Subject: Sunrise Power Link

To Whom it may concern,

My wife and I are long time residents of the Japatul valley and are writing today to express our opposition to the proposed Sunrise Power Link project. Please understand that our opposition extends beyond the proposed "modified D" alternative to oppose the power link in its entirety. The transmission lines are not only dangerous due to the increased fire risk, unsightly and visually disruptive to our natural viewsheds but also proven to be unnecessary in light of the many alternatives available.

In the last seven years we have been forced to evacuate our home from the threats of the Alpine fire, the Cedar fire and the Horse fire. The increased risk associated with the construction and maintenance of this project pose an even greater danger than normal, not to mention the destruction of natural eco-structures.

Your sensitivity to these and other community issues are tantamount to keeping this project from becoming a reality.

Sincerely,

KEVIN and LAUREN KREKELBERG
