

Existing Condition - Transmission line corridor in the foreground and San Bernardino Mountains and wind farm in the background.

Photograph taken 12/11/03 at 11:10 a.m. using a 50mm focal length.

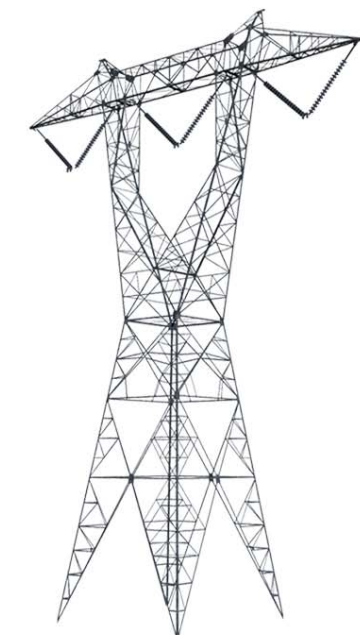

Viewpoint located north of Palm Springs at residence south of Dillon Road looking west-northwest towards proposed project, approximately 1/4 mile from the tower in the center of view.

Simulation - Transmission line corridor with proposed Devers-Palo Verde No. 2 500kV lattice steel structure transmission line.

This image is most accurately viewed at a distance of approximately 11 inches from the page to match the actual field of view.

Typical 500kV single-circuit lattice steel tower. Proposed towers are simulated to match existing tower heights and spans.
