As a property owner in Agua Dulce I would appreciate your assistance in extending the time we have to respond to the Draft EIR/EIS on the Edison transmission line from Antelope Valley. I was just notified of this line which will have a severe impact on the quality of life we enjoy in Agua Dulce. I have a real issue with Alternative 5 Route. This line should be put on as much Forest Service land as possible to avoid residential property. The forest service land is more suitable for a transmission line. This is insanity. Inconvenience a few small animals and plants or critically disrupt a way of life for thousand of people! It is not a forest it is a desert. Think!!! I will fight this. No to Alternative Route 5.

## **Response to Comment Set C.59: David Baral**

- C.59-1 Thank you for submitting your opinion on Alternative 5. The CPUC, as the CEQA Lead Agency, and the USDA Forest Service, as the NEPA Lead Agency, have extended the public review period for the Project from 45 days to 60 days.
