To Whom it May Concern:

The S. C. E. Cross Valley Loop Project over routes 1, 2, and 6 would be disastrous. Route 3 is the only viable route as clearly pointed out again and again in last night's public meeting.

In light of the verifiable facts presented, the historical aspect, the humanitarian value including lives of families of future generations, route 3 is the only choice.

Surely Edison does not want to ruin its current good reputation by selecting any route other than Route 3. Surely Edison does not want to join the money grubbers of this world who are placing dollars above all higher aspects of life.

I again respectfully submit

that route 3 is the only
route shown.
