

Michael Clayton & Associates

A **visual simulation** of the Partial Underground Alternative's eastern pair of transition structures, near the eastern border of the Sun Lakes Golf Resort and residential development, from Key Viewpoint 14 on northbound South Highland Home Road. This view is to the northwest. As shown in the simulation, the Partial Underground Alternative would replace the existing wood pole line with an underground segment that would start at the eastern edge of the Sun Lakes Development. The two transition structures would appear structurally complex and industrial in character.
