

**NOTICE OF AVAILABILITY
DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE
MESA 500-KV SUBSTATION PROJECT PROPOSED BY SOUTHERN
CALIFORNIA EDISON**

APPLICATION NO. A.15-03-003

To: All Interested Parties
From: Lisa Orsaba, CEQA Project Manager, CPUC Energy Division
Date: April 29, 2016

Si usted necesita más información en español, por favor, llame al (844) 538-6992.
如果你了解项目的信息(国语), 请打电话 (844)538-6992.

On March 13, 2015, Southern California Edison (SCE) filed an application for a Permit to Construct (PTC) with the California Public Utilities Commission (CPUC) for the Mesa 500-kilovolt (kV) Substation Project (proposed project) to rebuild and upgrade a substation and associated infrastructure in the Western Los Angeles Basin. The purpose of the Notice of Availability (NOA) is to announce the CPUC's Draft Environmental Impact Report (EIR) is available for public review.

Project Description

The primary components of the proposed project would include:

- Construction of the new 500/220/66/16-kV Mesa Substation and demolition of the existing 220/66/16-kV substation, increasing the substation's footprint from 22 acres to 69 acres.
- Replacement (removal and installation) and modification of transmission lines, subtransmission lines, and distribution structures to accommodate the new 500/220/66/16-kV Mesa Substation.
- New telecommunications lines and modifications to an existing line, mostly on existing poles and in existing ducts.
- Temporary modifications to 220-kV equipment at several existing substations to prevent electrical outages during construction.
- Relocation and replacement of an existing 72-inch-diameter waterline with an 84-inch-diameter waterline on the substation site.
- Electrical and/or telecommunications equipment upgrades at 27 existing substations.
- Undergrounding of three spans of overhead streetlight conductor.

Construction of the proposed Mesa Substation Project is anticipated to start in 2017 and would take approximately 4.5 years. The proposed project would be constructed primarily in the cities of Monterey

Park, Montebello, Rosemead, South El Monte, Commerce, Bell Gardens, Pasadena, Industry, Santa Clarita, and in portions of unincorporated Los Angeles County.

Significant Environmental Effects of the Proposed Project

The Draft EIR has identified that the proposed project would result in significant and unavoidable adverse impacts to aesthetics, air quality, and noise. The remainder of the impacts identified in the Draft EIR would be less than significant, or could be reduced to a less than significant level with the implementation of the mitigation measures proposed in the Draft EIR.

Presence of Hazardous Materials Sites

The proposed project is adjacent to the Operating Industries Inc. Landfill, which is a National Priorities List (NPL) Superfund Site; the Substation site is situated above the NPL site's contaminated groundwater plume. The Mesa Substation site also contains a former leaking underground storage tank site. Mobil Number 18-EVF Service Station, which is a former leaking underground storage tank site, is adjacent to Telecommunications Route 1. A portion of Telecommunications Route 3 is located within the San Gabriel Valley NPL Superfund Site, Whittier Narrows Operable Unit, and above the associated contaminated groundwater plume. No other sites enumerated under Section 65962.5 of the California Government Code are present on the project site.

Draft EIR Information/Public Review Period/Public Meeting

The Draft EIR is available on the internet at <http://tinyurl.com/mesasubstation>. Hardcopies of the Draft EIR are available at the following repositories:

