Subject: High tension transmission line

To: John Boccio & Marian Kadota:
It has JUST come to my attention that Leona Valley is one of the potential sites to add new high tension transmission lines. I moved here 22 years ago because I wanted to live in a small community with clean air and a rural atmosphere. The value of my property has increase in 22 years and Leona Valley has lived up to it's wonderful atmosphere and quiet living.

I am totally against the plans that Edison is proposing to destroy this wonderful community of ours. Not only will our property values go down but it will be a much more dangerous place to live due the to electromagnetic fields that will radiate from the high tension lines.

C.5-1

C.5-2

Due to the fact that this has just recently come to the attention to us the home owners it is not fair that the deadline for comments is September 18th 2006. More time is needed for us to get more facts and be able to put our thoughts to this proposed project before a final decision is made.

C.5-3

I ask that a 45 day extension to the deadline be made to accommodate those of us who live here in Leona Valley. I am sure you have had many months or maybe even years in planning this project and I feel we deserve at least the same if not more time to deal with such and issue that can completely change our way of living and health issues.

Sincerely:
Ingrid Welch
92nd St, West
Leona Valley

Response to Comment Set C.5: Ingrid Welch

- C.5-1 Please see General Response GR-1 regarding potential effects on property values.
- C.5-2 Please see General Response GR-3 regarding EMF concerns.
- C.5-3 Please see General Response GR-5 regarding the noticing procedures for an EIR/EIS. On September 13, the CPUC and the Forest Service formally extended the public review period for the Draft EIR/EIS to October 3, 2006.
