Identify any indicators present at the location.					
4. Repeat for other points in different hydrogeomorphic floodplain units across the cross section.					
5. Identify the OHWM and record the indicators. Record the OHWM position via:					
<input type="checkbox"/> Mapping on aerial photograph		<input checked="" type="checkbox"/> GPS		<input type="checkbox"/> Other:	
<input type="checkbox"/> Digitized on computer

## Indicators:

- ☒ Change in average sediment texture  
☐ Change in vegetation species  
☒ Change in vegetation cover

- ☒ Break in bank slope  
☐ Other: \_\_\_\_\_  
☐ Other: \_\_\_\_\_

## Comments:

Bed and bank feature with scoured channel. OHWM evidenced by change in sediment texture, break in bank slope, and change in vegetation cover. Sampling point documents an ephemeral stream.

Floodplain unit:☒ Low-Flow Channel☐ Active Floodplain☐ Low Terrace

GPS point: \_\_\_\_\_

## Characteristics of the floodplain unit:

Average sediment texture: Cobbles, pebbles, sand,Total veg cover: 0 % Tree: 0 % Shrub: 0 % Herb: 20 %

Community successional stage:

- ☐ NA ☐ Mid (herbaceous, shrubs, saplings)  
☒ Early (herbaceous & seedlings) ☐ Late (herbaceous, shrubs, mature trees)

## Indicators:

- ☐ Mudcracks ☒ Soil development  
☐ Ripples ☒ Surface relief  
☐ Drift and/or debris ☒ Other: Surface soil cracks  
☒ Presence of bed and bank ☐ Other: \_\_\_\_\_  
☐ Benches ☐ Other: \_\_\_\_\_

## Comments:

No water present in low-flow channel. Surface relief is present and the bed has surface soil cracks in the low-flow channel.

## WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Sampling Point: SP 02-7

Feature ID: W01-7

Project/Site: Zayo Fiberoptic Interconnect Project, Group #7

City/County: Lassen County

Sampling Date: 8/28/2019

Applicant/Owner: Zayo Group

State: California

Investigator(s): T. Kayatsky, P. Ferral

Section, Township, Range: S10, T30N, R15E

Local relief (hillside, terrace, etc.): Flat

Local Relief (concave, convex, none): None

Slope (%): 0

Subregion (LRR): D

Lat: 40.47429

Long: -120.27498

Datum: NAD83

Soil Map Unit Name: (335) Ravendale silty clay, 0 to 2 percent slopes, Hydric

NWI classification: PEM1C

Are climatic / hydrologic conditions on the site typical for this time of year? Yes ☒ No ☐ (If no, explain in Remarks.)Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No significantly disturbed? ☐ No Are "Normal Circumstances" present? Yes ☒ No ☐Are Vegetation ☐ No, Soil ☒ Yes, or Hydrology ☐ No naturally problematic? ☒ Yes (If needed, explain any answers in Remarks.)**SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.**Hydrophytic Vegetation Present? Yes ☒ No ☐Hydric Soil Present? Yes ☒ No ☐Wetland Hydrology Present? Yes ☒ No ☐Is the Sampled Area  
within a Wetland?Yes ☒ No ☐

**Remarks:** Wetland parameters present in sample point indicated by a dominance of hydrophytic vegetation, primary a hydrology indicator of surface soil cracks indicating recent inundation. Soils meet criteria for problematic hydric soils in seasonally ponded area functioning as a wetland.

**VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECCENDING ORDER**

<b>Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:</b>								
<b>Remarks:</b> Hydrology indicators present as evidenced by the presence of surface water, saturation, and high water table, and by secondary indicators of saturation visible on aerial and dominant species present pass FAC-neutral test.								

## WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project, Group #7 City/County: Lassen County Sampling Date: 8/13/2019  
 Applicant/Owner: Zayo Group State: California Sampling Point: SP 3-7 Feature ID: U1-7  
 Investigator(s): M. Oats, J. Ahn Section, Township, Range: S35, T32N, R15E  
 Local relief (hillside, terrace, etc.): bank slope Local Relief (concave, convex, none): None Slope (%): 8  
 Subregion (LRR): D Lat: 40.59283 Long: -120.24803 Datum: NAD83  
 Soil Map Unit Name: (363) Smocreek silty clay loam, 0 to 2 percent slopes NWI classification: None

Are climatic / hydrologic conditions on the site typical for this time of year? Yes ☒ No ☐ (If no, explain in Remarks.)  
 Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No significantly disturbed? Are "Normal Circumstances" present? Yes ☒ No ☐  
 Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No naturally problematic? (If needed, explain any answers in Remarks.)

**SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.**

Hydrophytic Vegetation Present? Yes ☐ No ☒  
 Hydric Soil Present? Yes ☒ No ☐  
 Wetland Hydrology Present? Yes ☐ No ☒

Is the Sampled Area within a Wetland? Yes ☐ No ☒

**Evaluation of features designated "Other Waters"**

Characteristics: Type: \_\_\_\_\_ Width: \_\_\_\_\_ Substrate: \_\_\_\_\_  
 Indicators: Defined bed and bank: \_\_\_\_\_ Scour \_\_\_\_\_ OHWM Mapped \_\_\_\_\_  
 Feature Designation: Perennial \_\_\_\_\_ Intermittent \_\_\_\_\_ Ephemeral \_\_\_\_\_  
 Natural Drainage \_\_\_\_\_ Artificial Drainage \_\_\_\_\_ Navigable Water \_\_\_\_\_

**Remarks:** Sample confirmed as upland along slope where indicators of wetland hydrology and a dominance of hydrophytic vegetation is absent. Likely that hydric soils are consistent in this transition boundary from wetland. Upland pair point to W1-7.

**VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER**

## WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project, Group #7 City/County: Lassen County Sampling Date: 8/13/2019  
 Applicant/Owner: Zayo Group State: California Sampling Point: SP 6-7 Feature ID: W3-7  
 Investigator(s): M. Oats, J. Ahn Section, Township, Range: S26, T32N, R15E  
 Local relief (hillside, terrace, etc.): Terrace Local Relief (concave, convex, none): Concave Slope (%): 1  
 Subregion (LRR): D Lat: 40.60356 Long: -120.24711 Datum: NAD83  
 Soil Map Unit Name: (348) Saddlerock silty clay, 0 to 2 percent slopes NWI classification: PEM1C

Are climatic / hydrologic conditions on the site typical for this time of year? Yes ☒ No ☐ (If no, explain in Remarks.)  
 Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No significantly disturbed? ☐ Are "Normal Circumstances" present? Yes ☒ No ☐  
 Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No naturally problematic? ☐ (If needed, explain any answers in Remarks.)

**SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.**

Hydrophytic Vegetation Present? Yes ☒ No ☐  
 Hydric Soil Present? Yes ☒ No ☐  
 Wetland Hydrology Present? Yes ☒ No ☐

Is the Sampled Area within a Wetland? Yes ☒ No ☐

**Evaluation of features designated "Other Waters"**

Characteristics: Type: \_\_\_\_\_ Width: \_\_\_\_\_ Substrate: \_\_\_\_\_  
 Indicators: Defined bed and bank: \_\_\_\_\_ Scour: \_\_\_\_\_ OHWM Mapped: \_\_\_\_\_  
 Feature Designation: Perennial: \_\_\_\_\_ Intermittent: \_\_\_\_\_ Ephemeral: \_\_\_\_\_  
 Natural Drainage: \_\_\_\_\_ Artificial Drainage: \_\_\_\_\_ Navigable Water: \_\_\_\_\_

Remarks: Wetland parameters are present in feature as indicated by primary and secondary hydrology indicators, hydric soil indicator (F6), and a dominance of hydrophytic vegetation.

**VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER**

<b>Remarks:</b> Primary ydrology indicator present as evidenced by the presence of oxidized rhizospheres along living roots, and by seondary indicators including drainage patterns and dominant species passed FAC-neutral test.								

## WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project, Group #7 City/County: Lassen County Sampling Date: 8/14/2019  
 Applicant/Owner: Zayo Group State: California Sampling Point: SP 12-7 Feature ID: U4-7  
 Investigator(s): M.Oats, J. Ahn Section, Township, Range: S23, T32N, R15E  
 Local relief (hillside, terrace, etc.): Terrace Local Relief (concave, convex, none): Convex Slope (%): 2  
 Subregion (LRR): D Lat: 40.62109 Long: -120.24644 Datum: NAD83  
 Soil Map Unit Name: (348) Saddlerock silty clay, 0 to 2 percent slopes NWI classification: PEM1C

Are climatic / hydrologic conditions on the site typical for this time of year? Yes ☒ No ☐ (If no, explain in Remarks.)  
 Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No significantly disturbed? ☐ Are "Normal Circumstances" present? Yes ☒ No ☐  
 Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No naturally problematic? ☐ (If needed, explain any answers in Remarks.)

**SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.**

Hydrophytic Vegetation Present? Yes ☐ No ☒  
 Hydric Soil Present? Yes ☐ No ☒  
 Wetland Hydrology Present? Yes ☐ No ☒

Is the Sampled Area within a Wetland? Yes ☐ No ☒

**Evaluation of features designated "Other Waters"**

Characteristics: Type: \_\_\_\_\_ Width: \_\_\_\_\_ Substrate: \_\_\_\_\_  
 Indicators: Defined bed and bank: \_\_\_\_\_ Scour: \_\_\_\_\_ OHWM Mapped: \_\_\_\_\_  
 Feature Designation: Perennial: \_\_\_\_\_ Intermittent: \_\_\_\_\_ Ephemeral: \_\_\_\_\_  
 Natural Drainage: \_\_\_\_\_ Artificial Drainage: \_\_\_\_\_ Navigable Water: \_\_\_\_\_

Remarks: Sample confirmed as upland along slope where indicators of all three parameters are absent; upland pair point to W4-7.

**VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER**

Feature ID: D202-8

Cross section ID:

Date:

Time:

Cross section drawing:OHWM

GPS point: \_\_\_\_\_

## Indicators:

☒ Change in average sediment texture☐ Change in vegetation species☒ Change in vegetation cover☒ Break in bank slope☐ Other: \_\_\_\_\_☐ Other: \_\_\_\_\_

## Comments:

Defined bed and bank feature with scoured channel. OHWM evidenced by change in sediment texture, break in bank slope, and change in vegetation cover. Sampling point documents an ephemeral stream.

Floodplain unit:☐ Low-Flow Channel☐ Active Floodplain☐ Low Terrace

GPS point: \_\_\_\_\_

## Characteristics of the floodplain unit:

Average sediment texture: sand, gravel, cobbleTotal veg cover: 0 % Tree: 0 % Shrub: 0 % Herb: 0 %

Community successional stage:

☒ NA☐ Early (herbaceous & seedlings)☐ Mid (herbaceous, shrubs, saplings)☐ Late (herbaceous, shrubs, mature trees)

## Indicators:

☐ Mudcracks☐ Ripples☐ Drift and/or debris☒ Presence of bed and bank☐ Benches☐ Soil development☒ Surface relief☒ Other: Surface soil cracks☐ Other: \_\_\_\_\_☐ Other: \_\_\_\_\_

## Comments:

No water present in low-flow channel. Surface relief is present and the bed has surface soil cracks in the low-flow channel.