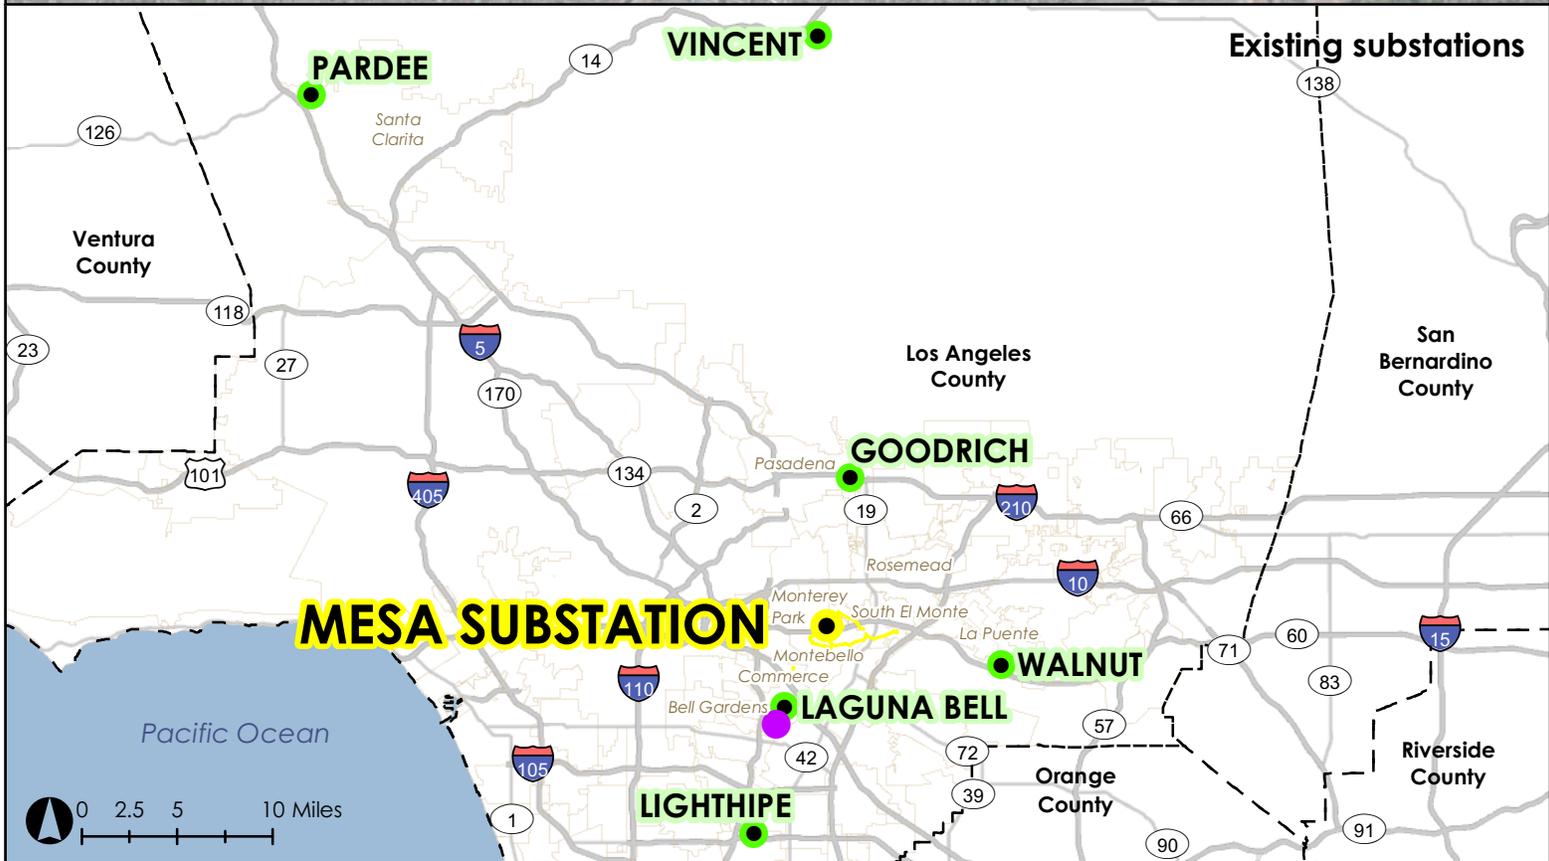

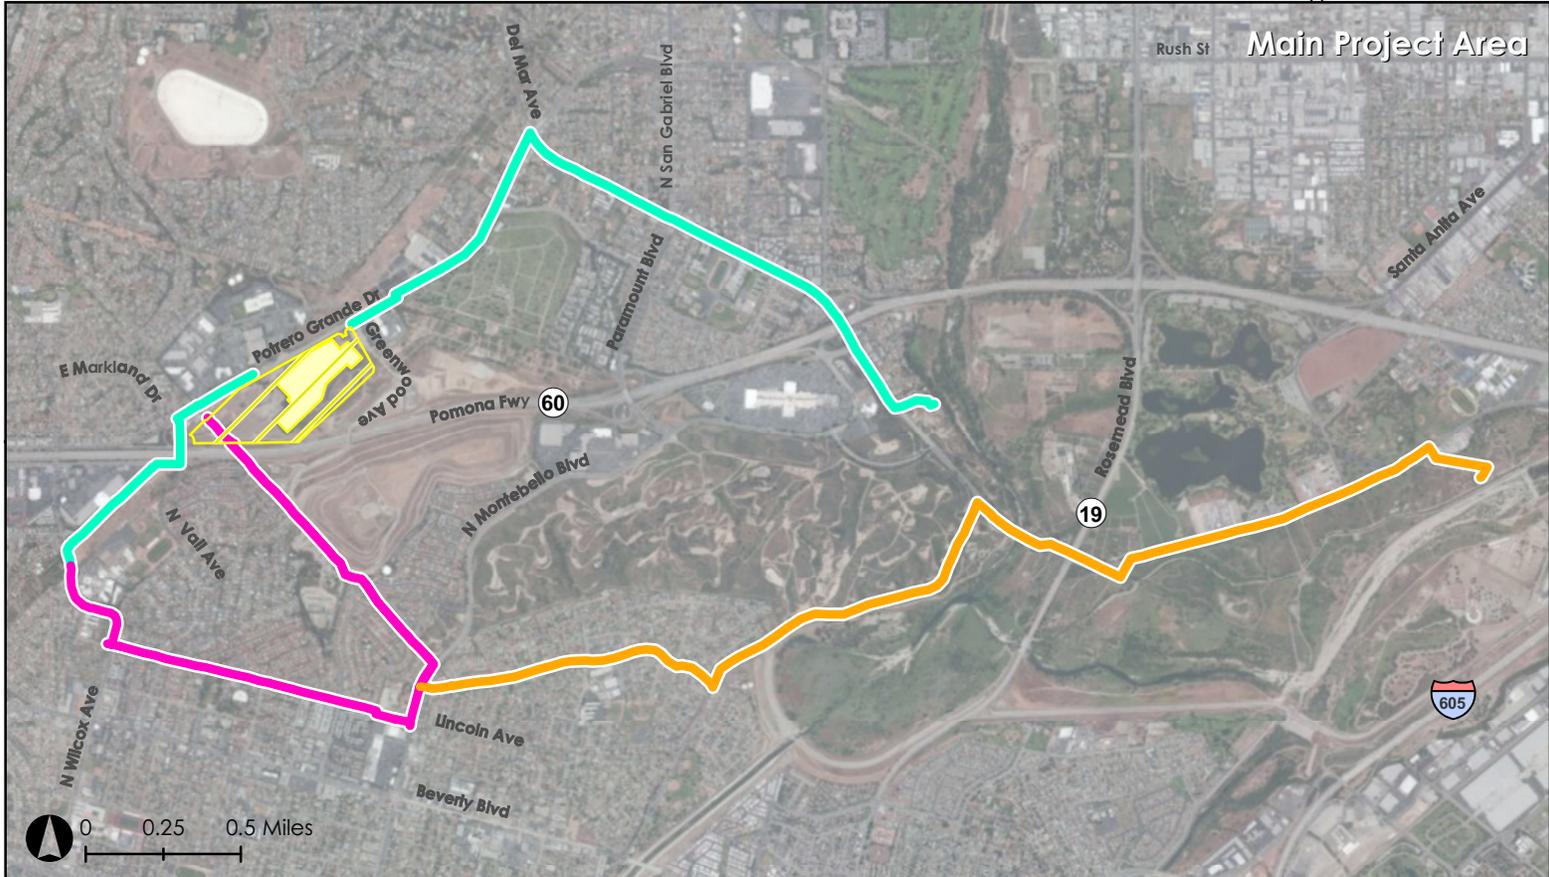

- **Monterey Park Library:** 318 S Ramona Ave, Monterey Park, CA 91754 (626) 307-1368
- **Montebello Library:** 1550 W Beverly Blvd, Montebello, CA 90640 (323) 722-6551

