

Nest Survey Report

<u>Date:</u> 02/26/2018			
Biologist(s): Amy Trexler			
Survey Area/Location/Structures: P05 & P06			
(Segment 2 – Section 4)			
Proposed Construction within Surve Proposed construction activities include gr removal of stored fill material at structure	rading and installation of	a retaining wall at struct	ture P05, as well as
Is Vegetation Clearing Required? Yes	es: No: 🖂		
Was Complete Survey Coverage Act	<u>hieved?</u> Yes: ⊠ N	o: 🗌	
Details of modifications to the surve	y area if complete cov	erage was not achiev	ved: N/A
Survey Conditions:	Start	End	
Time	3:06 pm	4:00 pm	
Temperature (°F):	5.00 pm	59°	
Wind Speed (mph):	0-5 mph	0-5 mph	
Cloud Cover (%):	100%	100%	

Habitat(s) and Vegetation Description within Survey Area:

- Ornamental
- o Disturbed
- o Chaparral
- Coastal sage scrub

Description of Survey Methodology:

Precipitation Type (if any) and duration:

The biologist conducted active and passive surveys within a survey buffer of 0.25 mile for white tailed kite, 500 feet for raptors, coastal California gnatcatcher, and least Bell's vireo, 250 feet for passerine birds in open space, and 150 feet for common passerines in residential, commercial and industrial areas. Active survey methods included walking meandering transects through the habitats while observing bird behavior with the aid of binoculars and directly searching in vegetation, the ground, the towers/poles, and other potential nest substrates. Passive survey methods included stationary observation periods from select vantage points that provided maximum visibility of the survey areas, using binoculars as necessary. If potential nesting behavior was observed within the survey buffers, specific shrubs were directly searched for nests in the areas where birds may have been observed exhibiting higher levels of activity or potential breeding behavior. All potential raptor nesting areas within the survey buffers were searched directly and/or with the aid of binoculars. Visibility, access, time of year and weather conditions were all conducive to collecting comprehensive breeding data, and ample time was spent surveying all potential nest sites.

n/a

cting comprehensive breeding data, and ample ting		
Suitable Raptor Nesting Habitat:	Yes: 🖂	No:

Suitable CAGN Nesting Habitat: Suitable LBV Nesting Habitat:			Yes: ⊠ Yes: □	No: No:	am brotograu, iie.
