|                       | C | III                              | IV       |            |               |          |            |            |
|                       |   | <b>f/m</b>                       | <b>b</b> | <b>s/s</b> | <b>f/m</b>    | <b>b</b> | <b>s/s</b> | <b>s/s</b> |
|                       |   | <b>Distance Zones</b>            |          |            |               |          |            |            |

\* Note: If adjacent area is Class III or lower, assign Class III, if higher assign Class IV

**Basis for Determining Visual Resource Inventory Classes**

**Class I.** Class I is assigned to all special areas where the current management situations require maintaining a natural environment essentially unaltered by man.

**Classes II, III, and IV.** These classes are assigned based on combinations of scenic quality, sensitivity levels, and distance zones as shown in the matrix above.