The CPUC will accept comments on the Draft EIR during a 45-day period starting April 30, 2016 and ending June 13, 2016. All written comments must be postmarked or received by fax or email no later than 5:00 p.m. on June 13. Comments on the Draft EIR may be submitted using any of the following methods:

Email: Mesa.CPUC@ene.com
Fax: 415-398-5326
Mail: California Public Utilities Commission
RE: Mesa 500kV Substation Project
c/o Ecology and Environment, Inc.
505 Sansome Street, Suite 300
San Francisco, CA 94111

The CPUC will hold a public meeting on May 18, 2016, to explain the proposed project, discuss the proposed project's significant impacts, and receive written comments on the Draft EIR from the public. The meeting will begin with a presentation, followed by an informal discussion session. Details for the public meeting are provided below:

Bids Wanted

New Designs Charter Schools

FOOD SERVICE PROGRAM NOTICE INVITING BIDS

New Designs Charter School is a 6th - 12th Grade School. We are inviting bids for the school's Child and Adult Care Food Program (Supper) from May 19, 2016 to May 18, 2017.

Sealed bids will be received by New Designs Charter School at 2303 Figueroa Way Los Angeles CA 90007 until **3pm May 6, 2016** for meals to be served in the centers.

At the time and place advertised, and promptly thereafter, all bids that have been duly received will be publicly opened and read aloud

About 200 bulk meals shall be delivered daily to 2 centers. All meals must meet the minimum requirements set for the CACFP meals.

To obtain copies of the invitation to bid please contact
Paul Okaitye
Tel: (213) 765-0130 ext. 227
Fax: (213) 765-0214
Address: 2303 Figueroa Way, Los Angeles 90007

The contract will be awarded to the responsible bidder that possesses the potential ability to perform successfully under the terms and conditions of the proposed procurement and is lowest in price.

New Designs Charter School is an equal opportunity provider and employer.

Employment Notice of Availability of a Draft Environmental Impact Report for the Mesa 500-kv Substation Project proposed by Southern California Edison Application No. A.15-03-003 On March 13, 2015, Southern California Edison filed an application for a Permit to Construct with the California Public Utilities Commission (CPUC) for the Mesa 500-kilovolt (kV) Substation Project (proposed project) to rebuild and upgrade a substation and associated infrastructure in the Western Los Angeles Basin. The purpose of the Notice of Availability is to announce the CPUC's Draft Environmental Impact Report (EIR) is available for public review.

Employment Significant Environmental Effects of the Proposed Project The Draft EIR has identified that the proposed project would result in significant and unavoidable adverse impacts to aesthetics, air quality, and noise. The remainder of the impacts identified in the Draft EIR would be less than significant, or could be reduced to a less than significant level with the implementation of the mitigation measures proposed in the Draft EIR.

Employment Presence of Hazardous Materials Sites The proposed project is adjacent to the Operating Industries Inc. Landfill, which is a National Priorities List (NPL) Superfund Site. The Substation site is situated above the NPL site's contaminated groundwater plume. The Mesa Substation site also contains a former leaking underground storage tank site. Mobil Number 18-EVF Service Station, which is a former leaking underground storage tank site, is adjacent to Telecommunications Route 1. A portion of Telecommunications Route 3 is located within the San Gabriel Valley NPL Superfund Site. Whittier Narrows Operable Unit, and above the associated contaminated groundwater plume. No other sites enumerated under Section 65962.5 of the California Government Code are present on the project site.

Employment Draft EIR Information/Public Review Period/Public Meeting The Draft EIR is available on the internet at http://tinyurl.com/mesastubstation. Hardcopies of the Draft EIR are available at the following repositories: Monterey Park Library: 318 S Ramona Ave., Monterey Park, CA 91754 (626) 307-1368 Montebello Library: 1550 W Beverly Blvd, Montebello, CA 90640 (323) 722-6551

Employment The CPUC will accept comments on the Draft EIR during a 45-day period starting April 29, 2016 and ending June 13, 2016. All written comments must be postmarked or received by fax or email no later than 5:00 p.m. on June 13. Comments on the Draft EIR may be submitted using any of the following methods: Email: Mesa.CPUC@ene.com Fax: 415-398-5326 Mail: California Public Utilities Commission RE: Mesa 500kV Substation Project c/o Ecology and Environment, Inc., 505 Sansome Street, Suite 300, San Francisco, CA 94111

Employment THE DRAFT EIR will hold a public meeting on May 18, 2016, to explain the proposed project, discuss the proposed project's significant impacts, and receive written comments on the Draft EIR from the public. The meeting will begin with a presentation, followed by an informal discussion session. Details for the public meeting are provided below: 6:00 p.m., May 18, 2016, Barnes Park Service Club House Main Room, 350 S. McPherrin Ave., Monterey Park, CA, 91754

Employment THAT SCRAMBLED WORD GAME by David L. Hoyt and Jeff Knurek

Employment Unscramble these four Jumbles, one letter to each square, to form four ordinary words.

Employment WARBL NAGDL CEAPIE GIBEOI

Employment Now arrange the circled letters to form the surprise answer, as suggested by the above cartoon.

Employment (Answers tomorrow) Yesterday's Answer: EPOXY MADLY OUTAGE PANTRY To start his new job at the nuclear power plant, he needed to — GET UP AND "ATOM"

PUBLIC MEETING FOR THE PROPOSED MESA 500-KILOVOLT (KV) SUBSTATION PROJECT

California Public Utilities Commission
 Barnes Park – Service Club House Main Room May 18, 2016

Note: Before including your address, telephone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from individuals identifying themselves as representatives or officials of organizations or businesses will be made available for public inspection in their entirety.

