

TABLE 4.5.4: MORRO BAY POWER PLANT, 1995 EMISSIONS COMPARED TO COUNTY-WIDE EMISSIONS /a/

Source	Emissions (TPY)				
	ROG	CO	NO _x	SO _x	PM10
Morro Bay power plant in 1995 /b/	18	215	685	734	88
San Luis Obispo County in 1993 /c/					
- stationary	2,373	759	1,905	4,234	288
- area	3,402	13,768	256	11	25,729
- mobile	5,387	46,019	10,008	45	704
- natural	51	715	11	0	102
- total	11,209	61,262	12,176	5,015	26,824
Morro Bay Plant, % of County	0.16	0.36	5.63	14.64	0.33
Total, excluding "natural" sources					

/a/ Source: Pacific Gas and Electric Company (PG&E), *Proponent's Environmental Assessment: Pacific Gas and Electric Company's Proposed Sale of Four Generating Plants*, November 15, 1996; minor modifications by Environmental Science Associates (1997)

/b/ Source: Title V, Federal Permit Application for PG&E's Morro Bay Power Plant, May 19, 1996. Data on organic gas emissions were for Volatile Organic Compounds (VOC) rather than Total and Reactive Organic Compounds.

/c/ Source: California Air Resources Board, *California Emission Inventory Development and Reporting System -CEIDARS, 1993 Inventory*. PM10 is calculated as a percent of PM emissions, which might not represent actual emissions for particular sources.
