Subject: NO...High Tension Transmission Line for Leona Valley

Aspen Environmental Group....Leona Valley is NOT the place to the new transmission corridor for high transmission lines. Of all the alternative routes that have been considered Leona Valley will impact more long term residents than any other route. Maybe individuals are not considered as important as big business and environmental organizations, that just don't want to be bothered with the lines. Bringing those lines through the unique community of Leona Valley is unfair, inappropriate, and not at all cost effective. It is NOT the right route to serve this community of any of the tax payers of California.

C.6-1

Sincerely, Gail DeJongh
Leona Valley Resident