Introductions

- California Public Utilities Commission (CPUC)
 - CPUC is Lead Agency under the California Environmental Quality Act (CEQA). The CPUC must conduct an environmental analysis in accordance with CEQA in order to issue a Permit to Construct for SCE's proposed project.
- Ecology and Environment, Inc. (E & E)
 - E & E is the CPUC's environmental consultant, hired to perform the environmental analysis and prepare CEQA document.
- Southern California Edison Company (SCE)
 - SCE is the applicant of the proposed project.

Purpose of this Meeting

- Describe the Draft EIR content and analysis
- Explain public participation opportunities during the CPUC decision-making process.
- Accept written comments from the public on the Draft EIR

CEQA – Environmental Impact Report

- Purpose of EIR
 - Disclose potential impacts of SCE's proposed project and alternatives
 - Identify mitigation to reduce adverse impacts
 - Consider a reasonable range of alternatives to SCE's proposed project
 - Give the public an opportunity to provide input
 - Provide information for decision makers to consider

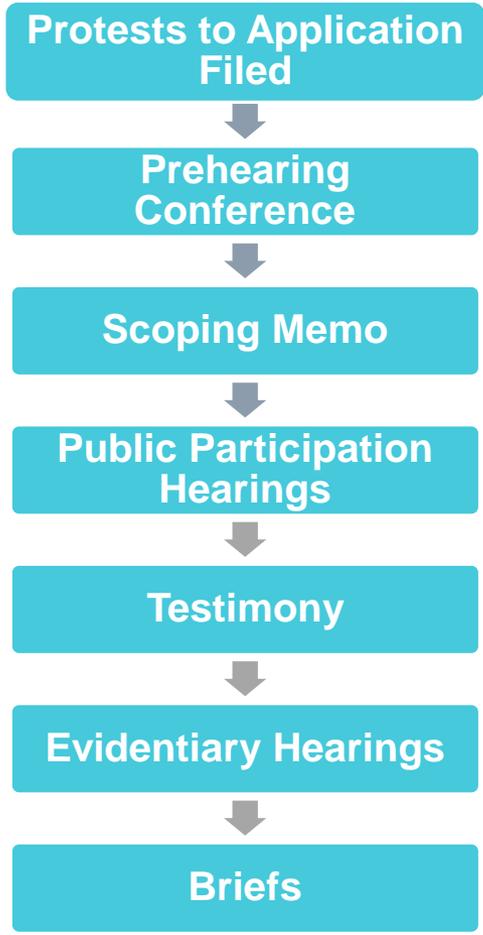

Process per CEQA (Public Resources Code §21000 et seq.) and CEQA Guidelines

Process per Public Utilities Code and CPUC Rules of Practice and Procedure

CEQA Review Process

SCE Files Application and PEA

Administrative Proceeding

★ Public Comments on Draft EIR

★ WE ARE HERE

Looking Back: EIR Process

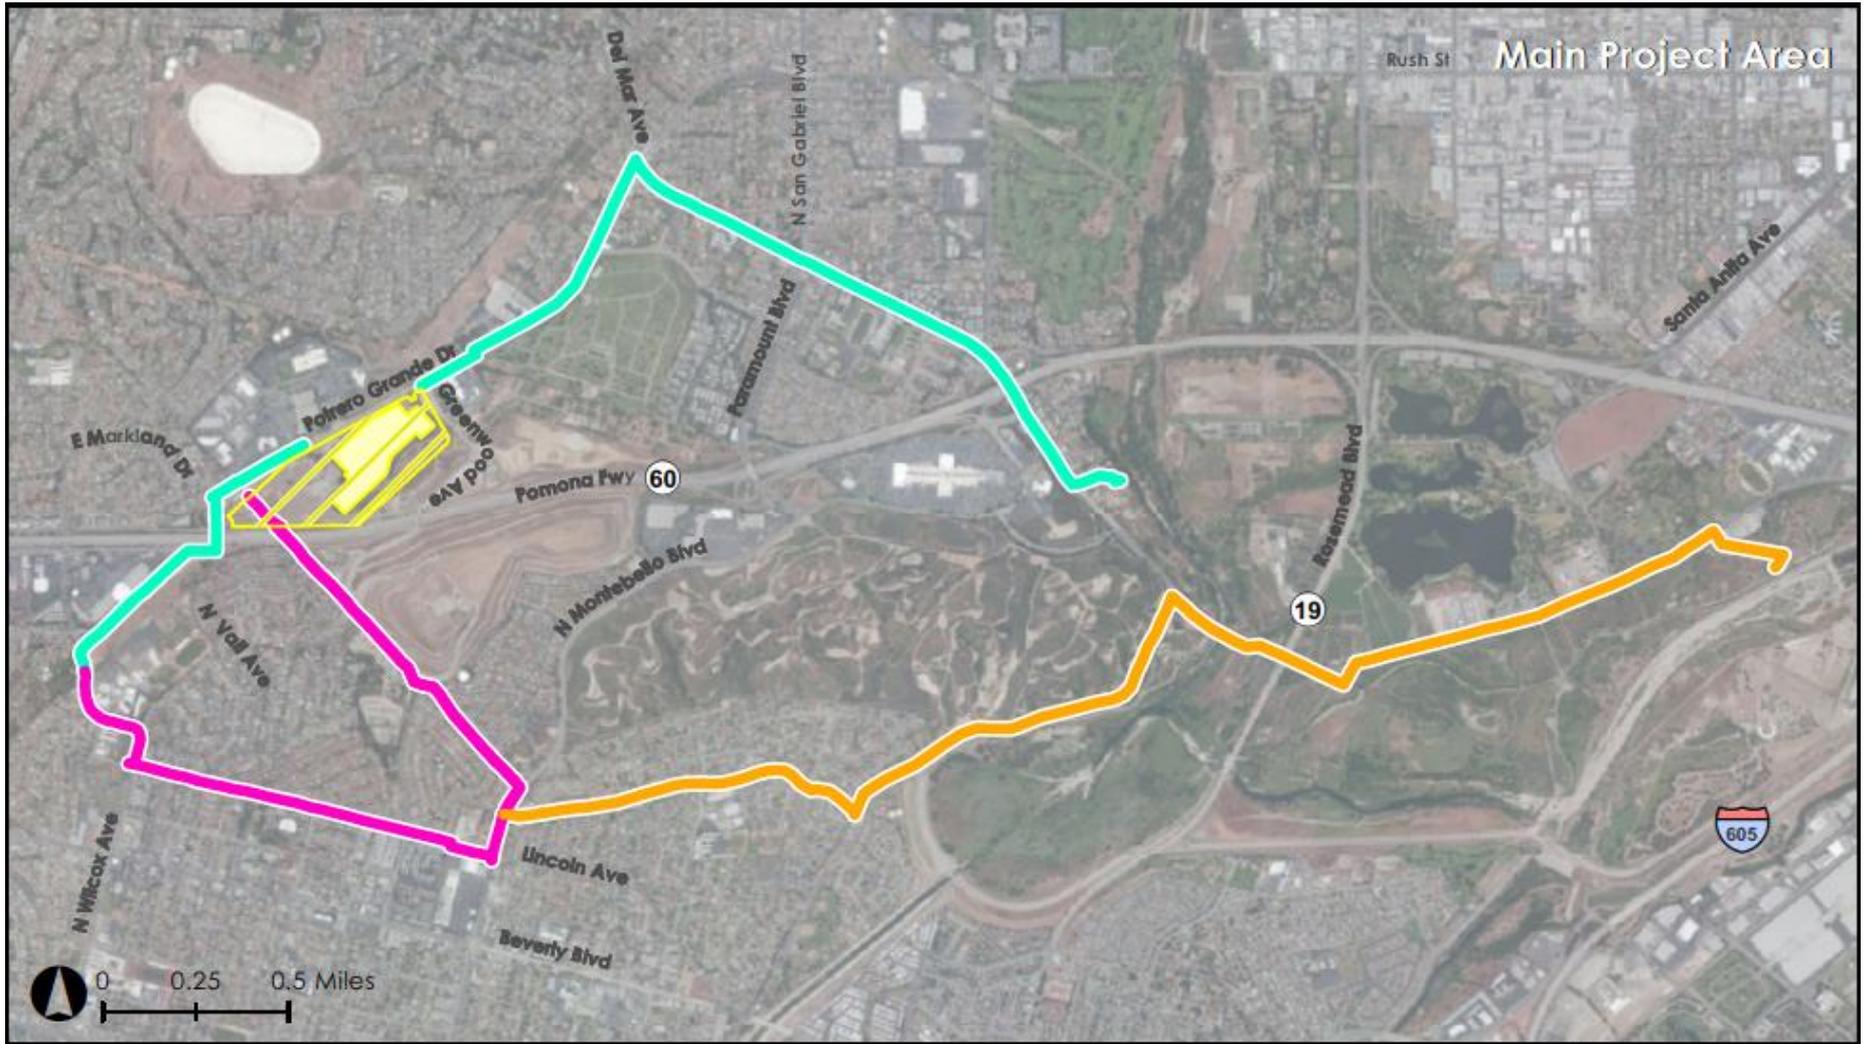

Stage	Objectives	Timeline
Notice of Preparation/ Scoping	<ul style="list-style-type: none"> • Collect comments from public and agencies on scope of the EIR 	June 5 to July 5, 2015 (30 days) Meeting on June 23, 2015
Draft EIR Preparation	<ul style="list-style-type: none"> • Conduct analysis of environmental impacts of SCE's proposed project. • Develop and analyze reasonable range of alternatives to SCE's proposed project. 	Draft EIR released April 29, 2016

