**Subject:** Water

To : Cal Am Water board;  
Judge Gary Weatherford;  
PUC;

I have lived in Monterey county since my parents bought their home in 1966. Monterey county has Always had a water shortage! Always! The entire county has been rationed long before that year too. We have been rationed, had building restrictions ( which never altered the growth of this area). An enormous case of Greed! We have been reminded each and every years for over 50 years of what we don't have... Which is water... And now you want to stop and think about "weather or not to do the Desal plant?" Wildlife is dying, landscaping and crops are dying, home values have been affected and in order to water the crops, ground water has been invaded ! Why?? It's really because Cal Am continually sit on the fence like what should we do?.

The PUC and Cal Am are generating fear in its customers, and destroying the faith in the ability of the PUC and Cal Am to function properly and to self regulate itself in the Best Interest of its customers.

I really am grateful that Judge Gary Weatherford has addressed the issue of the dual role by Dennis Williams but the bigger question other than the corruption is Why the Hell we have to be constantly put in a position to cut back, pay high prices while Cal Am is doing nothing but taking our money while Not taking care of the people's NEEDS!! And driving up the price of water! I'd love to see some harsh penalties come down on Cal Am and Forced Fast track the Desal plant ! What we have here by Cal Am Water is pure Greed and corruption!

Thank you... If you actually take the time to read this.

Sincerely,

A really pissed Off customer!
