

A **visual simulation** of Route Alternative Option 3 from Key Viewpoint 12 on Cedar Hollow Road approximately mid-block, which is located immediately south of Beaumont High School in the City of Beaumont. This simulation illustrates the introduction of the new 115 kV steel pole subtransmission line between the Devers-Vista Nos. 1 and 2 220 kV transmission lines on the tall lattice steel structures and the Devers-San Bernardino #2 220 kV transmission line on the wood pole H-frame structures to the north (right).