Looking Forward: EIR Process

Stage	Objectives	Timeline
Draft EIR Public Review	<ul style="list-style-type: none"> • Collect comments from public and agencies on analysis and alternatives in EIR • Public meeting 	April 29 to June 13, 2016 (45 days)
Response to Comments/ Final EIR	<ul style="list-style-type: none"> • Respond to public comments on Draft EIR • Revise Draft EIR as needed and publish Final EIR 	August 2016
Certification of Final EIR and Project Decision	<ul style="list-style-type: none"> • CPUC Certifies EIR • Makes decision on SCE's proposed project 	Late 2016/ Early 2017
Mitigation Monitoring	<ul style="list-style-type: none"> • Monitor and report compliance with mitigation measures 	Prior to and during construction and operation, if project approved

Main Project Area

Description of SCE's Proposed Project: Mesa Substation

- Upgrade existing 220/66/16 kV Mesa Substation to 500/220/66/16 kV substation
 - Substation footprint would increase from 21.6 acres to 69.4 acres
 - SCE currently owns most of the substation site, approximately 86 acres
 - **Existing 220-kV substation must remain in operation while constructing new 500-kV substation**
- Remove, replace, and relocate existing Metropolitan Water District 72-inch-diameter water line with an 84-inch-diameter waterline
- SCE estimates construction will take 4.5 years

Description of SCE's Proposed Project: Mesa Substation *(continued)*

Component	Quantity/Specifications
New substation	69.4 acres on 86.2-acre site
500-kV switchrack	8.2 acres
200-kV switchrack	6.8 acres
Transformer banks	<ul style="list-style-type: none"> • 500/220kv: 3 transformer banks/11 transformers • 220/66kv: 1 bank/3 transformers • 66/16kv: 1 bank/2 transformers
Mechanical and equipment rooms	1 senior, 1 junior

