Follow Up Flag: Follow up
Flag Status: Flagged

Dear Ms. Borak and Mr. Zigas-

I'm writing informally on behalf of Marina Coast Water District ("MCWD") to inquire whether or not the "Geoscience 2015" technical memorandum referenced in Luhdorff and Scalmanini's March 2015 updated draft version 2 Hydrologic Modeling of the MPWSP Using the SVIGSM, and which was listed therein as a "draft modeling report in preparation," has been completed. If so, would you please provide a copy as soon as possible? I believe this request is encompassed within our prior request for materials relied upon in the MPWSP draft environmental impact report (DEIR), but the document does not appear to have been delivered to us previously. If I'm mistaken and you've already provided it, would you please refresh my recollection as to when we would have received it? Thanks very much.

In addition, MCWD is curious as to whether the Commission's Energy Division has yet determined how it will "independently evaluate the accuracy and credibility" of the groundwater work conducted by Geoscience in relation to the MPWSP DEIR, as indicated would be done in the July 9, 2015 Notice to all parties that was attached to the ALJ ruling of the same date. We were hoping that, with the passage of nearly two months, the Commission would have made a public announcement of its determination in this regard, but we have not yet seen such an announcement so I thought I'd inquire informally if there is any news on that front, or if you are able to say when we may expect an announcement.

Please feel free to call me at the number below if you'd like to discuss these issues. Thanks again for your ongoing cooperation in responding to our information requests, and best wishes for the upcoming holiday weekend.

Sincerely,

Ruth Stoner Muzzin
