MESA PTC A.15-03-003

DATA REQUEST SET A.15-03-003 ED-SCE-01

To: ENERGY DIVISION
Prepared by: Jason Carson
Title: Project Manager
Dated: 05/22/2015

Question Q.25:

Roadway Repair

Describe measures to ensure any damage done to area roadways, including bicycle lanes, resulting from construction work would be repaired following completion of project construction.

Response to Question Q.25:

Applicable ministerial permits would be obtained from the governing public agency for construction work conducted within their public right-of-way. Within those permits, the public agency will describe restoration measures that must be complied with in order for the permit to be closed out. As part of the Mesa project all restoration measures will be met and SCE will ensure closure of all permits. The repair of any damage to public facilities from construction of the Mesa project that is not addressed within a ministerial permit issued by a public agency would be directed by the public agency on a case by case basis and would be completed prior to the closure of the permit by SCE.