SCE's Proposed Project Description: Transmission Components

Component	Actions
Transmission (500 kV & 220 kV)	<ul style="list-style-type: none"> • Remove 1 overhead structure • Replace approx. 20 overhead structures (3 500-kV, 17 220-kV) • 500kv: height of 140 to 200 feet • 220kV: height of 100 to 190 feet
Sub-transmission (66 kV)	<ul style="list-style-type: none"> • Remove approx. 65 overhead structures • Removal of 2,000 feet of underground conductor • Install 24 new overhead structures, 50 to 100 feet high, 3 to 5 feet in diameter. Concrete foundations, 5 to 7 feet in diameter • Install approx. 27,400 feet of underground duct, approx. 28 underground vaults (10' x 20' x 8')
Distribution (16 kV)	<ul style="list-style-type: none"> • Install approx. 5,000 feet of underground duct and 5 underground vaults (7' x 18' x 8')

SCE's Proposed Project Description: Transmission Components *(continued)*

Component	Actions
Temporary Electric Supply	<ul style="list-style-type: none"> • Install temporary steel pole at Goodrich Substation in Pasadena to maintain electrical service during construction
Equipment Upgrades/ Testing (220 kV)	<ul style="list-style-type: none"> • Replace/upgrade 220 kV equipment at 13 existing substations
Equipment Upgrades/ Testing (66 kV)	<ul style="list-style-type: none"> • Upgrade 66 kV equipment at 16 existing substations
Tower Replacement	<ul style="list-style-type: none"> • Replace existing transmission tower in Commerce
Underground Conversion	<ul style="list-style-type: none"> • Conversion of existing street light conductor from overhead to underground in Bell Gardens • Installation of approx. 3 pullboxes, approx. 300 feet of one 3-inch conduit

SCE's Proposed Project Description: Telecommunications Components

Component	Actions
Fiber optic	<ul style="list-style-type: none"> • Reroute one existing overhead line to clear Mesa Substation • Mostly on existing poles or in existing ducts
New telecommunications line	<ul style="list-style-type: none"> • Install two new lines into Mesa Substation mostly on existing poles or in existing ducts • Install new underground telecommunications within and immediately adjacent to Goodrich Substation
Telecommunications reroute	<ul style="list-style-type: none"> • Reroute existing telecommunications within fence lines of three existing substations

Environmental Impacts

- SCE's proposed project would have significant and unavoidable impacts on the following resources:
 - **Aesthetics:** Long-term visual character and quality degradation during operation at the substation site. Visual character and quality degradation during operation from views from North Vail Avenue in Montebello.
 - **Air Quality:** Temporary carbon monoxide emissions during construction. Temporary exposure of sensitive receptors to nitrogen oxides during construction.
 - **Noise:** Temporary violation of noise ordinances of several local jurisdictions. Substantial temporary ambient noise increase during construction activities.

Construction Activities: Air Quality Impacts

- Grading
 - 600,000 cubic yards of cut and fill
 - Import 100,000 cubic yards of fill
 - Export 115,000 cubic yards of cut
- Truck & vehicle “passenger car equivalent” trips (Phase I)
 - ~800 worker vehicle trips (one-way) per day
 - (1 worker vehicle trip = 1 passenger car equivalent trip)
 - ~530 medium truck trips (one-way) per day
 - (1 medium truck trip = 2 passenger car equivalent trips)
 - ~800 large truck trips (one-way) per day
 - (1 large truck trip = 3 passenger car equivalent trips)

Environmental Impacts

- SCE's proposed project would have less than significant impacts on the following resources with the implementation of mitigation measures identified in the Draft EIR:
 - Biological Resources
 - Cultural and Paleontological Resources
 - Geology, Soils, and Minerals
 - Hazards and Hazardous Materials
 - Hydrology and Water Quality
 - Public Services and Utilities
 - Traffic and Transportation

Cumulative Impacts

- SCE's proposed project would considerably contribute to significant cumulative impacts of the following resources:
 - Air quality – local exposure to NOx emissions at the Mesa Substation site
 - Noise – temporary substantial increase in ambient noise due to construction noise

