Thank you for the time extension to provide comments. My neighbor Dennis Corcoran may also be providing comments today. Hope this is OK.

Please consider only Alternatives 3 and 5 as these have far fewer environmental impacts than the Proposed Project or Alternatives 1,2,and 4. Also, possible additional mitigation or compensation for any biologic or aesthetic impacts of Alternatives 3 and 5 is to permanently remove the existing wood H-frames and tubular steel poles in the central portion of Segment A and return this area to natural habitat.

Thank you again.  
Lisa and Thomas Young