## WETLAND DETERMINATION DATA FORM -Arid West Region

v.111618

Sampling Point: 01-8

Feature ID: W01a-8

Project/Site: Zayo Fiberoptic Interconnect Project, Group #8

City/County: Lassen County

Sampling Date: 8/29/2019

Applicant/Owner: Zayo Group

State: California

Investigator(s): T. Kayatsky, P. Ferral

Section, Township, Range: S23, T28N, R13E

Local relief (hillside, terrace, etc.): Roadside depression

Local Relief (concave, convex, none): Concave

Slope (%): 3

Subregion (LRR): D

Lat: 40.27428

Long: -120.48186

Datum: NAD83

Soil Map Unit Name: (287) Mottsville loamy coarse sand, 2 to 9 percent slopes

NW1 classification: PFOC

Are climatic / hydrologic conditions on the site typical for this time of year? Yes ☒ No ☐ (If no, explain in Remarks.)Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No significantly disturbed? ☐ Are "Normal Circumstances" present? Yes ☒ No ☐Are Vegetation ☐ No, Soil ☒ Yes, or Hydrology ☐ No naturally problematic? ☐ (If needed, explain any answers in Remarks.)**SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.**Hydrophytic Vegetation Present? Yes ☒ No ☐Hydric Soil Present? Yes ☒ No ☐Wetland Hydrology Present? Yes ☒ No ☐Is the Sampled Area  
within a Wetland?Yes ☒ No ☐

**Remarks:** Riparian wetland adjacent to intermittent stream. Wetland parameters indicated by dominance of hydrophytic vegetation and hydrology. Problematic soils are present given low soil chroma and the proximity to Highway 395 (i.e., roadbase/road fill apparent in sample).

**VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESECCENDING ORDER**

3/3 Abbrev.	Species Name	Absolute % Cover	Dominant Species?	Indicator Status
Woody Vine Stratum (Plot size: _____)				
1				
2				
		0	= Total Cover	

% Bare Ground in Herb  0 % Cover of Biotic

**Dominance Test worksheet:**

Number of Dominant Species That Are OBL, FACW, or FAC:  2 (A)

Total Number of Dominant Species Across All Strata:  2 (B)

Percent of Dominant Species That Are OBL, FACW, or FAC:  1 (A/B)

**Prevalence Index worksheet:**

Total % Cover of:	Multiply by:	
OBL species	5	x 1 = 5
FACW species	35	x 2 = 70
FAC species	45	x 3 = 135
FACU species	5	x 4 = 20
UPL species	10	x 5 = 50
Column Totals:	100 (A)	280 (B)
Prevalence Index = B/A =		2.8

**Hydrophytic Vegetation Indicators:**

1 - Rapid Test for Hydrophytic Vegetation  
 Yes 2 - Dominance Test is >50%  
 Yes 3 - Prevalence Index is ≤3.0<sup>1</sup>  
 4 - Morphological Adaptations<sup>1</sup> (Provide supporting data in Remarks or on a separate sheet)  
 5 - Wetland Non-Vascular Plants<sup>1</sup>  
 6 - Problematic Hydrophytic Vegetation<sup>1</sup> (Explain)

<sup>1</sup> Indicators of hydric soil and wetland hydrology must be present unless disturbed or problematic.

**Hydrophytic Vegetation Present?**

Yes ☒ No ☐

**Remarks:** Dominance of hydrophytic vegetation present (FAC and FACW species).

SOIL							Sampling Point: SP 113-8	
Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)								
Depth (inches)	Matrix		Redox Features				Texture	Remarks
	Color (moist)	%	Color (moist)	%	Type <sup>1</sup>	Loc <sup>2</sup>		
0-3	10YR 2/2	100					Sandy loam	Roots throughout
3-9	10 YR 2/2	90	7.5 YR 4/6	10	C	PL	Sandy loam	Prominent redox concentrations
9-16	10 YR 2/2	90	7.5 YR 4/6	10	C	PL	Loamy sand	Lots of small rocks; Prominent redox
<sup>1</sup> Type: C=Concentration, D=Depletion, RM=Reduced Matrix, CS=Covered or Coated Sand Grains.							<sup>2</sup> Location: PL=Pore Lining, M=Matrix.	
<b>Hydric Soil Indicators: (Applicable to all LRRs, unless otherwise noted.)</b>								
<input type="checkbox"/> Histosol (A1)			<input type="checkbox"/> Sandy Redox (S5)				<b>Indicators for Problematic Hydric Soils<sup>3</sup>:</b>	
<input type="checkbox"/> Histic Epipedon (A2)			<input type="checkbox"/> Stripped Matrix (S6)				<input type="checkbox"/> 1 cm Muck (A9) ( <b>LRR C</b> )	
<input type="checkbox"/> Black Histic (A3)			<input type="checkbox"/> Loamy Mucky Mineral (F1)				<input type="checkbox"/> 2 cm Muck (A10) ( <b>LRR B</b> )