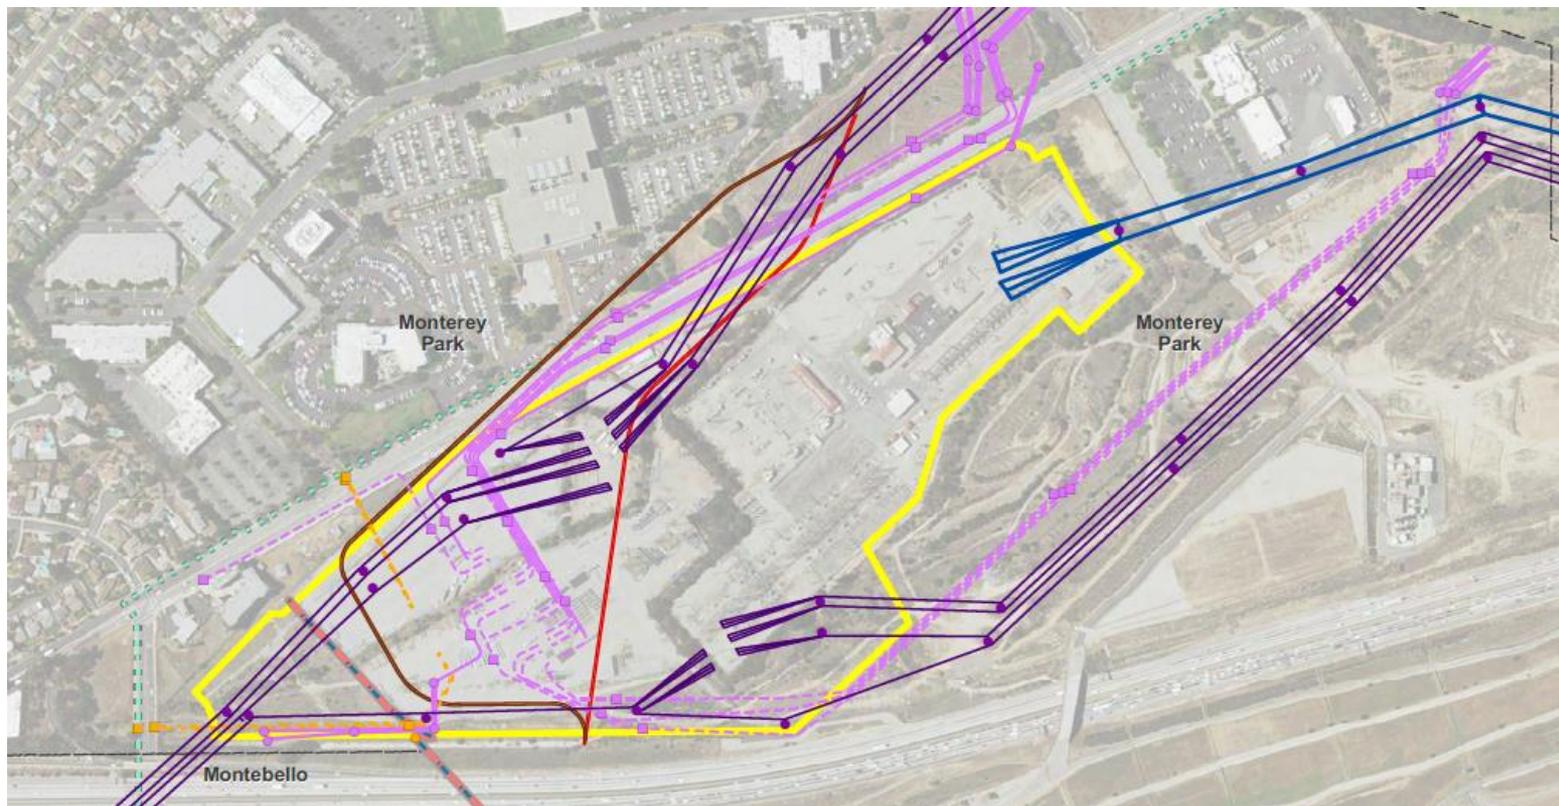

Alternatives Screening Process

- Nine alternatives were screened to determine if they could feasibly meet most of the project objectives and avoid or substantially reduce at least one significant impact of the proposed project.
- Three of the alternatives passed the screening criteria and were carried forward for evaluation in the Draft EIR.
- Chapter 3 of the Draft EIR explains alternatives considered and rationale for analysis or elimination

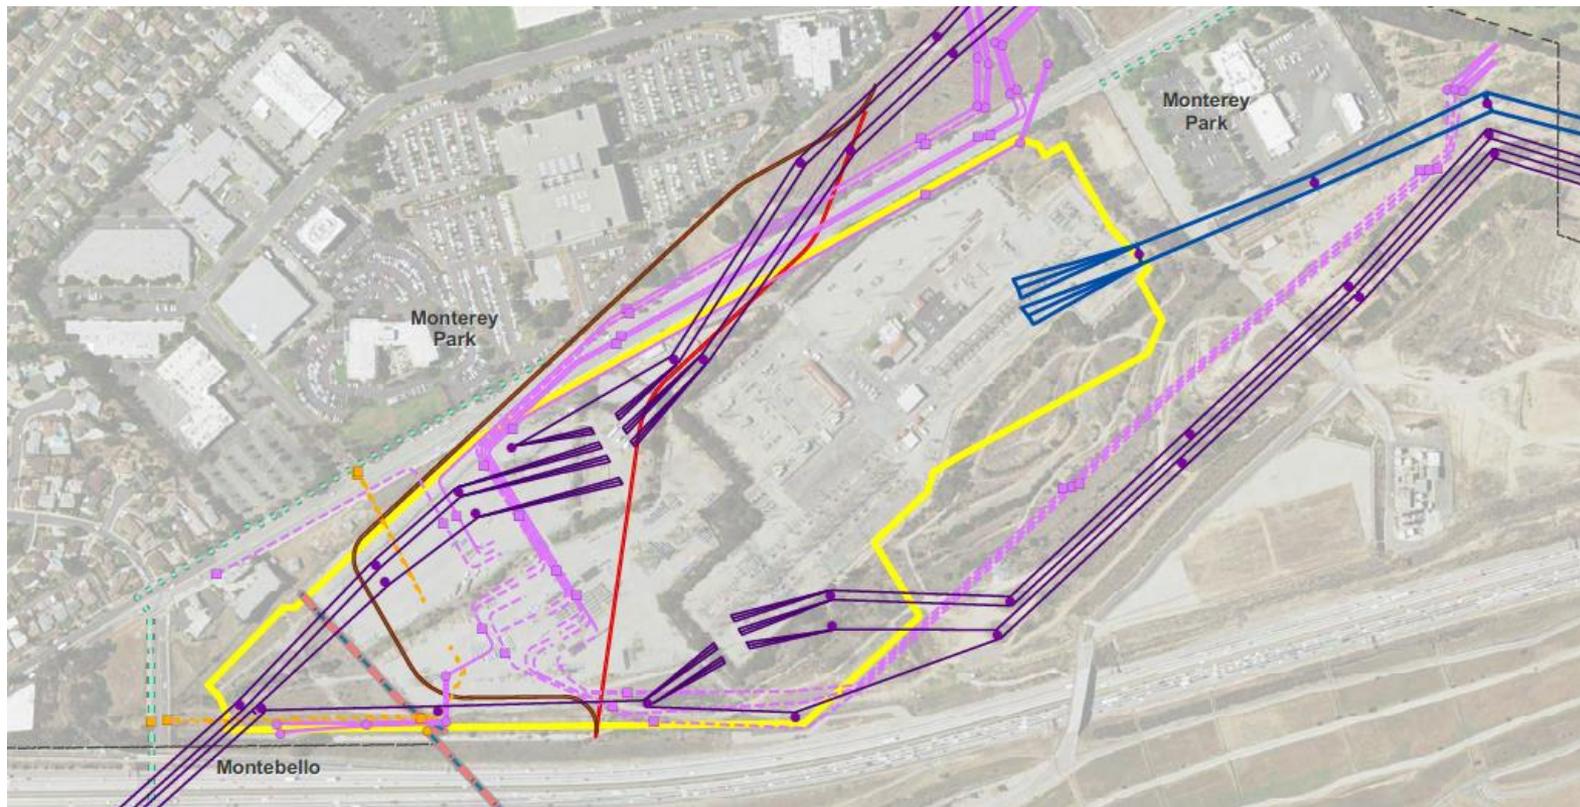

Alternatives Considered in the Draft EIR

- **One-Transformer Bank (1600 MVA) Substation**
 - Build new substation at same site with same orientation with one 1600-MVA transformer bank

