Re: PG&E Hollister Tap Transmission Reconductoring Project, Monterey and San Benito Counties

Dear Ms. Arias,

Jones & Stokes is conducting a cultural resources study for the proposed PG&E Hollister Tap Reconductoring Project, located in the counties of Monterey and San Benito. The proposed project involves reconductoring of two main segments of the transmission line: the Moss Landing – Salinas – Soledad Nos. 1 and 2 - 115-kV Hollister Tower Segment and the Hollister Tap No. 1 – 115-kV Hollister Pole Segment. A map of the project location is enclosed and the project area is marked in bold black. Legal information is as follows: USGS 7.5' topographic quadrangles – Hollister and San Juan Bautista T13S, R3E, Sect. N/A; T13S, R4E Sect. N/A; T12S, R4E Sect. 21, 27, 28; T12S, R5E Sect. N/A.

A records search has been conducted at the Northwest Information Center of the California Historical Resources Information System, located at Sonoma State University. No previously recorded prehistoric cultural resources are recorded within the project area. Jones & Stokes will conduct an archaeological survey of the proposed project area.

Jones & Stokes is requesting input from the Native American community regarding traditional cultural properties and other issues pertinent to this project. Any information you have regarding Native American sites or traditional cultural properties in the area would be helpful in identifying potential cultural resources issues. Please contact me at 916-737-3000, or at chavelaar@jsanet.com if you have any questions or concerns about this project. Thank you for your attention to this matter.

Sincerely,

Christiaan Havelaar
Cultural Resources Specialist
