

IMAGE SOURCE: CH2M HILL

This image presents a **Visual Simulation** of a portion of Segment 2 of the proposed El Casco transmission line, as viewed from Key Viewpoint 1 on South Sunset Avenue between Hilltop Drive and Bobcat Road. This view is to the west and illustrates the replacement of the existing wood H-frame transmission line with a lightweight steel pole transmission line under the Proposed Project. As shown in the simulation, the number of transmission structures and conductors would approximately double under the Proposed Project.