<input type="checkbox"/> Drift Deposits (B3) ( <b>Nonriverine</b> )			<input type="checkbox"/> Presence of Reduced Iron (C4)			<input type="checkbox"/> Crayfish Burrows (C8)		
<input type="checkbox"/> Surface Soil Cracks (B6)			<input type="checkbox"/> Recent Iron Reduction in Tilled Soils (C6)			<input type="checkbox"/> Saturation Visible on Aerial Imagery (C9)		
<input type="checkbox"/> Inundation Visible on Aerial Imagery (B7)			<input type="checkbox"/> Thin Muck Surface (C7)			<input type="checkbox"/> Shallow Aquitard (D3)		
<input type="checkbox"/> Water-Stained Leaves (B9)			<input type="checkbox"/> Other (Explain in Remarks)			<input type="checkbox"/> FAC-Neutral Test (D5)		
<b>Field Observations:</b>						<b>Wetland Hydrology Present?</b>		
Surface Water Present? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			Depth (inches): <input type="text" value="NA"/>			Yes <input checked="" type="checkbox"/> No <input type="checkbox"/>		
Water Table Present? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			Depth (inches): <input type="text" value="NA"/>					
Saturation Present? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> (includes capillary fringe)			Depth (inches): <input type="text" value="NA"/>					
<b>Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:</b>								
<b>Remarks:</b> Hydrology present as evidenced by sediment deposits (Nonriverine), indicating recent inundation.								

## WETLAND DETERMINATION DATA FORM -Arid West Region

v.110918

Project/Site: Zayo Fiberoptic Interconnect Project, Group #8 City/County: Lassen County Sampling Date: 8/29/2019  
 Applicant/Owner: Zayo Group State: California Sampling Point: SP 114-8 Feature ID: U105-8  
 Investigator(s): M. Oats, K. Daniels Section, Township, Range: S14, T28N, R13E  
 Local relief (hillside, terrace, etc.): Roadslope Local Relief (concave, convex, none): Concave Slope (%): 5  
 Subregion (LRR): D Lat: 40.28723 Long: -120.48151 Datum: NAD83  
 Soil Map Unit Name: (386) Truckee loam, 0 to 2 percent slopes NWI classification: None

Are climatic / hydrologic conditions on the site typical for this time of year? Yes ☒ No ☐ (If no, explain in Remarks.)  
 Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No significantly disturbed? ☐ Are "Normal Circumstances" present? Yes ☒ No ☐  
 Are Vegetation ☐ No, Soil ☐ No, or Hydrology ☐ No naturally problematic? ☐ (If needed, explain any answers in Remarks.)

**SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.**

Hydrophytic Vegetation Present? Yes ☐ No ☒  
 Hydric Soil Present? Yes ☐ No ☒  
 Wetland Hydrology Present? Yes ☐ No ☒

Is the Sampled Area within a Wetland? Yes ☐ No ☒

**Evaluation of features designated "Other Waters"**

Characteristics: Type: \_\_\_\_\_ Width: \_\_\_\_\_ Substrate: \_\_\_\_\_  
 Indicators: Defined bed and bank: \_\_\_\_\_ Scour \_\_\_\_\_ OHWM Mapped \_\_\_\_\_  
 Feature Designation: Perennial \_\_\_\_\_ Intermittent \_\_\_\_\_ Ephemeral \_\_\_\_\_  
 Natural Drainage \_\_\_\_\_ Artificial Drainage \_\_\_\_\_ Navigable Water \_\_\_\_\_

Remarks: Sample confirmed as upland along slope where indicators of all three parameters are absent; upland pair point to W105-8.

**VEGETATION – Use scientific names of plants. List all species in the plot. MUST LIST COVER IN DESEENDING ORDER**
