Notice of Availability/Notice of Public Comment Period for the Draft Environmental Impact Report for the Collinsville 500/230 Kilovolt Substation Project

Application No. 2407018; State Clearinghouse No. 2025010149

Subject: The California Public Utilities Commission (CPUC) (State Lead Agency) has prepared a Draft Environmental Impact Report (EIR) pursuant to the California Environmental Quality Act (CEQA) analyzing the environmental effects associated with LS Power Grid California, LLC's (LSPGC) application (Application No. 2407018) for a certificate of public convenience and necessity (CPCN) to construct, operate, and maintain the Collinsville 500/230 Kilovolt (kV) Substation Project (Project).

Project Location: The Project is located in Solano, Sacramento, Alameda, and Contra Costa counties (refer to attached map). The proposed Collinsville Substation site is in southern Solano County, immediately south of Stratton Lane and approximately 1 mile east of Collinsville Road.

Project Summary: The Project involves constructing the new Collinsville Substation, two 500 kV interconnection lines connecting Collinsville Substation to PG&E's existing Vaca Dixon-Tesla 500 kV Transmission Line, and a 230 kV transmission line connecting Collinsville Substation to PG&E's existing Pittsburg Substation, as well as constructing other ancillary infrastructure and modifying PG&E's existing facilities associated with the interconnection.

Significant Environmental Effects: The CPUC has prepared a Draft EIR analyzing the Project's environmental effects. The Project would have significant and unavoidable impacts related to air quality, biological resources, cultural resources, energy, greenhouse gases, land use and planning, mineral resources, noise, and tribal cultural resources that cannot be mitigated to less-than-significant levels. The Project would have less-than-significant impacts, with or without mitigation measures, related to the previously stated topics as well as aesthetics, agriculture and forestry resources, geology soils and paleontology, hazards hazardous materials and public safety, hydrology and water quality, population and housing, public services, recreation, transportation, utilities and service systems, and wildfire.

Availability of the Draft EIR: Digital copies of the Draft EIR are available for public review on the Project website, which can be accessed using this link or QR code:

<https://ia.cpuc.ca.gov/environment/info/panoramaenv/collinsville/index.html>

The Draft EIR may also be reviewed at the following locations during normal business hours:

Pittsburg Library: 80 Power Avenue, Pittsburg, CA 94565

Rio Vista Library: 44 S 2nd Street, Rio Vista, CA 94571

California Public Utilities Commission

Public Comment Period: A 45-day public comment period for the Draft EIR begins Tuesday, November 4, 2025, and ends at 5:00 p.m. Friday, December 19, 2025. Include your name, address, and phone number or email address so we may contact you for clarification if necessary. Send written comments via email to collinsville@panoramaenv.com or via U.S. mail to:

California Public Utilities Commission
Collinsville 500/230 Kilovolt Substation Project
c/o Panorama Environmental, Inc.
717 Market Street, #400, San Francisco, CA 94103

Virtual Public Meeting: In order for members of the public and regulatory agencies to have an opportunity to submit verbal comments on the Draft EIR, a virtual public meeting will be held via Zoom webinar. Meeting attendance information is provided as follows:

Date: Tuesday, November 18, 2025

Time: 3:00 p.m. – 5:00 p.m.

Webinar Link or QR Code: <https://us02web.zoom.us/j/84704287366>

Telephone Call-in Option: (669) 444-9171

Webinar ID: 847 0428 7366

Proposed Project Overview Map