Alternatives Considered in the Draft EIR

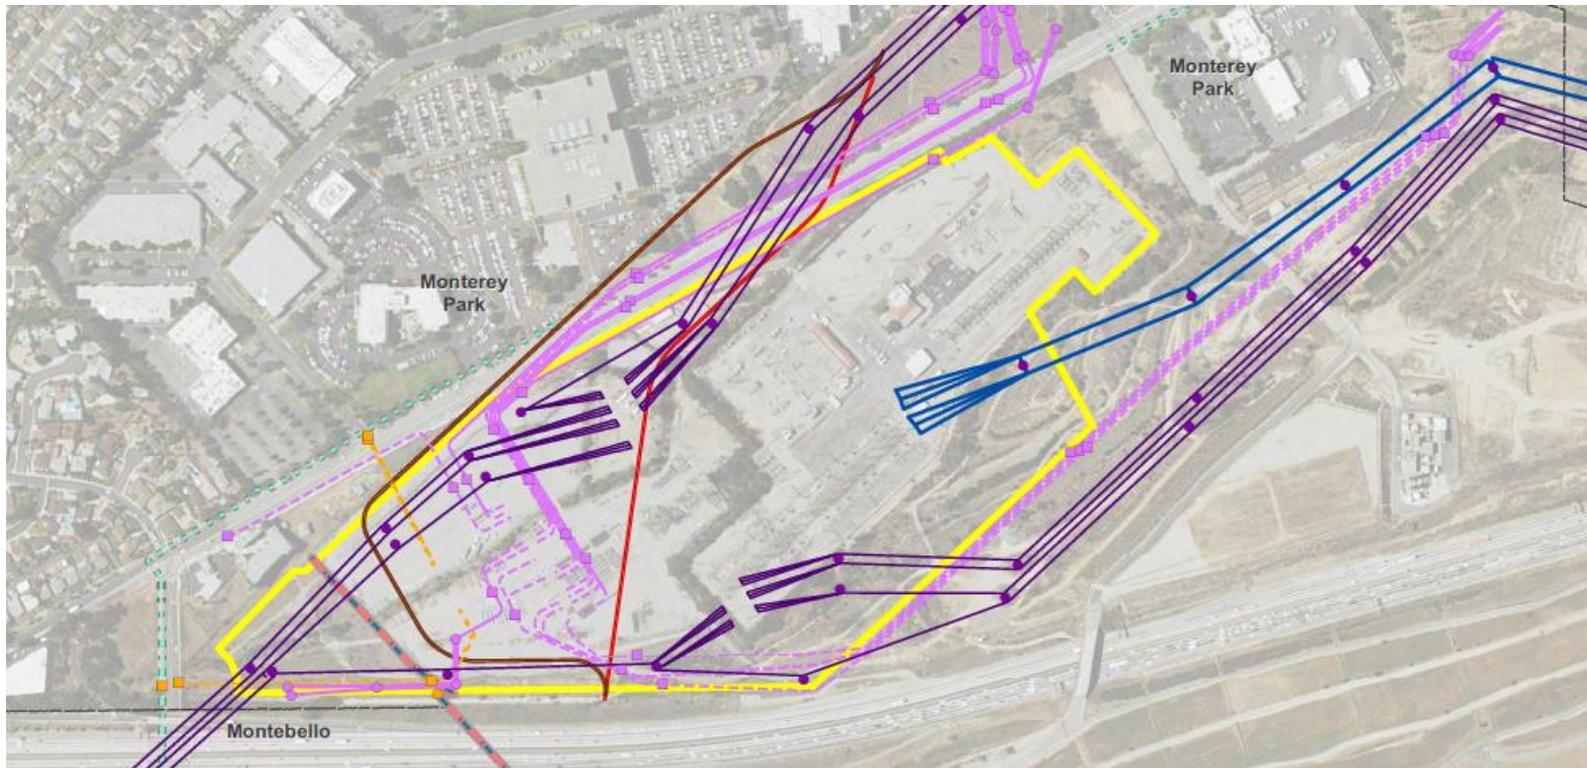

- **Two-Transformer Bank (1120 MVA) Substation**
 - Build new substation at same site with same orientation with two 1120-MVA transformer banks

Alternatives Considered in the Draft EIR

- **Gas Insulated Substation**

- Build new substation at same site with same orientation with gas insulated switchgear

Alternatives Considered in the Draft EIR

- **No Project Alternative**

- Evaluation of the No Project Alternative is required by CEQA.
- Represents scenario that would occur if SCE's proposed project is not approved
- Does not achieve all project objectives
- Includes implementation of a load shed scheme, generation procurement in the Western Los Angeles Basin, and an alternative 500-kV transmission project

Environmentally Superior Alternative

- **One Transformer Bank (1600 MVA) Alternative**
 - Substantially reduces impacts on **Air Quality**
 - Reduced fugitive dust emissions from ground disturbance
 - Substantially reduces impacts on **Biological Resources**
 - Reduces impacts on avian and special status species and habitat.
 - Reduces impacts on riparian habitat and potentially jurisdictional waters
 - Substantially reduces impacts from **Hazardous Materials**
 - Reduces the amount of transformer oil stored on site during operation

Comments on Draft EIR must be received or postmarked by **June 13, 2016**

- Written comments may be submitted at this meeting or by mail, email, or fax.
- Comments are due by **5:00pm on June 13, 2016**
